

Freed From Pain at 95

What a great thing it must be for this woman, after suffering from rheumatism for many years, to be free from pain again at her age. She writes:—"I should like to tell you that since I commenced taking Kruschen Salts two years ago, I am completely relieved of rheumatism, from which I had been a great sufferer for many years. I am now in my 95th year, and much appreciate being free from pain, which I attribute to the regular dose of Kruschen."—(Mrs. A. E. S.)

If only everyone would realize that the "little daily dose of Kruschen" is just as important to internal cleanliness as soap and water are to external cleanliness, there would soon be no more constipation, no more sluggish livers, no more rheumatism, gout or lumbago. Kruschen is a combination of six salts—each one is necessary to some particular organ of the body. Just what you need to persuade your system back into a healthy condition: very gently but very, very surely!

Never Die Tonic Is Made Entirely of Herbs and Barks Grown For You by Nature.

The Herb Never Die was given to us by nature for a purpose, yet it has taken us a long time to discover just what the active principles were. There are many other herbs unknown to-day to chemistry as to their value as a medicine, but eventually and most likely accidentally we will find the medicinal properties that will cure certain illnesses, just as the herb Never Die was discovered. All this came to the knowledge of chemists that the Indians and wild animals for hundreds of years past took this herb as their medicine. That being the case it must have had certain medicinal properties, if not why didn't they take any other weed or herb. Chemists started investigating, they prepared the herb and by a special process extracted the medicinal properties from same in a liquid form and now it is given to the sick in the form of a pleasant liquid and success far beyond imagination has been the result. Men and women and children have picked right up. It has put their organs in a healthy condition. It has made them as nature intended they should be. Never Die, The Indian Herb Tonic will repair your Stomach, Kidneys and Liver and will drive the poison out and create a healthy bowel movement. It will make you well and keep you well. Sold in Timmins by The Goldfield Drug Store only. In South Porcupine at Pearce & Sons. Don't neglect your health.

There Should be No Blue Book

Last week the writer of the column drew attention to the report going the rounds of the daily press that the Minister of Pensions had stated that his department would publish a Blue Book of Pension Administration. The book would contain the name and address of every returned soldier receiving a pension, his disability and the monthly pension payment. Various reasons were given in this column last week, showing why a protest should be raised to stop the publication of this book. The article was read with considerable interest by many and one reader stated that one very good point was missed. When pressed for his meaning he mentioned the fact that the list would be pounced upon by the drug and patent medicine men. When one considers this aspect of the case, he will see that this would undoubtedly be the case. The writer recalls a case of a ruptured returned soldier, who on discharge was given a 15 p.c. disability and a pension. He had not got settled very long in civilian life when his mail began to have booklets, pamphlets, and other trash, all stating that by taking this or wearing that, he could be cured of his rupture. For months this continued till the man in desperation had to resort to strong language and stern measures to have the nuisance stopped. One will ask, "How did these concerns get the particulars?" That is a mystery perhaps a little side graft did the trick, but the fact remains that in the years immediately following the World War veterans were pestered with these cure-alls for their ailments. The publication of the Blue Book on Pensions would revive this curse to a greater degree as the names would be public property and the concerns would be busy giving employment to stamp-lickers, etc. While on this subject perhaps another viewpoint would not be out of place. We will take for example a major or a colonel, badly wounded, his pension figures would be larger than the average, yet in civilian life he is on equal footing with the rest of us. The "Get-Rich-Quick" concerns would be after his hide. He would be put on every "Suckers List" in the country. What a varied mail he would receive! And what a rising of temper would be the outcome. Looking at the situation from all angles there can be no good come if the publication is allowed to go forward. It has been stated the printing of the Blue Book is because of fraud in securing pensions. The Government has the man's record from A to Z. This record tells more than the man know themselves and it is hard to understand how fraud could be committed. It would take up too lengthy an article to deal with this phase of how the returned soldier was kept track of, but this might prove interesting in a future issue. As stated last week, all branches of returned soldiers' organizations should lodge em-

phatic protest to stop this Blue Book on Pensions being published.

The Delayed Memorial

The writer of this column has had references in the past to the Vimy Memorial. However, it will be some time yet before it is finally completed. Word has just been received that by the end of 1934, the Memorial which will be the finest erected on the battlefield, will be completed. There is yet much, delicate carving to be done upon it. In view of the length of time taken to complete the work the following explanation has been issued by H. C. Osborne, secretary, Canadian Battlefield Memorial Commission. It says in part:—"In view of a certain misunderstanding which seems to exist, it may be well to explain that the final contract for the construction of this memorial was not let till March, 1926. Canada was allotted eight battlefield sites on which memorials might be erected. Seven of these have been completed long since. The sites vary from half an acre to six acres in extent. They have been beautifully planted and are objects of much admiration. Owing partly to its size and complexity, and partly to the condition of Vimy Ridge itself after the war, the Vimy Memorial was undertaken last. The preliminary work, which consumed a lot of time, included not only drawings and models, but the securing and preparation of ground and the construction of foundations of an elaborate character. At its lower part the memorial is 200 feet square. The height from the bottom of the front wall to the top of the pylons is about 135 feet. The specifications called for 6,000 tons of flawless stone, in blocks in unusually large size. A source of supply for such a stone, of an agreeable colour, hard enough to withstand the weather conditions and, at the same time, tractable enough for fine and sensitive carving, was not easy to find. After it was found, the large blocks of stone required could not be produced with the same speed as in the case of small stones for ordinary building. Nevertheless the period of construction for the monument, as a whole, will not be excessive for a work of this kind.

"Speaking generally, the design for this memorial was accepted by the Canadian Government upon the award of an international committee of judges. Its construction was confided to an honorary commission under the chairmanship of Hon. S. C. Mewburn. It became the duty of the commission to ensure that the memorial, in material and construction, approached as nearly as possible to perfection. It is a great work of art, and by it Canada will be judged. There is no more justification for hurrying such an undertaking unduly than there would be in building the chancel of a fine cathedral or any other work of art intended to be a national possession."

—W. A. Devine.

Cricket Game Here During the Week-end

Married vs. Single Members of the Club. Another Game at This Week-end Between Two Picked Sides.

An interesting game was played on the cyanide at the week-end between the married and single members of the recently organized Timmins Cricket Club. In order that everyone could have a game, it was decided to have thirteen members on each side, instead of the usual eleven.

There will be a game at the week-end between two picked sides. Any intending members are asked to be present. Game will commence at 2.30 p.m.

"Back to Land" Plan in Hearst District

New Settlers Being Located in the Hearst District. Six Families Placed Last Week. Under Direction Lands & Forests Dept.

The question is often asked these days as to how the "back to the land" movement inaugurated by Hon. W. A. Gordon, Minister of Colonization and Immigration in the Dominion Government, and backed also by the Department of Lands and Forests, is progressing so far as this North Land is concerned. It may be said that a number of settlers under the plan have been located in the Matheson area recently as noted by The Advance at the time. Then there are reports of others locating in the New Liskeard area. The latest reports are of six families settled not far from Hearst. These six families were under the personal conduct of W. Ferguson, assistant to the deputy minister of Lands and Forests. They arrived in Hearst last week and stayed at the hotels there for a day or two while arrangements were being made for their settlement on homesteads in the Hearst area. The Hearst correspondent of The Northern Tribune in reporting the arrival of the six families said:—"These families have been brought here under the new relief scheme just launched, which provides for their being placed on homesteads and outfitted with a year's requirements, including stock. The staff of the Forestry Branch has been busy today with trucks, moving these people and their effects out to their locations."

Not Less Than Year on High-Grade Count

Timmins Man who had Refining Outfit Pleads Guilty and Given Jail Term. Large Docket at Police Court This Week.

Despite the shortened week through the quiet holiday on Monday there was an imposing docket before Magistrate Atkinson at police court here this week, some of the cases being serious ones.

F. Valois, who had been remanded the past couple of weeks, this week pleaded guilty to illegally having gold ore and partly refined gold in his possession and was sentenced to not less than one year nor more than two years less one day in the Ontario Reformatory. When the police raided the premises occupied by Valois on Cedar street some weeks ago they found a quantity of gold ore, some partly refined gold and a small outfit for milling and refining gold.

For illegally having liquor not on his permit Frank Preshkus, Mountjoy street, paid \$100.00 and costs.

Eugene Leveille, of Sudbury, who was charged with breaking into a house on Cedar street, south, and taking a quantity of beer, was sentenced to thirty days at Halleybury. According to the evidence in the case he took the beer out into the bush and with a couple of acquaintances had consumed a case of the beer, less some five bottles when he was discovered and held till the police arrived.

Alex Korpil, McIntosh Springs, came in on No. 47 on Saturday evening, and was picked up by Sgt. Craik and Constable Hawley of the town police. Korpil had a suitcase containing seven quarts of moonshine and in a package three more gallon cans of the same kind of liquor. On a charge of illegal possession of liquor he was fined \$200.00 and costs for three months, apparently taking the latter alternative.

Mrs. Lenz Tom Stevenson, one of the group of gypsies in the district, faced two charges, one being a suggestion of fraud preferred by Irvin Buhe, of town, who claimed to have lost \$900.00 to her. Growing out of this charge there was another preferred by Chief Jones, who charged that she did "pretend to exercise or use witchcraft, sorcery, enchantment or conjuration, and did undertake to tell fortunes." She

IMPROVEMENT IN MEANS FOR FIGHTING FOREST FIRES

Forest fires in Canada are, to an increasing extent, being fought by specially designed apparatus. Light gasoline fire-pumps have been brought into use which will deliver a forceful stream through half a mile of hose, or, in favourable circumstances, a mile, and even farther. Fighting the fires at night is also greatly expedited by the use of lamps similar to those used by miners, which can be attached to the worker's cap, and so enable him to keep on working during the hours of darkness, at the very time when his work will have the greatest effect. In addition to this, the use of aircraft in the more remote forest areas, where communication and transportation facilities are not adequate, plays an important part in the suppression of fires, says the Forest Service, Department of the Interior.

HOCKEY RINK AT COBALT HAS PARTIAL COLLAPSE

The Halleyburian last week says:—"With a crack that startled occupants of nearby houses, part of the Cobalt rink collapsed about two o'clock yesterday afternoon, but arrangements

have been made for temporary repairs pending the next meeting of the town council, scheduled for September 12. The wall on the end nearer Commission street gave way, and four of the wooden "ribs" which hold up the roof came down. Present damage is confined to one end. Members of the council, with Fire Chief William Stinson, who is building inspector, made enquiry, and Bruno Gascon was instructed to take steps to prevent further damage meantime. The question of more extensive repairs will come up at the meeting on Monday week. The rink is municipally owned, and its affairs are administered by a commission, whose members also are being consulted. The building was erected 24 years ago, when professional hockey made its debut in Halleybury and Cobalt during the early boom days of this camp. Some years ago, the then owners were required to provide additional supports for the structure, and some further work was done after the municipality became the owners."

North Bay Nugget:—"The Vancouver Sun thinks that there is little profit in waiting about the modern youth. Correct and it doesn't matter whether you spell it prophet of profit either."

Teachers at the High and Technical School

The following is a list of the teachers at the Timmins High and Technical school, as starting the new term last week:—

High School—W. W. Tanner, B.A. principal; Miss E. L. Quinn, Miss E. L. Cunningham, Miss L. Bradley, F. Gauthier, Miss M. McNamara, Miss E. Briffett, J. G. Charlebois, Miss Tennant, Miss F. F. Evans, Miss A. Richards.

Technical School—A. A. Rose, B.A. Sc., director; Miss F. A. Twiss, J. Worthington, Miss A. Garrow, Miss J. E. Mulvihill, Jos. A. Broderick, F. E. Bird, W. B. Lyle, J. W. Fawcett.

TELEGRAMS AT COBALT TO BE HANDLED AT T. & N. O. RY.

A despatch last week from Cobalt says:—"A change in the handling of commercial telegraph messages is to be put into effect here within a few days and these, in future will be handled through W. G. E. Robinson, in charge of the ticket office at the T. & N. O. station. The present office will be closed, with Miss Marguerite Woodworth, operator there, going to Timmins in place of George Fenwick, second truck operator, in the gold town office."
