

Where The High Country Calls

Aventure has found a splendid and thrilling outlet in the new order of the outdoors, the Sky-Line Hikers of the Canadian Rockies. Organized at Banff and Lake Louise this season, the new order provided such happy, healthful opportunities for hiking over the high passes, Alpine Meadows, and mountain trails of the National Parks of Canada, that devotees of the outdoors throughout Canada and the United States are now singing its praises. The inaugural hike this year took a large party of enthusiasts, under the expert direction of Swiss Guides Ernest Fuzer and Rudolf Aemmer, through Paradise Valley, over the high trail past Lake Annette, and over Sentinel Pass to Moraine Lake. The second day's journey took the hikers across the magnificent Wenckhemma Glacier, and through the flower-decked Wenckhemma Meadows, and finally over the snow-bound pass of that name to Eagle's Eye on Tokum Creek. The third day saw the conquest of Opabin Pass,

some tricky work on the glaciers and finally the Lake O'Hara Bungalow Camp. Hikes in the O'Hara country and the Pow Wow occupied the fourth day, and the eight-mile hike to Wapta ended this truly historic expedition. Norman B. Sanson of Banff, is the President of the new order, which is now in full swing with steadily increasing membership. A four-day hike in the Yoho Valley will be one of the major activities next summer.

The picture lay-out well illustrates the happy moments on the trail. Carl Runius, internationally famous artist, is seen extolling the virtues of the Alpenstock to Miss Georgia Engelhart, celebrated mountain climber and New York socialite. A group of the hikers triumphant on Sentinel Pass enjoying the splendid view down in the mountain valleys below. The first annual Pow-Wow and the Sun-dance Lodge.

Council Objects to Evasion of By-law

(Continued from Page One)
Councillor Richardson brought up the matter of the water on the road east of the railway tracks in the vicinity of the oil warehouses. To remedy the conditions a plan of surface draining seemed necessary. He explained the method that seemed the only practical solution of the difficulty. It would take about \$1,000.00 for labour and about \$1900.00 for materials.

The question of the passing of the accounts of certain local doctors for treatment of venereal diseases was again before the council. Councillor Richardson said he was certain some of the patients were not indigents. The town clerk in reply to a question said that the doctors were supposed to attempt to collect from the patients in such cases, but if they could not the town had to pay. The doctors were not supposed to give out the names of patients suffering from venereal diseases and so the town was more or less in the position of having to pay the accounts as presented. Council decided to leave the accounts over until another meeting when further information might be available from the department of health.

Mayor Drew pointed out that the town's transient traders' by-law seemed to be more or less of a frost. The individuals and firms who paid the transient traders' license were usually those who were not meant to be covered—those who intended to stay here permanently and carry on business as taxpayers of the town. The majority of the transients coming here seemed to find ways and means to evade the law. Several instances were given of this. One of these was the case of a young lady who came to Timmins in the hope of securing employment. Being unsuccessful in the search for work she opened a store to carry her along at least for the time being. But when called on for the transient traders' license fee the claim was made that the store business was hers, but was owned by the owner of the building. A still more flagrant case was that of a man coming from outside and opening a store here. When asked to pay the transient traders' license he gave the name of the lady he claimed was the real owner. It was that of a woman who had been receiving town relief during the year. The merchants paying taxes here were not receiving protection from the transient traders' by-law. Councillor Massie thought the mayor was right in favouring a showdown on the by-law, and other councillors agreed. The matter was left for the police committee to deal with.

Japan Refuses Entry

LORD MARLEY
a British delegate to the Radical Anti-War Conference in Shanghai, who was forbidden to land by the police when the ship he is travelling on arrived at Kobe. It is reported that his purpose was to induce a Japanese delegate to attend the Conference.

THREE CARS REPORTED AS STOLEN SATURDAY NIGHT

No less than three cars were reported as stolen on Saturday night. In each case the motor seemed to have been taken for joy-ride purposes and to have been abandoned as soon as the ride was over. The police had a busy time searching for the cars to keep up the Timmins record of not allowing a stolen motor car to escape from the North. After diligent search the cars were recovered one after the other. It should be noted that the theft of a motor car is a very serious offence carrying with conviction a term in the penitentiary. Also, it should be noted that the taking of a motor car against the wishes of the owner is a case of theft. Only a week or two a couple of young men in Timmins had a narrow escape from prison for this sort of theft of a motor car. Although one of the owner of the car, a conviction was registered against the young man for improper use of the car and he was fined as a warning to others. Had the owner pressed a charge of theft of the car as he might have done it would have been a serious matter for the young man. It is too much, however, to expect motor car owners to continue patience and kindness in view of the trouble and expense they suffer by the taking of their cars without authority. Those who are inclined to "borrow" a motor car as a good sort of joke should remember that the humour is liable to turn to tragedy for them.

Government Studying Loosening of Beer Laws

"It is recognized that there is a large section of public opinion in Ontario which feels there should be some loosening of the beer regulations and this and other problems will have the consideration of the Government before it appeals to the people," stated Hon. Charles McCrea, Minister of Mines for Ontario, in an interview at Ottawa on Monday of this week.

Asked as to the possibilities of an election in the near future, Mr. McCrea stated that it was his personal opinion that an election this year was unlikely. The Minister of Mines told The Ottawa Journal that the money value of the gold production of Ontario this year owing to the high premium would be \$62,000,000, the highest in the history of the province though the value of production based on the standard value of \$20.87 an ounce was \$45,000,000 compared with \$47,000,000 in the previous year.

Mr. McCrea stated that the hunt for gold in Northern Ontario this year had been proceeding apace with thousands prospecting and a number of interesting finds recorded. He stated that the outlook for the lumbering industry also seemed more hopeful as there was a general feeling in lumbering centres that this basic industry would pick up. "The nickel-copper outlook in the Sudbury district also is most hopeful," Mr. McCrea said.

Asked about the C. C. F. the minister replied laughingly that so far he had been unable to find out what they were advocating.

"My visit in Ottawa is mostly in the nature of a holiday," he said. He thought that generally speaking the employment situation in Ontario was showing improvement.

Mr. McCrea's name has been persistently mentioned for the Premiership of Ontario in the last six months, says The Journal.

FOUR HUNDRED POUND BEAR KILLED IN HEARST AREA

The Hearst correspondent of The Northern Tribune last week says:—"A monster black bear weighing in the neighbourhood of 400 pounds was killed on the farm of Mr. A. Bernard, just east of town, on Saturday evening. The animal was first seen crossing the fields of the Demonstration Farm by a passing motorist, who hastened to town for a gun. In a few minutes a number of cars were in pursuit, and Bruin was surrounded on Bernard's farm. A fusillade of shots from the rifle of Godfrey Veilleux, one of our local nimmers, soon gave him his "quietus." This is probably the same animal that created such commotion when he invaded the open air dining room of the so-called "jungle" one evening last week."

Bold Robbery Last Thursday

(Continued from Page One)
tags themselves were found; also a broken watch crystal, the crystal very evidently being a new one.

Saturday afternoon a little girl found two rings alongside the track back of the Hy-Way service station. These rings were turned over to the police. It was found that they were among the articles that had been stolen. One of these rings is valued at \$250.00, the other at \$100.00.

A fingerprint expert, Bowden of the Toronto police department was brought here this week and was able to "raise" a number of fingerprints that later on may prove of much usefulness in securing the conviction of the thief.

Chief Jones has sent to between 40 and 50 towns and cities circulars giving particulars of the goods stolen. This has meant an enormous amount of work for the police, but they have carried it through in fine fashion. All the important cities and towns of Ontario and Quebec, as well as some United States centres, have been circularized.

Chief Jones refused to commit himself as to whether there were one or more men in the robbery.

Mr. Halperin has offered a reward of \$500.00 for information that will lead to the return of all the goods stolen.

KAPUSKASING CONSTABLE SUFFERS FRACTURED SKULL

Word has been received at Provincial Police headquarters at Halleybury, that Constable J. Quidine, of Kapuskasing, who two weeks ago met with an accident on the highway two miles north of Halleybury, when the car he was driving left the road and ended upside down in a field with four wheels in the air, has suffered a fracture of the skull. Constable Quidine was not regarded as seriously injured at the time of the accident and was able to proceed home the following day by train. However, an x-ray was taken when he complained of severe head aches and a fracture of the skull was found. An operation will be performed according to word received.

HEAD OF CANADIAN LEGION TALKS LIKE REAL SOLDIER

An editorial note in The Sudbury Star last week says:—Captain J. J. Ferry, of Sudbury, was re-elected president of the Ontario Command of the Canadian Legion at the annual convention at Windsor, this week. In accepting the post, Capt. Ferry said: "It's a big job, but I will do my best to live up to your expectations." That's the difference between a soldier and a politician. The soldier does not make promises.

Urging Reduction of the Motor Licenses for North

For a considerable time past certain newspapers in the North have been advocating a reduced motor license fee for cars in the North, in view of the fact that automobiles can be operated here only during a comparatively short season in comparison with the year round operation in the South. In this connection, The New Liskeard Speaker makes a good point last week in a front page editorial. The Speaker says:—

"Now that the Government has introduced the precedent of issuing motor licenses at 'half price' for 'the balance of the year,' Northern members of parliament, boards of trade and other organizations should not hesitate to demand more equal treatment for the North in the matter of license fees. While The Speaker has received no official information to the above effect, we have read it in several Ontario newspapers, and are presuming the information is correct. The fact that the Government has considered it proper to grant a license for a part of the year at a less than full year rate strengthens the contention of the Northern press that Northern Ontario, where autos can only be consistently used from May until November, should be granted auto licenses on a graded scale, or, in other words, on a monthly basis corresponding with the yearly rate where autos are in use for well over the whole year, as they are in Old Ontario parts. The North is solid in believing they are entitled to this consideration, especially when the rates for gas in this part of the province are practically ten cents a gallon higher than farther south. What are our people going to do about this matter? Better take definite steps in plenty of time to secure results for next year."

"Alice" in Filmland

MISS IDA LUPINO
noted English stage actress and a member of the famous stage family of that name, pictured on arrival at New York en route to Hollywood, where she will play the role of "Alice" in the film version of "Alice in Wonderland."

Kiwanis Club Hear Address on Silicosis

Origin and Cause of Disease Outlined, with Measures Adopted to Deal with it. Address Illustrated by X-Ray Pictures.

The address by Dr. Norman Russell, of the X-Ray Dept. of St. Mary's hospital, Timmins, was the big feature of the Kiwanis Club weekly luncheon at the Empire hotel on Monday. Dr. Russell's address was not only informative but it was intensely interesting, and from it the Kiwanis gathered an increased regard for the notable work being done here and elsewhere in Ontario to combat the menace of silicosis.

President Reg Smith was in the chair on Monday and carried the proceedings through with his usual effectiveness.

The visitors for the day included R. Allen, of Timmins, and Rev. Mr. McClure, of the Metropolitan Church, Toronto, who was the guest of Rev. Bruce Millar.

A. D. Campbell, safety engineer at the McIntyre, made his first appearance at the club as a member of the Timmins Kiwanis.

In opening his address on "Silicosis" Dr. Russell touched on the origin and cause of the disease. He made it plain that silicosis, sometimes called "miner's consumption," was by no means confined to mining. There were other industries in which silicosis developed to a greater extent than in mining. Dr. Russell followed up his outline of the cause and origin of silicosis by a review of the methods used to combat the disease. His address was a very effectively illustrated by x-ray pictures showing normal lungs, and lungs depicting silicosis in its various stages. There were also pictures in which lungs were shown when silicosis was complicated by tuberculosis acting on silicotic lungs and the serious situation that has to be met when these two diseases are present at the one time. If it were not for the tendency to develop tuberculosis and pneumonia, the silicosis patient would be comparatively easy to treat. When Dr. Russell completed his very able address he volunteered to answer any questions that might be asked to clear up points that might have arisen in his address. A number of questions were asked and the answers given by Dr. Russell added very much to the effectiveness of his discourse on silicosis.

One of the business matters before the club was the question of the district convention of the Kiwanis to be held in Montreal on Sept. 17th, 18th and 19th. Another was the arrangements for the visit of the Toronto Kiwanis Club to Timmins and Noranda next month. Kiwanian J. R. Walker is the representative for the Timmins Club to attend the district convention at Montreal. It is expected that a number of other Kiwanis from Timmins will also attend the convention. Arrangements are about perfect for the reception and entertainment of the Toronto Kiwanis next month.

The speaker at the Kiwanis luncheon on Monday next will be "Silent Bill" Biddle, who is a crusader for the ideas that parents should look after their boys and then there will be no recruits for the prisons, and also that all should learn the lesson that crime does not pay and can not be made to pay.

HAILEYBURY YOUNG MAN WINS A GRADUATE SCHOLARSHIP

Nell S. Beaton of Haileybury, Ontario, has been awarded a graduate scholarship of the Massachusetts Institute of Technology according to an announcement on September 1st by the committee on the graduate school.

The award, which is made on the basis of high scholastic standing, will enable Mr. Beaton to continue his graduate studies next year at the Institute where he is a member of the staff in the department of geology.

Young Lady Injured by Tomatoes Thrown at Car

A young lady riding in an automobile on the road near the incinerator plant last night had a narrow escape from loss of her sight through the criminal action of some persons said to be boys. The young lady in any event suffered painful and serious injuries to her face and eyes. As they were driving along the roadway tomatoes and other articles were thrown at the car some of the missiles breaking the glass in the windshield and showering the driver and the young lady with glass. The driver escaped injury but the young lady was so badly hurt about the face as to require medical attention. The doctor removed one nasty sliver of glass from the young lady's cheek, while she was also cut above and below one eye, the cuts being deep and painful ones. It was a matter of very small fractions of an inch in the position of the cuts that saved the young lady from losing her sight. It is said that autos passing the same piece of road recently have been pelted with rocks and other missiles. The matter was reported to the town police who investigated so far as possible though the location is outside the town limits. The provincial police are being asked to take the matter up so that those responsible for this sort of dangerous and criminal action may be dealt with.

Fire Looked Like an Incendiary Affair

Store Apparently Entered from the Rear. Fire Seemed to Originate on One of the Shelves. Firemen Have Two Other Calls.

On Saturday morning, Sept. 9th, at 2:30 o'clock the firemen had a call to 151 Maple street, north, the corner store building owned and operated by Geo. Boychuk. After a battle the firemen succeeded in stopping the fire but not before some damage was done. The loss on the stock would be about \$100.00 and about \$116.00 on the building. The loss is covered by insurance, there being \$800.00 on the building and \$1,000.00 on the fixtures and another \$1,000.00 insurance on the stock. The fire was handled by the use of both a water line of hose and the chemical tank. The water was used outside and the chemical for inside work.

There were so many evidences that the fire might be incendiary in origin that Fire-Chief Borland called in the police. Chief Jones and his men are investigating the matter. When Chief Borland looked over the building he found the key in the back door, while the glass in the door was broken. Mr. Boychuk said that there was a bar used across the back door and the key would not open the door. He did not put the key in the lock nor try to open that door from the outside. Mr. Boychuk thought that someone with a grudge against him might have tried to open the door with the key and finding it still secure they might have broken the window to remove the bar and get in. He knew people who had a grudge against him. The fire seemed to have been started on one of the shelves and the indications seemed to be that it had been set and had not come about by accident. The police are continuing their investigations.

On Sept. 11th at 2:15 p.m. the brigade had a phone call to 65 Fourth avenue for a chimney fire.

On Sept. 13th at 4:30 p.m. there was a telephone call to 7 Maple street south, L. Halperin, owner. The fire was in grass between two garages. No damage was done.

A young man from Toronto, who has motored all over the North this year, says that the finest piece of road that he has encountered apart from the pavements is the stretch of road between Cochrane and Kapuskasing.

Death of Little Daughter of Mr. and Mrs. D. Allan

There will be very sincere sympathy extended to the family in the death of St. Mary's hospital, Timmins, on Monday morning, Sept. 11th, 1933, of Barbara Allan, aged two years and two months. The little girl was the daughter of Mr. and Mrs. Duncan Allan, who are residing at the home of Mr. Allan's father and mother, Mr. and Mrs. Wm. Allan, 167 Elm street north. The little girl was only ill for about three days. Death was due to the prevalent summer complaint.

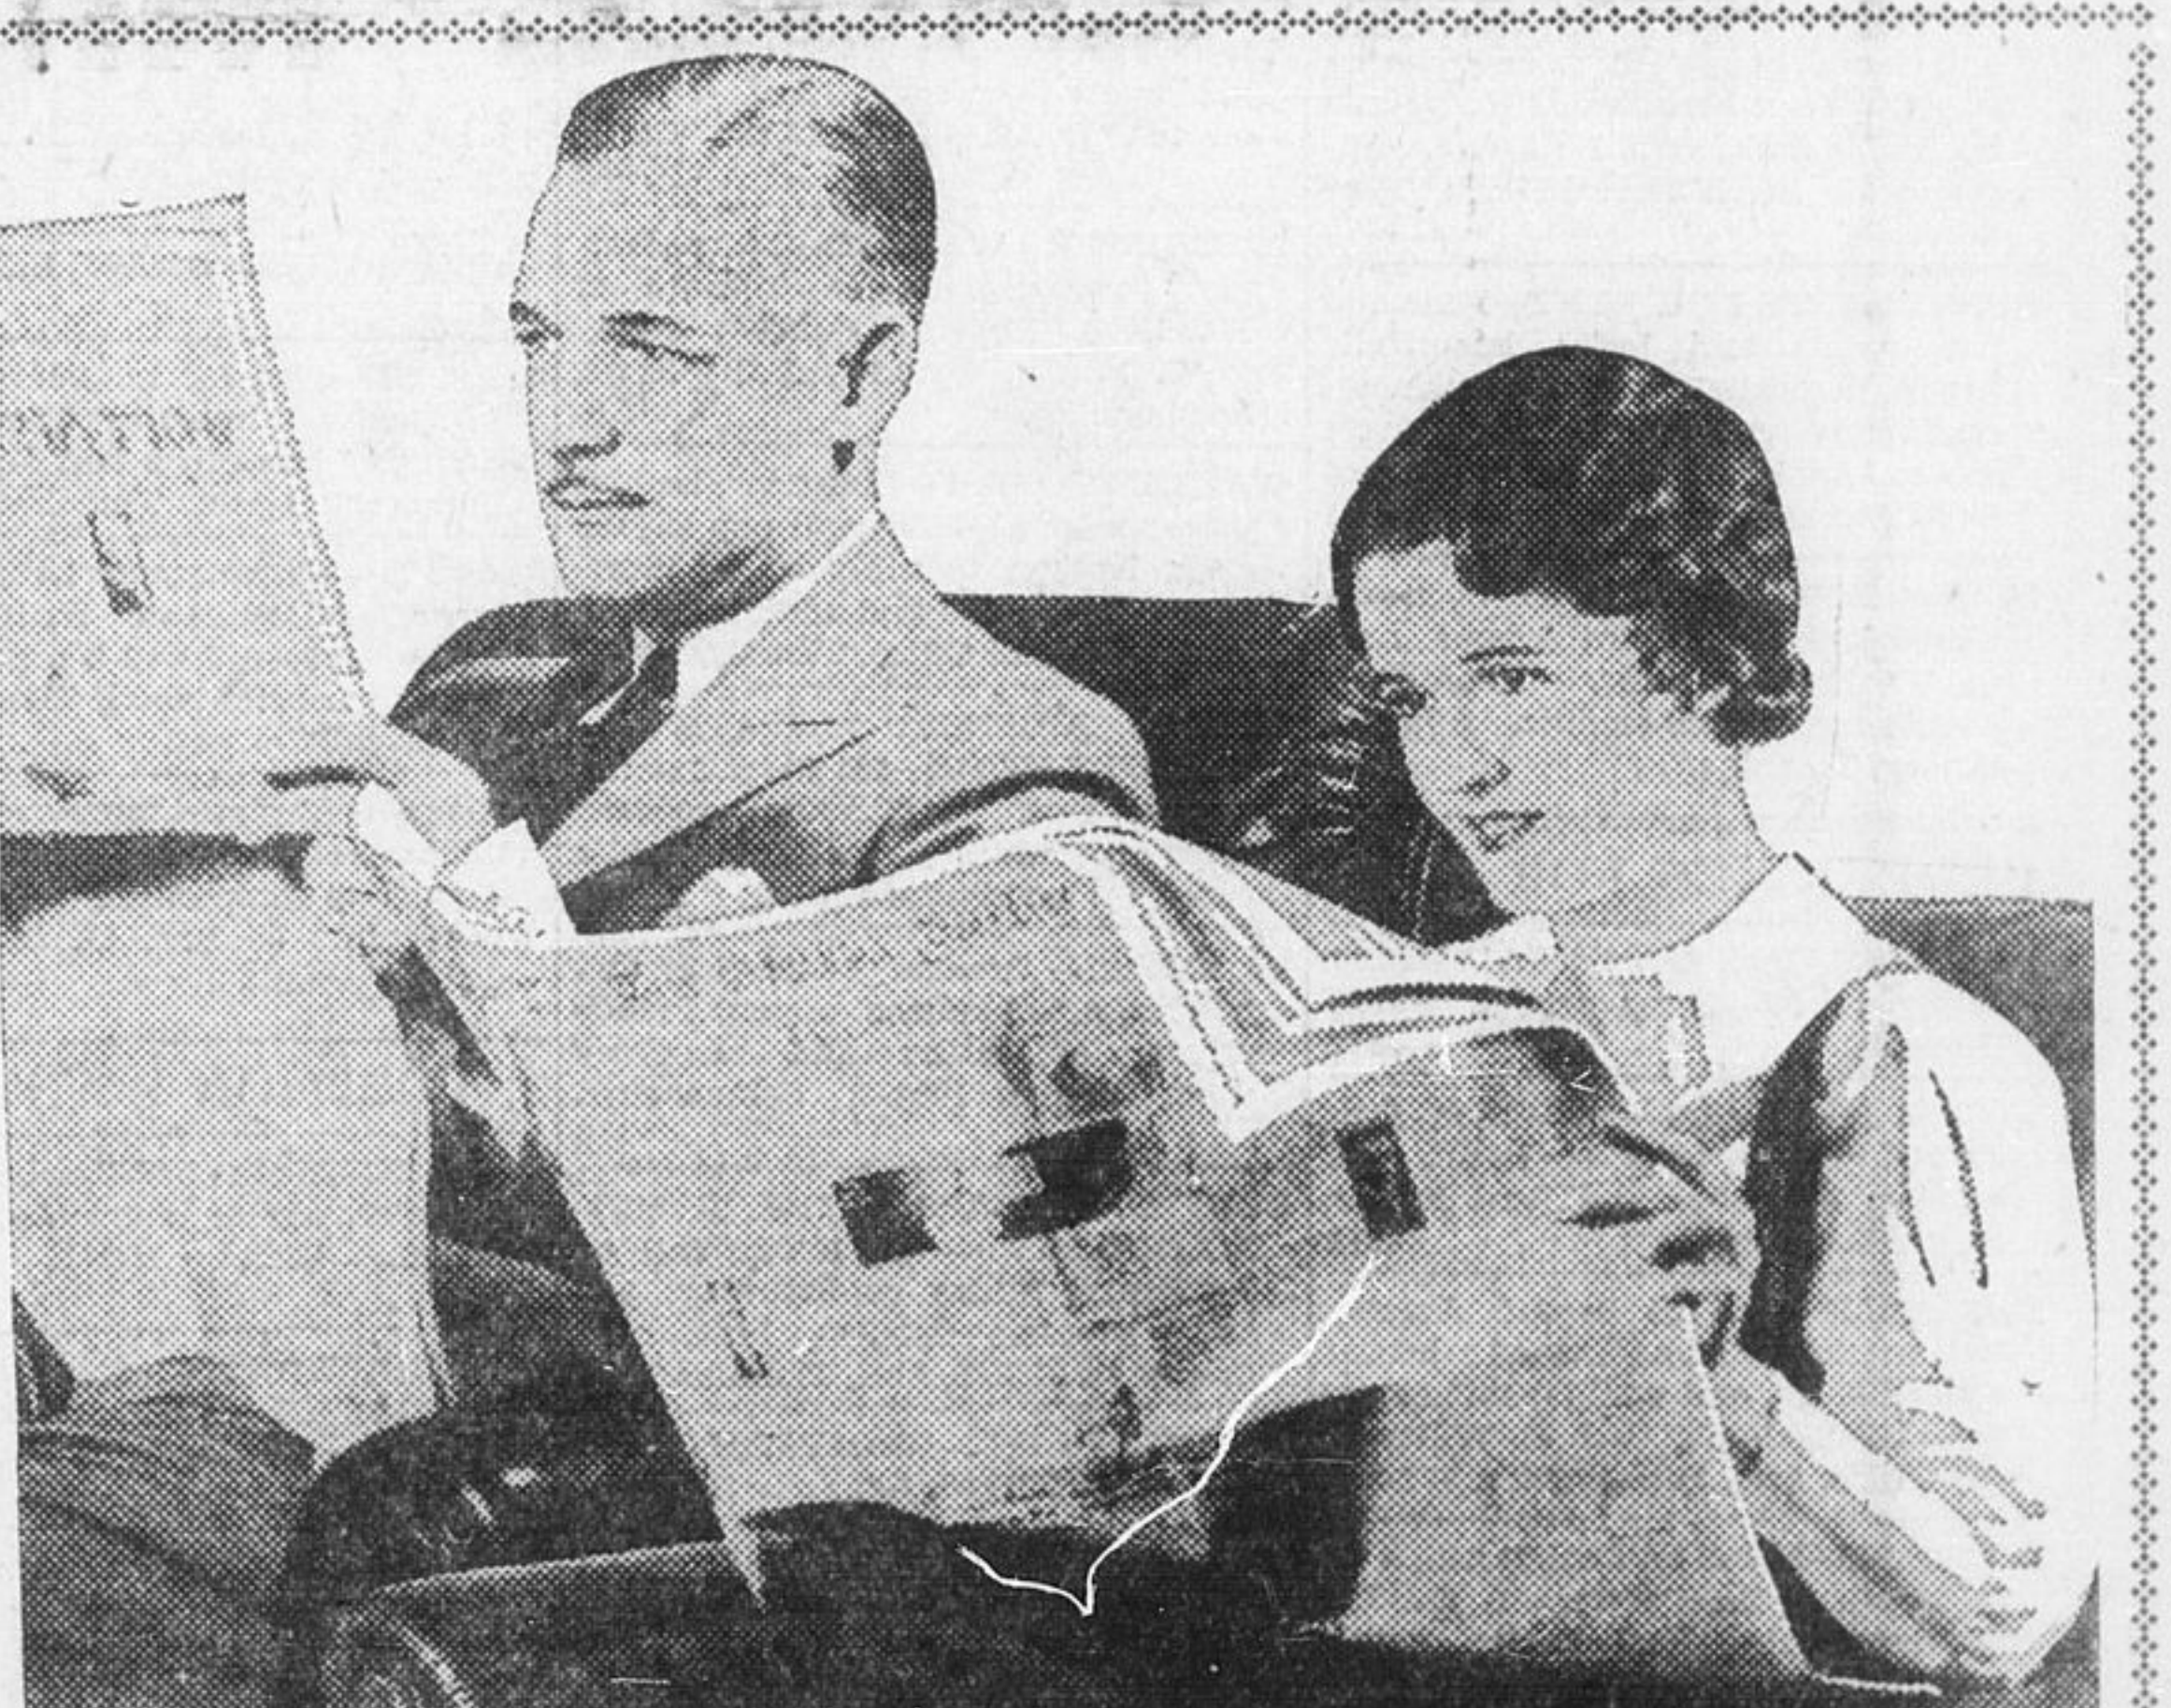

The funeral took place on Tuesday afternoon at 4 p.m. from the family home. Service was conducted at the house by Rev. Bruce Millar. Interment was made at the Timmins cemetery.

There were many beautiful floral tokens including—flowers from the family, from Betty and Jessie France, Gladys and Bernice Langman, Myrtle and Dora Knell, Mr. and Mrs. Gillen, Mr. and Mrs. A. Thomas, Mr. and Mrs. S. Johnstone, Mr. and Mrs. R. Smith, Miss Barton, V. O. N. nurse, Mr. and Mrs. Westine, Mr. and Mrs. Morrow, Mr. and Mrs. Geo. Allan, Wee Agnes Smith, Mr. and Mrs. McNnis (Toronto)

Syndicate After Silver in Gillies Limits Area

A well-known old-time prospector and mining man of the Cobalt camp, Walter J. D. Penley, of Cobalt, was a visitor to Timmins last week and met many old friends here. Mr. Penley had a number of successes in the Cobalt camp and believes that he is on the way now to the greatest success yet. He believes in hunches and he has two hunches at the present moment. One is regarding the price of silver and the other is in respect to a silver discovery that will put even the noted mines of the old Cobalt camp in the shade. In both hunches Mr. Penley has a number of known facts to back up his beliefs. At present Mr. Penley is putting all his attention and effort into a syndicate he is forming for the development of a silver property in the Gillies Limits area. He has nine claims there with six years' work done on them and he believes he has a proposition that will appeal to the old-timers with sporting blood, who are satisfied when they get a fair deal and a good run for their money, and with these things guaranteed are willing to take a chance. In any event Mr. Penley's double hunch has made such an appeal to many that a large number in Haileybury and Kirkland Lake have already joined. Indeed, Mr. Penley's list of syndicate share buyers from Haileybury looks like a directory of the shrewdest and best men of that town.
