

SIMPLE FOODS are best

Strong, healthy bodies and keen minds are best developed by eating the simple, natural foods. Many of the most famous men of history grew up with a diet chiefly of oatmeal. Purity Oats have all the healthful qualities and the delicious flavor of Canada's finest oats, milled in the exclusive "Purity" way.

A piece of fine china in each "China Package." Ask for it today.

PURITY OATS

Made by the millers of Purity Flour, Hoiva Flour and Pioneer Poultry Foods.

Governor-General Pays Visit to Niagara Falls

In the course of the Vice-Royal tour of leading Ontario communities, during which the Governor-General is paying special attention to important Canadian industrial enterprises, His Excellency, the Earl of Bessborough, last week visited the plant of the Canadian Shredded Wheat Company at Niagara Falls, Ont.

The distinguished party, accompanied by Mayor Swayze, studied with obvious interest the processing of Canada's most important agricultural product, wheat—a continuous operation from

the bins where the wheat is stored to the shipping room where the finished food product arrives, packed in cartons, ready for distribution. The automatic equipment, particularly the packaging machinery, which eliminates handling, drew particular attention.

From the steam-cookers, the visitors watched the progress of the cereal through the shredders and into the huge ovens, an endless parade of breakfast food to the automatic packing and packaging units.

His Excellency was welcomed by C. E. Edmonds, representing the president of the Canadian Shredded Wheat Company. Officials who were present for the tour of inspection included W. J. Wilcox, general sales manager; J. H. Hadden, production manager; J. Costello, plant superintendent; J. P. Patterson, director of publicity; C. B. Read, plants manager; W. J. Morrissey, assistant treasurer and E. P. Webster, engineer.

Huntingdon Gleason:—Under California law, a baby may work only two hours a day. At the Fox studio in Hollywood they are making a motion picture in which an infant plays a role. The director said he couldn't get the picture finished with those kind of hours, so he hired twins. The new actors are Pat and Harry Bowen, aged 4 months, the sons of Harry Bowen, screen comedian. They are going to work two hours each on one role, and the director says he has twice as much chance of catching the right mood for a shot.

Recipes for Cakes Frosting and Icing

"Delicious Crumblers of Frostings Baked on the Cake," Referred to by Expert in Food Service and Domestic Arts.

The following in reference to the new plan evolved of baking frosting on the cake was sent to The Advance by Miss Helen E. Kimball, director of food service department of the Borden Co., Toronto:—

Among the most interesting recipes which have been evolved recently are frostings which are baked right on the cake! They're very easy to make and the crunchy deliciousness of the finished cake will thrill you.

The basic ingredient in these frostings is sweetened condensed milk which is pure whole milk and cane sugar cooked down to a richness that is almost of a frosting consistency as it comes from the can. It needs only one or two other simple ingredients for a perfect frosting.

The cake should be baked first as usual and cooled. The frosting is then spread on it. Place the cake on a cookie sheet, or if you haven't frosted the sides use the pan in which the cake was baked and brown delicately in a hot oven (450° F.). The cake will not dry out as might be supposed because it is spread with moist frosting on all sides. Be sure and watch the cake carefully while it is in the stove for sugar mixtures, as you know, burn rather easily.

Coconut Broiled Icing
1-2 cup sweetened condensed milk
2 tablespoons butter, melted
4 tablespoons brown sugar
1 cup shredded coconut

Combine all ingredients and blend thoroughly. Spread on cake. Place very low in broiler under a slow flame. Broil until the icing bubbles all over and the surface becomes light brown. Remove from broiler. Cool.

Marshmallow Caramel Frosting
1 can sweetened condensed milk (caramelized)
12 marshmallows
1-2 cup shredded coconut.

Peat caramelized sweetened condensed milk (see note below for caramelizing) until smooth and creamy. Combine with finely cut marshmallows. Spread on top of cake. Sprinkle with shredded coconut. Bake five minutes or until coconut is golden brown in a hot oven (400° F.).

To caramelize sweetened condensed milk: Place one or more cans of sweetened condensed milk in a kettle of boiling water and keep at boiling point for three hours, being careful to keep can well covered with water. Chill thoroughly.

Baked Fudge Frosting
2 squares unsweetened chocolate
1-3 cups (1 tin) sweetened condensed milk
1 tablespoon water
1 cup shredded coconut

Melt chocolate in double boiler. Add sweetened condensed milk, stir over boiling water five minutes until it thickens. Add water. Fold in half the coconut. Spread on cake. Sprinkle top with remaining coconut. Place in a hot oven (450° F.) 10 minutes or until coconut browns.

Toasted Peanut Frosting
1-3 cups (1 can) sweetened condensed milk
2 tablespoons peanut butter
1-2 cup chopped peanuts
Peanut halves.

Place sweetened condensed milk and peanut butter in top of double boiler. Cook over boiling water for five minutes, or until mixture thickens, stirring until well blended. Add chopped peanuts. Spread on cake. Decorate top with peanut halves. Bake in a hot oven (450° F.) 10 minutes.

Lemon Crumb Topping
1-3 cups (1 can) sweetened condensed milk
1-4 cup lemon juice
1 cup zwieback crumbs
Stir sweetened condensed milk and lemon juice together until mixture thickens. Add 1-2 cup zwieback crumbs. Spread on top of cake. Sprinkle with remaining zwieback crumbs. Bake in a hot oven (450° F.) 10 minutes.

Crunchy Caramel Frosting
1 can sweetened condensed milk (caramelized)
1-2 teaspoon lemon extract
2 cups rice flakes
Beat caramelized sweetened condensed milk (see directions for caramelizing under marshmallow caramel frosting recipe) until smooth and creamy. Add lemon extract and one cup rice flakes. Mix thoroughly. Spread on cake. Sprinkle top and sides generously with remaining rice flakes. Bake in a hot oven (450° F.) 10 minutes.

British Columbia Jury Acquits Kirkland Miner

At Vancouver last week, Robert Kurja, also known as Bodgan, was acquitted on a charge of murder, an assize jury bringing in a verdict of not guilty after a little over half an hour's deliberation.

Kurja or Bodgan was a miner and was working at Kirkland Lake when he was picked up by the provincial police and held till an officer came from Vancouver to escort him back to that city for trial. He was working at the Sylvanite mine when arrested and had been four years in Kirkland Lake.

The charge of murder arose from the death of Kurja's wife in 1930. Kurja was accused by the authorities on the word and information of others it being said that he assaulted his wife while the two of them were visiting at a friend's home. In the affair he was alleged to have fired a gun, the bullet striking the woman in the chin and death resulting from the injury. Kurja's defence was that the discharge of the gun was accidental, and evidently the jury believed the account given by the defence.

A young wife, wishing to announce the birth of her first child to a friend in a distant city, telegraphed: "Isaiah 9:6." Which passage begins, "For unto us a child is born, unto us a son is given."

Her friend, not familiar with the Scriptures, said to her husband: "Margaret evidently has a boy who weighs nine pounds and six ounces, but why on earth did they name him Isaiah?"

—The Congregationalist

HOME FOR Christmas

WHY not go home for Christmas? . . . Perhaps you haven't been there for years. Restful cabins . . . comfortable public rooms . . . marvellous meals . . . and the perfect Cunard Personal Service await you in whichever class you travel on these popular ships.

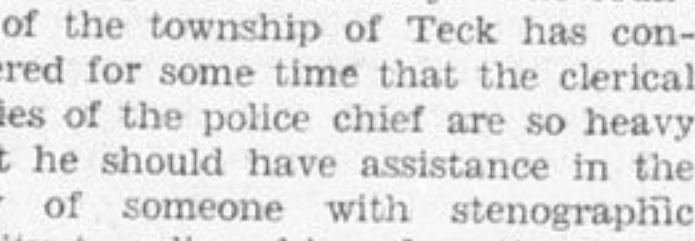

SPECIAL CHRISTMAS SAILINGS

from MONTREAL on
Nov. 24 — R.M.S. "AURANIA" to Havre and London.
Nov. 27 — R.M.S. "ATHENA" to Belfast, Liverpool, Glasgow.

from HALIFAX on

Cabin Class from \$266.00
Tourist Class from 183.00
Third Class 131.50

Ask about our Special Christmas Excursions from your local agent or from the nearest Cunard office 217 Bay Street, (Elgin 3471) Toronto.

Secretary Appointed to Kirkland Police Chief

The chief of police at Kirkland Lake has been given a secretary. The council of the township of Teck has considered for some time that the clerical duties of the police chief are so heavy that he should have assistance in the way of someone with stenographic ability to relieve him of routine work, correspondence, filing of d.j.ail and data, and so on. Some weeks ago Chief Wm. Shane, of Kirkland Lake, formally asked council for this form of assistance. The position was eventually advertised by the Teck council and last week the police committee, of which Walter Little, is chairman, selected the assistant to the chief of police. There were a large number of applicants. The final choice from among the many applicants was D. Pelagio, of Kirkland Lake, who is now the secretary to Chief of Police Shane, at a salary of \$60.00 per month.

Unique Rail and Water Circle Tours Arranged

An arrangement has been perfected by the Canadian National Railways and the Grace Line covering a unique rail-water circle trip to California and the Pacific North West, whereby the principal scenic wonders of Canada can be visited plus an ocean cruise through the Spanish Americas via Panama Canal.

Passengers can purchase these rail-water circle trip tickets at all Canadian National local offices or through any authorized steamship or tourist agent. Stateroom accommodations and meals are included on the steamer and the trips are sold at astonishingly low fares from starting point and return to starting point.

The ticket covering rail route across the continent carries with it liberal stopover privileges and includes visits to some of the most magnificent mountain resorts to be found in the world and a choice of routes can be selected from any part of Canada. Visits can be made to Jasper National, Algonquin, Mount Robson and other national parks as well as the principal points in the Canadian Northwest. All principal cities can be reached under the same arrangements depending upon route selected to make the transcontinental trip.

Railroad tickets are issued to the port selected for departure, namely, New York, Los Angeles, San Francisco, Seattle or Victoria, B.C. Following the steamer trip, the rail return is made from opposite coast to the starting point.

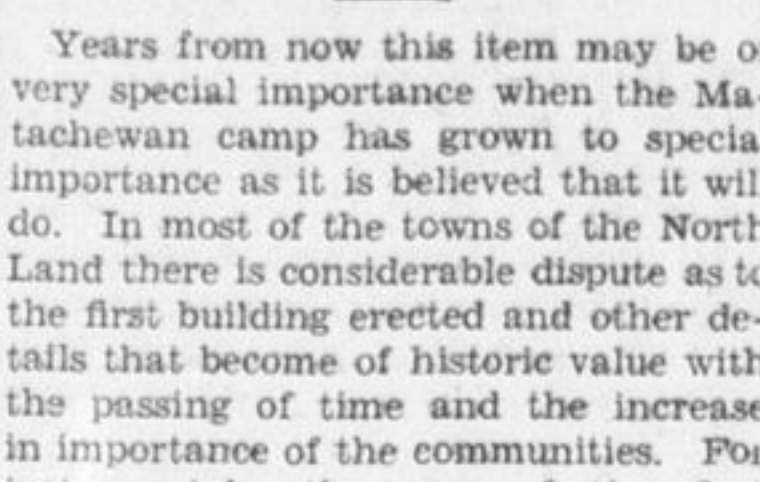

On the steamer portion of the trip a veritable journey abroad is made, with steps at six Spanish American countries. These include Havana, Colombia, the Panama Canal, San Salvador, Guatemala and Mexico. At each port the traveller is allowed ample time ashore to see the attractions of the native villages and cities and in some cases make short inland trips to scenic wonder and historical spots of the particular country. The time consumed between New York and California in either direction is 17 and 20 days, depending upon the type of steamer selected.

First Building in Matachewan 'Town'

One-Storey Frame Building Erected in New Townsite by Councillor Alex Fraser, of Kirkland Lake.

Years from now this item may be of very special importance when the Matachewan camp has grown to special importance as it is believed that it will do. In most of the towns of the North Land there is considerable dispute as to the first building erected and other details that become of historic value with the passing of time and the increase in importance of the communities. For instance, take the case of the first building erected in Timmins. For years there was dispute as to who had the honour of erecting the first building on the Timmins townsite. The late Henry Peters, first postmaster of Timmins, was given credit for having the first building in town, according to some old-timers. Mr. Peters, however, said himself that while his building was undoubtedly one of the very early ones and was rushed to completion for use as a post office, the old International Saloon building was probably erected as soon or sooner. Mr. Peters' building was near where the Goldfield theatre now stands. The Peters building (the first post office) was occupied for years by the Oriental Bakery and later by one of the Eilias firms. The old International Saloon building was on the same side of Third avenue, but up near the T. & N. O. depot. Mention of these facts some years ago tempted J. P. McLaughlin, one of the very first of the citizens of Timmins, to write The Advance from Toronto pointing out that he could claim to be first in building on the townsite of Timmins as he purchased his lots (where the Hollinger Stores now stand) and that the morning after the day of the auction sale men were at work excavating for the new building. Mr. McLaughlin seemed to have won his right to be considered first in building as he was in Timmins in so many things, being mayor of Timmins for two years and member of council for some years before that. But then along comes E. H. Gray, another real pioneer of the camp, to say that he had worked in the erection of the first building on the townsite, a bunk-house for the Hollinger employees, completed before any of the other structures were commenced. The Advance feels that arguments along the line of "firsts" are valuable and interesting because they bring out so many facts about the early days, which are after all not so very far away. It seems desirable that all the facts about the early days should be brought out while those concerned are available to check up on them.

Buy Quality

of the "first" building there. The Northern News, of Kirkland Lake, last week presents that official record in the following paragraph:—

"Councillor Alex Fraser, of Kirkland Lake, holds the distinction of having constructed the first building on the new townsite at Matachewan. The structure, a neat one-storey frame building with imitation brick exterior walls, is located on a street corner and can be utilized for a store, office or a home, as the tenant desires. Councillor Fraser took several photographs of the premises on a recent trip there, and exhibited them among his colleagues at a meeting of the Teck township council last week. Photographs of the townsite show it to be ideally laid out with an absence of hills and heavy timber."

ORE FINDING AT ASHLEY KEEPS PACE WITH OUTPUT

(From The Mining Analyst)
Development work on the 625 and 750-foot levels of Ashley Gold Mines continues to yield results comparable to conditions on upper levels. While nothing spectacular is reported by officials, ore finding has kept pace with production during a period when new conditions of geology and ore deposition have demanded considerable attention. It is believed that the faulting problem has been solved, which should reduce exploratory efforts considerably.

Production for September approximated \$50,000 with premium, the mill operating at an average of about 120 tons daily. Output from the inception of milling in November last has had a gross value of around \$500,000, an excellent figure for early stages of operation.

Ashley Gold, like Base Metals Mining, Normetals and Queмонт, is a subsidiary of Mining Corporation of Canada.

Blairmore Enterprise:—It cannot be said of misers and knoekers that two heads are better than one.

LAKELAND MINES CONTINUES SUCCESS IN DEVELOPMENT

In a recent report on progress of operations at the Lakeland Gold Mines, manager O. L. Knutson, has the following to say:—

"Developments to the south on the 450-foot level have encountered a large porphyry body east of the diabase dike which is now being explored. Diamond drilling cut a vein in contact with the porphyry heavily mineralized over a three foot width.

"No further news is available on the new vein developments of the 575 foot level. A satisfactory grade was reported from sampling where the new vein was intersected. Crosscutting is proceeding on the 700 and 825 foot levels. Mill preparations are also going ahead."
