Conservatives Meet for South Cochrane

J. W. Bain Re-elected President and U. L. Acton, Also of Kirkland Lake, Secretary of the South Cochrane Conservative Association.

On Wednesday afternoon of last week the annual meeting of the South Cochrane Liberal-Conservative Association was held at Matheson. There was a large and representative attendance from the district, members being present from Timmins, Schumacher, South Porcupine, Hoyle, Connaught, Porquis Junction, Iroquois Falls, Cochrane, Val Gagne, Monteith, Shiningtree, Matheson, Ramore, Kirkland Lake and other centres, as well as a number of the townships and unorganized sections of the riding.

President—J. W. McBain, Kirkland Lake, re-elected for second term. Secretary—U. L. Acton, Kirkland Lake, re-elected for second term.

Honorary presidents:—Rt. Hon. R. B. Bennett, Hon. G. H. Henry, A. F. Kenning, M.L.A.; Hon. W. A. Gordon, G. H. Gauthier (Timmins).

Vice-presidents:—F. K. Ebbitt, Iroquois Falls; F. C. Evans, South Porcupine; A. C. White, Hoyle; Alex. Fraser, Kirkland Lake; R. S. Potter, Matheson; J. D. Bastien, Ramore.

In the discussions of the day there was much of special interest and it was evident that the party is in fine fighting fettle. A. C. White, of Hoyle, pointed out that while Kirkland Lake now having a population of around 15,000, was in South Cochrane for the provincial elections, it was in South Temiskaming for the federal riding, and that this might make difficulties unless there were time to appoint new officers for South Cochrane to be on the representation of the North Temiskaming election committee.

A stirring address was made to the convention by F. C. Evans, of South Porcupine, who touched on a number of points that were being brought forward by those in opposition to the government. He thought it would be a good idea for the various associations in the riding to hold meetings to discuss the points referred to and to present their findings to the government.

F. K. Ebbitt, of Iroquois Falls, suggested that it might be well to set a date for the convention for the nomination of the candidate for the riding for the provincial election. The president replied that he had assurance that the date of the election would be known in ample time to allow for the calling of the convention and for the organizing of the campaign.

Reeve Mrs. Thomas, of South Porcupine, made a stirring address, urging all to unite and show the strongest front for the coming provincial and Dominion elections.

Reeve Gerald O'Meara, of Kirkland Lake, was another of the speakers. He touched on the fact that the matter of the government refusing to guarantee Northern Ontario school debentures had been brought up on several occasions. He felt that the Ontario government could be depended upon to give the best possible co-operation in this respect. In support of this he mentioned that he had just returned from Toronto where representatives of the township of Teck had been able to secure government guarantee of \$65,000.00 worth of school debentures of the township of Teck.

Among the others speaking briefly but to the point were G. H. Gauthier, of Timmins, and Alex. Fraser, of Kirkland Lake. In his remarks, Alex. Fraser assured the convention of his own support and the co-operation of Kirkland Lake and district.

In the re-election of President McBain and Secretary-Treasurer Acton, the meeting felt that it was starting a new year with good prospects and with harmony and interest in the ranks in all parts of the district.

MONSTER TURNIP GROWN IN HAILEYBURY GARDEN PLOT

The Haileyburian last week says:—"A monster swede turnip, grown in the Elliott street garden of Jos. Thisdale, is on view in a store window this week. It weighs 14 pounds and measures 26 inches around and is about the biggest thing in the shape of garden products, with the exception of pumpkins, that we have seen in many years. Mr. Thisdale says that it grew from a stray seed dropping among his onions and that it had plenty of space for expansion when the onions were picked. He has a good average crop of turnips, he says, but this is the only one that grew to such extraordinary proportions."

Five Hundred Pulpwood Cutters for Abitibi Co.

A despatch from Iroquois Falls this week says:—"Heavy bush operations by the Abitibi Power and Paper Company here this winter will give employment to a large number of bushmen, who have not experienced the like since the fall of 1929. The local mill here will employ approximately 500 pulp cutters this coming winter and contracts have been let out to George Wright, of North Bay; M. J. Hennessy, of Haileybury, and A. Bronson, for approximately 50,000 cords of pulpwood. Considerable wood will also be bought from the settlers in Quebec, also along the T. & N. O. The Ontario Employment Service at North Bay and Timmins have received orders to ship bushmen here. Timmins having orders for 60 men and North Bay 25, with more orders to follow later. Wood is also being cut at Smooth Rock Falls, a sulphite plant, also owned by the Abitibi, which will help considerably in that district."

About Hockey Prospects in the North for Season

Writing in the column, "Sportology" last week in The North Bay Nugget, "Observer" has the following to say about the hockey situation and prospects for the coming season:—"With King Winter fast scrambling back to his throne, hockey directors are busying themselves so as to be ready to start the season's festivities as quickly as solid ice forms. Within the next few weeks all leagues, local and district, will have re-united their forces and made other preparations for carrying on the 1933-34 campaign. The Northern Ontario Hockey Association, the big noise in these parts will stage the annual conviave here early in November and judging by the interest being evinced in all corners of the jurisdiction, it will be one of the largest and most important gatherings in the history of the organization. The T. & N. O. district, including the Noranda, Kirkland and Timmins mining regions, will be in the fight with more vim and vigour than ever. All three will furnish senior and junior entries with the Timmins section sporting senior teams at South End and the home of the Hollinger. There will be a mighty battle for senior laurels and the right to follow through to the provincial play-downs—and it will not all be centred in the Gold Diggings. Falconbridge, already noted in soccer and baseball circles, purposes persevering in an aim to win distinction in the hockey realms. This ambition has resulted in the assembling of a rather classy senior team and one that it expected to show a clean set of heels to the champions of the Golden Group. There's a lot of hockey gossip being thrown to the winds just now and if everything measures up to expectations the North should have a big year and be assured of sending two smart teams down province for the playdowns next spring."

In Arms Deadlock

Germany's Charge D'Affaires in London, pictured as he left the British Foreign Office after he had conveyed to Sir John Simon, British Foreign Minister, Germany's rejection of the three-power disarmament proposal.

KIRKLAND PLANS EXHIBIT OF TEMISKAMING FARM PRODUCE

Sponsored by two merchants of Kirkland Lake, an exhibition of Temiskaming farm produce is to be shown at Kirkland Lake in the near future, with the double object of creating greater interest in the agricultural prospects of the district and of assisting those on relief in Kirkland mining camp. Officials of the Temiskaming Farmers' Association are taking an active part in the staging of the event, which will be held probably in the first week of November and in conjunction with the weekly market held in Kirkland Lake. Prizes are being offered in the different classes, and it is expected an official from the Provincial Department of Agriculture will be judge.

Hollinger Led Last Month's Gold Output

Total Production of Gold Mines in Ontario for the Month of September was \$3,336,898. This Does Not Include Exchange.

Gold production by the mines of Ontario in September was lower than in any other month this year, and lower than in any of the first nine months of last year. The total was \$3,366,898, compared with \$3,716,395 in August and \$4,059,248 in March, the high month for the year. The figure compares with \$2,917,186 in September last year. The returns, compiled by the Ontario Department of Mines, however, do not include the premium on gold, which in recent months has been increasing the mines' income about 30 per cent.

Total production for the province in the first nine months of this year was \$22,884,782, from 4,143,505 tons of ore milled, compared with \$34,756,778, from 4,085,839 tons in the first nine months of last year. The lower income from greater tonnage this year suggests that the mines have been putting through some low-grade material which has been brought up to commercial quality by the gold premium.

September receipts of crude gold bullion at the Royal Canadian Mint, Ottawa, from Ontario mines, contained 167,090 fine ounces of gold and 21,270 fine ounces of silver, with a total value (standard) of \$3,461,866. Producers in northwestern district are now reduced to three, Howey, Minnie and Moss. Hollinger of the Porcupine field took the lead for production in September, followed by Lake Shore, McIntyre, Dome, Teck-Hughes and Wright-Hargreaves, in that order.

ARREST AT NORTH BAY FOR THEFT OF CAR AT SUBURBY

Last week Bert Johnson, who gave his address as Truro, Nova Scotia, was arrested at North Bay charged with the theft of a car at Sudbury. He was in the car reported to be stolen when picked up by the police. The North Bay police were scouting around the city looking for a Ford sedan reported stolen from Sudbury when they noticed the wanted vehicle parked at the curb. It had all the points of the wanted car, even to the number plates. The young man in possession of the car was questioned and then taken in charge and then held to be sent back this week to Sudbury to be tried on the charge of stealing the auto.

Queen Mary Actually Sees the Bull in a China Shop

The expression "a bull in a china shop" is a common one. Nearly everyone has used it at one time or another to describe reckless damage or picture confusion at its worst. It appears to the imagination as being about the limit in the way of stupid damage to useful and beautiful things. But though most people have used the expression, it is doubtful if anyone ever saw a "bull in a china shop." Indeed, few people will be able to remember even reading of an actual occurrence of this kind.

On the other hand, Queen Mary last week had the actual experience of seeing "a bull in a china shop." The results of the visit of the bull to the china shop seem to be rather disappointing. Apparently no great damage was done. Indeed, it seems that the incident would not have been mentioned even, had it not been for the fact that the Queen was in the china shop at the time of the visit from the bull. The story is told by the Canadian Press in the following cable:—"Pakenham, Norfolk, England, Oct. 20.—A young bull today rushed into a shop where Queen Mary and the Princess Royal were examining goods in the china department. The animal had fled from traffic in a crowded street outside.

The Royal party looked up in surprise at the sound of commotion, and the Queen found the bull standing almost beside her. Clerks and its drover hastily persuaded it to leave before any damage resulted. The Queen and Princess remained unperturbed and apparently enjoyed the incident.

Her Majesty said: "I have heard of a bull in a china shop, but had never seen one before."

BLAME LEAVING OF SKUNKS ON U. S. PLAGUE OF GOLD STANDARD

In one section of Pennsylvania there is a plague of skunks. Villages and farm lands are overrun by the odiferous animals, and it is just too bad. The people of Lancaster, Pennsylvania, say they certainly do care a cent. It is claimed that skunks are breaking up church meetings and services, actually blocking traffic and garages are being deserted by the wholesale in favour of the skunks. The farmers say that they were used to skunks trying to break up their political gatherings but this is the first time they have had church services interfered with by another brand of skunk.

The farmers of Pennsylvania blame all the trouble on the fact that the U. S. has gone off the gold standard. That sounds like a hard one, but the Pennsylvania farmers back it up with reason. They say that just as soon as the United States went off the gold standard the gold countries of Europe quit buying skunk hides, prices collapsed and trappers quit trying to capture skunks because they had become almost as worthless as they were smelly on occasion. As a consequence of this the skunks have been increasing in unprecedented way. No one but the farmers have been trying to kill them off. The result is that Pennsylvania this year has a bumper crop of skunks. Soon the farmers are afraid you won't be able to get near the state for the smell.

Cobalt Town Office Robbed of Over \$100

Money Stolen from Shelf in Cobalt Municipal Office on Saturday, but a Box Containing \$600.00 is Left Untouched.

On Saturday morning at an early hour forcible entrance was gained to the Cobalt municipal offices through the smashing open of the door, and over \$100.00 was taken from a shelf, according to a despatch from Cobalt on Monday. According to the despatch the thief or thieves took 54 bills of three different denominations, the total being \$108.00. At the same time a cash box containing about \$600.00 was left untouched, the despatch says. The police have been working on the case but there do not seem to be many clues, or other helps to the solution of the mystery of the taking of the money or the overlooking of the money in the cash box. It appears that the vault in connection with the offices has not been working properly and so was temporarily out of use. The money taken had been placed in a book with cheques for deposit with the bank in the morning, and had not been placed in the cash box simply through an oversight. The comparatively large amount of money in the cash box was due to the fact that Friday was the time limit for the paying of current water bills, and some payments on the third instalment of taxes had also been made. As soon as the theft was discovered, Provincial Constable R. O. Stromberg was called in Chief Geo. Delves of the Cobalt force being ill at his home.

The alleged theft took place between three o'clock in the morning, when a dance given in aid of the High School Rugby Club funds, and held upstairs in the town hall, concluded, and seven o'clock, when Samuel Harper, caretaker of the building, came on duty for the day. Constable Stromberg stated that he had been in the hall twice during the night, the second time as late as 2.30 a.m., and that everything was normal at that time. The officer said he then left on other official business, and when he came back about half past four, the building was in darkness. He did not enter the hall at that time.

The door jamb has been broken, apparently as a result of steady pressure applied to the heavy wooden door, with the intruder probably bracing himself against two pipes connected with the heating system of the building. The money taken included eight five dollar bills, 22 twos and 21 ones, according to the list given the police by Town Clerk Harrington.

Amount of Meat Used by Those on Relief Varies

Meat appetites of unemployed families are far from uniform shows a checkup made by F. R. Clarke, manager of the Emergency Unemployment Relief Committee at Montreal, according to despatches last week. Of 800 families budgeted at \$3 a week for meat, groceries and vegetables, 295 did not buy meat, 99 spent less than 25 cents for meat, and 217 spent from 26 to 50 cents, 170 from 51 cents to \$1 and 19 spent more than one dollar, Mr. Clarke found.

"It will thus be seen that with such variation of individual desire or requirements how unwise it would be to specify the amount to be spent by each family for meat," stated Mr. Clarke following a proposal made by the city's Unemployment Relief Commission to give unemployed families separate meat orders in place of ones combining meat and groceries.

"It should also be remembered," he said, "that more than 80 per cent. of the families on unemployment relief are normally self-supporting and are quite capable of judging for themselves the proportion of their relief order, which should be spent in any particular way. Besides some families buy more meat in one week than they do in another for their own convenience."
