**SOURD ON THE WORLD?—THAT'S LIVER**  
Wake up your Liver Bile  
—No Calomel necessary

Many people who feel sour, sluggish and generally wretched make the mistake of taking salts, oil, mineral water, laxative candy or chewing gum, or rougeage which only move the bowels and ignore the liver.

What you need is to wake up your liver bile. Start your liver pouring the daily two pounds of liquid bile into your bowels. Get your stomach and intestines working as they should, once more.

Carrier's Little Liver Pills will soon fix you up. Purely vegetable. Safe. Quick. Ask for them by name. Refuse substitutes. 25c. at all druggists.

**Keep fit!**  
Headaches, heaviness, depression—banish them all by keeping your system clean! Take Eno every morning.

**Expect Gold Flood to Revive Business**

History Thought to be Working to Repeat Itself, Africa and Canada to Make New Records in the Production of Gold.

To the average man who has given some thoughtful study to the economic situation, there has appeared the idea that one of the greatest helps to the revival of business and industry seemed to lie in increased gold production. It has been believed by many that a notable increase in the production of gold meant the earlier turning of the famous "corner" around which may be found prosperity. In connection with the matter of increased gold production it is worthy of note that Canada is doing her share in fine fashion. The whole question is ably and extensively dealt with by The Northern Miner last week. The Northern Miner says:—

"Sufficient of the year has passed and unfolded the situation at the gold mines to permit The Northern Miner to say that Canadian gold production should be \$63,500,000 this year, and to forecast that 1933 gold production will be from \$68,500,000 to \$70,000,000.

"The 1932 expectation is in line with the detailed forecast which appeared in the Annual Number, June, 1932. The present forecast for 1933 is a little below the figure of \$72,900,000 anticipated at that time.

"The increase of 1933 over 1932 of from \$5,000,000 to \$6,500,000 compares with 1932's increase over 1931 of nearly \$8,000,000. The reason for the reduction in forecast figures, is due to some of the older mines not proceeding with the step-ups that had unofficially been expected of them, and to the fact that some of the newer mines have been, or are, retarded by delays in getting their machinery placed and turning over.

"Of next year's 38 major gold producers in Canada, 13 are brand new to the list of bullion makers. They are or will be the 1932-1933 products. It is to these mines rather to the older ones at Porcupine and Kirkland Lake that Canada must largely look for expansion in gold production in the next two or three years. By 1934 and 1935 these newcomers will begin to show

themselves in their real colours, and along about this time, too, some prospective producers that are now looming up should be getting into the picture.

"The course of the six major Canadian gold mines has much to do with production. They account this year for two-thirds of the Canadian output. Among them Wright-Hargreaves is the only one from which any large expansion can be counted on for the future, although we expect them all to do somewhat better next year than this. Lake Shore is capable of producing more than the million a month which gives it the place of Canada's largest gold producer, but those in control seem to have set their minds upon this figure as one which promises long life for the town for which Lake Shore is largely responsible. On the other hand it is good to know that slackening of the pace at the big mines is not at present in sight for any of them.

"Barring fires or other accidents or unprecedented forced inflation of commodity prices, gold production should advance each year in Canada for the next several years. Any ordinary rise in prices will not hamper this progress; the high price year of 1929 was the best our gold mines had enjoyed up to that time.

"Approximately one-third of Canada's production comes from mines which have come into existence since Porcupine and Kirkland Lake were found and developed. Many of these mines have shown great capacity for growth, and it is significant that one (Noranda) has become, almost overnight, the third largest gold producer in Canada.

It now seems plain that world production in 1932 will equal, and may rise above, the previous all-time figure.

**May Equal All-time Record**  
"Output is estimated at 465 to 475 millions, judging from results available up to the end of September. The estimate for 1932 compares with 441 millions in 1931, 419 millions in 1930, 404 millions in 1929, and 319 millions in 1922. The previous top was 468.7 millions in 1915.

"Important in the world situation is the gain shown in recent months by the United States. Very largely American improvement is due to summer-time production from placer fields. Straight gold mining is going ahead in the States just as in Canada, but the American output has been affected far more than ours by the curtailment of copper, lead and zinc mines, which formerly were major contributors to United States gold bullion. There is little danger that the United States will overtake Canada's long lead. So far this year their production is running 25% below Canada's. It hardly seems likely that the United States will have more than 46 or 47 millions of gold output against Canada's 63 millions.

**All Countries Contribute**  
"Practically every country is contributing to the advance in bullion turnover. The Transvaal has made several new high monthly records during the past year, and, before the year is finished, ought to create a new high at a million ounces a month, and show for the year an increase of five per cent. over last year's figure. Rand increases are largely accomplished by greater labor efficiency and mechanical improvements, as new mines have not been coming in much faster than old ones have been giving out.

"From the East, chiefly India, the and 400 million dollars' worth of gold, world will receive in 1932 between 300 some of it in the original boxes of about a half century ago. There has not been such a pouring out of gold from India since early times. The East seldom before gave up its gold except to looting armies. The premium has sent it to London.

**Trade Uses Decline**  
"These past three years the amount of gold going into jewelry, or to India, has greatly reduced. Formerly about 200 millions a year disappeared in this fashion. Now, with nobody carrying the turnip-sized gold watches of our fathers, with platinum more favored than gold for feminine adornment, with the East selling instead of buying gold, the commercial take of the yellow metal will probably not run more than 100 millions. The net result for 1932 will be that 700 to 800 millions, or more, of new gold will be made available to the world for money metal, in comparison with 200 millions a year average for the previous eight years.

"The world is indeed becoming flooded with gold. Money is becoming so cheap that many European banks are charging people for making deposits, and governments are borrowing at the lowest rate on record. U.S. Treasury bills are paying only one-tenth of one per cent. interest per annum.

"While the world is holding conferences and learned experts are furrowing their brows over economic mysteries, the prospector and miner are solving the world's troubles.

**Historical Parallels**  
"In times past an ample supply of gold has always meant higher prices for commodities. Long-lasting depressions have been ended by great gold discoveries. On the other side of the picture, periods of gold scarcity have meant periods of depressed prices. How these gold laws work is beyond the knowledge of the most intelligent to explain in detail, yet they do work. Following upon the discovery of gold in California in 1848, and in Australia two years later, prices in the United States rose steadily from a level of 84 in 1851 to 114 in 1854; the whole world felt the flush of prosperity and as gold production mounted it continued. But by 1873 new gold began to diminish in flow, in comparison with the increase in business, and prices began falling and by 1893 there had developed a major panic. Then on the Rand immense production of gold commenced to come in and the world metal started to penetrate through the world, leading to an era of prosperity.

**You, too, can have a Beautiful Skin**

if you go about it the right way  
"I had skin eruptions that made me ashamed. I also had mean headaches. I am very grateful to Fruit-a-tives. My skin is lovely now, and I am very happy."  
—Miss A. D., Buchanan, Sask.

**Fruit-a-tives**  
MAKE AND KEEP YOU WELL

and rising prices which continued until the Great War.

"History records several eras when either lack of gold, or its plenitude, meant poverty of prosperity. When the gold hoard in the Roman Empire was dissipated, largely returning to the East from whence it came, Europe plunged into the Dark Ages; prices fell away because of the scarcity of money, and trade sunk to barter of goods between one village and another. Then came Columbus. In the first 150 years of the flooding of Europe with the gold and silver torn by the Spaniards from the New World, trade had enormously expanded and prices had become three times what they had been at the discovery of America.

**Gold Hoarding Ceases**  
"And now gold is flowing in ever rising streams into the financial treasure chests of the world, from the peaceful conquest of Canada and other new lands. Except in France the hoarding of gold has ceased. The United States is speeding the conversion of its bullion into credit. At the same time the need for gold to finance trade has greatly declined. For instance, five years ago 600 million dollars was needed to buy the wheat crop in the Canadian West. Today the same crop can be bought for 260 millions, or less. That's an example.

"Gold is not going to become a drug on the market because the year 1932 is seeing the greatest flood in the yellow metal that the world has yet experienced and because, through discovery and invention, the stream from the mines promises to rise for many years. Uses will be found for it.

"The new gold will finance another long era of world prosperity. The world is not preparing to drop into the black pit of poverty. On the contrary, we may be engaged before we know it, in worrying about the dangers of wild speculation."

**The Attitude of Canada on a Simple Suggestion**

William G. McAdoo is credited with making the proposal that to pay war debts Great Britain and France should give up to the United States everything they have in the way of colonies on the American continent. Canada, not being a colony, is kindly exempted by the McAdoo man. President Ten Eyck, of the New York State Waterways Association, is quoted as proposing that Britain cede part of Canada to the United States in payment of war debts. It may well be asked what Canadians think of such propositions, providing they consider them worth thinking about at all.

Here is what The Sudbury Star suggests as to the attitude of Canada:—"Lowell Thomas, after relating details of the proposal of President Ten Eyck, of the New York State Waterways Association, for England to trade part of Canada for part of her war debts closed his news brief with the remark: "We wonder what Canada will have to say to that, if anything." Most Canadians, we suspect, will remain speechless."

The Advance does not think The Star quite explains the speechlessness of the Canadians in this case. A story told some years ago by Hon. Hugh Guthrie, now Minister of Justice in the R. B. Bennett cabinet, illustrated the attitude of Canadians perhaps a little better.

Hon. Mr. Guthrie had just been appointed to the Meighan Cabinet and after a few days of strenuous labour he went to his old home section for a visit. At the station he met the old stage driver and went with him on the stage passing the old farm home. He talked to the stage driver, a character he had known from his boyhood and who had known him years before war was all well. "How are all the folks?" was all well. "How are all the folks?" was all well. Then, "What did they say?" asked the new Cabinet Minister. "Oh, they didn't say anything," replied the stage driver. "They just laughed."

The folks that laughed at Hon. Mr. Guthrie's appointment did not show either judgment or vision, but the chances are that the story all through is but a sample of Hon. Mr. Guthrie's Scottish humour. However careful the Scot may be about other expenses, he is always ready for a joke at his own expense.

As to these wild proposals to barter or trade Canada, the idea is so ridiculous and impossible that Canadians usually "do not say anything." "They just laugh!"

**Finds Seven Pearls in His Oyster Stew**

T. & N. O. Dining Car Steward Discovers Gems in Oysters at his Lunch Table. Another Reason the Diner Should Run to Timmins.

When the T. & N. O. Railway changed the run of the diner on No. 47, stopping that cafe car at Swastika on its way north, instead of allowing it to continue coming through to Timmins there was very strong objection from Timmins. The fact that people coming in to Timmins from the South would be in good time for supper, or dinner, (according to their social aspirations), and that those leaving here for the South could have dinner, or lunch (as may be) before they left home, seemed like poor consolation for the discontinuance of the diner on this part of the run. There were protests from the Timmins board of trade and from other bodies and individuals about the matter. But the worst of the matter was not known or there might have been a revolution, or something. Now, the whole bitter truth is out—they are serving pearls with their oysters on the T. & N. O. diner, and the diner does not come any farther north than Swastika. Worse still, if possible, the pearls go to the dining car steward. Here is the story as told by The North Bay Nugget last week:—

**Finds Seven Pearls in His Oyster Stew**

What started out as a mere oyster stew lunch, ended up in a successful pearl hunting expedition—and right at his own lunch table at that—for Gordon O'Toole, 103 Main street, east, dining car steward on the T. & N. O. Railway, on Thursday last week. The bag consisted of the one large mother pearl, and six small seed pearls, all extracted from the same oyster. O'Toole, who makes the run from North Bay to Swastika, made the lucky "strike" while en route north after sitting down to lunch, with a feed of stewed oysters to appease his appetite. The largest pearl of the seven, he stated, is about the size of a small marble. No estimate of their value could be given by local jewelers, however, so O'Toole intends visiting one of the larger centres to the south in the near future to ascertain this.

**LIQUIDATOR NAMED FOR ABITIBI POWER & PAPER CO.**

F. C. Clarkson of Toronto, was on Thursday last appointed permanent liquidator of the Abitibi Power and Paper Company, following his appointment the day previous by Irwin Hilliard, K.C., Master of the Supreme Court of Ontario. Mr. Clarkson is brother of G. T. Clarkson, receiver for the company.

He had given the matter a great deal of consideration, the master said, and he thought Mr. Clarkson's appointment would be in the best interests of the company.

W. R. Sweeney, shareholder, charged there was a family compact in the matter, and feared a conflict of interest. Mr. Hilliard said he did not anticipate any conflict.

**PRAIRIE CHICKENS RE-VISIT KIRKLAND AFTER 38 YEARS**

The Northern News last week says: "While here this week on one of his official visits, Game Warden W. G. Armstrong, of New Liskeard, answered a question that has puzzled Northern Ontario people for weeks—are they Arctic Grouse, Ptarmigan, or Pinnated Grouse? "They're Sharp-Tailed Grouse better known as Prairie Chicken," is the way the Game Warden identified an invading army of birds that has come into the Temiskaming area from the Canadian Northwest. Thirty-eight years ago, the Warden recalled, a similar invasion was recorded in these parts. Thousands of the birds have located in the district. In Elk Lake, some days ago, the feathered army moved into the village in such numbers that they cluttered up the house-tops and telephone wires. The birds are reported as far east as Noranda and Aldermac, and as far south as Temagami. No one seems to know what brought them this far east and south. Incidentally, it was learned, the birds are protected by law, and cannot legally be shot, now that the grouse-shooting season has ended."

Toronto Mail and Empire:—A New Jersey citizen sued his wife's father for the alienation of her affections and was awarded damages of six cents. Since the presumption is that her father enjoyed the daughter's affections before the appearance of the husband it must have been difficult to prove that they had been alienated.

**Well Children**

"Occasionally I give each of my five children BABY'S OWN TABLETS—I am sure that is why they never have any serious illness," writes Mrs. George Morley, Yarker, Ont. This sound advice is passed on to all Mothers. BABY'S OWN TABLETS can be given with complete safety to the youngest and most delicate child—see analyst's statement in each 25c package. Recommended by mothers for teething troubles, simple fevers, colic, digestive disorders, constipation, fretfulness. Easy to take as candy.

**It's Better and You can Prove it**

**TRY THESE THREE TESTS and Prove for Yourself that ST. CHARLES is better!**

- 1—Open a can of Borden's St. Charles Evaporated Milk. Note the creamy color—the smooth consistency, the pure, fresh flavor.
- 2—Make cream sauce with Borden's St. Charles. That pure, fresh St. Charles flavor gives greater deliciousness.
- 3—Have a cup of tea or coffee with Borden's St. Charles Evaporated Milk to "cream" it. St. Charles blends in smoothly, tastes fresh and rich.

**ST. CHARLES Evaporated Milk is pure whole country milk, with nothing added and 60% of the natural water removed. Then it is sterilized, after being sealed in the tin, to assure perfect, sweet flavor and absolute purity.**

Back of this Borden quality, a staff of milk experts are working day after day—inspecting the farms which supply the milk—seeing that the dairies are always shining and spotless—that the pastures are good and the cows in the finest condition.

That is why St. Charles tastes so fresh and sweet. Why it is better for coffee, tea and for all cooking purposes, where you would normally use milk. St. Charles is better—ask for it.

Send for this FREE cook book. Mail us the attached coupon and we will send "The Good Provider" by return—it contains nearly 200 wonderful tested recipes that you and your family will delight in.
