Bonus for Settlers on Land in the North

Reference Made to Different Plans for Encouraging Settlement as Carried Out by Provinces of Ontario and Quebec.

For many years there has been discussion in this part of the North Land in regard to the respective policies of the Quebec and Ontario governments in reference to the encouragement and support of settlement. Quebec for some years has had a system of land bonuses and this plan appears to have worked advantageously for all concerned. In addition it may be noted that Quebec province has not allowed scattered settlement as in parts of Northern Ontario. In Quebec settlement has been made in blocks with roads provided and settlement accompanied by the building of churches, schools, etc., at points needed. Under this double plan of avoidance of scattered settlement and the giving of a bonus for land clearing progress seems to be notable. Writing to The New Liskeard Speaker last week an English-gentleman calls attention to the fact that reference to the fact that the Abitibi and other districts of Quebec are prosperous and unemployment unknown should be accompanied by the other fact that Quebec bonuses its settlers and they are unrestricted in their method of clearing their land.

In publishing the letter from the English-gentleman, The Speaker refers to the fact that the Northern Ontario Settlers' Association at a largely attended meeting passed a strong resolution asking the Ontario Government for financial help along the bonus line for clearing land in the Cochrane district. Premier Geo. S. Henry took the matter into consideration but apparently decided against the bonus plan. The Speaker is inclined to think that this decision was a wise one in view of the expenditures that have been necessary for relief purposes in the cities and towns where unemployment has been so serious a matter. It may be noted, however, that there have been more or less extensive expenditures for relief among the settlers as well. It may have been that had some of this money been in the form of bonuses for land clearing the result would have been better for all concerned. During the depression with so many calls for money from the Government it seemed a bad time to emphasize the idea of land-clearing bonuses, yet looking back it will be admitted by many that perhaps the bonus plan would have proven more economical and given better results than direct relief. The fact that so many of the more enterprising settlers favour it seems to give it special standing.

It is true that, indirectly, the province of Ontario has recently been bonusing new settlers—and bonusing them to an amount much greater than suggested by the resolution of the Northern Ontario Settlers' Association. This is in connection with the Dominion Government's back-to-the-land plan. Under this plan each settler gets assistance to the ultimate extent of \$600.00. It is true that a number of those accepting this plan have dropped it and returned south after trials of the scheme of varying length. In some of the cases the expenditures made may be counted as a total loss when the would-be settler quits. However, there are enough of these settlers sticking to the work to make the plan as a whole a good investment. It is unfortunately true that the plan applying to new settlers only has the serious disadvantage of discouraging the settlers not coming under its provisions and so feeling that they are discriminated against. Settlers have serious difficulties to contend with in establishing themselves on homesteads and any additional handicap, such as feeling that others are getting more help than they are, is regrettable. Another trouble with the Dominion back-to-the-land scheme is that many were accepted at first under its provisions who were utterly unsuited for the life. These people, who should never have taken up the work, are now inclined to condemn it in unmeasured way. There are enough successes, however, to prove that the plan is in its essence a beneficial one.

What is to be the ultimate result? The Advance believes that in the end it will be found that the Dominion's back-to-the-land plan will prove of material advantage to the country, counting the successes against the misfits and the failures. In addition The Advance believes that eventually the Ontario Government will adopt some form of land-clearing bonus, direct or indirect, that will encourage and assist the settlers likely to make good and that will further have the effect of weeding out those never likely to make a success in settlement.

SOVIET ACCUSES JAPANESE OF SPYING FROM THE AIR

A Soviet telegraphic agency despatch from Vladivostok, cabled from Moscow, Russia, this week, says that a squadron of military planes flew over Soviet territory Nov. 3rd. The despatch claims that the planes penetrated Russian territory to a depth of 15 to 20 miles and were sighted over four different Soviet villages. It is likely that diplomatic communications will be made from Russia to Japan in regard to the alleged incident. It is just as probable that the Japanese will have an alibi of some sort or another.

Canada's Autumn Glory

They came in at a thousand-a-day clip all through October, the leaves that were giant in size or marvelous in beauty of coloring and shape, from all parts of Canada where the maple grows. The response was to the unique contest, inaugurated by the Canadian Pacific Railway with a view to encouraging interest in the Canadian autumn landscape. Prizes were offered for the largest maple leaf and for the most beautiful. The idea was an immediate success from the moment of its announcement. Everybody got out into the country after autumn-tinted leaves and the railway encouraged the search by operating Fall excursions. The leaves came in ever-increasing quantities to the offices of E. T. Noltie, director of exhibits, for the Canadian Pacific. The photograph shows the process of spraying and mounting the leaves. Outstanding artists are acting as judges of the competition for the most beautiful maple leaf, they are: C. W. Simpson, R.C.A., R. W. Pilot, A. R.C.A., and James Crockett. J. M. R. Fairbairn, Chief Engineer, Canadian Pacific Railway, is judging the competition for the largest maple leaf.

NOTED NIGHT CLUB HOSTESS PASSES AWAY AT VANCOUVER

Texas Guinan, who won much publicity in the daily newspapers in her role as night club hostess, and whose comments on Broadway life were widely quoted, died at Vancouver, B.C., on Sunday, death being due to intestinal trouble.

UNEMPLOYED WHO WILL NOT WORK GET LITTLE SYMPATHY

Commenting on the fact that relief was refused to men in Sault Ste. Marie when they refused to cut their own wood for the winter, just as it had been cut down on those who would not help themselves by raising vegetables in the summer, The New Liskeard Speaker recalls the case of two men in a relief camp last winter near North Bay who were asked to help in cutting a trail a short distance but who absolutely refused to turn a hand and consequently were expelled from the camp. On leaving the camp one of the men said:—"Oh, the ladies of North Bay will give us something to eat!" "And that is all the manhood this miserable specimen of humanity had in him," is the comment of The Speaker. The Speaker then concludes his comment with the following paragraph:—"Now, the fact is, men must work, steal or starve. If they steal, it is likely they will be sent to prison, and if so they will manage to lodge complaints to their friends outside the jail about the ill-usage, and this procedure will be followed by some social organization demanding an investigation. What a lot of fun these lazy good-for-nothings have at the expense of society!"

GIVE A LITTLE MORE FOR YOUR POPPY THIS YEAR

Lady was So Forgetful that She Forgot Herself

Men still hold first place for remembering to remove their personal effects when they leave railway cars, according to C. M. Loveys, of the lost-and-found department, Canadian National Railways, Montreal. He says children come next and women last. "Seldom indeed do we ever find toys left in the cars; but the finding of women's shawls, umbrellas and hats is still a common occurrence. Often we find money in the handbags left by women. Very often these effects belong to people returning or going to Europe and are never reclaimed. The prize oversight mentioned by Mr. Loveys was the case of a woman who not only forgot her personal effects when her train got to Levis, Quebec, when she intended to get off to take a liner for Europe, but entirely forgot to get off the train herself until she was several hundred miles past her stop. Pembroke Standard-Observer:—Gold is king of the North; sorry that we cannot say as much about lumber in the Ottawa Valley.

GEO. TAYLOR HARDWARE CO. NOW BUILDING AT NORANDA

The Northern Miner last week says:—"The George Taylor Hardware Limited, famous firm in the North, is building a warehouse at Noranda, Que., thus bringing the number of its branches to seven. The new warehouse will carry a complete line of heavy goods, such as are used in the mining industry and construction work, and is especially planned to serve these markets. In this respect it copies the Taylor warehouse at Swastika. The whole Quebec mining area can be served from this strategic point, especially now that roads, either in existence or projected are to radiate to the many fields of Quebec mining activity."

MONSTER MOOSE SHOT NEAR LADY EVELYN LAKE RECENTLY

The Halleyburian last week says:—"Jack Ryder of Halleybury, with a friend from Midland, had a successful moose hunt shortly after the season opened on October 20th, and came out early last week with two of the big animals which they had shot in the neighbourhood of Lady Evelyn Lake. They went in the first day of the season, taking Indian guides, and on Monday, October 23rd, each one had his moose. One of the animals, that shot by the Midland visitor was a monster, according to Mr. Ryder. He states that it was the biggest animal he ever saw, with the exception of an elephant. The other was not so big, but was of a good size and about three years old. The horns of the big one spread the width of a motor car."

Ontario Plans Big Public Works Plan

\$36,000,000 Programme of Construction Will Create Jobs for 61,200 Men. Surplus for the Year Helps to Make This Possible.

A works building programme for Ontario to cost \$36,000,000 and employ approximately 61,200 men has been announced by Premier Henry and is likely to be pressed into actual operation within the next few days.

It is expected the programme will include an addition to the Hydro Power Commission offices, University avenue, and extensions to the public hospitals to cost \$2,500,000, and employ 1,200 men by the province. Municipal undertaking launched in conjunction with cities, towns and villages will call for expenditure of \$7,500,000 and employ 5,000 while work on the trans-Canada highway is expected to provide for an expenditure of \$5,000,000 and employ 20,000 men. Northern Ontario development road construction and maintenance and settlers' road work will call for an expenditure of \$7,000,000 with employment for 15,000 men, and work on the King's highway system is planned costing \$8,000,000 and employing 10,000 men. County and township roads will have a similar expenditure with the same number employed.

"The municipalities are being assisted under an arrangement whereby the Dominion and the province will each take care of one-third of the labour cost of any municipal undertaking," the Premier pointed out. "Many municipal works, such as roads, etc., can be undertaken with a comparatively small percentage of material cost. The municipality will get 100 per cent of the work and will only pay a little over one-third of the cost. As labour can be secured at moderate figures to assist in such enterprises, the expense should be kept down to a minimum."

The Highways Department is also commencing a number of improvements. Hon. Leopold Macaulay, the Minister is advertising for tenders today for a number of pieces of work which will cost \$800,000.

Surplus of Ontario Said to be \$150,000

Announcement Made by Premier Geo. S. Henry on Friday Last is a Very Satisfactory and Pleasing One for All.

A surplus of approximately \$150,000 has been achieved by the Ontario Government for the fiscal year ending Oct. 31. Premier Henry announced last Friday night. This surplus comes in face of an anticipated deficit estimated by Hon. E. A. Dunlop, provincial treasurer, in his budget address of last march, of \$2,975,000. The deficit for the previous fiscal year of 1932 was \$2,000,000.

Due to drastic policies of economy inaugurated two years ago, and careful watching over the sources from which the Government obtains its major revenues, this surplus has been effected. Revenue for the year was \$2,450,000 more than estimated while \$200,000 was cut from the estimated expenditures. The increased revenue, the Premier believes, reflects an upturn in business conditions in the province.

"The province's position is a source of great gratification," said Premier Henry. "It has been attained by a continuance under the budgeting committee of the drastic policy of retrenchment which we inaugurated two years ago, coupled with painstaking watchfulness over and safeguarding of those sources of revenue from which we are accustomed to collect our chief means of financial support. While we may still have some distance to go to leave the depression behind us, the improvement noted reflects quite markedly, in my opinion, the upturn in business in Ontario that has been evident for some time. During the past year the number of employees on the Government payroll has been reduced by 700."

With the Ontario Government reporting a surplus of \$150,000 for the fiscal year that ended Oct. 31, Queen's Park circles are confident that the Government will readjust salaries shortly for the civil servants, so that the present reductions will be either wiped out or reduced.

It is intimated also that the Government may restore the annual increase schedule which was suspended in 1930, in view of general business improvements and a more buoyant revenue.

The matter, The Telegram learns is at present under advisement by the cabinet, but immediate action is expected in view of the fact that the Order-in-Council validating the prevailing wage cuts, expired Oct. 31.

In other words, the reduction ceased at the end of the fiscal year. The cabinet must now pass another order either continuing the present reduced scale; which runs from five per cent, up to and including salaries of \$1,000 to 35 per cent, on all over \$8,000, place in force lower reductions or, on the other hand, restore the annual increase.

The first salary assessment came into force Jan. 1932, and from two per cent to 10 per cent. It remained in force until March of this year when the prevailing scale was ordered. In 1932 the salary assessment netted the government \$223,000. In the year that has just concluded the amount was \$575,000. With revenues maintaining buoyant levels and even increasing, it is felt the government will lead the way in restoring salary levels and will obtain from other sources the saving expected by the wage cuts.
