Make Dreams Come True

A Beautiful Home
A trifle over a dollar a day for 120 months will provide \$5,000.00 cash, for a home, a farm, or a start in business.

A Retirement Fund
Beginning at age 30 invest \$32.50 a month for 240 months. Cease payments at age 50. Leave at interest and at age 65 you will have a retirement fund of over \$30,000.00

Free Booklet Explains Plan
NAME _____
STREET _____
P.O. BOX _____

A College Fund
Beginning at the birth of your child invest \$13.00 a month for 120 months. Cease payments and leave fund to accumulate at compound interest. Beginning at age eighteen it will deliver \$830 a year for four years.

Realize Profits
If you are receiving a monthly rent from your house deduct the cost and invest the balance. If the balance were \$26.00 a month, at the end of 120 months you would receive \$4,000

Pay Yourself Too
Are you merely a paymaster on pay day, paying everyone except yourself? Put yourself at the top, instead of the bottom of the list.

Need to Take Action of Some Sort for Young Folks

On a number of occasions The Advance editorially and otherwise has emphasized the necessity for some effective action to be taken to protect the interests of the boys and girls just leaving school. What prospects are there to-day for the young people who have reached the stage when they must go out in the world to earn their own living? How can the young people of to-day face life with hope? What is there for them to do? It is chiefly on account of these young people that The Advance has been so insistent on employment measures rather than relief. Direct relief will do nothing but harm to the young folks. Employment provided would give them a chance. How can the young people be expected to face life right with the handicapped start they are being handed at the present time?

It is pleasing to note that a number of newspapers have been hitting on this point. There may be a reason for the fact that the advocacy of something to be done to give the youth a better chance seems to come chiefly from the weekly newspapers. Is this something that the dailies have overlooked? There have been only a couple of daily papers that seem to have taken up the cudgels for the young people, while many of the weekly newspapers have stressed the need for a fair show for the boys and girls leaving school. In recent issues The Advance has quoted from The Brampton Conservator and other weeklies on the question. The following is what The Drumheller (Alberta) Mail has to say on the question:—

"With the arrival of school days, we wonder what will happen to all the young men and women who, in June, graduated from high schools and universities. During vacation period, this army of new unemployed have been unnoticed, but with children back at school, there will be a noticeable increase of youth lounging around at loose ends.

"One of the most serious problems of the day has yet to be faced—the handling of this youthful army of unemployed. To allow young men and women, fresh from school and college, with no outlet for their energies, is criminal. A large proportion of transients travelling from one end of Canada to the other, is made up of young men who have emerged from scholastic institutions in the past three years. Young men and women who today are unemployed, can easily become unemployable.

"It is futile to suggest that older men and women should be displaced to provide work for the younger generation. That is not the solution. Instead, governments would be well advised to establish supplementary technical courses in specified centres and offer free tuition with free accommodation, so that, when conditions do improve, this new army will be in a position to give efficient service to society."

Impressive Funeral of Kirkland Lake Citizen

The Northern News last week says:—"Relatives and friends of a young Kirkland Lake man who died from the effects of a friendly wrestling bout carried his body to the grave, last Sunday, amid impressive rites. The victim was Eino Lamstead, 23 years old, who suffered both a broken and a dislocated neck on Friday, August 19, while he was indulging in an impromptu tussle with a fellow Finn, Matti Rinta. The young man, who was an employee of the Wright-Hargreaves mine, succumbed in a Toronto hospital four days after the injury. Obsequies for the deceased were conducted here by Rev. Mr. Lehmann, of Timmings, in the absence of Rev. E. A. Kyllonen, the Finnish pastor in Kirkland Lake, who is on a vacation. Two of the deceased's brothers were among the pallbearers. They were, Sulo Lamstead, of Kirkland Lake, and Onni Lamstead, of Rouyn, Que., who formerly operated a cafe in Kirkland Lake. Others were Matti Rinta, Y. Vintter, H. Sankelo, and I. Ketoia. Burial was made in the Kirkland Lake cemetery. There were many wreaths, testifying to the esteem in which the youth was held by his compatriots. The Finnish youth lived at 46 Hudson Bay avenue. He was born in Finland, where his mother now resides. He had been employed at the Wright-Hargreaves mine for the last couple of years, and it was understood that he had planned to get married shortly. His injuries were such that no hope for his recovery were held out by Drs. C. M. Cameron and W. C. Rumball, who attended him. Under the circumstances, however, they sent him down to the Toronto General hospital which is elaborately equipped to handle such cases."

PROOF OF THE OLD SAYING THAT THE CAT CAME BACK

Everybody may have heard of the old saying that the cat came back, but a Cobalt man knows it for a fact. At least it has been proven to the extent of fifty-fifty. A Cobalt resident, who recently took his two cats to New Liskeard Beach, with the object of losing them there, was greatly surprised the other morning to discover that one of them had come back again. The animal had negotiated the nine miles along the main road without getting into trouble, although it occupied about seven days on the trip. When the owner arose a few days ago he found pussy waiting for him outside the house.

PUT HIM TO WORK

There never was a better time than right now for construction work of any kind. No matter how small or how large your project is you'll find it to your advantage to start work immediately.

Comments on Courtesy of Government Official

In view of the fact that criticism often has to be made of red tape and other things that seem out of line with the public advantage, it appears to be only fair to say a good word for a Government official when the facts warrant it. It will be surprising, too, how often the facts will support good words, if this attitude is adopted. "The Roving Reporter" of The Northern News takes this attitude in pleasing way and effectively says his good word in the following paragraph in last week's issue:—"The other day the Roving Reporter dropped in at the home of Dr. R. J. Neelands for an interview with his brother, C. F. Neelands, Deputy Provincial Secretary, who was here on a brief visit. Now interviews are interviews, and they can't be carried on without conversation. The visiting official was courteous itself, and seemed glad to tell of his work as the directing head of Ontario's jail and prison system. And it was not until the interview was terminated that the reporter learned that the Deputy Provincial Secretary had the day before undergone an operation for the removal of his tonsils—an operation that must have made it extremely difficult for him to talk. But he didn't complain, and gave his interviewer an altogether new impression of government officials. Incidentally, the reporter learned that besides the 47 county and district jails in Ontario the province also maintains two reformatories at Guelph and Mimico; a reformatory for women in Toronto (Mercer); and Industrial Farms at Burwash and Port William. In addition to that the province supervises the operation of two Industrial Refuges in Toronto, Catholic and Protestant."

Calgary Herald:—According to a statement at the convention of the Canadian Medical Association, Canadian doctors gave \$10,000,000 worth of free attention in 1930. This year the amount is expected to be trebled or quadrupled. This is a financial sacrifice which is not appreciated as it should be.

When a recipe calls for MILK Use ST. CHARLES

Whenever a recipe calls for milk it is a safe rule always to use Borden's St. Charles Evaporated Milk. St. Charles is economical, simple to use and definitely imparts an improved flavor to your cooking.

Only milk that has been subjected to the highest tests for purity and richness is good enough for acceptance in the St. Charles plants. Packed under the most sanitary conditions, St. Charles Milk represents the best evaporated milk you can buy—see that you ask for it by name.

Sees Romance in Work in the Night Hawk Lake Area

Several weeks ago The Advance had an article in reference to work being carried on in Macklem, German, Stock and Bond townships, in the Night Hawk Lake area. This article was criticized by some of those interested in the work though about the only thing that could be actually pointed out as incorrect was the spelling of the name of one of those interested. In subsequent issues of other newspapers appeared notices of the work in progress in the Night Hawk Lake area, the data given being little more than a re-phrasing of the information previously published in The Advance. The chief point made by The Advance was that electrical surveys in the area were being followed up by diamond drilling on one of the properties, and that the indications given by the electrical survey were hoped to be supported by the results of the diamond drilling. Since the announcement in The Advance, there has been considerable attention given to the area. The Northern Miner appears to be especially enthusiastic about the district, and there is evident reason for this. The Northern Miner very evidently is securing its information from those in close touch with the area, and this explains the fact that the articles in The Northern Miner give much the same data as those printed in The Advance. However, further credit is due to The Northern Miner for not slipping up, as The Advance did for once, on the spelling of a name. In an editorial note last week, The Northern Miner says:—"If the attempt now being made in the Eastern Porcupine field to find orebodies prove to be successful it will constitute the major romance of the Canadian mining industry. It is one thing to find an outcrop of rich ore in ordinary surface prospecting; it is quite another thing to discover values by geophysical inference through 100 ft. of clay and gravel. The attempt is a serious one, under excellent auspices and personal direction. The public has not been asked to share in what is quite obviously the longest chance ever taken in Canadian mining, so that there can be no criticism if the venture fails. We regard this effort seriously, because it is in the hands of an excellent geologist of proven ability and an expert geophysicist of world reputation. In Dr. Douglas G. Wright and Dr. Hans Lundberg there is an ideal combination of skill and experience and it is pleasing to record that they are adequately financed in their ambitious project."

Siscoe the Leader in Average Recovery

Production at Mine Near Amos Shows an Average Recovery of \$16.05 per Ton. Other Interesting Facts About Siscoe.

Recent reviews of Siscoe Gold Mines and the general standing and situation of the property, as culled from official information given out from time to time reveal a number of very interesting facts.

Evidence of the increasing richness of Siscoe ore discoveries at depth is clearly indicated in recent data covering the rise in average recovery from mine ore, which is now the highest among the steadily producing mines of Canada.

Handling an average of 180 tons of ore daily, the Siscoe operation resulted in a total output of bullion in July valued at \$89,056, without exchange, and representing an average recovery of \$16.05 per ton. During the first quarter of the current year, it is interesting to note, Siscoe's average recovery was around \$18.10 per ton, and for the entire six months averaged approximately \$16. This is a higher recovery per ton of ore handled than is obtained from the high grade Kirkland Lake mines, which heretofore have set the pace among Canadian gold producers.

Year's Output Up
With mill heads running nearly \$2,50 a ton higher than last year's average, indications point to Siscoe again showing a substantial gain in production figures for the year. In 1931, output amounted to \$742,811, or more than double the previous year's production. Up to the end of the June, 1932, total production amounted to more than \$500,000, and it is probable that by the end of the year more than \$1,000,000 will have been produced. This will bring the total value of bullion output from Siscoe up to approximately \$2,500,000 in four years of production, creating a record, it is believed, in the history of Canadian auriferous gold mining.

Out of an average monthly output of around \$90,000, more than 65 per cent., or about \$60,000, is available for profits, according to authoritative advice. By maintaining its present record for the remainder of the year Siscoe may be expected to show earnings of between \$700,000 and \$750,000 for the fiscal year 1932, and possibly even this estimate may be exceeded.

Option Cleaned Up
For some time it has been known that an option for 250,000 shares of Siscoe stock was outstanding in favour of N. A. Timmings, Thayer Lindsley and George Woods. On August 1, an announcement on behalf of the company stated that the option had taken up 83,334 shares of this block at an average price of 75 cents a share. It was also stated that the option agreement had consequently been terminated, leaving the company with a total of 419,935 shares in the treasury.

With 4,800,000 shares issued, indications are, therefore, to at least 16 cents a share. Two dividends of four cents each have already been paid this year.

Two of a Kind.

They met for the first time on the golf links, and fell to discussing their respective games.

"What kind of a game do you play?" asked one man.

"Oh, about 115" was the answer.

"What do you?"

"About 112 on a good day."

"Well, let's shoot at a dollar a stroke."

That night the "115" man told his wife that the "112" man was a crook.

"He made it in 78," was the complaint.

"What was your score?" sweetly inquired friend wife.

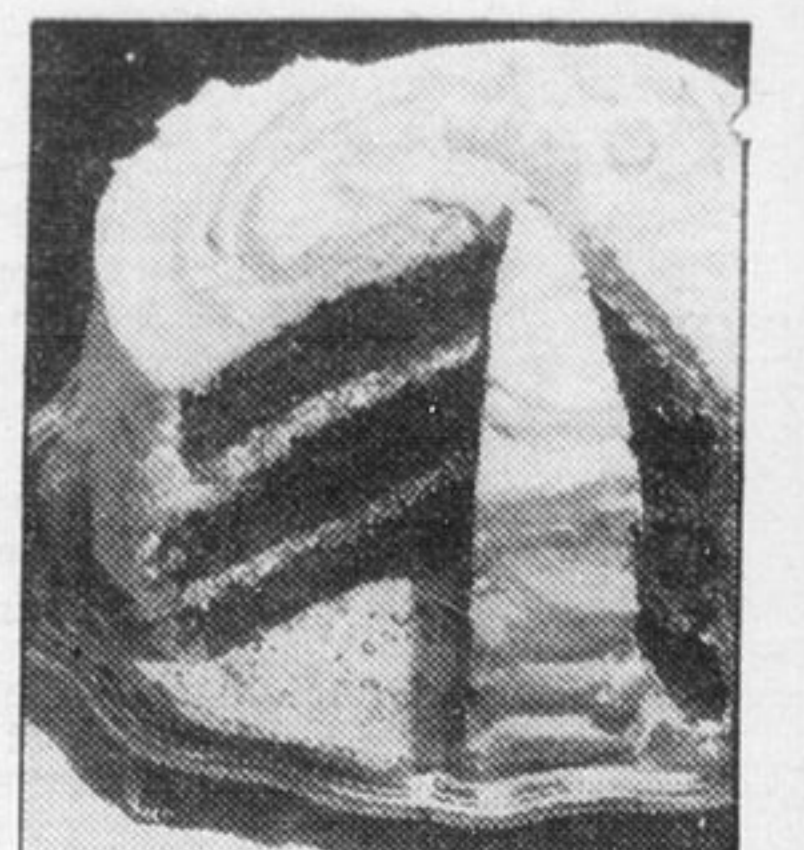

"Eighty."

Toronto Mail and Empire:—One flying record is assured for Col. George R. Hutchinson who is taking his children with him in his attempt to fly the Atlantic. His achievement marks the all-time high for folly.

Devil's Food Layer Cake

3/4 cup butter	1/4 teaspoon salt
1 1/2 cups sugar	3 teaspoons Magic Baking Powder
1 cup milk	1 cup pastry flour (or 2 cups and 3 table-spoons of bread flour)
2 1/2 cups pastry flour (or 2 cups and 3 table-spoons of bread flour)	1 teaspoon vanilla extract
	3 egg, unsweetened chocolate, melted

Cream butter thoroughly; add sugar slowly. Add beaten yolks; mix thoroughly. Add flour sifted with baking powder and salt, alternately with milk; add vanilla and melted chocolate. Fold in stiffly beaten egg whites. Put into 3 greased layer cake tins and bake in moderate oven at 350° F. about 30 minutes. When cool, put together and cover thickly with Chocolate or White Icing (recipes are in the Magic Cook Book).

Miss Gertrude Dutton tells why she makes her

Devil's Food Layer Cake

with Magic Baking Powder

"I know from experience," says the cookery expert of Western Home Monthly, "that Magic makes most baked dishes look and taste better. Its uniform leavening quality gives dependable baking results."

And Miss Dutton's praise of Magic is seconded by the majority of dietitians and cookery experts throughout the Dominion. They use Magic exclusively because they know it is pure, and always uniform.

Canadian housewives, too, prefer Magic. In fact, Magic outsells all other baking powders combined.

For luscious layer cakes, light, tender biscuits, delicious pastry—follow Miss Dutton's advice. Use Magic Baking Powder.

FREE COOK BOOK—When you bake at home, the new Magic Cook Book will give you dozens of recipes for delicious baked foods. Write to Standard Brands Ltd., Fraser Ave. and Liberty St., Toronto, Ontario.
