## Dr. Brennan's Father Passes at North Bay

Lived Recently in Timmins. Was  
Nearly Eighty Years of Age at  
Time of Death. The Funeral  
Held on Sunday.

Wide circles of friends will deeply re-  
gret to learn of the death of John  
Brennan, father of Dr. A. P. Brennan,  
the sad event occurring at North Bay  
on Friday morning last, May 13th.  
The late Mr. Brennan had recently  
been living with his son, Dr. Brennan  
in Timmins. Some weeks ago Mr.  
Brennan suffered a paralytic stroke and  
was taken to St. Mary's hospital, Tim-  
mins, for treatment. Later he was  
moved to North Bay, being taken to  
St. Joseph's hospital in that city.

In referring to the death, The North  
Bay Nugget last week said:—

"Pneumonia which developed follow-  
ing a paralytic stroke claimed the life  
of John Brennan, aged 78 years, pioneer  
citizen of North Bay and late resident  
of Timmins, whose death occurred on  
an early hour Friday morning, May  
13th, in St. Joseph's General hospital  
here. Mr. Brennan, who was residing  
with his son, Dr. A. P. Brennan, Tim-  
mins, suffered a paralytic seizure two  
weeks ago and was brought to St.  
Joseph's hospital on Saturday night,  
May 7. A native of Tipperary, Ireland,  
the deceased man came to Canada with  
his parents when eight years of age,  
the family settling in Ottawa. In 1882  
he married Miss Ann Gauthier, Egan-  
ville, the ceremony taking place in Mat-  
tawa. The couple came to North Bay  
in 1897 where Mr. Brennan carried on  
business as a team contractor. Five  
years ago the couple went to Timmins  
to take up residence with their son, Dr.  
A. P. Brennan, but had returned to  
North Bay to visit numerous times.  
Mr. Brennan was well-known through-  
out this district and was highly regard-  
ed by all. He was a member of the  
Holy Name Society, Timmins, and his  
death will be keenly regretted by his  
fellow-members. Surviving besides his  
widow are five children: Lawrence,  
North Bay; M. J. Brennan, North Bay;  
Urquhart, North Bay; and Mrs. R. J.  
Urquhart, North Bay; and Mrs. R. J.  
Thompson, Prince George, B.C. Six  
children are dead, two sons being killed  
overseas. The funeral will be held from  
the residence of Lawrence Brennan, 28  
Brook street, on Sunday afternoon at  
two o'clock, to St. Mary's Cathedral.  
Interment will be in the Roman  
Catholic cemetery."

## SAYS MINES ARE USING MORE ROUND TIMBER THAN BEFORE

The Canada Lumberman in the cur-  
rent issue carried the following refer-  
ence to lumber conditions in the  
North Land:—

"James Charron, of the Kirkland  
Lake Lumber Co., Kirkland Lake, Ont.,  
says the mines in that district have  
changed their system of operations un-  
derground to some extent and are using  
more round timber. This will cut down  
considerably the amount of sawn lum-  
ber used and will make it harder for  
manufacturers to dispose of their cuts  
up in the north. It is understood, how-  
ever, that there may be a chance of  
some new properties opening up east of  
Rouyn, in Quebec, which would help to  
reduce the stocks on the Transcon-  
tinental line. Continuing Mr. Char-  
ron says:—"Quite a few firms along  
that route have gone into liquidation  
last year and this stock has been  
thrown on the market which makes it  
rather difficult for other firms trying to  
carry on. However, we do not think  
this stock will last for more than six  
months at the outside and we hope this  
will be better after that time."

Huntingdon Gleaser.—When an  
Athens, Mass. woman paid a large fine  
for treating an officer unwomanly—  
Mrs. Anna Rubenstein of 408 Harrison  
avenue, South End, paid an aggregate  
fine of \$245 of which part was for tear-  
ing the trousers off Officer Arthur D.  
Timmins. She was also ordered by  
Judge Buttrick to reimburse the officer  
to the extent of \$14 for the pants and  
an additional \$2 for his shirt. Beside  
being fined Mrs. Rubenstein was placed  
on probation of two years.

## Hollinger's Option on the San Antonio

Big Mine Active in Other Fields. Get-  
ting Best Ore from Below the 3200-  
ft. Level, Annual Meeting Told.

The Advance last week carried a brief  
reference to the annual meeting of the  
Hollinger Consolidated Gold Mines.  
That reference had to do chiefly with  
late developments underground at the  
Hollinger. It indicated that Hollinger  
is getting its best ore below the 3,200-  
ft. level. The average grade below 3,200-  
ft. runs \$9.30 per ton as against  
\$6.17 on the upper levels. In his ad-  
dress to the shareholders at the annual  
meeting N. A. Timmins, president, made  
special reference to the company's deep  
development programme on the main  
property, results from which he said  
were "most gratifying." The principal  
work Mr. Timmins said, during the year  
was on the Nos. 55 and 95 veins. High-  
grade ore was encountered recently on  
what is presumed to be vein No. 95 on  
the 3,950-ft. level. So far this vein has  
been drilled for over 50 feet at this  
level, and has shown an average value  
between \$9 and \$10 per ton. It was 12  
feet wide where cut, and has continued  
wider than the drift in the work so far  
completed. This ore body was also  
found in a crosscut on the 3,350-foot-  
level and in a diamond drill hole at  
3,500-foot level. It should be noted  
that the eight levels between 2,750 and  
3,950 are only in the early stages of  
development, but are already showing  
marked improvement in grade over  
those above. From 3,250 to 3,950-foot  
levels there has so far been developed  
234,382 tons, with an average grade of  
\$9.30 per ton, whereas the average value  
from 2,150 to 3,200 feet is \$6.17. The  
success met with below the 3,200-foot  
level bears out the statement made  
some time ago, that Hollinger has "a  
mine within a mine."

There were two other important fea-  
tures of the address of the president,  
as noted by the despatches last week.  
One was in reference to the assets of  
the subsidiary company, the Internation-  
al Bond and Share Corporation. In  
reference to this The Northern Miner  
report last week was as follows:—"Speak-  
ing of the assets of the sub-  
sidiary company, the International  
Bond and Share Corporation, to which  
was transferred part of the company's  
surplus valued at \$1,195,980 in 1929,  
and which declined on the books to \$3-  
104,440 at the end of 1931, Mr. Timmins  
stated that had the securities been val-  
ued according to the rulings issued by  
the Canadian Department of Insurance  
to govern the valuation of the portfolios  
of insurance, loan and trust companies,  
the net assets would have been shown  
as \$5,302,129. Mr. Timmins also re-  
marked that the valuation of \$1,195,980  
adopted, does not represent the cost  
of these holdings to Hollinger but  
only their market value as of August  
1st, 1929, or practically the peak of the  
greatest bull market in the history of  
the continent. This transaction as far  
as Hollinger was concerned amounted  
to a capitalization of the appreciation  
in value of a portion of its surplus."  
You will also remember continued the  
president that in the spring of 1929  
the shareholders voted to amend the  
by-laws to broaden the investment re-  
gulations to permit the formation of an  
investment trust. In the same year the  
best financial houses in the United  
States saw fit to organize a number of  
investment trusts with a capitalization  
of over one billion dollars. In addition,  
if Hollinger had retained the securities  
which it turned over to the  
International Bond and Share Corporation  
and had held them until Decem-  
ber 31st, 1931, these securities would  
have shown a depreciation of 45 per  
cent. on the price at which they were  
taken over by your subsidiary and would  
not all be readily marketable at the  
present time as they now are. At the  
end of 1931 the resources of the sub-  
sidiary were distributed as follows:—  
Cash 6.8 per cent., bonds 32.1 per cent.,  
preferred stocks, 11.9 per cent., common  
stocks, 49.2 per cent.

The other outstanding matter at the  
annual meeting was the reference to the  
fact that an active campaign of explora-  
tion and examination of outside prop-  
erties is being carried on, and also  
that the Hollinger has taken an option  
on the treasury shares of the San An-  
tonio Mine in Manitoba. The Hollin-  
ger at present, it was noted, is work-  
ing on a group of claims in Louvicourt  
township, and is also keeping in touch  
with the developments in the mining  
fields. One of the despatches from  
Montreal in reference to the San An-  
tonio matter says:—"In his address to  
shareholders, Noah H. Timmins, pres-  
ident, stated that during the year the  
directors had taken an option on treas-  
ury shares of the San Antonio Gold  
Mines, Ltd., whose property is located  
in the Rice Lake section of Northern  
Manitoba. The erection of a mill, he  
stated, has just been completed, and  
hopes are held out that the property  
will be on production this month. San  
Antonio is one of the more promising  
gold producers of Manitoba. Consider-  
able work has been done on the prop-  
erty, with levels established to a depth

## Bidgood President Takes His Own Life

Leo Ehrenhaus, Well Known in the  
North, Dies at Buffalo. Had Been  
in Ill-Health and Worried by  
Financial Matters.

Word from Buffalo last week told of  
the death, apparently by suicide, of Leo  
Ehrenhaus, a mining man well known in  
the North Land. In recent years he  
has been known chiefly for his con-  
nection with the Bidgood mine, in the  
Kirkland Lake area. He was president  
of the Bidgood for some years past.  
The late Mr. Ehrenhaus had a residence  
in Halleybury but spent most of his  
time in the last year or two away from  
that town, his business calling him to  
Buffalo and other centres in the South.  
He is survived by a widow and two  
children residing at Halleybury. For  
some time past he has been in poor  
health, being especially worried by fi-  
nancial matters. He was a native of  
Germany, coming to Canada some years  
before the war. He was employed at  
first in the Kirkland Lake mines, work-  
ing in the mill at Tough-Oakes. He  
became interested in mining properties  
and eventually attained some promi-  
nence as a mining man.

Word from Buffalo last week told of  
a man later identified as Leo Ehrenhaus,  
47 years of age, president of the Bid-  
good Mine, being found dead in a  
downtown hotel in that city on Satur-  
day. A .32 calibre revolver lay near  
the body, and a medical examiner re-  
turned a report of suicide. Ehrenhaus  
registered at the hotel on May 10th and  
had been there for the balance of the  
week. Just before noon on Saturday  
a long distance call was received for  
him and when he failed to answer, the  
door of his room was opened by means  
of a pass key. He was found with a  
bullet wound in his head. The medical  
examiner said he had been dead for  
several hours when found. As soon as  
his death was known word was sent  
to his home in Halleybury. There will  
be general regret at his death and sin-  
cere sympathy with the bereaved family.

## SISCOE MILLED 5,027 TONS VALUED AT \$77,018 IN APRIL

Siscoe Gold Mines, Limited an-  
nounces that production for the month  
of April was valued at \$77,018, from a  
tonnage milled of 5,027 tons. The pro-  
duction included a clean up of \$3,164  
from ball mill. The millheads averaged  
\$15.49 but the recovery per ton, after  
deducting ball mill clean-up figure,  
averaged \$14.89, indicating a loss of 60  
cents a ton in tailings.

This production is lower than the  
preceding months. March figure was  
\$92,000 in United States funds, while  
the first quarter total output was \$315-  
000 in Canadian dollars. The cause for  
lower output in April was a ball mill  
shutdown.

To the \$77,018 figure must be added  
exchange compensation, amounting to  
about 11 per cent. in April, which would  
bring valuation up to \$85,490.

of 975 feet. All levels have been open-  
ed up to the 600-foot horizon and a  
raise has been run in ore below the  
600-foot level. Upwards of 61,000 tons  
of ore are said to have been blocked  
out, showing an average grade of 13.35  
in gold per ton. The mill, recently  
completed, has a rated capacity of 150  
tons per day."

# PUT HIM TO WORK

There never was a better time than right now for  
construction work of any kind. No matter how  
small or how large your project is you'll find it to  
your advantage to start work immediately.

## Mine Recorder Office to Move to Sioux Lookout

This year the mail-less period at  
Goldpines, in the Red Lake Mining  
Division was comparatively short, being  
only 28 days. A letter from Timmins  
to the mining recorder, H. E. Holland,  
at Goldpines, left Timmins on April  
12th, but did not reach Goldpines, un-  
til May 10th, being held in the mail  
during the break-up. It is understood  
that boats will be able to get through  
to and from Goldpines this week.  
It is understood that the mining  
recorder's office at Goldpines will be  
moved to Sioux Lookout on June 1st.
