

Siscoe Gold Output \$822,530 This Year

Nine Months' Production This Year at the Siscoe Gold Mines Greater than for the Whole of Last Year.

For the nine months ending with September Siscoe Gold Mines treated 47,345 tons of ore and recovered bullion to the value of \$822,530, including premium. This compares with a total of 56,675 tons of ore treated for the whole of 1931 and recovery of \$742,811 and indicates that in the three quarters of the current year the company exceeded gold production for the 12 months of 1931 by \$89,719. The large improvement was due in part to the premium paid on gold this year, but chiefly was the result of the substantial increase in millheads.

In the month of September Siscoe officials report production including premium at \$69,182 compared with \$91,491 in the month immediately preced-

ing and \$89,055 in July. Recovery for the past month was about the lowest monthly rate for the year and millheads dropped from \$18.05 in August to \$15.46 in September with the mill treating 5,128 tons and 5,249 tons of ore respectively in the two months.

The sharp drop in heads last month, however, does not come as a surprise to those acquainted with Siscoe's general mine conditions. It has been pointed out in these columns on former occasions that it is practically impossible to establish heads at any given rate due to the erratic nature of the ore, which carries large quantities of free gold which does not permit of accurate sampling. While samples taken may show a grade of say \$14, it has often been found that actual recovery will run nearer \$16 or \$18 per ton.

If Siscoe maintains its nine-month average to the end of the year it will show total production in excess of \$1,000,000. Official announcement was made a short time ago to the effect that by next February a mill addition

will have been completed which will increase the capacity from the present rate of 175 tons to 225 tons per day and will enable the company to make even a better showing in 1933 than that for the current year.

Picked Strawberries Outside on October 9th

T. H. Torrance, of Timmins, proudly displayed a sealer full of fine big well-ripened strawberries on Monday of this week. He had picked them outside on Sunday, Oct. 9th, while visiting R. Smith in Shaw township. Mr. Torrance intended to pick more on Monday, for there were heaps of fine strawberries there, but in the meantime the snowfall made considerable difference. Mr. Smith planted the strawberry plants at his place in Shaw township a couple of years ago and they have come along in remarkable way. This year they were a great crop and the berries were remarkable for size and flavour. The crop that ripened last week were beautiful, big and well flavoured, and for strawberries grown in the North on Oct. 9th are specially worthy of note. There should be further interest in these fine strawberries in view of the fact that they were grown in Shaw township, which is not as thickly settled yet, as some other parts of the Porcupine camp, but where there are some gardens worthy of note.

SEVEN OTTAWA FAMILIES TAKE UP LAND IN THE NORTH

The Ottawa Journal on Friday last had the following:—"Setting out for Northern Ontario to make a new start in life, with Government assistance, heads of seven Ottawa families which have been on civic relief, left the Capital Thursday night at 9.30 o'clock on the Western train bound for Englehart to establish farms under the back-to-the-land movement. The group was made up of Alexander Hyndman, Thomas Hyndman, Arthur Aspek, William Hayes, Sr., William Hayes, Jr., Henry Chapman and William Hodges, all men who hope to make new homes for their families through the agency of the co-operative relief scheme to remove needy families from cities onto the farms. They were seen off at Union Station by Ald. George Sloan and Nelson Ogilvie, member and secretary of the local committee co-operating with the province in the back-to-the-land movement. After about 10 days or two weeks in the North, where a Government agent will assist them, the men are expected to have a house ready, and their families will be sent on to them."
