**WILL ADD TWO MORE CAMPS ON TRANS-CANADA HIGHWAY**

The North Bay Nugget last week says:—"Operations on the North Bay-Pembroke link of the trans-Canada highway will be increased to ten fully-manned camps when two additional units are re-established next week. This will bring the working force to 800, all employed on the \$5 per month and board basis. Monday will see camp No. 9 in operation at Deux Rivières east, the second to be re-opened at this point, and camp No. 10 will be in operation at Bisset's on Wednesday, also the second to be re-started in that area. Seventy single men from Sturgeon Falls will be sent to the Deux Rivières camp opening Monday, and a detachment of 25, arriving here this morning from Kapuskasing will be located in the same unit. Mattawa has applied for authority to supply a number of single men and it is likely that they will be recruited for the Bisset's camp to be re-opened Wednesday. The camps already in operation have been giving good satisfaction and the men, generally, are contented and giving satisfactory service."

**TEN YEARS AGO IN TIMMINS**

From data in the Porcupine Advance Files.

The Advance ten years ago gave front page space to the plans of the Paymaster Mine for enlarged operations, noting that a much larger plant was to be installed. The new Government road past the Paymaster property had proved a very decided advantage to all concerned.

A note in The Advance ten years ago mentioned the fact that the township of Tisdale had passed an early closing by-law providing for the closing of stores in Moneta at 7 p.m. each evening except Saturdays, and also for the Thursday half-holiday.

The following from The Advance of June 28th, 1922, will be of interest at this date. It was the opening paragraph and summary of a column article:—"Tuesday evening, June 27th, will be long remembered in Masonic circles in Timmins, being the occasion of an official visit to 'Northern Lights' Chapter of Royal Arch Masons by M. Ex. Comp. Richard H. Spencer, Grand First Principal of the Grand Chapter of Royal Arch Masons of Canada, who was accompanied by Ex. Comp. H. T. Smith, Grand Scribe E., and Ex. Comp. Lorne Kennedy, Grand Supt. of Northern Ontario. After the proceedings in the lodge room were over, the brethren adjourned to the hall downstairs, where the ladies of the Presbyterian Church had prepared a banquet, which for tasteful decoration, quality and variety has never been surpassed by any affair of the kind in the town of Timmins."

Reference was made in The Advance ten years ago to what was considered one of the important "industries" of the town. This reference was as follows:—"Last week Mr. H. F. Schroeder moved his conservatory of music from Cedar street to the St. Onge block, foot of Third avenue, Timmins. In the St. Onge building upstairs, Mr. Schroeder has large and commodious quarters, and his rapidly growing list of students fully warrants the extension of accommodation. There are now five teachers on the Schroeder staff. Music in all branches is taught by experts—vocal, violin and piano music being specialized. Languages are also being taught now, and a full musical education of the best type is available at the Timmins Conservatory of Music in the new quarters, St. Onge building, foot of Third avenue, Timmins."

In one of the popular "international" football games in Timmins in 1922, Scotland was triumphant. The players for Scotland included such names as Wallace, Dalgarno, Roberts, Cadman, Donald, Harrower, Ritchie, Carr, McKenna. Another Scot, Jock Nicolson, was one of the backs for the English. The Advance said in part:—"Scotland" won the second international football match at Timmins on Tuesday by a score of 6 to 3. This match was a benefit one for Mr. Ralph Calverly, a well-known and highly esteemed football enthusiast, who is at present in poor health. Despite the drizzling rain there were about 100 spectators to witness the match. England took up the attack and soon brought Wallace into action for a few minutes, the ball being sent away to the wing for an attack on England and from a neat pass Carr opened the scoring. The players for England included:—Street, Vedova, Nicolson, Costain, Kellow, Pearson, Lucas, Dunbar, Eyre, James and Airey.

The express service has not always been as good as might be desired, though this has been as much due, perhaps, to the railway as to the express. While there was full railway service, the express service was excellent. The following comment was made in The Advance ten years ago:—"For the past ten days or two weeks Timmins has been enjoying much improved express service from Toronto. A through express car has been put on from Toronto, to express coming through from the city without transfer and reaching here on the seven train in the evening. This is for the Canadian National Express only, but is of general advantage to the camp. For the shipment of fruit in here it should prove of special benefit. The improvement is understood to have been secured through the efforts of the Boards of Trade along the line and from the interest of others concerned."

One of the big features in the entertainment line in Timmins ten years ago was the minstrel show given here. This was an unusually pleasing event. In commenting on it The Advance said, in part:—"The minstrel show given on Wednesday and Thursday evenings and Thursday afternoon matinee last week by the Porcupine Minstrels, a group of talented local artists, was unusually well presented and a credit to all taking part. The show was presented with a finish that would not be excelled by professional players and it was a real minstrel show, full of good local humorisms happy songs, melody and wholesome fun. The audiences thoroughly appreciated the good work of the local boys and the only regret is that the house was not crowded for each performance. The show deserved record attendance on its own merits. The matinee brought a big house and the youngsters were delighted with the fine show with its fun and music. At the evening shows, the grown-ups were equally pleased with the clever and effective work of the Porcupine Minstrels. The event was under the capable direction of Mr. W. King. Costumes, stage settings and other details were looked after with professional finish. For the stag settings, lights and other assistance the minstrels were indebted to Mr. Hugh Richardson, whose experience and art were of much value. A special feature of the good work of the minstrels was the clearness with which all were heard, the excellent voices of the two end-men, Messrs A. J. Downie and W. Lainsbury, and of the interlocutor, Mr. A. Snow, proving very effective." Among those taking part were:—E. R. Street, T. Lainsbury, A. J. Snow, A. J. Black, A. J. Downie, W. Lainsbury, Messrs Price and Griffiths, Mr. Grant.

Ten years ago Timmins town council inaugurated a campaign against flies as a menace to health. By doubling the previous system of garbage collection this campaign was much helped. Dr. H. H. Moore, Medical Health Officer, addressed the town council in regard to the need for better garbage collection and placed the matter so effectively before them that the support of the council was readily given in plans for better health protection.

Ten years ago Timmins was entering an era of expansion and development and there were rumours and reports along this line that did not always materialize in fact. One of these reports was referred to by The Advance in the following paragraph:—"According to the general reports, the Bank of Hochelaga intends to open a branch in Mattagami in the near future. It is understood the new bank will be on the River Road about a block and a half below St. Onge's corner. With a drug store, moving picture palace and other promised new city conveniences, Mattagami will soon be a metropolitan centre." The expected bank for Mattagami failed to materialize, but as a matter of fact there was serious consideration given the idea of establishing a branch of the Bank of Hochelaga here. The matter was under review more than once in years gone by.

As a matter of record the following paragraph is reproduced herewith:—"Work was started this week on the building of permanent Salvation Army barracks here. The new building will

be next to the Canadian Explosives office, opposite the public school. The building will occupy the full width of the lot and will be a large and commodious structure. The building on the lot, formerly occupied by the Northern Miner Press, is being moved to the rear of the lot."

It was less than ten years ago that the Timmins Citizens' Band inaugurated the plan of having regular band concerts at least one a week in the summer time and every two weeks in the theatre during the winter. For several years this plan was followed. Ten years ago, however, the concerts were not regular. They were much appreciated when presented. The following paragraph from The Advance of June 28th, 1922, shows the excellence of the programmes and the pleasure of the crowds:—"Timmins Citizens' band gave an open air band concert at the park Sunday afternoon. A crowd of over 300 gathered at the grounds for the event and the music was much enjoyed. The band gave a programme of varied selections, all of them well rendered and much appreciated."

Black flies were very active in the North Land ten years ago. They were sharp and strong that year.

Cochrane was on the wrong end of a 10-4 score game in a district baseball league game at Timmins on June 24th, 1922. The game lacked in interest, neither team being in good form. This lack of pep or snap was perhaps largely due to the heavy sand storm, the fine sand blowing around so viciously that on more than one occasion during the game the umpire had to call off play for a minute or two to allow the more vicious gusts to pass by. The first innings was a good one, no runs, no hits, no errors, but in the second frame Cochrane went up in the air and Timmins got three runs. In the fourth and sixth innings there was more air flights by Cochrane with the result that the final score was 10 to 4. Cochrane players included Thacker, pitcher, Morrison, catcher, and Acton, Kavanagh, Douglas, McLean, D. Campbell, G. Campbell and Allaire. The Timmins line-up included:—Tate and McIntyre, battery, and Destefano, Scully, Farr, Duncan, Sheehan, Cochrane, Geo. Lake. The umpires were J. F. Smith and C. M. Auer. In the game the Timmins pitcher, Ernie Tate, showed that he could pitch a good game, sand or no sand, and wind or calm. He struck out seven men. One of the odd things about the game was that it could be said quite truthfully that Cochrane was playing for Timmins.

Another baseball game of ten years ago is referred to by The Advance of June 28th, 1922, as follows:—"In the District League Baseball game at the Falls on Wednesday last Timmins met a rather pronounced defeat. According to those viewing the game the Falls team did not play so much better than at their recent game here when they met defeat, but the Timmins team played so much poorer ball. All that need be said is that it was an off-day for the Timmins team, practically every ball player on the line-up being below his usual form." The score was 10 to 3, but please don't mention it.

In the Dickson Cup series ten years ago Dome F.C. played a great game at Timmins on June 22nd, 1922, and won by a 2-1 score.

The Advance ten years ago carried good news for some youngsters in the form of the promotion examinations results. For others the results were not so good.

Among the local and personal items in The Advance ten years ago were the following:—"Mr. Howard Brewer left this week for a visit to his home at Buckingham, Que." "Born—at the Cairns Hospital, Timmins, on June 24th, 1922, to Mr. and Mrs. A. H. Cedarberg—a son." "Mr. W. McGonegal, of the Canadian National Express, was a visitor to the camp this week on business." "The Bank of Montreal expects to open its Timmins branch in the Thériault building opposite the New Empire theatre the first week in July." "Born—(Prematurely) to Mr. and Mrs. Ben Russell, 116 Maple street, Timmins, on June 26th, 1922—a baby girl. Baby died this morning." "Mr. Jas. McIntosh, who has been a popular member of the Curtis Drug Co. staff for some months past, left on Saturday for a visit to Toronto, after which he will take up residence at his home at Gore Bay. During his stay in the camp he made many friends, all of whom will follow him with good wishes." "Good progress is being made in the work of construction of the fine new Catholic church here. The new church will occupy the same site as the present church, but will be extended at the sides as well as having an additional storey in height. The basement of the new church will be used for Sunday school and church society purposes." "Born—at the North Thompson Mine, on Saturday, June 24th, 1922, to Mr. and Mrs. A. E. Mortimer—a son." "The Orangemen of the district will observe the Twelfth of July at Cochrane this year. A noteworthy programme is being prepared for the occasion." "Mr. and Mrs. W. H. Pritchard are visiting in the south." "Mr. A. F. Brigham returned this week from a visit to the Pas, Manitoba." "Mrs. W. G. Umfrey, of London, England, is visiting her daughter, Mrs. Herbert Martin at South Porcupine." "Miss Grace Carriere, daughter of Mr. and Mrs. A. F. Carriere, returned last Thursday from Rideau street Convent, Ottawa, to spend the summer holidays at her home." "Mr. and Mrs. John Neill, of Timmins, left Monday to spend a few days with friends at Englehart, after which they will set sail for Liverpool, England, their boat going out from Montreal Friday of this week."

The courts of the Timmins Tennis Club were completed last week for the season's play and are in fine condition now and being used with pleasure by the members of the Timmins Tennis Club. "Mr. Ralph Calverly left this week for Gravenhurst, Muskoka, for a couple of months' stay there for the benefit of his health. Ralph is one of the most popular and esteemed residents of the camp and he is followed by the most sincere wishes for an early recovery and complete return to health and strength." "Mr. Ivan Stadelman's book, stationery and music store was broken into on Thursday evening or Friday morning. Entrance was effected through a rear window. The thieves took about 75c in coppers, a quantity of silver left in the till and some cigarettes and tobacco. The police were notified of the matter and are working on the case."

**Awaiting Work on the Ashley Claims**

Sourdough Syndicate has done much Work on Matchewan Property, but now are Waiting for Ashley Mine Results.

A despatch last week from Elk Lake refers to Matchewan prospects as follows:—"A report to the unit-holders of the Sourdough Mining Syndicate, formed in 1930 by Toronto mining men to stake and prospect in the Matchewan area, shows that to April 18, 1932, the syndicate expended \$4,221 on its activities and has \$612 in cash remaining in the bank.

The company's holdings include seven claims in Argyle township, northwest of the Ashley Gold Mine, and 11 claims in Bannockburn township, immediately south of the Ashley Gold Mines. On the adjoining claims exploration work disclosed a small quartz vein six to eight inches wide containing visible gold which was traced to the boundary of the Sourdough northerly claims, but aside from this nothing of importance was found.

On the southerly group, which lies on the line of strike of the Ashley vein, the contour of the north line suggests the possibility of the continuation of the Ashley break. During the past winter an option was given to the International Mining Corporation, of New York, for three-quarter interest in the southerly claims. Here 1,000 ft. of diamond drilling was completed. In hole No. 3 a mineralized quartz vein 18 inches wide was encountered at a depth of 300 ft. The vein is similar to the gold-bearing quartz in the Ashley, but an assay showed but 40 cents per ton in gold. Sufficient work has been done to patent this group of claims and it is proposed to await developments on the adjoining Ashley property.

An interest was also purchased for \$560 in the Peter McDonough Oldtimer Prospecting Syndicate.

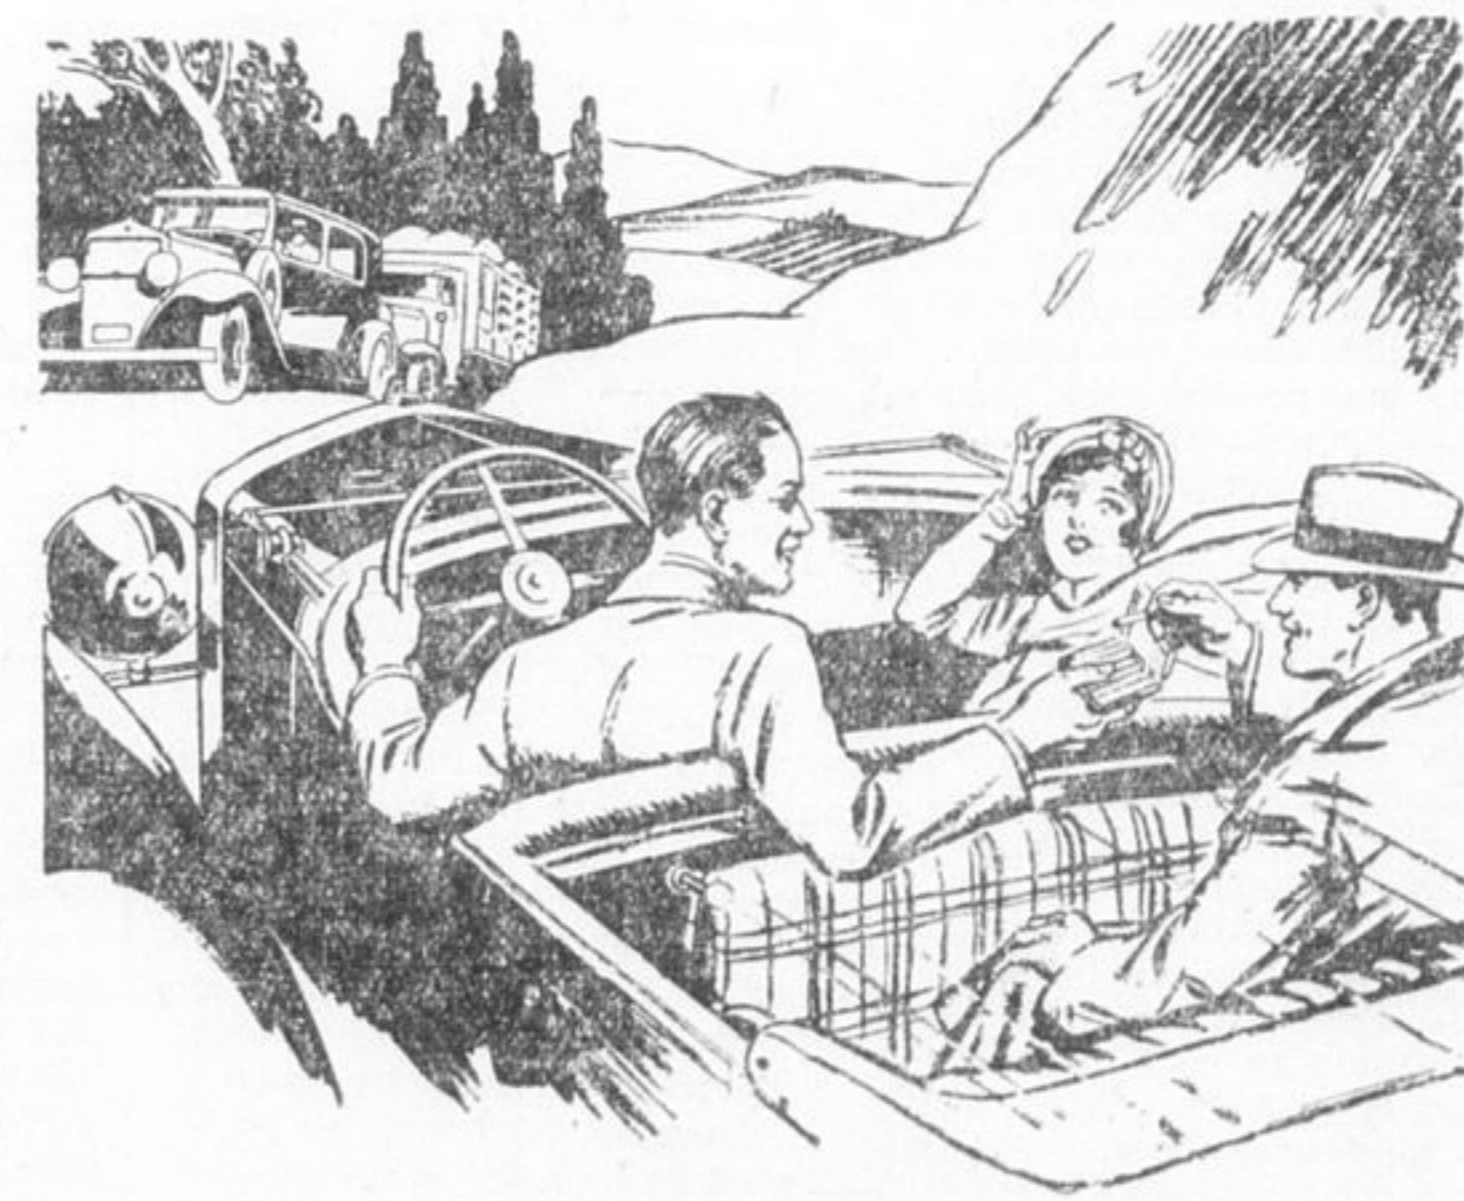

North Bay Nugget:—Details of the C.N.R. management as disclosed at the sessions of the special committee indicate some reasons at least why the road does not pay and they haven't anything to do with truck and bus competition, either.

**ONTARIO LIGNITE SAMPLES TO BE SHOWN AT EXHIBITION**

Specimens of Northern Ontario lignite, both crude and after treatment will form a part of the exhibit this year of the Ontario Department of Mines at the Canadian National Exhibition at Toronto. These specimens were recently used in the experiments conducted in Germany by the Ontario Department of Mines. Last week The Advance made reference to the report given following the experiments in Germany. This report suggested the possibility of a promising future for Northern Ontario lignite. That the lignite specimens are to be exhibited at the Toronto exhibition is proof of the continued interest of the Ontario Government and also should prove valuable publicity for Northern Ontario and Northern Ontario's lignite. The exhibit will be arranged and in charge of Cyril Tasker, departmental fuel expert, who supervised the experiments with the lignite abroad and elsewhere.

Port Arthur News-Chronicle:—That gold mining is making progress in Northwestern Ontario is shown in the report of the Ontario Department of Mines, issued this week. It records production in the first quarter of this year as 16,783 ounces to a value of \$346,929 as compared with 8,829 ounces valued at \$182,519, for the same period a year ago.

**Flowers that Kill**

All Flies or Mosquitoes with a Perfumed Mist

Some years ago it was discovered that a certain field flower grown in Japan drove away winged insects. A shipment was sent to America for testing in a research laboratory. Here an extract was made from the flowers and sprayed in a closed room filled with flies and mosquitoes. Every insect perished at its touch.

Now that extract is the basis of Fly-Tox, developed at Mellon Institute of Industrial Research by Rex Research Fellowship. Ten years and over \$100,000 have been spent by us in perfecting it. This Fly-Tox, used as directed, fills the room with a perfumed mist, at a cost of only 1 or 2 cents. That mist is harmless to people, stainless to anything. But every fly or mosquito that it touches dies at once. And they can't escape it when the room is filled.

These pests are deadly, for they carry the germs of over 30 diseases. They deposit those germs on foods or in blood streams. Many thousands of children die every year from this cause. Fly-Tox rightly used, frees your home and keeps it free, in an easy, certain, economical way.

Think what that means to you and yours.

**FLY-TOX ONLY**

A Rex Research Product

Use Fly-Tox only, and always in a new-type Fly-Tox sprayer. Every lot is tested on flies in our laboratory. The efficiency is guaranteed. The odor is pleasant, the extra strength makes it very economical. Use it because nothing is too good for the safety of your home. Go get it today—it's sold everywhere. Harmless to people. Stainless. Fly-Tox is made in Canada.
