Interesting Topics at the Meetings of the Y. P. S.

The Young People's Society of Timmings United Church had another rousing discussion period last Thursday. The topic, which was presented by Miss Florence Peters, convener of the missionary committee, was entitled "Should the Christian Church have Missions." While no decision was arrived at, much thought-provoking material was presented by those entering into the discussion.

The programme for the evening included a vocal duet by the Lang sisters, Tina and Isobel. A very enjoyable game period followed the discussion.

This week, the meeting is in charge of the devotional committee and the subject of the talk is to be, "God as Presented by Mohammed." The meeting will be thrown open to discussion and all those present will have an opportunity of expressing opinions or making comment. The committee this year are attempting to make an open forum out of the society, and invite all young men and women who are interested in live topics to attend. The meeting starts at 8.30 sharp.

End Shaving Nuisances

No constant paying out of money for new cheaply-made blades if you shave with a Wilkinson. This most advanced of all safety razors gives you the fine cutting qualities and the long wear of the best straight razors. Its blade is hand-forged and hollow-ground Sheffield Steel.

No possibility of pulling from dry skin. The Wilkinson spiral razor guard feeds lather to the cutting-edge.

No irritation or danger in cleaning. The Wilkinson blade is cleaned and stropped without removal from frame.

Made by a company which has been Royal Sword-Maker of England for 161 years.

When Food is Needed for Fuel Purposes

Some Recipes that Should Help for the Colder Weather when Food Must Serve the Uses of Fuel.

An interesting article, together with some recipes to back it up, is given by Ann Adams in her column in the Mail and Empire. Recipes, with her introductory suggestions about the need for "fuel" value in food during the cold weather, are given herewith:

The kind of weather has reached us—perhaps a little earlier than we expected—when questions of nourishment and the keeping up of a condition that will resist the germs of colds and other illnesses have become of great importance.

In the case of children particularly, a very even standard of nourishment must be maintained. Unless in very individual cases, most authorities feel that one splendid way of working towards this end is to include in the child's daily diet, as close as possible to a quart of milk; and for the adult, it is desirable to include at last one cup of milk daily.

Fortunately, most children like milk to drink. It takes no effort at all to have such a child consume practically all the milk you would like him to have. The quota is made up most casually "in the course of nature"—in all the soups, puddings and various dishes that include milk either in them or to serve with them.

Adults depend, for the most part, upon the milk they take in their made-up dishes. And so it naturally comes about that dishes with a good deal of milk in them are exceedingly desirable for general family serving.

This week, we have grouped for our readers a number of dishes which make good use of milk. These will help any finding it necessary to give real thought and planning to this matter of getting a generous amount of milk into the daily family diet.

Potatoes, Peasant Style
3 cups potatoes,
6 tablespoons bacon fat,
2 cloves garlic,
2 tablespoons parsley,
1-2 teaspoon paprika,
2 tablespoons flour,
2 cups milk,
1 teaspoon salt,
1-3 teaspoon pepper.

Wash, pare and cut potatoes in dice. Fry in fat until brown. Remove potatoes and fry the chopped garlic and parsley in the fat remaining in the pan. Add flour, milk and seasonings, and cook until thickened (about 5 minutes). Add potatoes and cook three minutes.

Macaroni Custard
1 pint milk,
4 eggs,
1-4 cup sugar,
1 cup stale almond macaroons,
2 tablespoons peach jam or jelly,
1-8 teaspoon salt.

Scald the milk in a double boiler. Beat the yolks of the eggs slightly with the sugar and salt. Over the egg yolks pour gradually the hot milk. Return to the double boiler and cook until thickened, stirring constantly. Remove and stir in the macaroons, crumbled, and the jelly or jam. Beat hard and cool thoroughly on ice. Serve in glasses topped with whipped cream.

Cocoanut Pudding
2 tablespoons yellow cornmeal,
2 tablespoons cocoanut,
2 tablespoons granulated tapioca,
2 tablespoons honey,
1 quart milk.

Mix all ingredients together, put into an oiled baking dish and bake in a slow oven 4 hours, stirring occasionally during the first half of the baking.

Nut Loaf
2 cups soft breadcrumbs,
1 cup milk,
2 cups chopped nuts,
2 eggs,
1 teaspoon salt,
1 teaspoon paprika.
Soak breadcrumbs in milk, add nuts, slightly beaten eggs and seasonings. Turn into greased bread pan, set in pan of water and bake 40 minutes. Serve with tomato sauce. The loaf may be steamed instead of baked.

Cream Filling
1 tablespoon cornstarch,
1 cup milk,
1 egg yolk,
1-8 teaspoon salt,
1 teaspoon vanilla,
2 tablespoons powdered sugar,
1-2 teaspoon butter.

Mix cornstarch with 2 tablespoons of the milk. Heat the rest of the milk in a double boiler and stir the cornstarch paste slowly into it. Stir the mixture until it is smooth and cook for 15 minutes. Add the beaten egg yolk and cook 2 minutes longer. Remove from the fire and add the salt, sugar and butter. Beat well. Add flavouring. Cool before spreading on layers of cake.

Want the Highway Paved Through the Three Towns

At a recent meeting of the New Liskeard board of trade a resolution was passed asking the Government to pave the Ferguson highway through the three towns of Cobalt, Halleybury and New Liskeard. It is likely that this resolution will be endorsed by Halleybury and Cobalt, while the rest of the North would also view the proposal with favour. Work of this sort is to be preferred to expenditures on direct relief and anything that will improve a part of the highway will be a benefit to the whole North. Also, it may be noted that the cost over a term of years for paving and repairs respectively will show that paving is the more economical if anything like a perfect condition of road is to be achieved. Many people see ahead the time when the whole Ferguson highway will be paved. That is a broad vision, of course, but few in the North will be other than pleased to see even a part of the highway paved. In this connection it may be noted that the highway through the three towns of South Porcupine, Schumacher, and the edge of Timmings is in bad need of repair. The town of Timmings and the township of Tisdale paid for part of the cost of the finishing of the surface of this piece of road. It is more than finished now. The town repaired its part of the stretch of road but the township did not feel able to do much for the stretch in Tisdale, while the province claimed that the municipality should look after the road inside its boundaries. Of course, there are certain rules and regulations that have to be made in connection with all such works, but it does seem a pity that in extraordinary conditions there should not be some leeway in regard to things that are badly needed.

Canada and the United States have their dollar, England its pound, France its franc, Italy its lira, Germany its mark, Japan its yen, Holland its guilder, but Gold is still King as a medium of exchange the world over, and the value of money representing a Government, is judged by its equivalent in Gold. When you have gold you have a medium of exchange good the world over.

Canada, you have the Gold. Your record up to this time proves it. In a little more than thirty years you have produced nearly a thousand million dollars of gold bullion.

What a staggering sum of money! Since Columbus discovered America in 1492 you have produced nearly one twenty-second of the world's gold output, which is approximately twenty-two billions of gold.

To-day, you stand second as a world gold producer!

Heard Broadcast From Miles Above Earth's Level

Radio fans have many interesting experiences. The most of the enthusiasts for radio take special delight in hearing from far-off places on the earth and are often entertained and delighted when they are able to "pick-up" something on the air not expected to reach them. This was the case recently in Halleybury when the radio picked up a broadcast sent out from miles up in the air. The Halleyburian tells about it in the following paragraph:

"Wm. Farmer, Rorke avenue, had the unusual experience on Monday of listening in to a conversation carried on between balloons miles up in the air and their coadjutors on the earth, through the medium of his short wave receiving set in his home. The reception was quite clear. Mr. Farmer says, and he was able to follow the talk without difficulty. The balloonists were Lieut.-Commander T. G. W. Settle, of the U.S. Navy and Major Chester L. Fordney, who accompanied him on a flight into the stratosphere from Akron, Ohio. They kept in touch with Col. Frank Knox, of the Chicago Daily News until they had reached an altitude of over 53,000 feet, and reports published on Tuesday said the balloon had been up to a height of 58,000 feet before the descent was begun. The flight started at 9.27 a.m. and the big balloon was brought safely to earth at about eight o'clock that night in a marsh near Elmer, New Jersey. The majority of local people are less concerned with the scientific objects of the trip into the upper air than they are with the fact that radio broadcasting has been brought to such a stage in its development that a conversation, carried on under such conditions, could be heard so plainly at this distance. It appears that the short wave receiving sets have almost eliminated distance entirely, and no one can foresee what may be accomplished in another few years."

PROVINCE NOT TO BUILD BRIDGE NEAR KIRKLAND

A couple of weeks ago The Advance referred to the efforts of the Kirkland Lake council to induce the Government to build a new bridge across Amikougar creek on the Ferguson highway between Swastika and Kirkland Lake. They asked a new steel and concrete bridge. The matter has been taken up with the provincial authorities and the answer given in the negative. The province suggests that Teck township should pay at least half of the cost of the proposed new bridge. This means, in effect, that the new bridge will not be built.

In regard to the plea for a higher road clearance under the overhead bridge at Swastika, the T. & N. O. points out that the cost would run into thousands of dollars, and in any case the matter is not one for the railway but for the Northern Development Dept. The latter built the highway and are responsible if there is not enough clearance under the bridge.

THREE BEREAVEMENTS IN ONE HOME WITHIN A FEW DAYS

The Halleyburian last week says:—"The home of Mrs. Etta White, daughter of the late Aaron Parcher, former chief of police at Cobalt, suffered three bereavements in a few days, relatives have been informed. Her husband, Jack White, farmer of Eldorado, Hastings County, died a week after her father, and her husband's youngest sister, who lived in Western Canada, also passed away in the same period. Mr. White had been in poor health for some time past, and although there had been reports he was improving, his condition had been recognized as serious. Both Mr. and Mrs. White were in Alberta before their marriage, but following their wedding in Cobalt, went to live at Eldorado. There are two children, P. A. Derry, of Cobalt, is an uncle of the late Mr. White, who was in his 44th year."

Mrs. O. J. Thorpe returned last week to her home in Halleybury after a visit with relatives here.

Pointing Canada's Opportunity To-day

A Clarion Call to the People of the Dominion to Prospect, to Develop to Finance and Produce More Gold.

Do you read advertisements? If not you miss a lot. To read the ads, is to encounter information, inspiration! There was an advertisement published the other day by a financial firm, and it carries so much of inspiration that it is reproduced herewith. At first thought it may be thought a shade too flamboyant, but consider the real basis on which it rests and such a charge fails. To the suggestion of high-pressure methods, it should be replied that the facts on which the appeal is based are so notable that exaggeration is not likely. Reading this article one might well wish that high-pressure inspiration of this kind might be adopted for Canada as a whole rather than for one firm or individual. It would be well, indeed, if the whole people could be seized with the belief—the fact—that Canada's opportunity is here and now, if she can and will accept the chance. The article in question states the facts fully and forcibly, here is the article:

"My Name is Canada and I am Paging Opportunity!"

Canada your day has come. The world is at your feet, begging you to release your riches cramped in Mother Earth.

The world asks you to go to work, as you have never worked before, to prospect, to develop, to finance and to produce more gold.

For Gold has become the most talked about thing in the world. The world is hungry for the precious metal as never before.

All the mines in all the world since the beginning of time have failed to produce enough gold. The demand has been greater than the supply.

Canada and the United States have their dollar, England its pound, France its franc, Italy its lira, Germany its mark, Japan its yen, Holland its guilder, but Gold is still King as a medium of exchange the world over, and the value of money representing a Government, is judged by its equivalent in Gold. When you have gold you have a medium of exchange good the world over.

Canada, you have the Gold. Your record up to this time proves it. In a little more than thirty years you have produced nearly a thousand million dollars of gold bullion.

What a staggering sum of money! Since Columbus discovered America in 1492 you have produced nearly one twenty-second of the world's gold output, which is approximately twenty-two billions of gold.

To-day, you stand second as a world gold producer!

There is not any reason why you should not occupy first position. No one can stop you but yourself.

You gained second position comparatively easy. You admit that you have covered only a limited gold area of the Dominion. Your progress up to this time was made with little capital, and so it took you longer than it should.

But with the introduction of adequate capital you will shorten the development time, and you will find more mines and produce more gold than ever before, in quicker time. And now is the time to do it.

Go after greater gold production! Gain first place!

Grasp the opportunity as you have never grasped anything before. The opportunity is big, important, world wide. Be equal to it by getting on the job and staying on it until you come through.

Think of being in a position to produce the most precious thing needed in the world right now.

You have the courage! You have the

energy, enthusiasm and the will to carry on! The end will surely justify the effort, and you will be repaid amply for the struggle and the labour necessary to produce anything as valuable as Gold.

Carry on until the pick strikes the hard firm, yellow metal, until the cry of "Gold" resounds through the virgin forest.

Carry on! Finish what you have started! You are only half way through. Don't be satisfied with second position.

Canada's real gold position is locked in the ground of the Dominion. Open it up. You will find additional gold there as you have found it before. You have only to go after it. And you will be first!

Remember that Opportunity comes every day in the life of the individual and as the individual makes the nation, the future of Canada depends upon the efforts of each one of us.

Go forward then, with light shining in your eyes, with firm step, with courageous resolution, with determination, with the will to do and to fight until you win.

Kirkland Lake seems to be lagging. At the same time it is felt that if taxes can not be collected now, there is little chance of getting them in until after the Christmas holidays are over. A recent meeting of the Teck Council was largely given over to the question of the collections. It was agreed that those on relief could not pay and so there no use in bothering them, while at the same time there was some reason for giving consideration in such cases. If there was any way of carrying these cases along and letting them pay later when they got work, that seemed the best thing to do. Consideration was also felt due to those not on relief but out of work. At the same time it was considered that the township had to collect taxes and leniency could be carried only so far. Also, there was some who could pay if they made a little effort and perhaps a little sacrifice. Mention was made of some who had cars but could not pay their taxes. Also there were cases where men had been collecting good rentals from buildings but had not paid the taxes for three or four years.

FORMER TIMMINS PRIEST RETURNS TO BUFFALO, N.Y.

Rev. Fr. Cornelius Zak, Polish priest, who was stationed at Timmings last year for a few months, and who later was given charge as parish priest for the Polish people at Kirkland Lake, has been recalled to the Franciscan Monastery at Buffalo, N.Y. He has been at Kirkland Lake about a year. His successor at Kirkland Lake has not been announced. Previous to his leaving Kirkland Lake, Rev. Fr. Zak was the guest of honour at seven separate events where presentations were made to him to express the esteem and affection in which he is held by the Polish people in Kirkland Lake.

TECK TOWNSHIP WORRIED BY ARREARS IN THE TAXES

At the present time tax collecting in
