Mrs. D. Pitre left last week for a holiday at Ottawa and Montreal.

Mr. Alex Johnston of Windsor, Ont., is spending a few days in Timmins.

Born—On Friday, July 15th to Mr. and Mrs. Prosperie Marion of Timmins—a daughter, (Jeannine Henriette).

Mrs. I. L. Church and children left last week by motor for North Bay, Parry Sound and Toronto.

Born—In Timmins, Ont., on Thursday, July 14th, 1932, to Mr. and Mrs. Herbert Roy—a daughter (Marjorie Anne).

Mr. and Mrs. H. W. Warren returned this week after spending a couple of weeks with friends and relatives in Toronto and Hamilton and other Southern points.

W. Rinn was called to the South last week owing to the serious condition of his father at his home at Creemore, Ont. After Mr. Rinn had left here friends in town received word that his father had passed away.

Mr. Rinn's father was around seventy years of age. There will be general sympathy extended to Messrs Wm. and Harry Rinn and the other near relatives and friends in their bereavement by the death of Mr. Rinn, Sr.

David Smith, 13 years of age, son of Mr. and Mrs. Peter Smith, West Cobalt, was drowned on Sunday at Mud Lake, three miles south of Cobalt, when he slipped off a log raft on which he and a friend were playing.

The body was recovered two hours after the accident. Two unknown men in a car refused to help two adults who were with the boys, but reluctantly brought them to West Cobalt.

Three boys aged 9, 10 and 11 years old respectively were caught a few nights ago while in the act of prowling around the store of Reamsbottom and Edward at Kirkland Lake.

They had entered the store by way of a basement window and were neatly caught by Joseph Edwards, one of the firm. The boys were duly repentant and promised not to try any burglary stunts ever again.

They were allowed to go after a severe lecture by Chief of Police Shane.

The Kirkland Lake Northern News last week had the following note in reference to the recent Firemen's tournament at Kirkland Lake:—"Chief Max Smith, of South Porcupine, did the megaphone honours as an announcer from the judges' stand during the firemen's trials at the high school grounds.

The timers and assistant judges were Chief D. A. Lapointe, Rouyn; ex-chief Jack Lever, New Liskeard; and F. B. Tanner, a representative of the La-France Fire Engine and Foamite, Ltd."

When the schools re-open after the holidays Kirkland Lake will have a total of 53 teachers on the staffs of the Kirkland Lake schools. There are now 29 teachers on the public school staff, 14 teachers at the high school, and 10 at the separate schools.

Even at this distance figures Kirkland Lake has a long distance to go to equal the standing of Timmins in regard to teachers. Kirkland Lake apparently is striving to equal Timmins in regard to school matters, just as it has done in other lines.

Sixty tons of concrete were poured into excavated rock to give a foundation for the non-overflow gravity dam. In deflecting the torrent to construct the dam and other works necessary, two immense tunnels had to be constructed through hard rock.

560,000 cubic yards of rock and 480,000 cubic yards of earth have been excavated in the work.

From 600 to 1200 men have been steadily employed for nearly two years. Nine men lost their lives during the work, but in view of the magnitude of operations this was a comparatively

Big Power Project at Abitibi Canyon

Notable Achievement in Harnessing Nature Seventy Miles North of Cochrane and Over 320 Miles North of North Bay.

A visit to Abitibi Canyon to view the immense power project there was among the outstanding items of interest in the trip last week to Moosonee when 150 men of the North and the South were the guests of the T. & N. O. Railway.

Abitibi Canyon is about seven miles from Fraserdale, a spur line giving access to the power town site. A month ago Abitibi Canyon had a population of 1000. Now there are only about 50 people left there, the work being closed down on account of the difficulty of completing the financing.

The work is nearly completed, however, only a comparatively small strip of rock excavation being necessary, together with the placing of a roof on the power house and other minor work on the completion of the buildings.

The development of power at Abitibi Canyon and the work accomplished there is a triumph for the skill of the construction company and its men. All the visitors last Thursday were impressed with the magnitude of the work and the wonders accomplished.

Looking at the construction now so near to completion many were expressions of wonder at the miracle thus wrought by man. "The Egyptians with their pyramids had nothing on modern man," said one visitor to C. V. Gallagher. The reve of Tisdale did not altogether agree that it was the most noteworthy enterprise in the North.

"If you would take the 143 miles of underground work at the Hollinger and pile it on end, you would have something to make even this immense work look small," he said.

The development work was estimated to have cost \$20,000,000. There will be 270,000 horse power available. The plant has a capacity of 330,000 h.p. The work was commenced in August, 1930, and would have been completed on contract time, October of this year, but for the present shut-down. It is understood that the completion of the work on contract time is impossible now.

An adequate idea of the extent and scope of operations, but some figures given by workers on the project may be illuminating.

Five hundred thousand cubic yards of concrete were used in the work. A million pounds of powder was expended in blasting.

There are 5,000 tons of steel in the construction, and the use of 15,000,000 board feet of lumber was necessary.

The dam is 750 feet long, and the spillway 270 feet. Sixty tons of concrete were poured into excavated rock to give a foundation for the non-overflow gravity dam.

In deflecting the torrent to construct the dam and other works necessary, two immense tunnels had to be constructed through hard rock.

560,000 cubic yards of rock and 480,000 cubic yards of earth have been excavated in the work.

From 600 to 1200 men have been steadily employed for nearly two years. Nine men lost their lives during the work, but in view of the magnitude of operations this was a comparatively

judgment on the case.

Kiwanis Hear About Detroit Convention

Address by Vice-President Reg Smith of Particular Interest and Value. Conditions Very Depressing in the City of Detroit.

In the absence of Dr. H. H. Moore, the president, the chair at the Kiwanis weekly luncheon on Monday was taken by Vice-president Reg. Smith.

The visitors for the day were Jos. Paul, a member of the Kiwanis at Ottawa, who was introduced by P. T. Molesley, and E. H. King, formerly a member of the Timmins Club who had to drop out for a time on account of other calls on his time.

Mr. King applied for re-instatement Monday and was heartily welcomed back to club membership.

The speaker for the day was Vice-president Reg. Smith, who gave a very interesting and valuable account of his visit to the Kiwanis International at Detroit. He covered the proceedings of the convention in very effective way. He made special reference to conditions as he found them in the city of Detroit. Conditions are very bad indeed in Detroit, Mr. Smith said, as he pictured the thousands of poor and unemployed in the city and the depressing conditions generally prevailing in that once prosperous city.

Mr. Smith thought that the conditions, seen by all the delegates, had a more or less depressing effect upon the convention.

J. D. Brady again asked for volunteers to supply motor cars to take children from the hospital this week after operations for removal of tonsils. The cars, of course, were forthcoming, this service being just another of the ways in which the Kiwanis by thought and kindness helps the community.

Sudbury Star:—A doctor mentions the danger of children swallowing coins. They are very rare to-day.

Sudbury Star:—There was more than a note of irony in the fact that Mr. Justice Raney should have been called upon to preside over a case in which the Toronto Evening Telegram was involved. Anyone who recalls the punishment which W. E. Raney, as a politician, received at the hands of the Evening Telegram newspaper, will applaud the spirit in which Hon. Justice W. E. Raney expressed a desire to be relieved of the necessity of sitting in judgment on the case.

High-Grade Samples from Week's Run of the Press

There are 5,000 tons of steel in the construction, and the use of 15,000,000 board feet of lumber was necessary.

The dam is 750 feet long, and the spillway 270 feet. Sixty tons of concrete were poured into excavated rock to give a foundation for the non-overflow gravity dam.

In deflecting the torrent to construct the dam and other works necessary, two immense tunnels had to be constructed through hard rock.

560,000 cubic yards of rock and 480,000 cubic yards of earth have been excavated in the work.
