FORMER POPULAR RESIDENTS PAY VISIT HERE THIS WEEK

Mr. and Mrs. Harry Rinn and Mr. and Mrs. J. Wilson motored here this week and spent a few days in town with friends and relatives, returning south this (Thursday) morning. Mr. and Mrs. Rinn were formerly popular residents of Timmins, Mr. Rinn being in partnership here with his brother, W. Rinn, for a number of years. Mr. and Mrs. Rinn for some time past have been residents at Tottenham, Ont. Wide circles of friends here were delighted to meet them again and give them greeting. The trip from Tottenham to Timmins was made in excellent time. The party left Tottenham about midnight Saturday evening and reached here on Sunday night at 9 p.m. They found the roads in excellent condition, with the exception of a couple of short strips.

Over Thirty Cases at the Police Court

Variety of Charges from Immorality to Breach of the Highway Traffic Act. Police had Active and Profitable Week.

Police court this week showed that Chief Jones and his men are very busy seeing that the law is observed and the town kept as clean as possible in every way. There were thirty-one cases on the docket yesterday, the court being held on Wednesday this week on account of Tuesday being a Dominion holiday. In addition to the number of cases the variety of the charges was also noteworthy as well as the amount (around \$700.00) collected in fines and costs.

A willful damage case remanded from last week was given another remand to next week. The woman charged under the Excise Act and the L.C.A. was also remanded another week.

A charge of false pretences against a Charles street man who was accused of renting a lot he did not own was dismissed.

Two charged under the highway traffic act had not been served with notice to appear and so the cases were remanded to next week. Another highway traffic case was dismissed. A charge of speeding brought a fine of \$10.00 and costs. For failing to stop at the stop street sign a motorist escaped with a \$2.00 fine and costs.

There were two men charged with breach of the town tax by-law. Both these cases were adjourned to next week. The men are charged with carrying passengers in town without the necessary license.

A charge of assault cost one man \$10.00 and \$11.25 costs.

Andrew Marrisotte, Pine street, paid \$20.00 and costs for illegally having a revolver.

An assault case was adjourned for a week as was also a charge against a woman for alleged attempt to create a disturbance.

No less than seven were fined \$10.00 and costs for common drunkenness.

On the charge of being the keeper of a common bawdy house, Jeanette Lemieux was fined \$150.00 and costs. Mrs. Jos. Therrien of Picton, and Marguerite Gauthier of Cedar street, each paid \$50.00 and costs on the charge of being inmates, while three men "found in" each paid \$25.00 and costs. These cases were the result of a raid made some evenings ago by the police. All these fines were duly paid.

A woman charged with theft from a man who visited her was remanded for a week at her own request.

Mr. Bradette Asks About Hearst Farm

Member for This Riding Refers to Good Work of Kapuskasing Experimental Farm and the Provincial Farm at Hearst.

In the Dominion House on Thursday last, Jos. A. Bradette, M.P., Temiskaming North, brought up the question of the curtailment of operations at Hearst Government Farm and also the appropriation for Kapuskasing farm. The matter is of such importance to this riding as to warrant the reproduction here from Hansard of the discussion between Mr. Bradette and Hon. Mr. Weir, Minister of Agriculture.

Mr. Bradette:—What is the amount of the reduction, if any, in connection with the Kapuskasing experimental farm?

Mr. Weir (Melfort): With reference to Kapuskasing, last year the vote was \$48,045; this year the estimate is \$41,000 a reduction of \$7,045.

Mr. Bradette: What activities will be particularly curtailed?

Mr. Weir (Melfort): The chief reduction is in salaries. Land improvement work will be curtailed and there will be some reduction in the live stock division.

Mr. Bradette: I really believe the land improvement work could be dropped for the time being, but I want to protest as strongly as possible against any curtailment of work in connection with live stock. We in Northern Ontario hear on many occasions of the wonderful things that are being done for the western farmers. We do not begrudge them anything, but northern Ontario is a new and rich agricultural section of the country. It is in what we call a clay belt, and instead of being curtailed the live stock activities should be increased for the very good reason that many of our farmers cannot afford to go to southern Ontario, Quebec, or the western provinces for the stock they require. I think the full activity of this branch should be maintained. I speak feelingly on this matter, because while I was on the government side of the house I asked every year for an increase in the amount voted for the Kapuskasing experimental farm, and I was to some extent successful. I think this is not the right time to curtail the amount spent in that way. I fully realize the situation in which the minister now finds himself, but I hope he will be able at least to maintain the live stock activities carried on at the Kapuskasing experimental farm. I do not want to say more on this subject, because I have spoken on the matter previously.

There is another question I should like to ask the minister, and in this connection I should like to give all credit to the province of Ontario. Last Fall they threatened to close the Hearst demonstration farm, but we are glad to learn that they are not going to do so. I understand, however, that the federal government has built a dwelling house at Kapuskasing for the superintendent of the Hearst demonstration farm. We know that this gentleman, who is exceptionally well qualified for his work, should live in the town of Hearst, and the settlers of that district do not want to see the head of that demonstration farm moved to Kapuskasing. Experimental farms come under the jurisdiction of the federal government, while demonstration farms come under provincial jurisdiction. It has been brought to my notice that a certain amount of money has been spent by this government for the construction of a house for the superintendent of the Hearst demonstration farm, and I should like to know from the minister if that information is correct.

Mr. Weir (Melfort): I may tell my hon. friend that the reduction is in the number of cattle. We decided, for the very reason the hon. gentleman has in mind that we must give all the assistance possible in these new areas, but we felt that we would do more in that way by disposing of the grade cattle and increasing the number of pure bred cattle so there would be more seed stock available in that new country. With regard to the closing of the Hearst demonstration farm, which is a provincial farm, as I stated at the outset this action was taken in accordance with the policy of co-operation between the federal department of agriculture and the provincial department. It was felt that the money expended on the Hearst farm could be better used in further assistance to farmers in northern Ontario and that the work could be well carried on, as far as attacking agricultural problems was concerned, at the Kapuskasing farm. I did not catch the last question of the hon. member.

Mr. Bradette: I have received a number of letters to the effect that the federal government spent a certain amount of money in the construction of a dwelling house for Mr. Hanlan, a friend of mine of the north country, the superintendent of the Hearst demonstration farm. The people in Hearst who expected the demonstration farm to be maintained, believed Mr. Hanlan should remain in Hearst so that there might not be any conflict between the activities of the two governments. It will be hard to explain why a provincial official should come under federal jurisdiction, and why his activities should be curtailed to a certain extent.

Mr. Weir (Melfort): His activities will not be curtailed. It was felt that it would be better for him to live on the farm where the experiments were being conducted, so a cottage was built at a cost of about \$3,100. So long, as he makes that cottage his headquarters my understanding is that he will continue to occupy it.

Mr. Bradette: We were under the impression that the Hearst demonstration farm was to be maintained by the provincial government. The statement appeared in the press that activities at that farm were not to be curtailed, and if that is to be the case it seems strange that superintendent should reside at the Kapuskasing farm.

Mr. Weir (Melfort): The Hearst farm is a provincial farm, but in conference we agreed that it would cut out waste, without removing any great benefit from agriculture, if the provincial government should close that farm and have that money available for other purposes. It was agreed that Mr. Hanlan, who is now residing on the Kapuskasing farm should make that his headquarters.

Mr. Bradette: Then I understand that by arrangement between the two governments the demonstration farm has been closed. I think that is a bad move, because I maintain that the provincial government should have continued to operate the demonstration farm at Hearst. In northern Ontario we need to have all the agricultural experiments that we can get the benefit of, and the activities carried on at the Hearst demonstration farm were doing a great deal of good. This farm is at least seventy-five miles from the Kapuskasing farm, and it dealt with matters that were not taken up at Kapuskasing. If it is at all possible I think the federal authorities should tell the provincial authorities that the Hearst farm should be maintained and that M. Hanlan, a very able agriculturist, should be sent back to Hearst. He might extend his activities to Kapuskasing or other portions of northern Ontario if possible, but he should be located at Hearst, and I hope the minister will use his influence to bring about that result. The province of Ontario should be able to maintain that farm without asking the help of the federal government, or at least without discontinuing its needed services at Hearst.

Mr. Weir (Melfort): I gather that the Hearst farm is in the constituency represented by the hon. member. There is no gain, so far as experimental work goes, in having a farm at Hearst, because soil and other conditions are almost identical at Kapuskasing. With regard to the Ontario Department of

Agriculture, we have spent a great deal of time in bringing about co-operation in attacking agricultural problems of an experimental or research nature, and it was agreed after full consideration that there was no advantage in operating the two farms.

Mr. Bradette: I want to thank the minister for his explanation. He said something about the experimental farm at La Ferme, pointing out that the soil was not of such a quality as warranted the continuation of great activities there. I happen to know something about the constituency so well represented by the hon. member for Pontiac. The statement that the soil is low is not quite right; it is fairly high and fairly hilly. Has the minister in mind some other site for an experimental farm in northern Quebec? This is important. Although I do not belong to the province of Quebec, I am interested in the northern section of Canada and its agricultural development, and I am fully convinced, from the series of experiments we have carried out at Kapuskasing and La Ferme that the possibility has been demonstrated of extensive colonization in that district. Does the department intend to choose another site? I said that the land was not altogether low; it is not typical of the clay belt, but it also has some good farming features. As the minister had in view another site on which enormous sums would be spent before it could become an experimental farm, I thought it would be wise to maintain activities for a few years instead of curtailing them on that farm.

REPORT OF SISCOE FOR APRIL SHOWS MINE DOING WELL

The following is the official report for the month of April for the Siscoe Gold Mines:—

"At the regular monthly meeting of the board of directors of Siscoe Gold Mines, Limited, production for the month of April was reported at \$77,107, with mill heads of \$15.49 and tonnage treated 5,027. A new headframe was ordered from the Dominion Bridge Company. This headframe is capable of handling a much larger tonnage than is being hoisted at present.

"Good progress was reported in shaft sinking the shaft now being at a depth of 810 ft.

"Development on the four levels now being opened up was reported as quite satisfactory. Some spectacular gold showings were in evidence in a raise now being driven from the 600-ft to the 450-ft level.

"A vein, 18 ins. in width, was encountered in the shaft at a depth of 805 ft. This vein carried good values.

"The new compressor will be in Amos the latter part of this month and will be used to upon the three new bottom levels.

"General progress at the mine is excellent. No gold can be shipped at present, owing to the break-up, but navigation is expected to open within a few days."

Toronto Mail and Empire:—More than a hundred Doukhobors have been sentenced to prison terms for parading naked at Thrums, B.C., on Sunday. We can imagine that on that day the Window in Thrums would be crowded.

Pictures of Crash to be Shown Here Next Week

The motion pictures taken by Karl Eyre of the recent crash of the airship coming from Toronto with the hockey fans will be shown at the concert under the auspices of the Kiwanis Club, in St. Anthony's church hall, Timmins, on Friday and Saturday of next week, June 3rd and 4th. These motion pictures will be of very wide interest, and will add to the attraction of the concert on June 3rd and 4th under the Kiwanis auspices. Indeed, it may be said that the pictures alone would likely be considered as worth the small admission fee, while the concert to most people will also appeal as being worth double the price for itself. The two together mean a big amount of value for the small admission fee charged.

EMILE EVERARD SUFFERS BAD FRACTURE OF THE LEG

Some days ago Emile Everard, of Tamarack street, had the misfortune to step on a stone at his garage and was thrown to the ground. In the fall he sustained a bad fracture of the leg, it being necessary to instal two silver plates in the leg to remedy the injury. The accident occurred on May 14th and Mr. Everard has been in the St. Mary's hospital since. An operation was necessary this morning at 10 a.m. in connection with the remedy of the trouble. Mr. Everard is one of the popular pioneer residents of the town and there will be wide circles of friends who will very sincerely wish him an early and complete recovery from the effects of the unfortunate accident.
