Bad Attacks of Flu E. M. Ward Finds Wonderful Pick-Me-Up

in Dr. Williams' Pink Pills.

Wonderful

attacks of the 'flu' frequently since 1919, and sometimes very bad attacks, but always when on the road to recovery I take Dr. Williams' Pink Pills and I find

"I have had

them a wonderful pick-me-up." So writes E. M. Ward, Saskatoon Sask., who further states: "I would recommend Dr. Williams' Piak Pills to all sufferers from that rundown, listless feeling. I have taken the Pills on many occasions, and they seem to tone up my blood wonderfully. I have been anaemic for years, and find that, when I get rundown, after taking several boxes of Dr. Williams' Pink Pills the color comes back to my cheeks and I have wonderful vitality.

Dr. Williams' Pink Pills rebuild health by creating new blood and increasing the red blood cells which restore the wasted tissues and revitalize the exhausted system. They remove the cause of rundown or nervous conditions. Try them. At your druggist's. 50c a package.

Great Bear Lake is the New Eldorado

Porcupine Prospectors Concerned in Pioneering Section that is Rousing the Attention of the World.

A couple of weeks ago The Advance

had a reference to some of the prospectors concerned in the remarkable mineral discoveries in the Great Bear Lake area. The Advance referred to the "remarkable specimens of radiumbearing ore" brought out by E. C. St. Paul from this new Eldorado, also to samples of gold, silver, and other ore from Great Bear Lake territory. There can be little question as to the wide taken in the new mineral field. There are some mining men and other some newspapers concerned with mining that are inclined to bethe matter of transportation alone ran makes it impossible for the Great Bear Lake to be a success at present. It is Kamiskotia, Red Lake and Matache-There is always someone to prove it can't be done, but the prospectors and mining men then go in and do it. There may be some who will say that so far as Red Lake and Kamiskotia are concerned the pessimists seem to be right. This, however, is not the fact. Howey Gold Mines have disproven the knocks against Red Lake. Kamiskotia will yet be heard from again and come into its own. Indeed, the history of mining in Canada would sems to suggest that the pessimits are tendency to accept the word of the boosters in such matters as much more ter" ikely to be true than any of the un-

Leslie Macfarlane, who has won much fame as a literary man, a fame that reflects much credit on the North Land which has been and is his home regard to the Great Bear Lake matter. Because so many in this camp are didensed review of this article is given

Eldorado in Canada

About the middle of May 1930, two prospectors pitched camp on the shore of Echo Bay, on Great Bear Lake They were E. C. St. Paul and Gilbert LaBine, and they had just completed an arduous six-week trek from the lead waters of the Camsell River, which had been preceded by a month's planning and a swift, tremendous plind by the time that they arrived, out LaBine was ready to start pros-

which he explored. LaBine had spent mines.' twenty-five years in the Temiskaming country, and he had seen similar rock at Cobalt. It was silver, all right, and a rich find. For a while he examined the rock, and then his excitement over the silver find was replaced by incredulity. A streak of dark greenish-black substance like a narrow ribbon of some deeply colored lava, coursed irregularly down the side of the rock to the ice.

available to testify that he danced jig, flung his hat in the air, turned a cartwheel, or performed any of the antics that commonly signify the delirium of joy. But this is what he had discovered:

Two veins of pitchblende, from which comes radium at \$70,000 the gram. There is nothing to compare with the find on this continent, nor anywhere in the world. Incidentally he had made a silver find which promises to eclipse the glories of Cobalt. He had made the first find of a discovery of high-Cobalt occurrences, indications of even greater depths. He had made a silver strike from which samples have since been taken running from 1,000 to 15,000 unces to the ton. Pure silver runs 30,000,000 ounces to the ton. He had discovered a promontory from which 32 mineral specimens have been taken, specimens which may be roughly classified under the general heading of

uranium, gold, silver, copper and iron. It is not too much to say that the Great Bear Lake discovery may prove the greatest mining find of the decade. perhaps of the generation. It looks as though this year will see the beginning of one of the greatest rushes of all time. At one stroke the northward thrust of civilization through the Northwest Territories to the borders of the Arctic Sea has been given an impetus and an objective. Considering the restrained report of the government technologist who studied the territory last summer, one ventures the statement that the Great Bear discoveries in general and the LaBine find in particular may play a part of the greatest historical importance in the

This newest mining field in Canada is unique in its importance to Canada. LaBaine Point, the first to be discovered is the richest field to date and the most representative of the area's great possibilities. Other finds in the vicin- pup was slightly injured, but when they ity are those of the Great Bear Lake were taking his master away the lit-Syndicate, Ventures, Ltd., Consolidated the chap fought furiously until he was Smelters, Dominion Explorers and the allowed to go along. And until his N.A.M.E. About 600 claims have been master recovered he refused to be ejectstaked around Echo Bay. Copper has ed from the hospital, and sat disconalso been discovered, and drilling is ex- solately in the adjoining hall with his

destiny of the Dominion.

pected to start during the summer Difficulties of access, combined with the object of his unwavering regard.

to raise money, slowed down the early little the find reported. Other raise development. There was, too, considof the new field. Last week one of the of the Dominion Department of Mines, well-known mining men who helped to studied the new finds in August of pioneer this North proved very con- last year, and made his typically reticlusively to his own satisfaction, that cent governmental report. The report

"While at present no estimate of the actual available tonnage can be made, always like that. It was the same with the No. 1 and No. 2 veins at LaBine Cobalt, Porcupine, Kirkland Lake, Point may be expected to yield several of milling ore. Underground explora- read the ideas of another newspaper under the lake, as well as prospecting question. The Speaker says:of other known veins, will probably materially increase these amounts. Beyond any question the pitchblende deposits at LaBine Foint constitute a very valuable source of radium. At the present value of radium, ore could easily meet the cost of shipment to rail (\$400 per ton) . . . as regards actual mining, the lie of the ground could always wrong. Accordingly, there is a hardly be improved upon, and development would be of the simplest charac-

> The government technologist personally broke "heavy uranium strain from a fourth, as yet unexplored vein lying about one mile beyond No. 3."

No. 2 vein carries rich silver ore asfor many years, has an article in a sociated with the pitchblende. It is number of applications." recent issue of MacLean's Magazine in likely that veins No. 1 and No. 2 may, improve both in size and grade of ore with depth. The fact that pitchblende is glad that the tide seems to be turnrectly or indirectly interested, a con- has recently been found two miles inland from LaBine Point, and on the strike of the veins there, suggests that the vein system may have a very considerable persistence.

Bear Lake Syndicate, visited the district last August. He returned to United States and Canada have to re- Premier and the Chairman of the Haileybury full of enthusiasm.

"The No. 2 vein on LaBine Point, he said, "is undoubtedly the most im portant discovery yet made in the Northwest, and probably one of the woop by airplane. St. Paul was snow- most important in Canada to-day. The Bonanza group of Eldorado consists of 27 claims on which very important silver showings may be seen, and this dis-There was something familiar about covery, to my mind, will develop into the tiny island across from the Bay one of Canada's most important silver

Substantial evidence of the importance of the find lies in the fact that the Eldorado people shipped out twenty tons of pitchblende last summer, separated by hand-cobbing, much of it tions which previously existed in rerunning to more than \$5,000 a ton.

Bear Lake find has flung open doors to a tremendous and well-nigh to the lowest point which has been neglected area of the Dominion so great that its extent exceeds that of LaBine was alone, so no witness is the four western provinces. Transportation facilities will have to be improved rapidly to meet the new needs. should be given power to investigate Extension of the railway into the area is a resonable possibility within the the reason why the present state of decade. The oil wells of Fort Norman the lead-zinc deposits at Great Slave Lake, all the found and yet-to-befound natural resources of the North- be published and then leave it to pubwest Territories promise to attain de-

There is a great opening for the real fit of other classes. It might be that pioneer in this new center of mining activity where daylight is of twentyfour hours' duration in the brief summer months, where winter temperature as low as 80 degress below zero has been recorded, where the airplane is the greatest single factor because the 1,400 miles of waterways lie between that inland sea and the fringe of civilization. But the obstacles will be overcome. Canadians discovered this Eldorado of the Northwest and they will develop it.

The new field is of importance both nationally and internationally. It seems certain that the Belgian monopoly, held by virtue of the Congo pitchblende deposists, will be broken and that the price of radium will come down, with greater quantities of the precious substance available for scien-

tific research. Radium, copper, silver, Gold-no wonder Gilbert LaBine christened his young mining company the Eldorado. And they have only scratched the surace. When summer comes to the Cirale the eyes of the world will be upon he mining rush of '32.

Perth Expositor:-He's only a dog. but how often the four-footed, tailwagging canine can teach humanity a lesson in faithfulness. The story came from Vancouver the other day that a little brown puppy was in an automobile accident with his master, and the master suffered severe injuries that necessitated going to the hospital. The eyes fixed on the door that concealed

Back to the Land

from the Timmins Advance:- "A ra- the advice given them but saying, ther remarkable fact has been disclosed in regard to the udbury area. very small measure is the same fact true of this district. In the Sudbury area there seems to be a very decided "back to the land" movement. The applications for farms by unemployed shows a hundred per cent. increase in the Sudbury area. In less than a score of townships lying within 25 miles of Sudbury, there were 254 applications for Crown lands for homesteads. This is double the number in the previous year, and sets a new record for the

The Speaker has always been an ardent friend of the farmer, and really ing; but what strikes us as being very strange is that when prices for farm products were fair, and the farmer was doing well, farming was unpopular, nor could men be got to do work at prices J. J. Byrne, manager of the Great a farmer could afford to pay. Now, England in the far north for many when thousands of farmers in the ly for Government support to tide" there is a decided "back to the farm movement.", This assuredly seems strange. However, do not let anything be said or done to discourage this tendency toward poularizing agricultural pursuits. On the contrary, let everything to get into deep water. possible be done to encourage the farmer We think much could be done by the Dominion Minister of Agriculture in the way of levelling up the terrible inequalities which exist between the prices the farmer gets for what he has to sell and the prices he must pay for what he has to buy. Of course, we all know that the Great War upset condigard to the cost of living, but the stra-These are solid proofs. The Great nge part of present day conditions is that while farm products have dropped known since Confederation, the prices of manufactured goods still remain very much the same as when the war was on. Now, the Minister of Agriculture under oath if necessary, and ascertain affairs between the farmer and those of other callings should exist. And the findings of the Minister should opinion to say whether or not

the farmer is being bled for the bene-

pears to be, for none of us know how much it costs the manufacturer to put his products on the market. We can ascertain the prices the farmer gets for his wool and hides, for instance, of converting the wool and the hides into the finished product.

We can well understand the farmer muttering his thanks to the

FAVOURS HONOUR TO WORK OF THE ANGLICAN CHURCE

The New Liskeard Speaker last week

"Under the heading "Moosonee an Ideal Name for a New Town", the Timmins Advance publishes an explanatory letter from Archdeacon Woodall which calls for a brief explanation from us: When The Nugget announced that the name of Ontarlo's seaport town was to be changed from "Moose Harbor" to "Moosonee," it did not occur to us that in making the change an honor was being conferred on the Anglican Church. This idea does not seem to have occurred to any except those who are familiar with the work being done by the Church of years. Had we known the oject the Commission had in view we would not over for hard times, we ar etold that have objected to the change made."

> Chatham News:-A school of 500 porpoises was discovered cavorting in the Connecticut River. With things as they are, they probably didn't want

MAKING ANOTHER BONER BY CORRECTING A BONER

Last week The Advance published another group of "boners," blunders, errors, "bulls," or whatever you like but we know nothing about the cost to call them. The most of these were supposed to be from examination papers where some boys show more crooked memory than straight good judgment. Of course, it is not well to be too hard in criticism of the boys. This lems than he does at farm work for is particularly true so far as newspapers are concerned because there is and varied ideas, which would, accord- no place where there is so much farmers of the East, and on behalf of The setting up of last week's list gave whom we are especially interested, an example of this.
