Above are seen the members of New Liskeard Junior Hockey team. Champions of the Central Group of the N.O.H.A.

Kapuskasung, Champions of the Northern group will play the above team in their second game of the inter group series on Friday night to decide who will meet the winners of the Southern Group.

WHIST DRIVE ON FRIDAY
AUSPICES OF THE L.O.B.A.

The L.O.B.A. announce a whist drive to be held in the Oddfellows' hall on Friday of this week, March 2nd. A special invitation to this event is extended to the L.O.L., and everybody else will be welcome. All attending may be sure of a very happy time. The cards will start at 8:30 p.m. Refreshments will be served during the evening. Previous events under the same auspices have been most enjoyable, and the L.O.B.A. expect the event on Friday evening to be the best of its kind.

Garden Notes from Horticultural Soc'y

List of Vegetable Seeds and of Flower Seeds Suitable for Planting in the North. Some Notes on Planting Seeds, Etc.

The following is the third article in the series of "Garden Notes" supplied by the Timmins Horticultural Society for the benefit of the readers of The Advance. All readers of this paper who are interested in beautifying the home surroundings and adding to the good appearance of the town should read these articles each week. They are well worth while, and will prove of much value. Below will be found Article No. 3 of "Garden Notes":—

At this time you may be looking over the catalogues, and you may find that everything is strongly recommended. However, if you have not much experience it would be wise to take the suggestions of neighbouring gardeners, for it must be admitted that difference of soil and climate play an important part in plant life.

Every gardener delights in specialties, but the beginner at first should be satisfied to try only those hardy plants which will always form the nucleus of the garden and which might be depended on to bring in some measure of success, whether the season be good or poor.

The following is a list which the beginner will find trustworthy:—

Vegetable Seeds, Etc.
Beans, beets, brussels sprouts, cabbage, carrots, cauliflower, celery, corn, cucumbers, endive, kohi rabi, leeks, lettuce, onions, parsley, peas, potatoes, radish, rhubarb, sage, spinach, squash, swede turnip, table turnip, tomato.
Celery, leeks and onions should be sown in boxes early in March, and transplanted as soon as plants are large enough to handle.

Flower Seeds
Alyssum, annual; Antirrhinum (Snapdragon), annual; Aster, giant, early flowering, annual; Calliopsis, annual; Candytuft, giant, hyacinth flowered, annual; Clarkia, double, annual; Cosmos, annual; Gaillardia, annual or perennial; Hollyhock, double or single, perennial; Lobelia, Crystal Palace Compact, annual; Marigold, African and French, annual; Myosotis (Forget-me-not), biennial; Nasturtium, double, annual; Nicotiana (tobacco plant), annual; Pansies, giant, perennial; Phlox, Drummondii, annual; Petunia, double or single, annual; Poppies, Shirley, double or single, annual; Salpiglossis, annual; Stocks, giant, ten week, annual Sweet Peas, a collection; Sweet William, perennial; Verbena, annual; Zinnias, giant, double or single, annual.

The above may be grown from your own seed inexpensively, and their nurture will be explained later on.

However, if it can be afforded, grown plants should be obtained of Perennial Phlox, Aquilegia, Delphinium, and Digitalis. These plants take a long and tedious time to develop, and only a few of each (costing about 30 cents each) are needed in the small garden.

Another line which we believe should be adopted more in the North is the lily family. It might surprise some that tiger lilies are to be found growing wild in sections around Timmins. Among tiger lilies there are many cultivated varieties. Other lilies are Speciosum Melpomene, Speciosum Rubrum, Speciosum Album and the wonderful Lillium Regale (or Regal Lily). Top size bulbs should be requested (price ranging between 10 and 50 cents each). There are three important groups of tulips:—Darwin, Cottage and Breeder.

These add materially to the spring bloom, together with Hyacinths, Narcissus and Daffodils.

For summer bloom in bulbs, Gladioli are prominent in their wonderful range of colour.

As many shrubs and trees commonly used for garden backgrounds are not adapted to the North, we suggest that local species be used as much as possible (this to be dealt with in future notes). However, in the flowering shrubs, types of Spiraea, Honeysuckle and Lilac may be grown.

There is distinctiveness and beauty to be found in Dahlias. Decorative and Cactus types produce immense blooms. The Pompoms, a dwarf type, have come very much into favour. The commoner roots, perhaps gleaned from the surplus of other gardens, would make a beautiful hedge if properly stalked.

As for hedges, the Carrigana has proved itself the best yet.

Peonies are so beautiful that we would not advise you to grow them unless kept well away from the hands of envious people and children.

Roses are not to be forgotten though our climate does not favour them generally.

Even though plants, roots and bulbs may seem an expensive outlay, they will lengthen the blooming period of your garden and the majority will be in your garden for many years to come. However, we think the beginner should be content to use annuals and a few perennials first. There are little ways and means that the gardener does not acquire from printed pages but from practical experience, and it is our desire to help such gain that experience with the least expense and disappointment.

After all, you can create a yard brim full of colour for a few dollars. We suggest that you order your seeds now for prompt delivery, but request that any shipment of plants, bulbs or roots be held over to the middle of May so that they will be fresh and well kept for the time of planting.

Next week's notes will include the planting of certain seeds indoors.

Fatalities Below Average Last Year

Fatal Accidents in Mines of Ontario for 1933 Less per 1000 Men Employed than for 25 Years. Nine Fatalities in Porcupine.

During the year 1933 at the mines, metallurgical works, quarries, and clay, sand and gravel pits regulated by the Ontario Mining Act, there were 1,538 accidents to employees reported by the Department of Mines up to January 16, 1934. Twenty-five fatalities arising out of 24 separate accidents were reported in the bulletin just issued by the Department of Mines.

These returns represent an increase of 63 in the total number of accidents, and the same number of fatalities as recorded for the previous year.

The report shows a fatality rate of 1.57 per 1,000 men employed, which is 1.27 per 1,000 lower than the average for the past 25 years.

There were 95 non-fatal accidents per 1,000 men employed, which is a decrease of three per 1,000 from the rate of 1932.

The percentage of non-fatal accidents followed by infection increased from 6.5 in 1932 to 7.3 in 1933.

The gold mines contributed the largest number of fatal accidents last year, according to official report. Classified by industries, the fatalities are as follows: Gold mines 17, nickel mines 3, silver mines 1, copper-lead-zinc mines 0, talc mines 1, metallurgical works 1, quarries 0, sand, gravel and clay pits 2. In the Sudbury district, one fatality occurred at the Falconbridge, one at the Creighton, and one at the smelter shops of the International Nickel Company at Copper Cliff.

In the Porcupine camp there were nine fatalities at the mines in 1933. Only one of these was at the Hollinger two at the Buffalo-Ankerite, one at the Dome and five at the McIntyre, run of muck in the slope being responsible for three of the latter deaths.

The report also gives a summary of cope tests made in 1933 as well as other information relative to the plans to assure safety in the mines.

JACK MILO AND JOE LIPECK IN WRESTLE AT NORANDA

Recently there was a big wrestling card at Noranda, the main bout being between Jack Milo and Joe Lipeck. Each of them got a fall in a full hour's work but neither could get the decision. Milo was out of the ring several times and was jeered by the fans but he knew his wrestling and held Lipeck to the one fall.

Personnel of the New Men on Police Force

Some Particulars in Regard to Eight New Men Appointed to Timmins Police Force, Eight-Hour Shifts and Days Off.

Last week The Advance gave a list of the eight new men appointed to the town police force, as furnished by Chief Wm. Rich. Since then there have been two changes on the list as given by The Advance last week. One of the men was not sworn in because it was felt that he had not been long enough in town, and the other did not wish to proceed with the taking over of the duties.

Below will be found a list of the new police constables, with some references to each of them. They were all sworn in on Friday last and all of them were on duty on Saturday.

Most thoughtful people will give Chief Rich credit for one move he has made in regard to the men on the force—the changing to 8-hour shifts, instead of 11-hour ones as previously obtaining. The three extra policemen now on the force make the changing over to 8-hour shifts possible without having less men on duty than formerly. For the present the sergeants have to work ten hours but it is hoped later to adjust this also to come under the 8-hour plan. Chief Rich also intends to give each man a day off in every eight days with one day off in seven as soon as it can be arranged.

The following are the new constables: Conrad J. Fuhr; aged 25; height, 5 ft. 10 inches; born in Canada; formerly worked at the Hollinger Mine; in Timmins about five years; single.

Cornelius Cuihane; aged 25 years; height, 5 ft. 10 inches; weight, 180 lbs.; of Irish extraction; at Hollinger Mine as policeman; previously at Copper Cliff on police force; in Timmins about 3 years; single.

Samuel Williams; of Welsh extraction; worked in Hollinger Mine on police force; height 6 ft.; weight 180 lbs.; in Timmins 5 or 6 years; married.

Archie Vedova; Italian by birth; in Timmins ten years; height, 5 ft. 11 inches; weight, about 180 lbs; worked at provision store; single.

Ovilia Racine; miner; married, with three children; of French extraction; height, 5 ft. 10 inches; weight, 200 lbs.; about ten years in Timmins.

Gilbert Des Roches; traveller for Swift Canadian Co.; height, 6 ft.; weight, 180 lbs.; of French extraction; single; 5 years in Timmins.

Edward Cyr; of French extraction; married, two children; ex-employee of McIntyre Mines; height, 5 ft. 11 inches; weight, 180 lbs.; about four years in Timmins.

Arthur Melvin Olsen; of Swedish extraction; height, 6 ft.; weight, 200 lbs.; worked with packing company; in town five or six years; married, with family.

The new men at present are working in plain clothes but it is expected that they will be fitted out with uniforms at an early date.

Wants Closed Rinks at Cochrane, Smooth Rock, etc

(From The Northern Tribune)

When the times are mended in the North and the towns in this district have resumed their normal business, it is to be hoped that Cochrane, Smooth Rock Falls and Hearst may find it possible to build covered rinks for skating, hockey and curling. They would then be on a par with Kapuskasing, which has fine curling and skating rinks, and winter sports would be more keenly enjoyed all round. Inter-town matches would hold more zest and draw more support.

These more frequent contests (held under almost similar conditions in the four covered enclosures) would create a much more friendly feeling between our district towns, and this feeling would radiate into the social atmosphere.

We hear a rumor that Smooth Rock may build a covered rink in time for next winter, and we hope the rumor is true. The citizens of Cochrane and Hearst would perhaps find it a more difficult matter to finance such buildings, although it is more than likely they would well pay their way when completed. We are sure we speak for the sporting fraternity of Kapuskasing when we say that we wish all success to promoters of rink projects in the three towns mentioned.

Trenton Courier-Advocate:—If Adam and Eve were to return to this old world they would find many things to surprise them. For instance, Cain is playing hockey with Montreal Maroons while Abel is with the Chicago Black Hawks.

RESIDENT OF LARDER LAKE FOR 23 YEARS PASSES AWAY

With the request that Finnish newspapers please copy, despatches were sent last week from Larder Lake telling of the death there of Mrs. Hilda Katarina Nyland, aged 69 years. The late Mrs. Nyland was for 23 years a resident of Larder Lake, emigrating from Finland to Canada. She had many friends because of her fine disposition and character. In recent years she had suffered considerably. Her right foot had to be amputated some years ago; her eyesight was failing gradually until recently she was totally blind; yet under all these troubles she tried to

carry on with patience and courage. Last year, it may be recalled Hon. W. A. Gordon arranged for her son, Frank, to come from Washington, D. C. to Larder Lake so that the good woman might have some one to care for her in her illness and handicaps. This son was with his mother to the end, and amid his sorrow at her death he found time to express his gratitude to Hon. Mr. Gordon for what he had done to make things easier and happier for his mother and himself. It is interesting to note that the despatches from Larder Lake mention the fact that Finnish and English speaking people alike attended the funeral of Mrs. Nyland, joining together on this occasion, as they do on all occasions to help each other in distress. "Nationality and creed," says one despatch, "make no difference in Larder Lake, a fact of which we are proud." It is something in which pride may well be taken.

TIMMINS L.O.O.F. WHIST DRIVE TUESDAY EVENING, MARCH 13

Announcement is made by the Timmins Lodge of the Oddfellows that a whist drive will be held in the L.O.O.F. hall on Tuesday evening, March 13. The cards will commence at 8:30 p.m. and there will be good prizes for the event. All should attend this whist drive as there is certain to be a very pleasant evening for those attending.
