

Health Brought Back After Years of Suffering

Every day we get reports from the sick, telling of the wonderful cures brought about by taking the New Indian Herb Tonic Never Die. A Tonic for Men and Women Unsurpassed.

Over Five Hundred People in Timmins are Taking this new Medicine. Over Five Hundred are feeling better. You too Can be Made Well.

Bad Stomachs, Rheumatism, Lack of Energy, Gas on Stomach, and all Run Down Conditions, such as No Ambition, No Pep, Indigestion, Heart Burn and Weakness can be cured. Never

Die Herb Tonic lifts you right out of your present state and makes you fit. The young can be filled with pep and ambition. The old made younger and the sick made well.

Information Given by Tisdale Council

Reeve Gallagher Comment: on Value of Interest of Ratepayers. Many Questions Before Regular Session of Tisdale Council.

South Porcupine, Ont., April 27th, 1932. Special to The Advance.

Tisdale township council met on Monday evening with the reeve and all the councillors present.

There was a letter from the Medical Officer of Health, Dr. Byers, of Schumacher, re two children in Schumacher, one suffering from pulmonary tuberculosis, the other from spinal trouble. He recommended these be removed to an institution where they could be properly cared for without being a menace to the health of others. There was a report from G. H. Gauthier re some legal matters pending and a report from Chief McInnis re a family in need. Mr. J. Shewan, chairman of the school board of School Section No. 2, and on behalf of the ratepayers of that section presented a petition showing their need of extra school accommodation and asking that \$15,000 be raised for same by debentures, lasting over fifteen years. They wish-

ed to add to the present building and thus could use the heating unit now installed. The reeve stated he had been unable to see Premier Henry when he was in Toronto as it was just at the Easter season, and had not been able to get his assurance as had been promised but felt sure it could be arranged later. The McIntyre store building had been suggested for housing the two extra classes but there are no playgrounds there, an extra janitor and heating system would be required and expense would not likely meet the inspector's requirements. Mr. Shewan stated they would like to start their building operations by the end of June. All the classes in one building would tend to much better co-operation among principal and assistants.

Mr. Campbell was present on behalf of the Schumacher Ratepayers' Association re their request for certain reports. They wanted the amount of taxes collected from S.S. No. 1 and S.S. No. 2 respectively and how they were applied on the various levies. The clerk replied that these taxes were turned over to him in bulk—that, as each payment came in, it would require much more in the way of books to allocate each one among the various levies made. Reeve Gallagher stated that each year there is a requisition made

from both school sections for funds. Each year taxes usually fall short of the amount requisitioned but this amount for the schools must be met. Nevertheless Mr. Campbell stated that he understood that, but could not see why they could not have the amount of taxes collected on each levy whether it was short or not. The reeve stated that with so many amounts both large and small being paid "on account" for taxes to allocate the proportion of each small payment to the various levies would involve so much mathematical work and a much more complicated system of books that it would not be feasible. The taxes are bulked and the totals allocated but there are some of the levies which must be paid in full, such as debentures and school requisitions whether their share of the taxes levied meet the required amount or not, hence the general levy suffers.

Mr. Campbell then asked if they could get the total taxes from each School section, separately, and thought there must be something in the books re debentures which would give his association the information re financial matters which they wished. What he wanted was the total 1931 taxes collected in each section and also the arrears paid in each section during 1931. The reeve assured him the two sections were handled as two different units except for township purposes and highway repairs.

He had a printed copy in book form of the expenditure, etc. of 1928, and asked why this was not provided each year now. It was explained that two or three years ago it was decided to no longer have these reports printed as there were so few of them called for that it did not justify the expense involved in the printing. Instead a multigraphing machine had been purchased and a certain number of reports multigraphed and kept in the office where they could be seen if asked for. The report for this had to be taken in detail from the cash book and was being typed now and would be out, he believed, within the next ten days the clerk asserted. The other work in the office had to go on as usual while these reports were being made. This itemized report from the cash book does not come in detail in the report from the auditors and was being made up now at the request of the Schumacher Ratepayers' Association, the reeve stated.

Mr. Campbell then asked re the financial statement of each month and when they could have that. They had received the idea at a former meeting that this was available each month. The reeve stated that the information was available from month to month on the books but not in a compiled form for handing out. Mr. Campbell thought that giving this out in a compiled form each month would facilitate the year's report. The reeve instructed the clerk to try out this system and get out a compiled report of each month.

The council asked Mr. Campbell what reply he had had from Premier Henry and A. F. Kenning, M.L.A. re some influence asked in matters of income tax for the municipality. The reply was that they had received merely an acknowledgment of their letters. It was remarked by the council that this was the first time they had got any effort of assistance from the ratepayers in trying to solve the township's difficulties and felt that their influence back of the township's efforts would eventually help considerably.

A clean-up for the streets of Schumacher was also asked and possibly the placing of waste-paper receptacles that the public might be educated in keeping their town clean. It was thought a good idea to have one near the post office. The fact of the foreign-speaking population blocking the street at certain sections so that even women had to step off the sidewalk to get past was mentioned by council and Chief McInnis said he would attend to that now that the council had given him authority to do so.

The police car needs an over-hauling and this was authorized. Relief for an indigent in the flooded area at Porcupine Lake was asked before he and his dogs and his wood-pile floated down to Night Hawk Lake.

The routine bills and accounts were passed for payment. A special meeting is called to go into the relief situation in detail and find out the cases where real suffering will exist when the federal government's assistance will be cut off after May 1st. There are families where there are small children here who must receive help of some kind.

Winchester Press:—First its slippery, then its sloppy, now you melt and then you freeze, now you cough and then you sneeze, watch the mercury hop and skip, it's not strange we have the gripe.

Prizes Offered Public in Goodyear Tire Contest

Everybody likes trying for a prize. The challenge to skill and judgment is often as strong a lure as the prize itself. Whether it be estimating the number of beans in a jar, solving an intricate puzzle, or choosing a name for somebody's soap, there is a satisfaction in putting one's brains to work in competition with others.

The prize contest just announced by the Goodyear Tire Company offers an unusual opportunity to those who pride themselves on their powers of deduction.

Never before have people been asked to estimate the number of cords in an automobile tire. Some people are not even aware that there are such things as cords in a tire. Of course, tire manufacturers know that it is the cords that give the tire its strength. But it is doubtful if even the men who make tires have ever before counted the number of cords.

Some tires contain more cords than others. For this reason, six different types and sizes of tires have been selected. Contestants are being asked to estimate the average number of cords in these six tires.

The contest does not show on the surface of a tire. They are imbedded in rubber under the tread. They are visible when a tire is cut in two; the ends of the cords can then be seen in the rubber. A section of the tire fabric showing the cords is on display at the stores throughout Canada to help contestants in making their estimate, and entry forms can be obtained from the dealer.

Another Busy Session at Police Court Here

There was another busy session at the police court here on Tuesday though none of the cases were particularly serious.

There were three charges of drunkenness, each of the three being fined \$10 and costs. One of them could not produce the required fine and as a consequence will spend the next thirty days at Halleybury.

The police are starting in early to check up on the speeding autos. There were no less than five men charged in this week's court with speeding. Two of them pleaded guilty and the other three were convicted of this breach of the Highway Traffic Act. Each of the five was fined \$10.00 and costs or a total of \$21.25, which is enough to discourage speeding, especially as a second offence costs still more and is a black mark on the license.

A woman charged with breach of the Liquor Control Act had her case adjourned for a week. Another woman, who faced two charges, one under the L.C.A. and the other under the Excise Act, was remanded to next week on both counts.

A couple of men who damaged the fence around the ball ground were in court as a consequence. They had deliberately pulled at least one board off the fence and thought this senseless and destructive trick very funny no doubt. It did not seem so funny in court this week when the magistrate said \$5.00 and costs, which means a total of \$16.25 for each of them. It is to be hoped that these fines will have the effect of stopping the damage to public property that is all too common on occasion. It seems particularly mean to cause loss to the property of the general public. There should be even more care and consideration for public property than for private. To wilfully damage public property is to injure oneself and everybody else in the community and there does not seem to be much sense or good sport in that sort of thing.

At this week's court there was another charge of wilful damage to property, this latter case being one in which private property was concerned. The case was remanded for a week as was also one under the Master and Servant Act.

The other two cases, one a charge of assault and one under the Highway Traffic Act, were withdrawn by the parties laying the informations.

Investigations in Ore Dressing and Metallurgy

A broader knowledge among the mining public of the facilities provided and the type of work performed is resulting in a steady increase in investigative work at the Ore Dressing and Metallurgical Laboratories of the Department of Mines, Ottawa, according to the report of investigations conducted during 1930, which is now available in published form. The trend of activities in the mining industry toward a search for new discoveries of the precious metals and the increased exploration and development in this phase of the industry, rather than the base metals is shown in the nature of the work carried out in the laboratories. A general review of the investigations is presented by W. B. Timm, Chief of the Division of Ore Dressing and Metallurgy, in the first section of the report.

Section II contains the reports of investigations on the treatment of metallic ores. Fifteen of these were on gold ores such as the O'Brien Cadillac, Sisco, Parkhill, Beardmore, Casey Mountain, Central Patricia, San Antonio; one was on a straight silver ore; nine on base metal ores, including the copper-pyrite ore of the Aldermac Mine and the copper-nickel ore of the Falconbridge Mine; and two were on cobalt ores.

Section III contains the reports of investigations on the dressing of non-metallic minerals, such as the grinding of scrap mica; the examination of anhydrite from Canadian deposits. The preliminary analyses of the Great Bear Lake pitchblende is included in the reports of this section.

Section IV contains the reports of investigations of the iron and steel section, including the musso process and a study of the concentration of certain types of iron ores.

Copies of the report may be obtained by application to the director, Mines Branch, Department of Mines, Ottawa.

Kenning Trophy Won by Schumacher

The 1932 Championship of the Inter-town League Won by Schumacher Bowlers in the Final Games.

The A. F. Kenning trophy goes to Schumacher this year with the 1932 bowling championship of the inter-town league. In the final games on the McIntyre alleys Schumacher won from Timmins, taking three points to the one for Timmins. To tie up the league Timmins needed all four points. As a consequence of the games last week the handsome trophy donated by A. F. Kenning, M.P.P., now finds a new home. In the season's play Timmins won 17 points and Schumacher won 23. In the final games, Tomkinson rolled high single, 240, and total 659. For Schumacher Morandin rolled high single, 284, and McMillan, high total, 594. The scores were as follows:—

TIMMINS				
Studor	169	226	186	581
Whitney	218	156	179	553
Kimball	210	234	180	624
