Children's Carnival at South Porcupine

Interesting Event at South Porcupine Rink on Saturday Last. Porcupine Skiers win Honours in Sudbury Event. Police Make Clean-up at South Porcupine.

South Porcupine, March 14th, 1933. Special to The Advance. Born—in Toronto on Friday March 10th, to Dr. and Mrs. Harper (nee Carmel Laforest)—a son. Congratulations are being tendered the happy grandparents, Mr. and Mrs. Fred Laforest on the arrival of their first grandchild.

Mrs. James Houston has returned from her parents' home at Ayr, Ontario, and will remain here for two or three weeks to dispose of her furniture before leaving to make her home permanently at Ayr.

Messrs Eugenio Tiovesan and Dominic Gustavo Arata are sailing from New York on March 18th on the steamship Conti di Savata.

The skiers who went from here to Sudbury were not in as good shape as hoped at Sudbury after their long trip down but showed up well a week later at Long Lake. They made good time both going down and coming back. In the return trip on the last day over sixty miles was covered. Among those skiing down and back on the trip was a boy of seventeen and a man of fifty. At Long Lake the winners of the skiing meet held under the auspices of the Workers' Sport Association were—First and championship (30 k.m.), H. Tuutela, South Porcupine, time 2 hours, 4 minutes 23 seconds; second, A. Back, Sudbury, 2 hours, 5 minutes, 27 seconds; third, P. Johnson, Sudbury, 2 hours, 6 minutes, 54 seconds; fourth, L. Huuki, Sudbury, 2 hours, 10 minutes, 57 seconds. Juniors under 18 years, 10 k.m., first, Toivo Parkko, South Porcupine, 28 minutes, 32 seconds; T. Bruce, Long Lake, 29 minutes, 43 seconds. Senior men over 45 years, 10 k.m., first and championship, L. Tanner, Timmins, 47 minutes, 17 seconds; second, L. Lanto, Long Lake, 59 minutes, 10 seconds.

On Saturday afternoon at the skating rink the Children's Carnival was held. Those winning prizes were—Most original, Norbetine Ferrigan, "A Depression" urchin; girls' fancy dress, 1st, Vieno Kauto, as a Victorian lassie in a very pretty creation of yellow and white with becoming pokebonnet; second, Della St. Paul, as an Eskimo in parka bloomers and moccasins of caribou fur; first girls' comic, Helen Hanberry, as St. Patrick, a study in green, with tall green hat; second, girls' comic, Patricia Laforest, as Mrs. She and Stella Brown, were Mr. and Mrs. and had a go-cart with a tiny Miss in it, which Mr. took care of while Mrs. skated around among her friends and showed the prize she won; first, boys' fancy, Harry Disher, as a pirate; second, Lloyd Owens, as a ghost; first boys' comic, Bobby Pearce, as a Remyer Baby; second, boys' comic, Billie Miller, as a clown. Other costumes worthy of mention were—Marrycotie Ewing as an Easter rabbit; Harry Cott was Santa Claus; Evelyn Disher, a newsboy; Betty Couch, with her laundry bag, made a fun-producing Chinaman; Joyce Coffey made a pretty Bo-Peep; Shirley Coffey was Little Boy Blue; Jean Gallai was an old-fashioned woman, and Evalina Spadafore was a gypsy. The ice was good and the kiddies thoroughly enjoyed having their very own carnival.

Mr. Peter Armstrong, of Monteith, took the service in St. Paul's Anglican church here on Sunday as Archdeacon Woodall was in Cochrane for the ordination of a young Indian from the more northern parts of the Bishopric of Moosonee who is entering into the work of the Anglican church.

Mr. George Harvey is able to be out of the hospital now and is around meeting old friends who are rejoiced to see him so well recovered after his four months in the hospital. Going to the hospital to be operated on for appendicitis last December it was found when the incision was made that the appendix was not in its natural place but was over on the left side instead and a second incision had to be made. The appendix had already burst and very little hope was held out for his recovery but a life of clean young manhood came to his aid and although it has been a long uphill road back to health, those who know him are delighted to see him making such good recovery.

Mrs. Romanuck and two children have returned after spending the winter with relatives in Western Canada. Dr. McLaren returned this week from a vacation spent in Bermuda and is much improved in health.

Considerable interest is being taken in a snowmobile, called the "Arctic Traveller" by its inventor, Vladimir Hrynuk, of Commercial avenue. He and Harry Martin have constructed it and tried it out. It has wings which helps it over snowdrifts and difficult places.

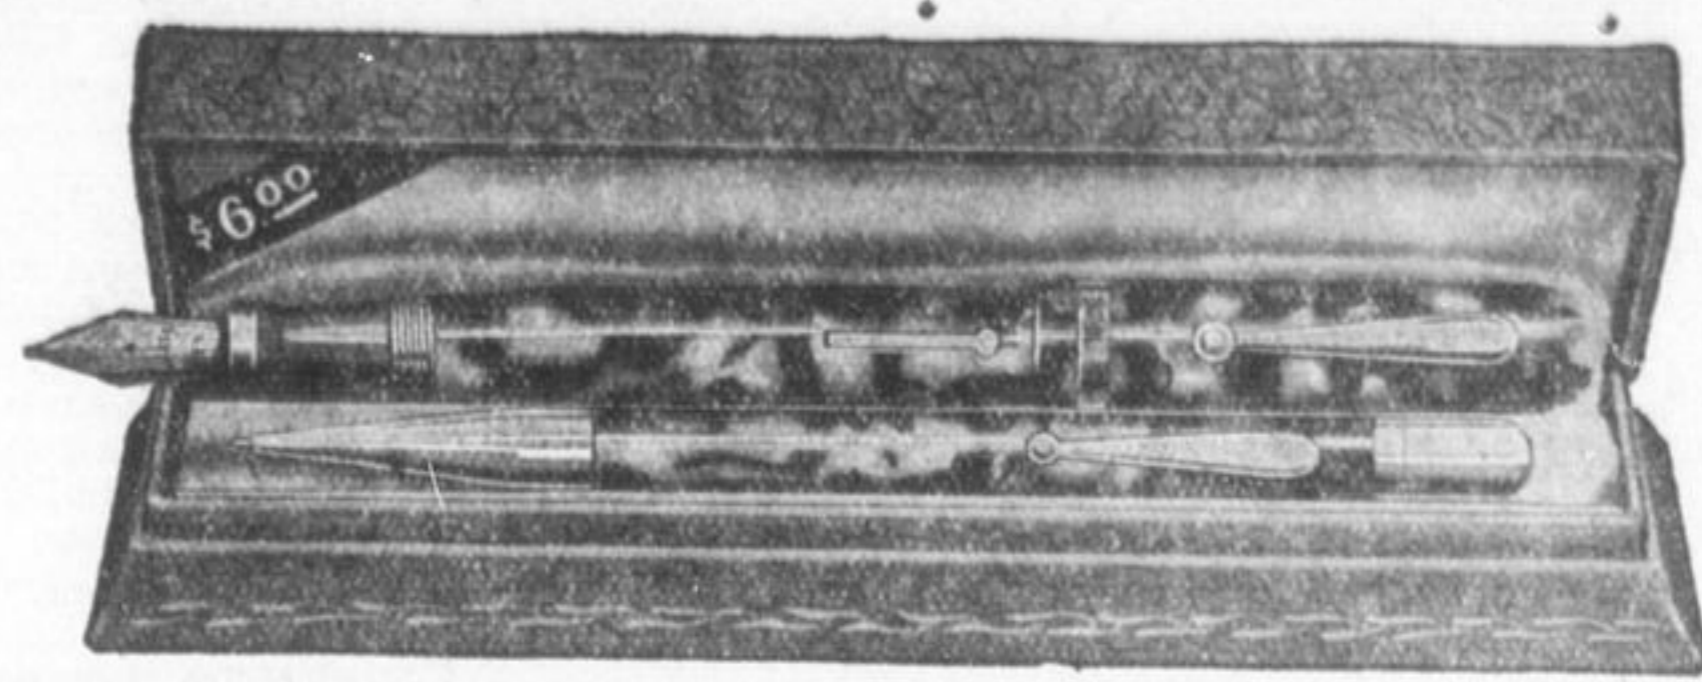

In the Toronto Daily Star of March 9th in an article by Bill Cole, soccer writer for that paper, we were glad to see special mention made of the work of Jimmie Tennant in soccer football in the Old Country. Tennant was an outstanding player on the Dome football team last season. He left in the fall to join Cardiff City in Wales. In a game against Norwich he won his spurs by his work on the right wing for Cardiff and some of the Old Country papers contained glowing accounts of his work there. He has since joined "Hearts" a Scottish team that are now in the semi-finals of the Scottish Cup series.

We hear that Mr. W. A. Christie of the Dome who was operated on this week is making good recovery. The games for the Sky trophy competition at the curling rink were concluded on March 9th, J. J. Gallagher's rink winning the trophy. On March 6th Basso's rink won from Miller 12-8. On March 7th, Spiers won from Costain 9-8; Gallagher from Cantor 9-7. In the semi-finals on March 8th Fair-

GOOD ONLY FOR THIS SATURDAY This Certificate is Worth \$5.02

hurst won from Basso 10-8, and Gallagher from Spiers 12-8. In the last game three men played to a rink, the lead in each case throwing four times. The rinks going into the finals on March 9th were Fairhurst, skip, Stone, vice-skip, Evans, lead, Alexander, second, against Gallagher, skip, Strange, vice, Dixon, lead, and MacDonald, second, the latter rink winning out in a score 10-8.

There is now a bonspiel being held, seven rinks competing, each rink to play six games. The skips of the competing rinks are Gallagher, Basso, Fairhurst, Miller, Smith and Costain.

In the police court on Tuesday a man from Schumacher was charged with selling liquor. Among the exhibits in the case were one full case of beer, one case containing seven bottles, a large bottle of whisky and glasses both large and small. A man from South Porcupine testified he had got beer there the night before and had paid for it. His partner no got money, just drink beer he buy. The partner also testified as to getting the beer and money being paid for it. The constable told of going to the house where accused stayed about nine-thirty. There was a man going up the stair and when he saw who was there he hurried up and pressed a button in the door of a room at the top of the stair. When the constable got there he had to break in the door to force an entrance. He found accused and other men there rustling to get out. He also found the liquor. Accused claimed he was treating the men but he had the money in his pos-

session that had been paid to him. He was given three months. A young woman, an inmate of the same house, was also sentenced to three months for making her room a common bawdy house. Money which had been marked earlier in the evening was found in her possession. She had come from Rouyn about two weeks before and was acting as a waitress in the place. Upon her arrest she had admitted canvassing men in the dining room, although on the witness stand she denied it. The boarding house was declared a public place for a year, liquor not being allowed in any of the rooms. The mistress of the house in trying to explain the system of electric bells and push-buttons in the house, which had figured in each case, upon the arrival of the police, said they were a sort of burglar alarm as there had been thieving in some of the rooms. A case of non-support was taken up in closed court, the wife claiming that the husband was spending his time with another woman. The daughter, a young woman, also testified as to the frequency with which he was in the other woman's company and the way he neglected them at his own home. The man had admitted before policemen who were called to the home that he had been staying with the other woman, a married woman with children, and would continue to do so. The wife was on the verge of nervous collapse and the court had to wait for some time for her to be able to go on with her evidence. They felt she was not in a very good state to give evidence but she begged to be allowed

to proceed and have it over with. There was some discussion as to what allowance or alimony could be claimed in such a case and decision was reserved for a week.

Born—in South Porcupine on March 1st, to Mr. and Mrs. Nicol Rechitnyk, Commercial avenue,—a son.

"The top o' the mornin' to ye" for Friday, March 17th. And be sure to moike it a folne evenin', too, for that purty colleen o' yours and be takin' her to the St. Patrick's ball in the High School hall, South Porcupine, under the auspices of the curling club. The Merry-makers' orchestra will supply the music and special St. Patrick numbers will be featured.

There will be a Shamrock tea given at the home of Mrs. F. H. Hall at the Dome on Friday, March 17th, beginning at three o'clock. There is also to be a sale of home baking. It is being given in aid of the United Church, South Porcupine, and a cordial welcome will be extended to all wishing to come.

Kingston Whig-Standard.—The nations realize they must trust one another. All they ask is that the other fellow risk it first.

Financial Post.—C. C. F. speakers claim that man cannot get rich honestly. This is a libel on one of the most prominent of British Socialists now visiting Canada, who is not only rich but has a title. He came by both honestly. He married the fortune and took the title to give the Socialists representation in the Lords.

Successful Year in 1932 for the Canada Northern Power

Substantial Increases During 1932 in All Departments According to Annual Report Just Issued. Company Earned Ninety Cents per share on Common Stock as Against 78 Cents in 1931. Some of the Specially Interesting Features of the Report for 1932.

Recording substantial increases in gross and net earnings, power output, and number of customers served, the annual report of Canada Northern Power Corporation, now going forward to shareholders, reviews the most satisfactory year yet experienced by this utility company.

Gross revenues for the year amounted to \$3,456,772 as compared with \$3,341,964 in 1931. After deducting expenses, maintenance and taxes, net earnings amounted to \$2,389,081, an increase of \$108,977 over the net for the previous year. Actual operating expenses and maintenance were lower than the previous year but taxes were increased nearly 10 per cent, from \$335,000 to \$365,191. After allowance for bad debts of \$4,141 and bond interest charges of \$960,189, which sum included the heavy premium on U.S. funds amounting to \$88,950, there remained a surplus for the year of \$1,424,751 as against a comparative figure of \$1,368,771. Preferred and common dividends of subsidiary companies amounting to \$99,201 left a balance of \$1,325,551 applicable to depreciation reserve and Canada Northern Power preferred and common shares.

The report shows the regular allowance for depreciation of \$600,000, the same figure as in the previous three years. After deducting all prior charges, including depreciation, there remained a balance of \$725,551, equal to about \$13.20 per share on the 7 p.c. preferred stock of Canada Northern, as compared with \$12.13 the previous year. Preferred dividends amounting to \$385,000 were paid, leaving the sum of \$340,551 applicable to Canada Northern common stock, of which there are 375,000 shares outstanding. This represents earnings of 90c a share, as compared with 78c in 1931, and 68c in 1930.

The expansion in operations achieved during the year is indicated by the fact that 1,109 new customers were connected to the company's system, bringing the total to 12,516 as at December 31st last. Power output at 441,150,290 k.w.h. was 22,933,480 greater than the output for the previous year. By the construction during the year of a new 110,000 volt transmission line from the Provencer switching station, the Kirkland Lake gold field is now supplied with power over 5 transmission lines, thus greatly adding to the safeguards ensuring dependable service. A 12,000 volt line to the new Matachewan gold field was also completed during the year. Since the close of the fiscal year the company has received a contract to supply power to the Beattie gold mine.

Income account figures for the past 2 years compare as follows:

	1932	1931
Elec. Rev.	\$3,423,978	\$3,221,832
(a) Misc. Rev.	32,794	123,132
Gross Rev.	\$3,456,772	\$3,341,964
Oper. Exp.	590,060	595,689
Maintenance	112,440	131,171
Taxes	365,191	335,000
Net Earnings	\$2,389,081	\$2,280,104
Bad Debts	4,141	9,031
Interest	960,189	902,302

	1932	1931
Depreciation	600,000	600,000
Balance	824,751	768,771
Pref. dividends	472,960	474,582
Com. dividends	311,241	311,589
Surp. for year	40,550	617,400
Minor interest	1,238	1,974
Prev. surplus	1,337,393	1,355,021
Total surplus	\$1,378,071	\$1,339,595

In the balance sheet, total assets are shown at \$35,335,104 as against a comparative figure of \$34,725,388. Net working capital shows improvement at \$285,439, current assets being higher at \$1,040,004 from \$725,481, and current liabilities only \$22,671 higher at \$754,569.

Balance sheet figures are as follows:

ASSETS		1932	1931

Surplus	1,378,070	1,339,594	
Totals	\$35,335,104	\$34,725,388	

In presenting the report to shareholders, A. J. Nesbitt, the president:

"The demand for power for the mines continues to grow, owing to the expansion in the scope of operations at the mines of the Kirkland Lake, Porcupine and Noranda-Rouyn districts, augmented by the growth in the domestic demand in the towns served by your company. This is clearly shown by the increase in the number of customers on our lines, which has grown from 11,407 at the end of 1931 to 12,516 on December 31st, 1932 a gain of 1,109 during the year.

"The year 1932 has been marked by the construction of another 110,000 volt transmission line from Provencer Switching Station in Boischatel township, Quebec, to Kirkland Lake. By

the placing in service of this line, the Kirkland Lake Camp is now supplied with power over five transmission lines, thus greatly adding to the safeguards ensuring perfect service.

"Connection was also made in the early part of the year between our Quinze-Schumacher 110,000 volt line and the Matachewan gold area, by the construction of a 12,000 volt line from High Falls to the property of Ashley Gold Mines, operated by Mining Corporation of Canada. This extension entailed the construction of a substation at High Falls.

"A short extension was added to our distribution system in the township of Tadoussac, by which the section of Schumacher known as Gold Centre has been provided with electric service.

"In March, 1932, power was turned on at the Ashley Gold Mines in the Matachewan area, thus adding a new mining camp to those served by your company. This property became a gold producer on completion of the mill in September.

"In Quebec, Granada Gold Mines, Limited, also commenced to utilize power from our lines early in the year.

"While not strictly new power customers, as power was being used for mining purposes, Toburn Mines, whose property lies in the eastern end of the Kirkland Lake Camp, and Hayden Gold Mines, located in the Porcupine Camp, both placed their mills in operation during 1932.

"A great deal of exploration and development work is taking place all over the Northern Quebec and Ontario mining district, but particularly in Quebec, and your company is keeping in close contact with the situation with a view to taking care of the market by extending its lines whenever the situation warrants.

"Sales in merchandise department were again satisfactory, amounting to the substantial sum of \$121,750.85. As prices of all appliances were greatly reduced, this figure represents a greater volume of merchandise than in past years, and naturally accounts for a considerable portion of the gain in our domestic demand for power. We also have the satisfaction of knowing that our customers are supplied with efficient equipment.

"As our bond interest is payable in New York, we suffered a charge of \$88,950 owing to exchange on the payments which became due on May 1st and November 1st, this is shown in increased interest charges for the year.

"The problem of increased taxation again forcibly brings up the injustice of the present policy of discrimination against privately owned public utilities such as ours, whereby Federal income taxes, from which publicly owned systems are exempt, are imposed upon our company and its customers. In these days, when governments are perforce seeking means of collecting additional taxes, the unfairness of adding additional burdens to those borne by present taxpayers and exempting others from the furnishing similar service should be apparent.

"It will be of interest to our shareholders to know that the rates for electric power received by the company, in spite of statements to the contrary, compare more than favourably with those paid to any undertaking, either privately or publicly owned, furnishing electricity on the continent. The correctness of this statement is shown by the figures covering our gross revenue and power output.

"By reference to these figures it will be seen that we receive seventy-seven one-hundredths of a cent per kilowatt hour before taxes, and after deducting taxes amounting to \$365,191.00, only sixty-nine one-hundredths of a cent per kilowatt hour."

The Big New Ford V-8

The finest, largest, roomiest and most powerful car Ford ever built.

A New Standard of Motor Car Values

- 1—112" Wheelbase. New longer, wider bodies with sweeping air flow design.
- 2—Smooth running V-type 8-cylinder engine, 75 horse power.
- 3—Force feed lubrication to all Crankshaft and Camshaft bearings.
- 4—All Aluminum cylinder heads.
- 5—Engine mounted on live rubber.
- 6—Twenty-five anti-friction roller and ball bearings.
- 7—Remarkable acceleration, over 80 miles per hour.
- 8—Silent second speed and silent synchronized gear shift.
- 9—Fully balanced 65-lb. crankshaft.
- 10—Aluminum Pistons.
- 11—Down draft carburetor with air cleaner and silencer.
- 12—Increased fuel economy—(20 to 24 miles per gallon under normal driving conditions).
- 13—Torque tube drive.
- 14—Three-quarter floating axle.
- 15—Straddle mounted rear axle driving pinion.
- 16—New double channel double drop X-type frame.
- 17—All steel bodies—great strength and maximum safety, fully insulated to insure quiet, increased leg and head room.
- 18—Conveniently located instrument panel with parcel compartment.
- 19—Wire mesh in roof of closed bodies insulated to form Radio antenna.
- 20—Five distinctive one-piece electrically welded steel spoke wheels.
- 21—3.50 x 17 tires.
- 22—Finger touch steering.
- 23—Safe, reliable four-wheel mechanical brakes with 186 square inches of braking surface fully enclosed.
- 24—23-degree slanting windshield.
- 25—Safety Glass windshield in all body types and safety glass throughout in all Deluxe cars.
- 26—New riding comfort because of exclusive Ford designed transverse cantilever springs properly controlled by four double-acting, self-adjusting hydraulic shock absorbers automatically and thermostatically controlled.
- 27—All enamel parts bonderized for protection against rust.
- 28—Rustless steel trim.
- 29—New Ford Service Policy covering free greasing for one year.

An improved 4-cylinder engine is also available in all body types at a lower price.
