SOURED ON THE WORLD?—THAT'S LIVER

Wake up your Liver Bile
—No Calomel necessary

Many people who feel sour, sluggish and generally wretched make the mistake of taking salts, oil, mineral water, laxative candy or chewing gum, or medicines which only irritate the bowels and ignore the liver. What you need is to wake up your liver bile. Start your liver pouring the daily two pounds of liquid bile into your bowels. Get your stomach and intestine working as they should, once more. Carter's Little Liver Pills will soon fix you up. Purely vegetable. Safe. Sure. Quick. Ask for them by name. Imitate substitutes. 25c. at all druggists.

Should Tell the Noisy Bunch to Behave a Little

(From New Liskeard Speaker)
Mr. Woodsworth, M.P., fitly described the Communists as a "noisy vociferous group," which stands for a new order but would bring it about by force if necessary.

And Mr. Woodsworth knows. The towns of Timmins and Kirkland Lake will fully endorse the views above given, for at every meeting of the town councils the members are awaited upon by a crowd who demand larger grants toward their support than the towns can give. If these persons were respectful and would show the least gratitude for what is being done for them the citizens would not resent their action so keenly; but their spokesmen act as though they wanted to insult the members of the councils.

At the last Kirkland Lake council meeting, one Rakatti, the spokesman, is reported to have said: "This delegation will leave you now, but will go out and mobilize more forces and organize into revolutionary movement to oust you." "We are out to get what we want and neither you nor the mine barons are going to stop us," he went on.

And then, according to the press report, a councillor told Rakatti that he was neither a taxpayer nor a Canadian, but that he was a "paid agitator."

It would appear that at both Timmins and Kirkland Lake the provincial police should warn this "vociferous"

bunch of reds what is going to happen to them unless they decide to show more respect for our Canadian laws and customs.

Says Public Works the Only Cure for Conditions

"Public works are the only form of wealth suitable for use as a money standard," stated John S. Lennox, Pittsfield, Mass., in an address "The Cause and Cure of Unemployment," speaking under auspices of the 100 Club of Ottawa at a luncheon at the Chateau Laurier at Ottawa one day last week, according to despatches.

"The use of public works as a money standard requires maintaining an unlimited market for them at fixed or controlled price levels similar to that maintained for gold," he said. "It would control the buying power of the dollar by controlling the amount of effort required to earn one dollar; permit investment of all surplus productive power in capital goods, and put the ownership of that property, in the hands of those who produce it," he affirmed.

Mr. Lennox thought that regardless of how it was brought about an unlimited market for public works would instantly, completely and permanently end unemployment. He claimed that the public works standard would stabilize prices, control the inflation of debt and permit its deflation without unemployment.

NORTH BAY ALSO SUFFERS FROM A BOGUS 50c PIECE

The quick work of the Timmins police and the publicity given the matter in The Advance prevented any widespread passing here of the counterfeit 50-cent pieces recently attempted to be put into circulation in Timmins. Two weeks ago The Advance gave warning against the bogus coins and last week there was another item in the paper—this time telling about the sentencing of a man who admitted that he had tried to pass the counterfeit coins and did succeed in having a few accepted. There were very few, however, in circulation here, though more may turn up later, so it would be as well for all to be on the lookout for the counterfeits. They are light in weight too white in colour and generally are not difficult to spot. There has been one of the 50 cent counterfeits passed in North Bay. As soon as this was known to the North Bay police a general warning was issued to all to watch for the bogus coins. Consequently anything from a nickel upwards is scrutinized very closely in North Bay these days and it is likely that no one will succeed there in passing any more of the coins. There should be general notice taken all over the country to prevent any passing of counterfeit coins. With general watchfulness it will be impossible to get the spurious coins in circulation and the passing of counterfeit money of any kind is something to be discouraged to the limit.

St. Thomas Times-Journal:—"Agnes Macphail Opposes" says a headline. That's not news. It is only news when Miss Macphail fails to oppose something put forth by the government or the official opposition.

Canyon Power is now Owned by the Hydro

Hydro Electric Commission Buys Ontario Power Service Corporation Plant, Commissioner's Tender the Only One Received.

A despatch from Toronto last week says that the only bid for the assets of the Ontario Power Service Corporation received by I. H. Hilliard, K.C., at Osgoode Hall Toronto, on Friday last, was a \$14,000,000 tender submitted by Ontario Hydro-Electric Power Commission. The property is known as the Abitibi Canyon hydro-electric development.

The tender, submitted by I. B. Lucas, K.C., on behalf of the commission, was considered in private by Mr. Hilliard and A. J. Thomson, K.C., representing the Montreal Trust Co., trustee for the holders of a \$20,000,000 bond issue.

Statement issued to the press was: "This was the day I was to receive tenders for the sale of the property of the Ontario Power Service Corporation. I have received a tender from the Hydro-Electric Power Commission for \$14,000,000, with a marked cheque for \$100,000 as required by the advertisement. The tender has been considered by the Montreal Trust Co., and they have accepted the tender in writing, and I have approved of the acceptance of the tender by the Montreal Trust Co."

Mr. Thomson afterwards explained the purchaser, under the conditions of sale, may in paying the purchase money turn in to the Master any of the bonds or matured coupons secured by the deed of trust at the amount which would be paid for them on a distribution of cash.

The Ontario Cabinet today authorized the Hydro Commission to put in a bid for the property. The Hydro Commission now owns \$19,400,000 worth of Ontario Power Service Corporation bonds, and there are \$600,000 worth that have not been transferred under the offer made by the Government.

ed, by R. W. Howe in his recent report on the property has been purchased by the company and has been assigned to the mine. Mr. Howe, who came east for the purpose of making the required purchases, will be returning to the property within the next few days. Report of definite progress in the development programme which has already commenced, may therefore be looked for. It is stated that the interests who have been identified with the financing of the Moss company have already made sufficient advances to the company, by way of loan, to permit of the carrying out of the changes necessary, and that these interests intend making such other advances as will be required to put the various recommendations of Mr. Howe into effect.

During the first half of March Moss Gold Mines shipped gold bullion of a value of \$13,000 without taking into consideration the premium. Average millheads for the last half show further improvement.
