**Business to Revive in Next Ninety Days**

So Says Hon. Chas. McCrea in Thoughtful Address at Picnic at Sudbury Last Week

Hon. Chas. McCrea is one of the public men who do not make statements lightly or without the most careful study and consideration. He is in very close touch with business and public affairs and so his words are entitled to special consideration. Accordingly there will be particular attention given to an address the Minister of Mines made last week at the annual picnic of Rev. Father J. H. Coallier, held near Sudbury.

"Be of good heart and good cheer," said Hon. Mr. McCrea. "I believe we are on the fairway towards recovery, and within the next ninety days business will take an upturn. I see more hope, and expectation, and promise for a revival of business this fall than I have seen for years."

"Faith in yourself and faith in your country will be rewarded, for no country will come back faster than this province and this Dominion of Canada," he declared.

The four factors making for a revival of business, Mr. McCrea said, are the Imperial Conference now in session at Ottawa, the Lausanne conference, the proposed international conference for the stabilization of money, and the American elections on November 4.

Spent \$35,000,000  
Canada and the Province of Ontario stand in a position superior to the other parts of the world in the depression, because of the co-operation of the governments and municipalities, in according help to those unable to weather the storm, he said.

The government, two years ago, before it realized the extent of the depression spent \$35,000,000 on public works he continued. Hindsight is truer than foresight, and mistakes are realized, but the money was all spent in the interests of the people.

"It is the policy of the government that nobody shall go hungry and that nobody will go without clothing, food or shelter," he said. "That does not mean all persons who ask for relief will be given it, but all in actual need, whether Catholic or Protestant, Liberal or Conservative, will receive aid, irrespective of class or creed. That is as it should be."

"The government has agreed to pay in Sudbury 80 per cent. of the cost of relief, and I think perhaps they may do a little better, for we realize that Sudbury was hit particularly hard."

"If for relief given, we ask you for a measured amount of work, we don't want you to grumble," he said. "When a man gives labor for what he gets, he can hold his head up with the rest of us."

**Combat Communism**  
Hon. Mr. McCrea also touched on the evils of communism and the alien agitators who have been so active attempting to create difficulty and trouble in the North Land during the

**Radium Plant Will Open Research Field**

Initial Capacity of New Radium Plant to be Ten Grammes Annually. Extension of Market Needed.

Writing from Ottawa last week Ed. Loney of The Sudbury Star says:—"Canada will have within a year its first commercial radium reduction plant as a result of plans now in final stages by Eldorado Gold Mines, Limited. The site of the proposed plant will be at Port Hope, Ontario, and it will have an initial productive capacity of 10 grammes of radium annually. These facts were learned from authoritative sources in the Capital today."

Ore for the production of this amount of radium will amount to about 100 or 150 tons and can be easily brought from Great Bear Lake, either by aeroplane or boat to Waterways, Alta., whence it can be shipped by rail to the new refinery.

This important development follows the practical completion of the detailed chemical process for reduction of the Great Bear Lake ores, undertaken some time ago by the Ore Dressing and Metallurgical branch of the Ottawa Department of Mines. Work on metallurgy of the uranium bearing pitchblende samples forwarded the department from Great Bear Lake has now reached a point where definite details of the metallurgy are available. The first samples have been reduced to the form of a concentrate, the only remaining process being the reduction of this product by crystallization to pure radium. The concentrate, a fine white powder, is confined within walls of lead, three-quarters of an inch thick in a safe in the Ore Dressing and Metallurgical Laboratories on Booth St.

**Need Extension of Market**  
The reduction of radium and the prospect of the early establishment of a commercial reduction plant opens up a very broad field of research with the object of finding uses for this newest of natural Canadian products. Belgian control of the market has resulted in a restricted range of uses, confined almost entirely to surgery and medicine. It is apparent that at prevailing prices of from \$50,000 to \$70,000 a gramme the market for radium will have to be extended in order to provide an outlet for the extensive production indicated by the known ore reserves of the Great Bear Lake field.

That the Canadian government has definitely abandoned any idea of "control" by commission of radium production from Great Bear Lake has also been learned. Some time ago discussion of this subject in the Senate led to widespread reports that the government was contemplating confiscation of the Eldorado and neighbouring discoveries. While no such action was proposed, the resulting agitation has set at rest any thought in the government's mind of interference in the sub-Arctic areas.

Toronto Globe:—From several lands the dentists are converging on Toronto. Now there arises the question as to whom the convention authorities will put in the chair.

Sudbury Star:—At a Progressive party nomination in South Huron recently one of the men nominated withdrew his name saying that he had a big farm and a young bride. Seems to us that has a Scriptural sound.

**Man Released From Jail To Attend Wife's Funeral**

Following arrangements made through the provincial secretary's department at Toronto, a man confined in Halleybury jail was allowed to go home last week under guard to attend his wife's funeral. The man was H. Sootheran, of Niagara Falls, who was sentenced a couple of weeks previously to a fine of \$1,000.00 and costs or three months in jail for an offence under the Liquor Control Act. He did not pay the fine and so was committed to the Halleybury jail. It is said that Mrs. Sootheran was in poor health when her husband started on the trip that ended him in trouble. At her death effort was made to have her husband released from custody long enough to allow him to attend the funeral. This was granted by the authorities. He was released temporarily from the district jail and escorted south by J. B. Anderson, one of the jail staff, who returned with him to Halleybury after the funeral. On several occasions there have been complaints regarding men in custody being held from the death-bed or funeral of loved ones. It is easy to arouse public sympathy in such cases. At the same time it should not be forgotten that this restraint from freedom of action is one of the penalties coming from breach of the law. Also it should be remembered that jailers have no authority to release prisoners in any way and that, of course, there are no funds available for the necessary expenses in such cases unless such funds are supplied. Last year there was a great howl over the case of a prisoner who was not allowed to attend the funeral of his father. It would be absurd surely to have prisoners no less confined than free men. On the other hand the Halleybury case suggests that the authorities have a heart and are ready enough even to stretch a point of law so that kindness may be shown. In the Halleybury case while the breach of the law was a serious one, the type of offence was not such as to prevent the prisoner from being used with humanitarian ideas in mind, and the authorities seemed to have been as sympathetic and as kindly as they could be.

**SAYS GOLF TOURNAMENT ONE OF BEST IN HISTORY OF NORTH**

Commenting on the Northern Ontario Golf tournament held at Timmins recently, The North Bay Nugget last week says:—

The Northern Ontario Golf Association tournament for the year 1932 has passed into history, and a new name, that of Bob Tomlinson, of Sudbury, has been inscribed on the championship trophy. This tournament at Timmins last week must be described as one of the most successful since the organization came into existence in 1926. The Timmins Golf Club and the executive of the association is to be congratulated on the splendid organization which enabled the event to pass off without a single hitch. To handle 68 players in the main through a qualifying round, three flights and a consolation event, is no mean feat on a nine hole course, but everything passed off like clock-work, and all events were decided by six o'clock on Saturday night. Among the 68 competitors there was some fine scoring on this difficult course, but many a player "wept bitter tears" over shots that found a resting place in serious trouble."

**THIS MONEY SAVING MEAL helps others eat, too...**

The wheat used for Shredded Wheat is Canada's leading product. And this all-family food costs so little. Eat Shredded Wheat daily and do a good turn for Canada.

**Sweet Odors Kill And Kill Quickly, Every Fly or Mosquito**

Science has discovered that a flower grown in Japan repels and kills winged insects. Now the extract of these flowers is employed to completely free your home—and keep it free—from these germ-bearing pests.

That flower extract is the basis of Fly-Tox, developed in Mellon Institute of Industrial Research by Rex Research Fellowship. Ten years and over \$100,000 have been spent by us in perfecting it.

The result is a perfumed mist, called Fly-Tox. Used as we direct, it creates in a room a pleasant cloud of vapor. An all-pervading mist, harmless to people, stainless to walls or furnishings. But that mist kills every insect that it touches. And they can't escape.

Think what that means to your home. Complete and constant protection from these germ-bearing pests. These insects, by their feet or stings, carry the germs of over 30 diseases. They carry these germs to your food or to blood streams. Many thousands of people—especially children—die from these infections every year. Fly-Tox offers you an easy, certain, economical way to complete protection.

great economy to you. You can not take chances in protection of your home. Get Fly-Tox at once. Sold everywhere. Harmless to people. Stainless. Fly-Tox is made in Canada.

**FLY-TOX ONLY**  
A Rex Research Product

Use Fly-Tox only, and always in the new-type Fly-Tox sprayer. Use it because of its marvelous efficiency. Every lot is tested on files in our laboratory. Use it because its extra strength means

**JUST IMAGINE! CHICAGO IS AFRAID OF SHOOTING HERE!**

An amusing story was given out at Cobalt last week. Three residents of Chicago were in Cobalt and in a restaurant there while enjoying their dinner they confided the fact that in their home town of Chicago they had been warned of the danger of being shot in this wild and woolly North. "You know," one of the two ladies in the Chicago party is quoted as saying, "they told us at Chicago to be sure to get an escort at North Bay if we were going to the wild mining camps up North, or we would be liable to be shot." People in Cobalt hearing the story were so overcome that they were apparently unable to say anything. The thought of anyone fearing being shot (except by some Southerner in mistake for game) in this North Country was paralyzing. That Chicago people should be concerned about the danger of being shot made matters all the more astounding. For once, Cobalt folks seemed to be speechless from amazement and amusement.

**Only GUTTA PERCHA has this EXTRA VALUE At no Extra Cost!**

**GUM CUSHIONS An Extra Value**  
Cushions of pure gum rubber moulded in between the plies of cord fabric, making a "bearing" that reduces friction and wear at these points as effectively as ball bearings do in machinery.

**An Interesting Accessory for You—FREE**  
Your Gutta Percha Dealer will give you FREE a handsome, polished metal service record to remind you when to change oil, when to lubricate the chassis, when to check tires, battery, etc. Conveniently small—can be fastened in your car in a fly—Ask him for it.
