Review of Notable Results at Hollinger

Reference Made by Mining Paper to Remarkable Results of Deep Level Work at the Hollinger Mine.

In a review of the Hollinger Mines last week, The Northern Miner had the following inspiring article suggesting the "new mines" that are being developed at the Hollinger these days:—

Hollinger Deep Level Work Brings Remarkable Results. "Developments that are probably freighted with the utmost significance to the future of Hollinger Consolidated Gold Mines are proceeding at the lowest level, the 3,950. Outstanding among these is a drift that has now proceeded for 300 ft. in ore of \$12 average grade in the downward extension of the Miller-ton porphyry mass. Hollinger occasionally had ore in porphyry on its upper levels, but these occurrences were bunched, uncertain, and low grade. It has never before had such a long, steady stretch of ore in a vein in porphyry.

"If this ore continues, if the vein holds rich after it leaves the porphyry and drifting carries ore southwestward into the greenstones (in which Hollinger has found practically all its ore), then the development has, beyond doubt, great importance to the future productivity of the mine and great importance to the whole Porcupine camp. The vein, which is very strong and is giving ore over an average width of eight feet, may strike out of the porphyry into the greenstones at any time. When The Northern Miner last visited the property the drift was at a point about 175 ft. southwest of No. 11 shaft. Incidentally, other gold-bearing occurrences have been picked up by drilling in this porphyry, one of them a two-inch crack carrying spectacular rich material, but for the time being these other chances are not being followed up, in order that the main chance may be developed to its fullest extent as quickly as possible. Naturally there is great eagerness to learn the habits of the vein when it gets out beyond the porphyry and into the rocks which have hitherto carried all Hollinger's ore.

"Striking also, in considering the new possibilities, is the point that this new ore is three-quarters of a mile west of Hollinger's east boundary (the Platt Vet-Schumacher line). In the Acme ground to the east of this porphyry occurrence and in the Schumacher claims still farther east excellent stretches of good average ore are under development on the 3,950 and levels above. In short, the known length of ore-bearing ground (three-quarters of a mile) on the lowest horizon is already almost as great as that above; its width is not so great; the existence of as many veins has, of course to be proved.

"Another point noted by The Northern Miner is that practically all the ore so far had on the lower levels carries its gold largely in free state. Sulphides though present, are in considerably reduced quantity. This condition upsets the theory commonly held that Porcupine mines would find a higher percentage of sulphides as they worked deeper.

"Developments on the lower levels formed the piece de resistance at the last Hollinger annual meeting. Because of their enlargement and because of this new ore-in-porphyry condition, they promise to excite great attention at the coming annual gathering of shareholders.

"As is well known to the majority of shareholders, Hollinger has found the bulk of its orebodies alongside or at the nose of a main porphyry mass and adjacent lesser masses, their general trend northeasterly, carrying some of the ore into Hollinger's neighbour at depth and a considerable portion into Hollinger's Schumacher ground. It became believed some time ago that all the ore which could be developed in several chief veins in the Hollinger ground had been found and either milled or blocked into ore reserves. As this idea spread and as people lost sight of the fact that the ore-making potentialities of this exceptionally rich piece of territory had been but partially explored, some fears as to the future of the mine were expressed. A decline in ore reserves from the top figure of 66 millions at the end of 1926 to 46 millions five years later gave fuel to apprehension. However, the decline in total ore reserves has been checked during the past couple of years and at the end of 1932 the total stood at above 45 millions, showing but a minor decrease from the figure of the year before, with more than four years' production in reserve.

New Ore Not in Estimates "The developments at the new lower horizons, below the 2,750 and down to the bottom level, 3,950 have hardly begun to register in the ore reserve estimates in any important way, as yet. The mine, which will soon celebrate the 25th year since discovery, has taken its production, plus ore reserves (an aggregate of \$235,000,000) almost entirely above the 2,750-ft. level. Hence the significance of rich extensiveness below this mark.

"Ore resources of upper levels are some distance from being fully known. For instance in clearing up the territory around No. 91 vein, a prolific old-timer pretty thoroughly developed and believed ready for complete back-filling on upper reaches, indication of something else were followed up, with the result that a body close by, on the 300 level, has been lately developed to

DOESN'T PAY TO TALK TOO MUCH EVEN WHILE YOU'RE IN JAIL

Inability to keep his mouth shut cost Bertram A. Warren, 25, Toronto youth, an additional six months in Burwash Industrial Farm for breaking parole. While a prisoner in North Bay jail on a charge of stealing a ride on the C.P.R., Warren let slip the fact that he broke parole last July. He will be required to serve, in addition to the six months imposed for parole breaking, seven months of his uncompleted sentence on a fraud charge.

Carlo's Magda Shot

Mme. MAGDA LUPESCU the third side in the marital triangle of King Carol of Roumania, who, according to reports from Paris was shot and slightly wounded in Bucharest. The King's friend was wounded in the shoulder. An anti-Semite, Jon Vargo, was arrested by police, but the matter was hushed up, says the report.

ELECTED BY ACCLAMATION TO IROQUOIS FALLS COUNCIL

William Needham was elected by acclamation last week as councillor for the town of Iroquois Falls to fill the vacancy caused by the death of A. E. Brewer. There were five candidates qualifying for the position, as noted in The Advance last week, but later word from Iroquois Falls says that four of the five later withdrew, leaving Mr. Needham elected by acclamation.

Kingston Whig-Standard—Miss Agnes Macphail, and exponent of a new economic structure for Canada, admitted at Calgary that although she is a director of a small oil company she has not read the prospectus issued by the company. Really, Agnes, isn't that just the kind of thing we would expect from a capitalistic company director?

ALLOW THIRTY PER CENT. OFF ELECTRIC LIGHT ACCOUNTS

A despatch from Ansonville last week said:—"Electric light patrons in Calvert township will be allowed a discount of 30 per cent. on payments before the 10th of the month. The discount was formerly 10 per cent. This method was taken to pass along to patrons a reduction in the rate charged the municipality by the Abitibi Power & Paper Company, instead of lowering the kilowatt rate."

Another of the Good Works of Hon. Wesley A. Gordon

All in this North are interested in the good work being done by the "Minister from the North," Hon. W. A. Gordon. The North is proud of the notable service given the country at this time by the "Minister from the North." In reference to this good work the following from The Financial Post, of Toronto, will be read with interest and pleasure. The Financial Post says:—"Almost unnoticed, an efficient and successful back-to-the-land movement has been going on in Canada.

"In the fall of 1930, the Department of Immigration at Ottawa joined with the Canadian National Railways to move unemployed people with their families from urban centres to the farms. During the period October 1, 1930, to January 31 of this year, 76,518 persons have been taken from the cities and towns and absorbed into agricultural life under this co-operative movement. This represents 10,733 families settled on farms and 23,253 previously unemployed single men placed in farm work.

"In each case, the families selected had had previous farm experience and sufficient personal capital to enable a start on the land to be made. There has been no financial assistance from the government or any other agency. The contribution of the government has been confined to practical field service in co-operation with the railways.

"This effort has contributed notably to the relief of the unemployment problem and has converted many hundreds of cases of actual or potential distress into examples of happy family life.

"Hon. Wesley A. Gordon, Minister of Immigration is not prone to blow his own trumpet and it is well that the public should know of this capable effort of his department and the two railway systems."

Denies Charges in Northern Dev. Work

Hon. W. Finlayson Scores Tactics of Certain or Uncertain Toronto Newspaper. No Mal-administration in Northern Development Dept.

Declaring that he was willing to provide any Opposition member with full access to all payrolls, accounts, etc., in connection with any allegation of maladministration on work in Northern Ontario under the Northern Development Act, Hon. William Finlayson on Friday in the Legislature replied at length to charges of drunkenness, padded payrolls and fraud on works proceeding in that district.

Admitting that there had been difficulty with an inspector and officials at Warren, and that five men had been let out following investigations there, Mr. Finlayson stated that the honesty and efficiency of those engaged in the various works in Northern Ontario had been outstanding.

Replies to Charges Mr. Finlayson took advantage of the opportunity when his bill to provide \$3,000,000 for the Northern Development work was before the Committee of the Whole, to reply to allegations of corruption, paying special attention to those contained in the Toronto Star. The bill was approved by the House.

He read the statement of Father Rother of Corbeil, and the statutory declaration of Reeve John Dufresne of East Ferris township that two reporters of the Star had masqueraded as Government officials during interviews with them, and that their reports had been inaccurate and misleading.

"The action of the Star in sending up two men telling the parish priest and reverend that they were representatives of the Government is one of the lowest types of political brigandage possible. I suggest to the responsible editor of the Star that such action will not bring credit to any political party or paper," said the minister.

"Low Type of Political Warfare." "It is a low type of political warfare, which I do not think will succeed or appeal to the people of Ontario. By deceit and dishonesty they were able to find out about one foreman who had been drunk and who had been dismissed. It is not surprising that the old man of the thousands working in this district should have been drunk. We had to let out a few men on account of this. But it is a wonder there were not more," he said. The Public Accounts Committee was still sitting, and he was willing to produce any one, any accounts, payrolls, etc., that any member should ask for.

The Warren difficulty was one mainly of two factions in the area, he said, reading voluminous documents. Complaints had been received by his department of dead men being on the payrolls, and of other men being paid for horses which had never been born, and of drunkenness, and of a man being employed who had appropriated some funds of a municipality.

Three Suspended An investigation had been made first by H. C. Draper, a department solicitor. No dead men were found to be on the payroll, nor were there any horses unaccounted for. But it had been found that Pat Rochefort, the inspector, was given to strong drink, and that his brother was a timekeeper; that there was loose bookkeeping. The two brother and three other men were suspended.

But Rochefort, the inspector, had been with the department fifteen years. "When there was work to do he was a slave-driver, but when there was no work he wanted a good time." The head officials of the area spoke highly of his ability, and he was given another chance, after signing an agreement to keep away from liquor, Mr. Finlayson stated.

But his intentions were better than his will-power, and complaints were made again. This time Inspector Miller of the Provincial Police went in and investigated. As a result, Rochefort was let out, and an engineer from the Highways Department was sent in to take charge of the work, so that he would work with both factions. "The work at Warren was now closed down, he said.

Sturgeon Falls Hearings While the investigation at Sturgeon Falls disclosed a bad situation, this was in connection with relief, and not under the Northern Development work, he pointed out. He then disposed of the other charges one by one.

According to the report given by The Toronto Globe, at one stage of Mr. Finlayson's explanation, Earl Hutchison (Labour, Kenora) was the only Opposition member present, and William H. Ireland, Conservative Whip, and George Shields (Conservative, Toronto-Woodbine) took up positions on the Opposition benches. This compared with one stage on Thursday night, when D. J. Taylor (Progressive, Grey North) was speaking, and there were but eleven Government members and thirteen Opposition members present. Hon. Harry C. Nixon, Progressive Leader, who had asked Mr. Finlayson to give his explanation, had to leave early, but stated he was perfectly satisfied.

Pembroke Standard-Observer:—In Elmira, those receiving relief must sign an agreement to pay all advances together with interest charges, also not to drive a car, nor to use liquor. If those on relief in Elmira will eventually pay back all they have received they will have set a record for Canada.

"I NEVER USED TO THINK OF BUYING A LOW-PRICED CAR!" BUT times have changed, you know. And that's how I came to buy a Rockne. I knew Rockne would be built right because Studebaker stands behind it. I didn't dream, however, that anybody—even Studebaker—could put so much into a car that sells as low as \$795 f. o. b. Walkerville. I was particularly impressed by the richness of Rockne's interior trim. And I found it generously roomy even for people my size. And when I drove a Rockne it performed like a big, expensive car. I never rode in a car that had better balance and steadiness on the turns. I could scarcely believe it when I found there wasn't any extra charge for all Rockne's special features. As a matter of fact, I had to lay out very little cash for my Rockne, considering what my old car brought. I've got a car that I'm proud of and that my family's proud of. We don't feel threadbare in our Rockne as we might in some other low priced car.

Timmins Garage Co. Ltd Timmins, Ontario TRY A ROCKNE...AND YOU'LL BUY A ROCKNE Six-cylinder, 70 h. p. engine floated in live rubber ... free wheeling, synchronized shift, silent second ... automatic switch-key starting ... double-drop, rigid 'X' frame ... one piece all steel bodies of full aerodynamic design ... contoured upholstery with special coil springs ... smaller wheels, lower overall height ... and numerous other fine car features. \$795 and up, at the factory. Rushers, spare tires and Gov't taxes extra. ROCKNE SIX SPONSORED AND BUILT IN CANADA BY STUDEBAKER
