Results of Entrance Exams in Part of Cochrane District

List of Pupils Passing at South Porcupine, Connaught, Iroquois Falls, Matheson, Monteith, Kirkland Lake, Englehart, Savard Centres. Timmins in Other Inspectorate. Certificates to be Mailed Successful Pupils.

Below will be found the official report of the results of the High School Entrance examinations for part of the district, including centres like South Porcupine, Matheson, Monteith and others.

Timmins and other centres are in another inspectorate and will be listed separately.

The following is the official report: The Kirkland Lake High School Entrance Board lists below the names of successful candidates at the High School Entrance Examination held recently in Temiskaming (North) and Cochrane (in part).

Certificates will be mailed to these pupils in due course, while unsuccessful candidates will receive statements of marks.

Connaught Centre—Fick, Albert; Lehto, Max H.

Englehart Centre—Andrews, Elsie; Bean Russell; Blackburn, Della (hon.); Campbell, Eric; Carey, Lowell; Chambers, Wilma; Gray, Stevenson; Greer, Viola; Hough, Irene; Hough, Betty; Jewitt, Donald; Johnston, Clayton; Laronde, Leo; Merriman, Harry; Nether-ton, Eileen; Pearce, Basil; Peden, Mer-ryle; Rowlandson, Harold W.; Smillie, Madeline; Smith Chester; Solway, Sid-ney; Solway, Marjorie; Stephenson, Lorne; Sullivan, Irene; Toye, Eleanor; Wood, Hazel; Wright, Marie Louise.

Iroquois Falls Centre—Abramson, Esther; Abramson, Harry; Alexander, Audrey; Bergeron, Annette; Bergeron, Jeanne; Blondeau, Laurette; Breton, Therese; Brewer, John R.; Cameron, Olive; Champoux, Antoinette; Charron, Eileen; Dawson, Edward; DeLaplante, Royer; DeLeon, Therese; Eade, Eleanor; Eaton, Bill; Foy, Elmer; Gagne, Blanche; Garneau, Philippe; Goodfellow, Edna; Gregorochuk, Mary; Grummett, Rita; Hardy, Irene; Harrop, Vera; Hoff, Lila; Jack Helen; John-son, Marcelle; Kussner, Grace; Le-pace, Marcel; Lortie, Cecil; McGrath, Frank; McKeown, Francis; Marcac-cini, Narciso; Marion, Cecile; Miller, Robert; Moore, Norman; Paquette, Peter; Romain, Raymond; Schuloff, Mary; Smith Norbert; Stack, Isabel; Sullivan, Norville; Tierney, Irene; Vachon, Jean B. Vland, Vladimir; Wil-son, Dorothy.

Kirkland Lake Centre—Acton, Mary; Ashley, Gail (hon.); Baker, Iris; Bas-sett, Eileen; Behie, Clarence; Beland, Gerald; Belanger, Irene; Belmore, Geraldine; Belmore, Juanita; Bergeron, Lucienne; Bertrand, Rose; Boisvert, Basil; Boisvert, Reginald; Brady, Har-vey; Brydges, Thomas; Brydle, Flor-ence; Burbank, Marguerite; Burke, William; Burley, Betty; Butorac, Olga; Cameron, Colin; Carlson, Betty; Chis-holm, Albert; Clark, Gayland; Coles, Beatrice; Comish, Ruth; Conlon, Har-old; Connolly, Laurence; Corbell, Beat-ric; Deighton, Nora; Dodd, Arnold; Doggett, Robert; Dorzinsky, Chester; Dorzinsky, Rose; Ewing, Harry; Para-gher, Lily; Farstaad, Eskil (hon.); For-gel, Pauline; Frederick, Mike; Gagne, Yvette; Gagnon, Corinne; Gardiner, Francis; Garrity, Patricia; Gelinas, M. Ange; Gernecki, Olga; Gibson, Jack; Hamilton, May; Hanson, Nils; Higgs, Jack; Hoadley, Elettia; Hodgins, Gladys; Hogan, William; Holtman, Ruth; Howey, Victory; Huff, Winnifred; Jarvis, William (hon.); Jones, Ada; Jones, Handel; Joy, Lloyd; Jun-tilla, Elma; Kavanagh, Carmel; Kelven, Tormod; Koche, Steve; Kokko, Nilo; Kuoppa, Aune; Lafreniere, Lucie; La-londe, Marguerite; Latulipe, Maurice; Lawry, Gordon; Lothian, George; Mat-son, Oliver; MacDougall, Angus; MacDougall, Margaret; MacLeod, Pa-tricia; MacPhail, Margaret; McDonald, Mary; McGaw, Hugh; McIntosh, Don-ald; McKeown, Martha; McLaren, Georgina; McLellan, Buddy; McLen-nan, Jessie; McPhee, Jack; McPherson, Keith; Mallon, May; Martin, Pearl; Maruska, Annie; Mattson, Helmi; Max-well, Leah; Melong, John; Merrifield, William; Mitchell, Donald; Murphy, Leo; Nelson, Harold; Nilsen, Semla; Nord, Carl; Nord, Randolph (hon.); Orser, Stuart; Paget, Arthur; Patter-son, William; Porcheron, Madeline.

Kirkland Lake Man Sells Claims for Large Figure

Edward Chaput, one of the pioneer mining men of the Kirkland Lake area, is reported now as successful in closing a deal for a group of claims in Per-shing township, in which he and some associates are interested. The claims are just east of the Pascalis area. To-ronto interests are said to have made the purchase.

The amount paid for the claims is said to be over a hundred thousand dol-lars, payments running over 3 years. Mr. Chaput and associates also retain a ten per cent. interest in the produc-tion of the mine when developed. Mr. Chaput is a brother-in-law of Chas. Belec, M.P., for Pontiac county.

Slima Cleaners Instal New Dry Cleaning System

The Slima Cleaners announce the installation of a modern and extended dry cleaning system. It is the Clorex dry cleaning system, made in Canada by the Beaver Laundry Machinery Co., Limited, Toronto. The system is of the fully closed type, the garments not being touched or handled in any way until the entire cleaning, drying and decolorizing process is completed and they are ready for spotting and finish-ing. The system consists of a combin- ing cleaning and drying machine, a solvent storage and purification system and a solvent recovery system. The system is considered as the best obtain- able, very effective and yet non-injuri- ous to any fabric. The new system has been fully installed and is now in oper- ation at the Slima Cleaners' premises, 69 Third avenue.

COBALT TO SUE MINING COMPANIES FOR BACK TAXES

Mining companies owing back taxes to the town of Cobalt have been given ten days in which to pay arrears, or legal action will be taken by the munici-pality to collect the amounts claimed to be due.

Iroquois Falls Golfers Pay Visit to Timmins

The last week-end some fifteen golf-ers journeyed over from Iroquois Falls and played a friendly game with the Timmins players, after which a dinner was served at the club house. The fol-lowing are the names of the players who took part:— Iroquois Falls—Messrs Oliver, Brydge, Mobbs, Soderstrom, Hobson, Wilson, Mac-Taggart, Mitchell, Hiscoc, Hurter, Sapiro, Devine, Lavallee, Yuaranchuk, Roach.

Timmins—Messrs Galbraith, Fuke, Lake, Ross, Munroe, Dr. Porter, Laid-law, Wookey, Jamieson, Rinn, Keddie, Brady, Irving, Eyre, Lang, Widdfield, McCoy.

Cobalt Young Man Lived Couple of Days on Berries

Lucien Allard, 19 years old, was back at his home in Cobalt Saturday evening after being lost for a couple of days. He was unreported at his home in Cobalt from Friday morning when he left to go picking berries until he was located by the provincial police on the highway between Latchford and Temagami late on Saturday afternoon. He was promptly restored to his home. He was in good condition, though tired, hungry and worried. He spent one night in the bush, his chief trouble being with the black flies, mosquitoes and other insect pests. He fed himself on berries so was in no danger of star-vation. Apparently he became con-fused in the bush and lost his bearings getting considerably out of his way and walking miles in the bush and on the highway. He could give the police little information as to how he got lost, fur-ther than that he became confused, probably on account of the distraction of the hungry insects that annoyed him in the bush.

RAINED ON ST. SWITHIN'S DAY; MAY OR MAY NOT RAIN 40 DAYS

It rained on St. Swithin's Day this year, and according to the old legend it should rain at least a little each day for forty days. Will it? Once before the legend was tested out in Timmins, and though that year it rained on St. Swithin's Day and rained every day a little, at least, for ten days, it missed several days in the rest of the period. According to the old legend, St. Swith-in wanted his body to be allowed to rest in the grave in which he was laid. Years after his death it was desired to move the body. Torrents of rain came down and the work had to be deferred from day to day, until eventually it was decided that it would be best to re-spect St. Swithin's wish. And the rain then stopped. Since then, however, so goes the legend, if it should rain on St. Swithin's Day it will rain for forty days more or less, just as a reminder that St. Swithin still desires and intends to be left to rest in peace.

Vocational School Wants to Aid Pupils

Offers Employers a Service for the Securing of Suitable Trained Help. Anxious to Help Place Pupils

A. A. Rose, director of the Timmins Vocational School has written a number of employers in town and district offering the employers a service in the securing of suitable, trained help, and at the same time assisting the pupils in placing themselves in employment. This service has been given in past years, but at the present time when there is so much difficulty in young people finding places the service should be of special value.

In his letter to employers Mr. Rose points out that this year there are a number of students graduating from the Commercial, Machine Shop, Mining and Electricity departments of the Vocational School, and also a few gradu-ates from last year who have not yet secured employment. These students have been given a thorough elementary training in the practical work of these occupations, paralleled with three years of academic study in English, History, Science and Mathematics. On at-tached sheets Mr. Rose gives the names of the graduating pupils with some general information regarding each of them. He says in his letter that he is prepared to supplement this informa-tion with a confidential report on the ability, qualifications, etc., of any of these students. Great care will be taken with all reports issued, and no graduates will be recommended for a position unless considered fully capable and qualified to fill it. Mr. Rose asks the consideration of these students by any employers when making any changes in or additions to staffs. This service would seem to offer much to students and employers alike and should prove of value. Any employer looking for additional help might do well to consult with Mr. Rose in this matter.

An information booth for the free distribution of Canadian National Ex-hibition literature and a directory of private residences where Exhibition visitors may find accommodation has been opened at 46 Yonge St., Toronto.

HUNTER SHOOT AT MOOSE AND KILLS FATHER-IN-LAW

J. Payeur, of Hearst, was accidentally shot and killed by his son-in-law, Adolphus Poulin, near Hearst last week. The two men were out hunting and Payeur after shooting at a moose stepped in front of his son-in-law's gun just as the latter was shooting at the wounded animal. Payeur was killed instantly, his skull being fractured by the bullet. Poulin at once notified the provincial police who investigated. An inquest was held.

Kiwanis Hear of the Romance of Rubber

J. F. Devine, Sales Manager for Dom-inion Rubber Co., Delights Timmins Club with Interesting and In-formative Address on Monday.

The big feature of the weekly Kiwan-is luncheon at the Empire hotel, Tim-mins, on Monday was the address on "The Romance of Rubber" by J. F. De-vine, sales manager for the Dominion Rubber Co., central division.

The visitors at the Kiwanis on Mon-day included Mr. Devine, the speaker for the day; Mr. Littlejohn, Mr. Reid and Mr. Duffield, of the Dominion Rubber Co., and Kiwanian Jos. Bemans, of the New Liskeard club.

Mr. Devine, whose address for the day, will be long remembered as an out-standing and important one, is an ardent and active member of Kiwanis. He was one of the charter members of the Toronto Downtown Kiwanis Club.

The address on "The Romance of Rubber" was specially notable for the large amount of valuable information it contained and also for the way Mr. Devine held the interest and attention of all from start to finish. Mr. Devine gave a very effective outline of the way rubber came into use in the first place. The first European to know anything about rubber was no less a gentleman than Christopher Columbus, Mr. De-vine said. On his second voyage to this part of the world Columbus had seen Indian boys playing with balls that bounced. They showed him how these were gotten from the sap of a tree. Christopher took some of the balls home with him, but nothing resulted. In 1770 rubber may be said to have been rediscovered by Europeans and efforts were made to popularize its use for commercial purposes. Some ad-vance was made in this respect but not much. There was a very serious draw-back to the new product; it was sticky in-summer weather and frozen stiff in the winter. A Scottish gentleman named Mackintosh made garments of the material but their disadvantages prevented any general use. In the meantime Charles Goodyear, a hard-ware merchant, was experimenting with rubber with the determination to make it a commercial product of special value and service. He spent so much time and money in this work that he lost his business and his money. It was by accident that he eventually found a way to solve the difficulties that prevented rubber from reaching its full usefulness. Mr. Goodyear was talking to some friends and pacing the floor. He had some sulphur with him as well as some sulphur in his hand, or at least without definite design, he emptied his hand into the fire. At once he was struck by the action. He quickly rescued the combining rubber and sulphur from the fire and noted that the rubber was no longer sticky where sulphur and fire had done their work. From this little incident de-veloped the basis of the vulcanizing process that has made rubber so useful in so many ways. An Englishman named Wickham (who, Mr. Devine noted in passing, died only about three years ago) visioned the great possibili-ties of rubber. He suggested to the British Government that they plant rubber trees in the East Indies where the climate most closely approximates that of South America, the native home of the rubber tree. The British Gov-ernment sent Wickham to South America to get seeds of the rubber tree. These were planted in botanical gar-dens and when they grew to plants of a little size they were sent to the East Indies where they became the foundation of the plantations there that have since become the main source of the world's supply of rubber. For his notable services Wickham was given an annuity. He was knighted by the present king. Goodyear, however, never reaped the advantage of his notable work for the founding of the great rub-ber industry. He became involved in litigation and died a poor man. Mr. Devine made reference to the innum-erable useful purposes for which rubber was now considered as indispensable. There are also new uses developing for rubber every day, and the scope of its possible usefulness is a real romance of modern industry. Mr. Devine in-dicated that in practically every line of business and industry there was ro-mance and interest, did one but right-ly look for it. His address held the at-tention of all to the last word and was considered one of the most interesting and instructive addresses listened to by the Timmins Club.

Kiwanian Jos. Bemans gave a pleas-ant friendly message from the New Lis-keard Club with greetings and good wishes. Messrs Littlejohn and Reid also spoke briefly but pleasantly. Dr. S. Lee Honey was welcomed back to the club after his trip overseas. Dr. Honey is to give a talk next Monday to the club on his observations and impressions on his recent trip.

McIntyre Has Easy Win for Foster Cup

Kirkland Lake Team on Saturday Last Proves Great Disappointment to Football Fans Here. Game a Listless and Uneventful One.

McIntyre, 4; Kirkland Lake, 0.

In what was perhaps the worst game of football played here this season the McIntyre emerged winners in the first of home and home games for the Foster Cup over the newly formed Kirkland Lake football club.

Kirkland Lake did not come up to the expectations of the crowd that was in attendance. The McIntyre had several new faces on their team, which did not improve it any. The game was listless, lacked combination and in the whole ninety minutes of play there was nothing outstanding to bring the ap-plause of the fans.

Two goals were scored for the Mc-Intyre by Kirkland Lake themselves one by Parsons and the other by Mc-Murray the goal-tender who punched the ball into his own net. Hendry and Turle scored the other two.

The McIntyre will have to play an entirely better game against Toronto Scottish whom they meet on Saturday of this week in the Dominion Chal-lenge Cup at Toronto. It is stated that practically the same line-up as that which beat Falconbridge will be used

LOSES LIFE WHEN ENTANGLED BY HIS OWN FISHING LINE

Attempting to save his fishing tackle, which became snagged while he was at Lake Rouyn, Tom Livinsky, 55, waded into deep water and was drowned. Livinsky was a strong swimmer and the cause of his drowning was a mystery until the body was recovered some time later. Then it was seen that the strong fishing line was entangled about his feet.

Miss Loretta Legris is spending the summer holidays with relatives near New Liskeard.
