

Big Prizes for Best Essay on a "Floating Power" Ride

A striking series of newspaper advertisements will shortly announce an offer of \$1000 cash and 182 other cash prizes for the best fifty-word description of a Floating Power ride.

The reason for the contest, according to Mr. Jno. D. Mansfield, president of the Chrysler Corporation of Canada, Limited, is that a great many people do not yet know what "floating power" means to the performance of an automobile.

"Floating power is being confused with free wheeling, automatic clutch and many other features that are not even remotely connected with it," declared Mr. Mansfield. "It is being especially confused with the conventional type of rubber engine mounting which was introduced by Chrysler years ago and which is still widely used."

"We have entirely abandoned this conventional type of rubber mounting," continued Mr. Mansfield. "Floating power involves not only a new type of mounting but an entirely new principle giving quite different results."

"We are therefore inviting the public to take a floating power ride and at the same time offering an opportunity of winning a rich cash prize for the best description of what we claim to be a new experience in motoring," concluded Mr. Mansfield.

The next meeting of the Timmins town council, will be held on Monday, June 27th, commencing at 4 p.m.

SHOW PROFIT SINCE MILL RESUMED ITS OPERATIONS

An extensive programme of mine development is under way at the Ankerite Gold Mines in Deloro township, according to an article on the mining and financial page of The Mail and Empire last week. The Mail and Empire says: "The company is said to have shown a profit from production ever since the mill resumed operations a couple of months ago. At present the mill is treating approximately 200 tons of ore daily and will eventually mill all the ore produced in the adjoining March gold mine. Plans are under way to drive a crosscut from March into the Ankerite, but no information is available as to what depth the crosscut will be started."

Continuing under the heading of "New Ore Section Opened," The Mail and Empire says: "While some of the mill feed now going to the Ankerite mill is being drawn from old stopes, the management is pushing underground development and rapidly opening up new ore sections. At the present time work is proceeding beyond the diabase dyke, at which point previous operators believed the mineral zone terminated, and the present operations are bringing to light good values in gold. The average grade beyond the diabase is said to run better than \$10 per ton. It is the intention to continue work in this area and it is expected that the ore will boost the average mill-heads and increase earnings."

With Chautauqua

C. ROY HANSEN

Startling revelations of "Government by Gangland," by one who has been beaten and taken for "a ride" is the amazing story of Attorney C. Roy Hansen.

Lorne Daigle, formerly operator at Lorrain Junction, is the new agent of the T. & N. O. at Island Falls, north of Cochrane. Cyril Kennedy, formerly of Island Falls, has been transferred to Fraserdale, while Harry Beemer, recently at Fraserdale, will be the first T. & N. O. agent at Moosonee the northern terminus of the road.

North Bay Wishes it Had Good Citizens Like Here

Sometimes it is an unfortunate thing to be envied, whether the victim of the envy be a town or an individual. At other times, however, it is different, and certainly no town is other than fortunate that is envied for its good citizens and the generous things they may do for the common good. Accordingly, there is nothing but pleasure in reading the following paragraph in "Sport-Clogy" in The North Bay Nugget last week:—

"Some persons are born lucky and others have luck thrust upon them. The same applies to habitations and it would seem that North Bay doesn't fit into either class. While every hamlet, town and city (other than the Gateway City) is being equipped with everything the athlete can desire in the way of playing facilities, our foremost city is more or less at a standstill. True, we are making progress but at a snail's pace. We have been waiting years for a skating and hockey rink and although many assuring statements have been made, it still remains to be seen. However, the current proposition has not yet turned up its toes, so be hopeful and pray. This bit of comment wasn't prompted by a scare that we will not see a rink before the next snow flies, but a little item in the Porcupine Advance (Timmins) saying that a public-spirited citizen had decided to build a commodious park and prepare a fine beach caught our at-

ention. We give it to you: "Leo Mascioli is building a fine park and beach at the river, the land used being just across the bridge. His idea is to provide the people of the town and especially the youngsters with a pleasant and safe place for amusement and recreation in the summer. Work has started on the improvements planned, these including the perfecting of a nice beach, the steam shovel being used to give the shore line the proper slope and to make it safe for youngsters as well as others. The new park will be ready for use this summer and will no doubt be of great value to the public and especially the children. The park is not planned as a money-maker but as a benefit and advantage to the townspeople." Truly, there are ways and means of having your name remembered and revered after the "call you-der."

Shower Held in Honour of Miss Idella Sopha

A very delightful evening was spent at the home of Mrs. H. R. Sopha on Thursday, June 2nd, when a miscellaneous shower was held in honour of Miss Idella Sopha, bride-elect of June. A dainty luncheon was served during the evening to the many friends who gathered at the bride's home to wish her good luck and prosperity. The bride-to-be was the recipient of many beautiful and costly gifts which showed the high esteem in which this young lady is held.

Government Should Help North Schools

Guaranteeing of Debentures Seems to be Essential if Recommendation of Dept. of Education are to be Followed Out.

Timmins has a school problem. In this it is no different to many of the neighbouring towns of the North where somewhat similar conditions prevail. In this North Land the problem of providing sufficient school accommodation for a rapidly growing population of children is a particular problem at this time. With all the willingness in the world the people have not a fair chance unless they have the backing of the Government. With about two millions invested in this part of the North Land in schools and education, it is certainly not fair to suggest that the people are not ready to pay for school facilities for their children. This summer the public school board asked the town council to provide ways and means so that further accommodation for classes might be provided. The council's reply to this was to ask the government to guarantee the new school debentures that would be necessary to pay for the needed new additions. In response to this the government replied to the effect that the Ontario Government has made a ruling against the guaranteeing of any further school or other municipal debentures. The question asked by the council is "How can the town be expected to sell school debentures in the present market without the guarantee of the Government?" Further, it is pointed out that the Dept. of Education not only approves the request of the school board, but practically urges it. A year or two ago the Dept. of Education would simply have insisted that proper accommodation for the children be provided. They may do so now. In such a case there would be the peculiar situation that one department would be ordering a procedure, while another branch would be practically announcing that the course ordered would be impossible. In the meantime, both the school board and the people may well ask, what the children are going to do in the meantime. In the case of Timmins the guaranteeing of the bonds would make their sale easy and plans could be proceeded with accordingly. At the same time the Government would not have to put up a cent. It is not likely that the Government would ever be out a cent on the debentures so guaranteed. On the other hand if Timmins is forced to pay for necessary additions to school accommodation without the use of debentures or by issuing debentures that can not be sold, the situation is certainly one to make the council hesitate. There may be other ways out of the dilemma. Some of the proposals made so far do not appear attractive. The suggestion that the age limit be raised for the admission of children is not agreeable to many people. Another suggestion is that teaching be carried on in "shifts" as it were, more of the day being used to accommodate classes. This has been tried out in some places with varying success reported. It does away with the necessity for additional building and it saves something in the cost of teaching staffs. It has, however, some disadvantages. It seems to be certain, however, that some plan must be adopted to provide accommodation and at the same time not completely over-power the public purse.

May Honour Roll of Mattagami School

Standing of the Pupils in the Various Classes at the Mattagami Public School for the Month of May

- The following is the honour roll for the Mattagami public school for May: Junior Room—Miss Kelvie, teacher—K.P.—Class A—Anita Soti, Muriel Rothwell, Karl Redden, Vivian Constant.
- Class B—Margaret Latham, Nora Paver, Hazel Rita Caron, Fred Barnes, K.P. and Jr. Pr.—Miss Kelvie, teacher—Jr. Pr.—A Class—Richard Stingle, John Newsham, George Shaw, Timmy Wilkins.
- B. Class—Murray Kaulbeck, Irene Lawson, Audrey Worthington.
- K.P.—Marita Forberg, Billy Downs.
- Sr. Pr.—E. Taylor, teacher—Annie McColeman, Walter Scott, Hazel Stevens, Barbara Haystead, Ross McIntosh, Peter Harrower, Ella Lubanen, Basil Trevathan, Scott McColeman, Harvey Jacklin.
- Jr. 1st and Sr. 1st—Miss Dodd, teacher—A. Class—Fred Milne, Muriel Stuart, Herman Sanford, Wilma Hawse, Kathleen Burke, Hazel Bound, Bertha Sheridan, Myrtle Knell, Ahti Kata-lakoski.
- B. Class—Anna Middleton, Alma Cripps, Irene Kuotsala, Gladys Roy, Harry Jacobson.
- Jr. II—M. H. Thorburn, teacher—A. Class—Marion McLeod, Harvey McColeman, Allen Lawson, Jean Loader, Gladys Langman.
- B. Esolyle Martin, Edna Spujta, Helen Robertson, Toiva Talo, Flora Waterhouse.
- Jr. II—Miss Harris, teacher—A. Joyce Collins, Marion Constant, Bessie Percival, John Pearce, James McLean, Willie Haystead, Esther Stratman.
- B. Ida Riard, Margaret Stevens, Eric Barnes, Keith Cooke, John Rothwell, Billie Shaw Alex Getty.
- Sr. II—Miss Rogers, teacher—Annie Getty, Aila Convery.

Automobile Insurance

YOU

cannot avoid unexpected accidents (even the most careful drivers) but you can save yourself the loss of, or damage to your car or truck as well as possible claims for injury or death of persons or damage to property of others, by being fully insured.

Rates and information concerning Automobile insurance gladly furnished.

RADIO ELECTRIC SHOP ANNOUNCES the Newest and Best in Electrical Appliances and THE BIGGEST VALUES IN TOWN

In connection with the opening of their new store at 14½ Pine Street North, the Radio Electric Shop will show a representative line of the famous Northern Electric Ranges, Washing Machines, Refrigerators, Vacuum Cleaners, and other electrical appliances—all of which may be purchased on convenient easy terms if desired.

Two Modern Vacuum Cleaners for the Price of One

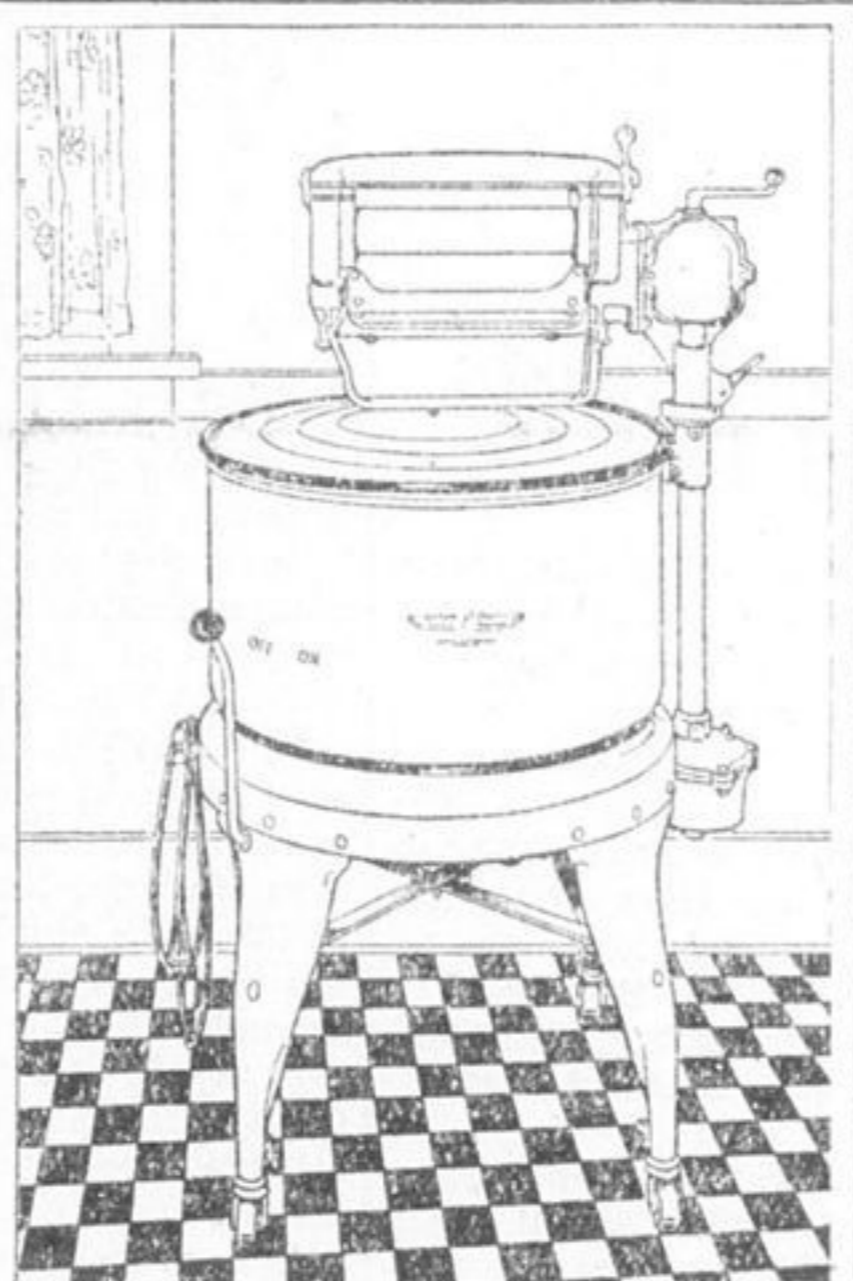

The Handy Cleanerette

Every purchaser of a Northern Electric 2-speed Vacuum Cleaner who will turn in their old cleaner or carpet sweeper, will be presented with a Northern Electric Cleanerette absolutely free of charge. This offer is for a limited time only.

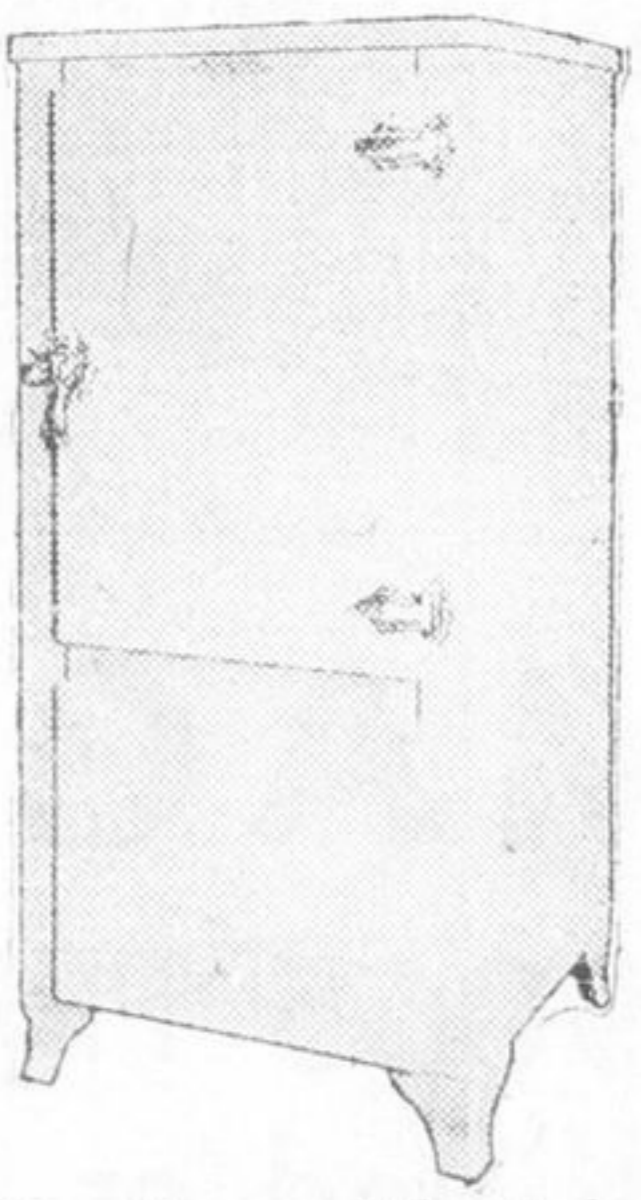

THE NORTHERN ELECTRIC TWO-SPEED VACUUM CLEANER provides an additional speed and suction which removes deeply imbedded germs and dirt from rugs of any depth or weight, without injury to rugs. It is easy to handle, requires no oiling and is fully guaranteed.

THE NORTHERN ELECTRIC CLEANERETTE is a handy little cleaning appliance, complete with blower and duster, which gets into all the hard-to-reach places and keeps them free of dust and germs. Attaches to any electric outlet. Complete with 20 foot of cord. Call and see these cleaners demonstrated.

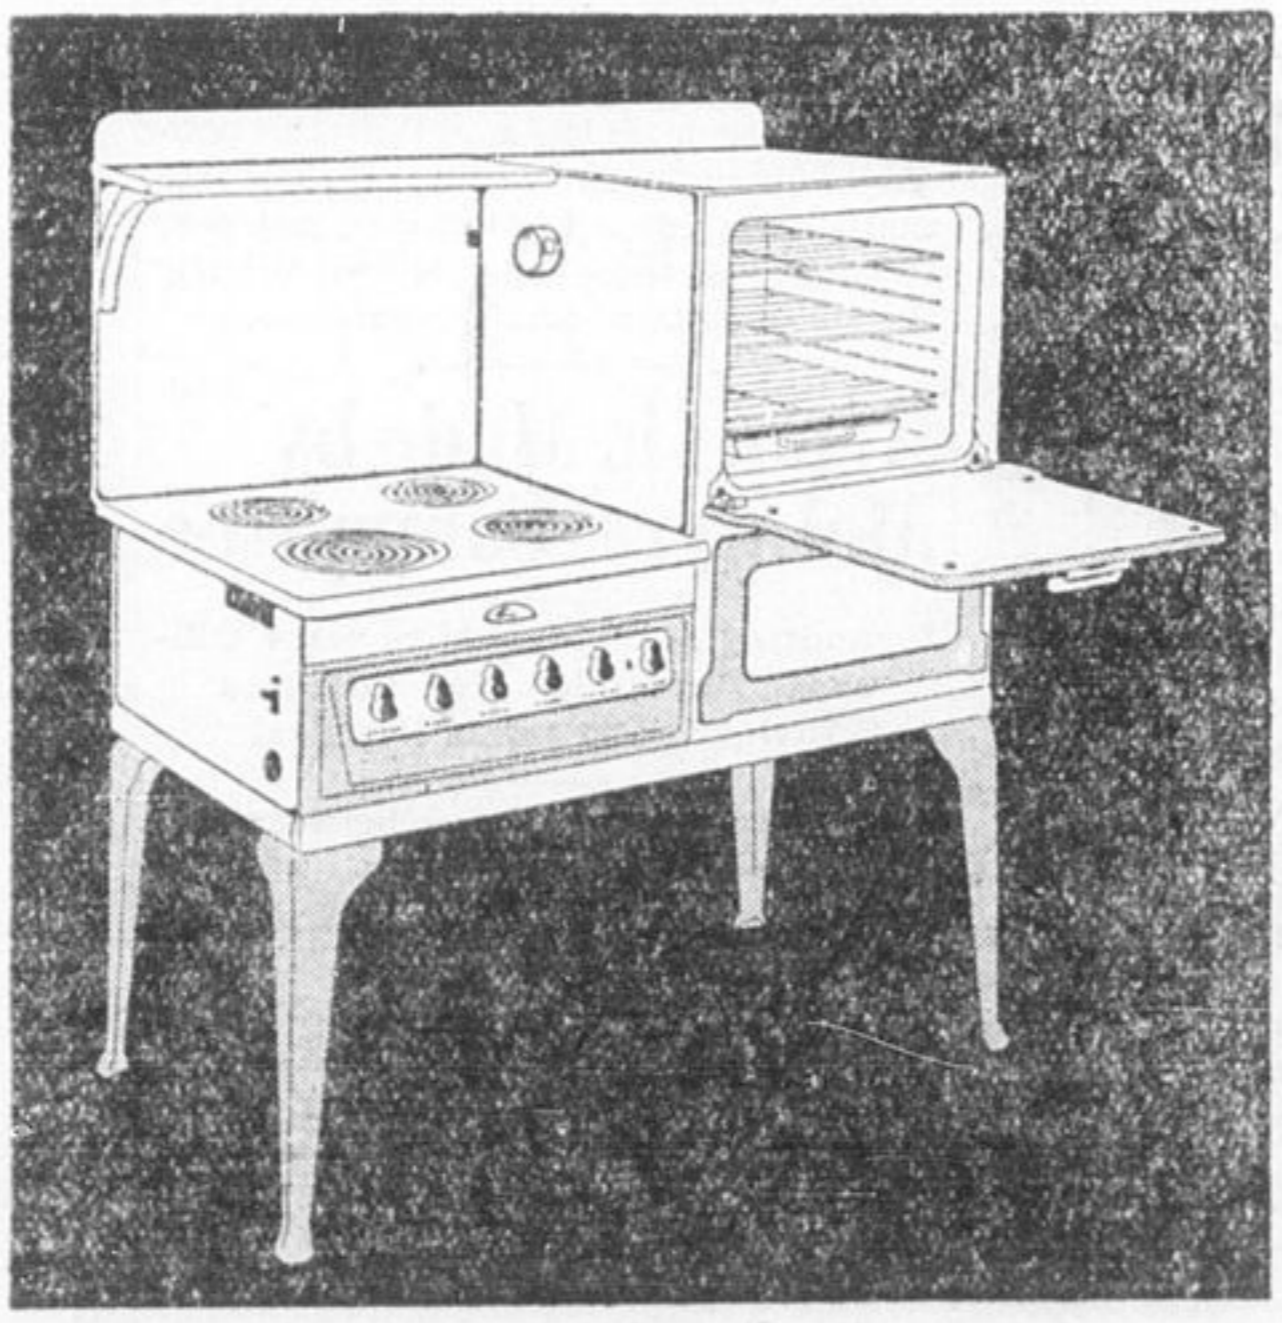

Northern Electric Model "B" Play-maid Washer

This machine has a beautiful light green mottled enamel finish, and the tub is porcelain enamelled both inside and out. It washes and wrings anything, from the sheerest lingers to the heaviest garments with speed and efficiency, and without the slightest injury. The Model "B" insures faster, cleaner, easier washing. Call and see it.

Northern Electric "Ilg Kold" Refrigerator

Full automatic control, absolutely noiseless, quick freezing, easy to clean, beautiful in design and appearance, enduring porcelain finish, chrome-plated hardware, economical to operate. Let us tell you more about it.

Northern Electric-Gurney Range

This handsome range is thoroughly modern in appearance, in operation, in service, in results and it fully answers the housewife's demand for a satisfactory electric range at a reasonable cost. Its use means fast cooking, thorough cooking, economical cooking, cool cooking, clean cooking, safe and convenient cooking. Let us explain its many merits.

Carbide Used by Mean Fishermen Near Sudbury

The dynamiting of fish in this district has not been as rare as most people would like, but Sudbury district has experienced a still meaner form of poor sportsmanship in the way of capturing quantities of fish. This lower type of fisherman is the fellow who uses carbide. Sportsmen at Sudbury are asking that the use of carbide in this matter be barred under the criminal code. From the information to hand in the matter it would appear that the request of the Sudbury sportsmen is a reasonable and desirable one. In discussing the matter last week The Sudbury Star said:—

"Carbide has been used by unscrupulous fishermen near Sudbury, it was reported to the Ontario Game Commission which sat in Sudbury at the Canadian Legion rooms on Monday evening and a request was made that its use be prohibited in the same category with dynamite, which is barred by the Criminal Code.

"Two men recently found some white powder near Mud Lake, on the southeast shore of Lake Ramsay," Col. A. H. Smith, president of the Sudbury Trout Club, reported. "Investigation showed it was carbide."

"One pound of it will destroy all animal life within a radius of one hundred feet, he stated.

"It kills fish outright, and a large number of small fish were found dead in the vicinity of the place where carbide was discovered."

"These fishermen, he pointed out, have two methods. The first one consists of throwing the carbide in the water; others place the carbide in a bottle with a small quantity of water, in the lake or stream, where it explodes."

North Bay Nugget:—North Bay is apparently not going to have daylight saving this year. It is about time that some general move was made to get away from what amounts to a positive nuisance where people on standard time have dealings with those on daylight time.

Carbide Used by Mean Fishermen Near Sudbury

Word comes from Toronto that the cabinet adheres to its policy of refusing to guarantee building debenture issues of Northern-school boards. This means that Kapuskasing is flagrantly discriminated against, although it is a community which substantially supports the T. & N. O. and pays enormous crown dues on timber to the government, as well as bearing the heavy load of other provincial tolls. Other Northern centres have had out-and-out substantial cash grants to their high schools, as well as provincial guarantees of their debentures; the Kapuskasing high school board is told it will get nothing, yet it is told—on the recommendation of department of education inspectors—that it must vacate the public school where its classes have been housed. It is tantamount to saying that our school children must not grow up or progress in their education. A business may shorten sail during a depression and postpone building extensions, and so may the private citizen when needs must; but we cannot see how it is conceived that the education department's own regulations and recommendations in respect to secondary education can be ignored. We trust that the Northern M.L.A.'s appealed to by our high school board to press upon the cabinet the reason and justice of restoring the former guaranteeing of school board building debentures in the North, will not lack in earnestness of effort to bring about the desired result; and we would be glad to know that our own member, Mr. A. V. Waters, of Cochrane, has determined not to rest until Kapuskasing is fairly dealt with in this matter."

Gore Bay Recorder:—No doubt local bridge players will agree that in a game of bridge a good deal depends on good playing; and yet good playing depends upon a good deal.
