that the proposal to take over all the coughs and colds. gold mines in Ontario, or to have a limitless number of prospectors out NO BASIS FOR REPORT THAT seeking for new gold mines, or both, was not the simple and easily-worked plan some might appear to imagine. It would be just as brilliant to suggest that Canada should take over all inventions, for example. It is a wellknown fact that some inventions have made fortunes for their owners. Of course, there are other inventions that have been no more than a dead loss to their inventors. Would it not be well to remember that it is much the same with gold mines. Some have made fortunes, while others are not so good. Such is life! However, here is one answer, and apparently a very able and conscientious one. The answer is by Hon. Chas. McCrea, Minister of Mines in the Ontario Government. Hon. Mr. in very effective fashion. With his statement of the case there is little to add and practically nothing further to explain. Few people at this time would care to jeopardise the credit and outlook of the country as a whole. Such jeopardy would endanger the whole

"The mining industry is surrounded by more hazards than ordinary industries," declared Hon. Charles McCrea, Ontario Minister of Mines, in discussing a proposal made to the Ottawa Board of Control whereby 1,000 un-Ontario to search for gold.

## C.P.R. TO EXTEND IN QUEBEC

A couple of weeks ago The Advance printed a denial of the report that the T. & N.O. was planning to extend its line all through Northwestern Quebec to serve the new mining fields there. Geo. W. Lee, chairman of the T. & N. O. replied to questions regarding the truth of the rumours by saying the matter had not been considered by the commission. There was nothing to that rumour. Immediately, however, another rumour was started, to the effect that the Canadian Pacific Railway intended to extend its lines up through Northwestern Quebec, building the line from Maniwaki, thus giving a direct line from Noranda area to Crea has the talent for stating a case Montreal. This rumour has also been contradicted. Officials of the C.P.R. say they know nothing about it, so unless somebody intends to extend the C.P.R. without the knowledge of the company there can be nothing in the rumour. At the present time there is not much chance of railways or other district. But to return to Hon. Mr. big corporations going into expenditures on large scale on capital account. While the rumours may be explained by the fact that lots of good people would like to see the railway extensions in Northwestern Quebec and so are quite anxious to believe what they hope On the other hand railways are employed would be sent to Northern looking for ways and means to cut down expenditures, rather than to extend, and it would be difficult to make them see money even in a gold country at the present moment. Accordingly the taxpayer there would be, and right- any rumours about railway extensions ly so, tremendous opposition. Canada may be discounted before they are fair-

than are justified," said the Minister. Toronto Globe:-How impatient we Basic Factors More Perilous have become in this age of speed! ## Young Davidson Promising

The Northern Miner last week has the following in reference to the Holinger's work at the Young-Davidson work in the Matachewan area:-

"Hollinger Consolidated is tackling its investigation of the Young-Davidson property in Matachewan in a most comprehensive way. A Diesel-driven compressor and a five-ton sampling mill are being installed at once to not only speed up surface sampling of the big gold outcrop, but also to give bulk tests. It has been found that ordinary sampling methods are not very satisfactory because of the erratic character of the gold occurrence so A. F. Brigham, Hollinger consulting engineer, decided upon the installation of a Nutt mill. Careful check will be made of both recovery and tailings.

"It is expected that Hollinger will pretty well determine its intentions toward Young-Davidson by the middle of May. Under the terms of the deal made by the Porcupine mine, a declar-

ation is in order by that time. Should results be as anticipated, Hollinger will go ahead with putting the Four hundred and eighty-nine cases Young-Davidson on a producing basis at one session of the Timmins police as quickly as possible, Mr. Brigham inof the province, he commanded absorb- court! This is the suggestion made last formed The Northern Miner. Plans week by the "Roving Reporter" of The are to construct an initial milling unit Northern News. startling, but it is by no means new or were lawfully entitled to receive their ister of Mines, seized with a similar original. It is only a couple of weeks shipments of "Oh-be-joyful" were able vision, not long ago wrote Mr. McCrea ago that The Advance was pointing out to do so in time for the Christmas proposing nothing less than relief from our financial burdens on a provincial scale through its gold mines. His scheme was that the Ontario Government should purchase all the gold mines in the province, acquire all the properties where gold reasonably might be sought, hire all the unemployed, and send them out to dig, prospect, and explore. There would be, he said, many important discoveries, a prodigious increase in production and a great flow of wealth to the provincial treasury. Meanwhile there would be work for

everybody, prosperity for all. McDougall is more modest in his proposition, but no less optimistic.

#### NORANDA HOCKEY PLAYERS TRAVELLED BY AEROPLANE

Noranda recently made history for the Kiwanis Club by staging an interclub visit with Timmins, the members making the trip from Noranda by aerooplane. Last week Noranda made further use of the aeroplane in unusual way, the services of the air fleet being used to transfer hockey players and fans from Noranda to Amos for a match between Noranda and Amos teams. Six planes were used in the transportation of Noranda players and fans, about sixty taking in the air trip. The game resulted in a win for Amos

The Leader for Forty Years

THE RIGHT TIME TO THINK

going "the rounds of the press" recently. The item is well worth consideration, especially at this time. Here is the

paragraph, including the heading:-When to Stop Advertising

When every man has become so thoroughly a creature of habit that he will certainly buy this year where he bought last year. When young and fresher concerns in your line cease starting up and using the newspapers in telling the people how much better they can do for them than you can. When nobody else thinks "it pays to advertise." When the population ceases to multiply and the generations that crowd after you, and never heard of you, come on. When you have convinced everybody whose life will touch yours, that you have better goods and lower prices than they can get anywhere outside of your store. When you perceive it to be the rule that men who never do and never did advertise are outstripping their neighbors in the same line of business. When men stop making fortunes right in your sight, solely through the discreet use of this mighty agent. When you can forget the words of the shrewdest and most successful business men concerning the main cause of their prosperity.

Toronto Star:-The Ottawa Journal has discovered a fine recipe to avoid banging the fingers with a hammer. "Hold the hammer in both hands," suggests The Journal, but does not add the obvious advice that in such a case the risk of holding the nail devolves upon Friend Wife.
