

The 40th Anniversary of "SALADA" TEA

For 40 years SALADA has given the finest quality in tea. Present prices are the lowest in 15 years.

Weather works 365 days a year . . . Does Your Paint?

To develop C-I-L New Process Paint required years of intensive research, thousands of tests. And the result was a new paint . . . not merely new in name, but new in performance. Every batch is thoroughly pre-tested before it leaves the factory. Wooden panels, painted with New Process Paint, are exposed to the weather year in and year out. And these panels prove that months after ordinary paints have failed, New Process Paint retains its fresh, bright color . . . its clean, unbroken surface!

Your master painter can tell you why. Profit by his professional knowledge. He will advise you which C-I-L paint or varnish is most suitable for your requirements.

The Canadian Legion in the Porcupine

By Timmins Branch Correspondent.

Your Suggestions Desired. Much has been tried, spoken and written to endeavour to create renewed activity in the ranks of the Timmins branch of the Canadian Legion. While it is true there has been no falling-off of membership yet it is felt that something is lacking in the way of interest. All the committee men are working hard, and as proof of this fact was the

arranging of the concert of last Sunday week in the Goldfields theatre. Looking over the very good audience one was struck by the absence of Legion members, if our members had attended as they should have done the theatre would have been crowded out. The committee who arranged this event spent much time in securing the talent as well as giving items on the programme. Again, on Monday evening, June 6th, the Ladies' Auxilliary of the Legion had gone to much expense in making arrangements for a dance. They cut a large amount of sandwiches and cakes all ready, and the result, the same: few Legion members turned out. Three or four of the stalwarts made an appearance but not enough to allow the paying of expenses. Several smokers and meetings have had a similar experience and the officers lose heart. As one said the other night "May be the boys will come back after the Week of Wonders." The officers say we are ready to do anything to maintain the interest and attendance at our events. Nothing could be fairer than that. Now your correspondent also takes a hand in the game and will receive any letters for publication that will show grievances or otherwise of the members. Some members may have good suggestions to work upon, and others simply a grouch. To get the idea in general of the members I think it would be a good idea if any and every member who has an idea—anything for the "good of the order"—anything he thinks would help increase interest and enthusiasm—anything to make the Legion meetings better—any complaints, or suggestions to increase the "pop"—would write a letter giving his ideas. Address all letters W. A. Devine, Legion Correspondent, Box 210, Timmins. These letters may be discussed in the column, and it may be possible by this plan to shape a programme of activities which will appeal to all, and to start in the fall with record attendances and our membership increased to every returned man in the camp a member. So let's have your letters. Don't be afraid to write just what you think. It will all be between you and me. Of course you will have to sign the letter, so that I will know you are a member, but your name will not be used, if you don't wish it.

Lignite Valuable Locomotive Fuel

Two Processes Show Results, Third Not so Favourable Announcement Made by Research Foundation Director

With the sale of lots at Moosonee and the formal opening of the town-site at James Bay to be held shortly, there is general attention directed to the country north of Cochrane. What is there really there? is a question often asked these days. There is also enquiry as to what industries are probable in the area now being opened up. In response to these enquiries the first thought is naturally in regard to lignite. Much time and money has been spent on the development of the lignite fields north of Cochrane along the Moose River area. Of course, china clay and similar products may also be considered, hopefully and it appears practically certain now that an industry in the clay products line will be started in the North. A chief hope for big things, however, must rest on the lignite deposits. Word from Toronto last week said that Dr. H. B. Speakman, Director of the Ontario Research Foundation, announced that processes completed in Europe with lignite taken from the Moose River basin in Northern Ontario have definitely established this low-grade fuel as technically valuable. The result of the experiments, he said, "together with a study of the test and cost data, will determine the recommendations to be made in a few months regarding the fuel possibilities of lignite."

Closing for Summer.

It is not to be understood that the above means the ceasing of activities; in fact, as a rule the summer months are busier than the winter ones. First of all we have the planning and work of the "Week of Wonders," which is to be held from September 5th to September 12th. Then there is the annual sports day, the drumhead service, and last but not the least, the various dances and concerts which are permanent fixtures. The idea of closing our meetings is because of the members having a rest, but the officers carry on just the same. It can be said also that the secretary will still be taking dues and these should be addressed to box 1059 during July, August and September. If at all possible it would also be a good plan for Secretary W. D. Forrester to make arrangements to be at some designated place on certain days of the month for the taking of dues, etc. In any case members are once again reminded that although the meetings have ceased, the Legion still carries on.

The District Picnic.

There have been many enquiries since last week's letter regarding the district picnic. It seems that the place

named to hold this picnic is not generally known. We have written the Cochrane branch to have the name verified and also all particulars. These are not to hand at this moment, but will be published as soon as received. All members who have automobiles would do a kind act by arranging to take a party to this big event. In any event we do know we have the date correct—Sunday, July 3rd, for the Northern zone district picnic of the Canadian Legion, so put it in your note book and watch for further particulars.

Final Meeting Monday

On Monday, June 20th, the final meeting for the season will be held. It is hoped to have a large closing attendance. After the meeting there will be a social hour. All ex-service men are cordially invited. Visiting Legion members will be warmly received by our branch, which has a reputation for this particular fact. Now then, members, you are going to have a rest for three months, so I am hoping that I for one will have to give up my seat and hand it over to a new-comer. Don't forget your dues. Delegates to the provincial convention at Sault Ste. Marie will be elected also. It's very important to be present. So until the general meeting, Monday, June 20th, I am your correspondent.

—W. A. Devine.

parts of the world, particularly in Germany and Australia, while all along close touch has been kept with the work being done in other Provinces of the Dominion on the utilization of lignite. The problem has been attacked systematically and scientifically, the first step being to make a careful study of the lignite itself and find out what are the main characteristics of the types of lignite which were found during the sinking of the trial shafts. In addition, a comprehensive physical and chemical survey was carried out of the beds of lignite, and the foundation is now in the position to say what variation in composition and type of material there is in the two seams discovered in the area to the west of the Onakawana River, which runs through the deposit and after which the deposit is named.

"At the end of about eighteen months work carried out in the fuel laboratories of the Research Foundation of Toronto and on the field, it was decided to make tests as to the behavior of Northern Ontario lignite in certain types of apparatus which has been proved technically and commercially sound in the treatment of European lignites and brown coals. When all arrangements were completed some 110 tons of lignite were sent to certain plants in Germany and Czechoslovakia for testing. The tests were made during the first three months of this year and were under the direct supervision of a member of the staff of the Ontario Research Foundation."

Marriage of Popular Couple Here on June 4th

A pretty wedding took place at the Church of the Nativity, Timmins, on Saturday morning, June 4th, at 8:30 o'clock, when Idella, eldest daughter of Mr. and Mrs. Harry R. S'pba, became the bride of Mr. Durrell Donovan, eldest son of Mr. and Mrs. A. E. Donovan. Rev. Father Caulfield officiated. The church was prettily decorated with flowers. The bride wore a charming gown of white georgette with high bodice and insets of silk lace. Her tulle veil fell in long graceful lines. She carried a shower bouquet of pink and white carnations and sweet peas. Her sister, Mrs. L. Lorane, was bridesmaid wearing a frock of maize georgette with large mauve hat. She carried a bouquet of mauve sweet peas. The best man was Mr. L. Lorane. The groom's gift to the bride was a substantial cheque; to the bridesmaid, a crystal necklace; and to the groomsmen a leather belt. Following the ceremony there was a wedding breakfast served at the Goldale Cafe. In the evening a reception and a dance was held at the groom's home. They received some beautiful gifts. The young couple will reside in Timmins.

PRIVATE GARAGES MUST NOT CARRY GASOLINE IN QUANTITY

The Halleyburian last week says: "Fire Chief J. Marcella, who is also building inspector for the town, ask The Halleyburian this week to call attention to a provision of a town by-law respecting private garages. He states that this by-law forbids storing in garages or other buildings of gasoline in the barrel. A barrel of gasoline may only be kept 100 feet from a building, or three feet underground according to the building inspector. This information is hereby passed along to those who may not be familiar with the regulations."

COLIC

"Really, I think BABY'S OWN TABLETS are wonderful," writes Mrs. Allan P. MacDonald, Northfield, Ont. "My baby has no more colic pains." Don't let your baby suffer—give BABY'S OWN TABLETS. For colds, fever, upset stomach, constipation. Absolutely harmless. 25c 2x2

Dr. Williams' BABY'S OWN TABLETS

When a recipe calls for MILK Use ST. CHARLES

Whenever a recipe calls for milk it is a safe rule always to use Borden's St. Charles Evaporated Milk. St. Charles is economical, simple to use and definitely imparts an improved flavor to your cooking.

Only milk that has been subjected to the highest tests for purity and richness is good enough for acceptance in the St. Charles plants. Packed under the most sanitary conditions, St. Charles Milk represents the best evaporated milk you can buy—see that you ask for it by name.

A Special Message for

The Man Whose Income Stops If He Is Disabled

THE cutting off of an income because of total disability is one of the greatest blows that can befall anyone. Ordinarily it means that not only you but your dependents will suffer.

The London Life issues policies containing a disability clause which guarantees a stated monthly income. In addition, premiums falling due during the time the Disability Income is being received are cancelled outright.

Life Insurance with The Income Disability arrangement gives two-way protection to your earning power. Send in the coupon for full particulars.
