Two Auto Accidents Near Kapuskasing

Little Boy Killed when Hit by Car at
Opazatika, West of Kapuskasing.
Dust Causes Another Accident.

Those using the roads of the district last week will not need to be told of the serious danger caused by clouds of dust at various parts of the roads. The dry weather and the use of gravel containing sand or dry clay made occasional clouds of dust that made travel more or less dangerous. It will not be surprising to motorists to learn that there was one accident due to flying dust. Indeed, the wonder is likely to be that there were not more. There was one accident reported from Kapuskasing last week where dust was the prime cause. There was also a fatal accident in which a child lost its life, the baby being thrown over 54 feet after being hit.

Details of the two automobile accidents on the Cochrane to Hearst extension of the Ferguson highway, one of them a fatality with a three year old child as the victim, and the other the result of dust raised by passing traffic, are given in reports to district headquarters of the provincial police at Halleybury from Constable W. R. Bryne, at Kapuskasing, John Paul Gaudreau, of Opazatika was instantly killed by a car driven by Clermont Roy, of the same place, and E. C. Walker of Iroquois Falls, with Fortunat Cyrenne and George Comfort, went to Kapuskasing hospital, when Walker's car piled into a grader driven by Comfort.

Roy later was arrested on instructions from Magistrate Tucker and released on \$2,000 cash bail. According to the officer's report, the Roy car was said by eye-witnesses to have been travelling at a high rate of speed when it struck the little boy as he crossed the road, and the child's body was carried 54 feet six inches. Roy is said to have swerved his car in an effort to avoid striking the boy, but caught him while travelling on the driver's left hand side of the road. Opazatika is a few miles west of Kapuskasing.

In the other accident, which happened a few hours before, Walker and Cyrenne were in a car driven by the former, while the grader, in a hollow of the road, was travelling slowly west in Fauquier township, east of Kapuskasing. Another automobile had passed the grader and had met Walker on the top of a hill, but the dust from this car and from the grader below blinded Walker's vision, the report states, and his car piled into the government road machine. Walker sustained fractured ribs and cuts on the face and head, Cyrenne had face cuts and bruises and a neck artery cut, while

Building Lots Selling Quickly at Moosonee Now

"Building lots are selling at Moosonee as quickly as the Commission desires to sell them," stated George W. Lee, chairman of the T. & N. O. Railway Commission, when questioned by "The North Bay Nugget" last Saturday morning regarding developments at the new Northern terminal. He added that several important parties have purchased desired sites and are preparing to establish stores of various types. He reiterated his statement of early in the week to the effect that there is absolutely no truth in the report that the Catholic Church authorities had abandoned plans to establish a church, school and presbytery in the new town. Property has been purchased for this purpose, he stated.

SERVED TWENTY-TWO YEARS AT HALLEYBURY SCHOOL

The Halleyburian last week says:—"Mr. J. H. McFarlane, who has served 22 years as principal of the Halleybury public school, has this week tendered his resignation to the school board, to take effect with the closing of the present school term at the end of the month. Mr. McFarlane suffered a serious illness last fall and since that time has been supervisor at the school. Mr. R. J. McClanahan, who came to Halleybury at the beginning of this year, is his successor."

HOBOS EVEN TRAVELLING BY AIRSHIP THESE DAYS

The North Bay Nugget publishes the following paragraph:—"An air minded" hobo bummed at ride in an airplane from Halleybury recently with the idea in mind of getting to a more desirable centre. He was, no doubt, quite peeved at himself for not sticking to the plane when, on being dropped off at his named destination learned he could have "flown" much farther and to an even greater metropolis where his opportunities might have been much better. "Hey! do you ever give a hobo a lift?" he had queried of an airplane pilot about to take off from the Halleybury airport. "Sure," was the reply. Asked where he might be going, the "ho" named the first town that came to mind, and in due time was dropped off at Temagami. Great was his surprise, and self criticism at not learning the pilot's destination, however, when, after stepping clear of the plane, saw the machine take off again and head towards North Bay or some other town farther on.

Comfort, who is an ex-chief of police at New Liskeard, had two ribs fractured. All will recover.

Thousand Families to be Placed on Land

Settlement to be Chiefly in the North
Land. Committee to be Set up to
Select Applicants for Farms.

One thousand families, mostly in the Northern part of the province will be taken care of by a "back-to-the-land" plan this coming winter, according to announcements made at Toronto last week. The cost of the plan is to be borne three ways, one-third from the province, one-third from the Dominion Government and one-third from the municipalities.

Announcement was made of the plan last week by Premier Henry after a series of conferences with Hon. Wm. Finlayson, who investigated the possibilities of the scheme. One despatch from Toronto says that the scheme "will be put in operation in the North Country, where great hardship is being suffered by citizens due to the closing down of many mines." In this connection it may be noted that the reference must be chiefly to the Sudbury area, where the depression has affected the nickel mines. So far as this section of the North is concerned, it is not the closing of the mines that has caused the trouble, but the fact that thousands of unemployed from other parts of the Dominion have crowded into the mining areas of the North and thus created an unemployment situation that would not normally have arisen.

In working out the plan now put forward by the Government, there are several things that are worthy of consideration. For instance, it is regrettable that the limit has been placed at 1000. According to suggestions from Sudbury and North Bay there is reason to think that the full quota of 1000 might be filled from those two cities and adjacent towns, leaving nothing for the rest of the North. Another thought that is sure to obtrude itself on those who know the situation is the hard place already occupied by settlers already on the land. The question naturally arises:—"If new men are to be assisted in establishing themselves on the farm, will help be given those in dire need who have for years been trying to establish themselves on homesteads in this North?"

Still another thought arises in connection with this plan. In every town of the North there are large numbers of unemployed, many of them foreigners who came here to go on the farm. These foreigners often howl that they were "invited to Canada," but only a very little investigation shows that they were here for years under false pretences. They came here to work on farms but if they went at all to farm work they soon quit it for work in the mines or running stores or doing other business not mentioned in polite society. These fellows howl about their invitation to Canada, but it is easy to see that they had no invitation at all along the lines they adopted. Their competition has had much to do with creating the present conditions and now, in many cases after sending their money overseas for years to foreign lands, they are demanding that the country keep them. How would it be to weed out these gentlemen at this time? Why not deport all those who are determined not to be decent citizens of the country? Then ask the other (practically all of them accustomed to farm labour) to go on the land as they pretended to desire to do when they came to this country? Those who refuse might be either deported or jailed. There is no doubt but that a lot of these fellows are capitalizing their present unemployment and are attempting to sponge on the people of Canada. A year or two more and they will be so expert it will not be possible for them to return to fair work under fair conditions.

To return to the announcement made last week by Premier Henry, it may be said that the statement as issued by the prime minister is as follows:—

Result of Negotiations.

"For some time negotiations have been taking place between the Dominion and the Provincial Governments in reference to a land settlement scheme. Large sums of money have been spent in construction work by the Dominion Government and the Provincial Government individually during the past two years, and both governments have very generously assisted municipalities in municipal undertakings. All this was intended to relieve unemployment by providing work. This effort has been fairly successful, and, if the depression had only lasted for one or two years, it might have been sufficient, but unfortunately there is every evidence that the period of depression will continue until at least next winter, and neither the Governments nor the municipalities have the means to carry on work on the same scale. The Provincial Conference recently held at Ottawa unanimously came to the conclusion that it would be absolutely necessary to take care of the distress from unemployment by direct relief. It was felt, however, that something might be done by way of giving experienced farmers an opportunity to return to the land with a moderate amount of help. "Although final details of the agreement have not been worked out, a general plan has been agreed upon and the following particulars may be given at once.

"The scheme contemplates a three-way split of the expense; viz., one-third from the Dominion, one-third from the province, and one-third from the municipality from which the settler comes. In addition to this the province is prepared to supply suitable

Chinese Lady-Bird

ROSE LOK

land wherever available. The Dominion has appropriated a considerable sum for the purpose, and the province is appropriating a similar amount. If the municipalities contribute an equal amount, there will be available about enough to take care of one thousand families in the province of Ontario.

"The amount to be advanced cannot be used for the purchase or rental of land, but it is hoped that it will make a sufficient amount available to start some experienced people on the land.

"The personal selection of families for this scheme is regarded as being most essential. Experience in land settlement schemes has shown that only those with farming experience and suitable physique are likely to succeed. For this reason the agreement provides that a selection committee must be set up whose duty will be to consider applications from municipalities and to decide whether persons recommended by the municipalities are suitable and the amount of the grant that will be available for the purpose.

"It will be seen that the first step must be made by intending settlers applying to their municipalities, and if the municipalities are willing to help to a limited amount, an equal amount may be available from the Dominion and the province if the parties are considered as proper material."

That Dreaded Time of Life

Mrs. Brockbank Tells Why She Recommends Dr. Williams' Pink Pills to Women of 40 to 50.

"My age was — which every woman knows is critical time — life — when I derived such benefits from Dr. Williams' Pink Pills," writes Mrs. Brockbank, Hamilton, Ont. "I felt so tired and depressed; could not sleep; my appetite was impaired; my skin and hair were pallid. I could not make a headway with my housework. I was discouraged, as tonic after tonic did not better my condition. My sister, a graduate nurse, advised Dr. Williams' Pink Pills. After taking a few boxes my condition greatly improved. My sleep was restful and my natural colour and appetite returned."

Dr. Williams' Pink Pills rebuild health by creating new blood and increasing the red blood cells, which restore the wasted tissues and revitalize the exhausted system. They remove the cause of run-down or nervous conditions. Try them. At your druggist in the new protective glass container 50c a package.

Brampton Conservator:—A citizen of Toronto of foreign extraction was evidently looking for depression as storing up goods against the evil days. Relief officers and police discovered months' supply of goods taken from the Home and Industry stored in the home.
