Enquiry Being Made into Accident to Girl in Play

In regard to the serious injury to the Kirkland Lake young lady recently when her face was disfigured through the discharge of a gun in a play being staged at the Finn hall in the Lake Shore town, The Advance suggested that a thorough enquiry would be in order. At some of the foreign halls in the mining camps there are plays staged that do not sound any too good to Canadians and other Britishers when reports are heard about them. Some time ago in Timmins there were allegorical plays staged here at local halls and the general reports credited the performances with such games as literally jumping on the Union Jack and so on. In one case at least real rifles were used in a play presented here, and the question naturally arises is it a good idea to allow aliens, and aliens apparently unfriendly to the country, to use rifles and to hold rifles for the ostensible purpose of drama purposes, when tragedy may result. The Advance does not know whether the Kirkland Lake play where the young lady had her beauty spoiled was staged by "reds" or "whites," but it was evidently given by those of foreign origin. Why should such realism be necessary in these cases, when ordinary citizens of the country do not often think about the use of actual firearms in their dramatic presentations.

There was a police investigation of the accident at Kirkland Lake, provincial police headquarters at Toronto directing that such an enquiry be held. The provincial police investigating the accident say that so far as they can

learn, the charge of powder that disfigured the young lady's face came from a stage revolver loaded with a standard blank cartridge. The actor apparently held the gun too close to the young lady's face. This may be all right so far as it goes, but it would appear to be better for further enquiry to determine just why firearms are so often supposed to be needed in the dramas at foreign halls, while there is little call for them in ordinary plays presented by other organizations. With the fact that permits are necessary for the use of firearms at stage performances, would it not be well to make it known very emphatically that the possession and use of firearms by aliens is not to be encouraged in this country. It may be all right for the parties concerned to be ready to let the whole matter drop, as simply an accident, but the general public should be guarded in all such matters and the regulations enforced in regard to the possession and use of firearms.

ADVANCE POLLS TO BE HELD ON JUNE 16TH AND JUNE 18TH

With the announcement of Tuesday June 19th as the date for the Ontario general provincial elections, there was the further announcement that official nominations will be held on Tuesday, June 12th.

Advanced polls for the benefit of railroad men, commercial travellers and others will be held on Saturday June 16th, and Monday, June 18th.

BASING DEDUCTIONS ON THE ABSENCE OF SIGNS

(From Powassan News)
"Is there any truth in the report that Angus McTavish bought the filling station?"
"Well, I don't know for sure, but the 'free air' sign has been taken down."

A. J. KENNEDY AGAIN THE CHOICE OF TEMISKAMING

At a meeting of the Conservatives of Temiskaming riding last week A. J. Kennedy, member for the riding in the Legislature for the past seven years, was again the choice of the convention as Conservative candidate for the contest on June 19th. He defeated O. J. Thorpe, Halleybury, and Geo. Mitchell, K. C. Cobalt, on the first ballot, and was enthusiastically endorsed. There were five other candidates mentioned but all declined the honour. Before the convention was held, officers for the association were elected, including the following:—W. H. Walters, New Liskeard, president; C. W. Wright, Englehart, vice-president; Dr. J. E. Joyell, Halleybury, second vice-president; P. J. Grant, New Liskeard, third vice-president; J. B. Bradley, Latchford, fourth vice-president; Alonzo Fortin, Cobalt, secretary-treasurer.

Profits of Noranda Mines Increased for Quarter

Net profit of \$1,645,796 is shown for the first three months of 1934, ended March 31, in the report of Noranda Mines Limited issued recently. This is equivalent to 73 cents a share of outstanding capital stock and compared with net profit of \$667,961 and share earnings of 29.8 cents for the same period in 1933.

For the first three months, Noranda produced 14,657,781 pounds of anodes from which was recovered metals to the value of \$3,501,743.

Cost of production and general expenses amounted to \$1,494,043 which with \$238,500 reserved for taxes, left an operating profit of \$1,769,150.

Miscellaneous income is shown at \$142,790, bringing estimated profit before depreciation to \$1,911,940. After deducting \$266,143 as reserve for depreciation, net profit stands at \$1,645,796 and, added to the surplus carried forward Dec. 31 of \$7,227,574, brings this account to \$8,873,370 at the end of March.

If Noranda continues this progress 1934 production will have a total value of approximately \$14,006,972, against \$12,588,374 in 1933. Net profit would be \$6,383,184, equal to \$2.92 a share.

Recipes for Making Some Fancy Breads

Raisin Nut Bread, Bran Corn Bread with Bacon, Apple Cornbread, Apple Gingerbread, Etc.

The following are some recipes for making fancy breads, etc.—

Raisin Nut Bread
1 egg
1 cup sugar
1 cup milk
1 1-2 cups flour
1 teaspoon salt
4 teaspoons baking powder
1-2 cup chopped nut kernels
1 cup seedless raisins.

Wash raisins and drain. Beat egg, add milk, sugar, and mix together. Combine with flour sifted with baking powder and salt. Add nuts, raisins, and beat thoroughly. Pour into a greased, paper-lined bread pan. Bake 1 1-2 hours at 300 degrees F.

Bran Corn Bread With Bacon
2 eggs, beaten slightly
1-4 cup sugar
1-2 cup bran
1 cup cornmeal
1 cup milk
1 cup flour
1-4 teaspoon salt
3 teaspoons baking powder
1-4 pound bacon, diced

Combine eggs and sugar thoroughly; add bran, cornmeal and milk. Sift dry ingredients together, add to first mixture and pour into greased baking dish (9 x 12 inches). Sprinkle bacon over top. Bake at 400 degrees F. for 20 minutes, then brown the crust and crisp the bacon by turning on top oven unit. Servings, 16.

Apple Cornbread
2 cups cornmeal, white or yellow
2 tablespoons sugar
1-2 teaspoon salt
3 teaspoons baking powder
1-8 teaspoon baking soda
1-2-3 cups milk
1 egg
3 tart apples, pared and diced finely

Mix dry ingredients. Beat egg, add milk and combine mixture. Stir in diced apples, pour into well-greased shallow pan. Bake 30 minutes in hot oven—400 degrees F.

Raisin and Nut Oat Loaf
1 pint scalded milk
1 cup rolled oats
1 teaspoon salt
1-4 cup molasses or sugar
1 yeast cake
1-2 cup lukewarm water
2 cups whole wheat flour
1 cup raisins
1 cup chopped nut meats.

Pour the scalded milk over the oats and cook slowly to a mush, adding salt, molasses or sugar. When lukewarm add the yeast, which has been softened in the water, add flour, chopped raisins, and nutmeats. Knead carefully on a well-floured board until it loses its stickiness. Form into two loaves, place in well-greased pan and let stand until very light. Brush over with milk or egg and bake in a moderately hot oven. Time in oven, 1 hour and 20 minutes. Temperature, 330 degrees.

Apple Gingerbread
3 tart apples
1-3 cup fat
2-3 cup boiling water
1 cup molasses
1 egg
2-3-4 cups flour
1 1-2 teaspoons soda
1-2 teaspoon salt
1 teaspoon cinnamon
1 teaspoon ginger
1-4 teaspoon cloves

Melt fat in boiling water, add molasses, egg and sifted dry ingredients. Slice apples very thin. Place in a greased pan, pour over the gingerbread mixture and bake in moderate oven—350 degrees F.—about 30 minutes.

Date Bread
1 pint bread sponge
1 cup chopped nutmeats
2 tablespoons maple or brown sugar
1 tablespoon coriander seeds
2 tablespoons caraway seeds
1 cup chopped dates

Mix ingredients thoroughly and add enough flour to make into a loaf. Let rise until at least double in size, brush over with beaten egg and sprinkle with coriander seeds. Bake in a moderately hot oven. Time in oven, 1 hour and 10 minutes. Temperature, 330 degrees.

EXPECT RECORD VOTE IN THE PROVINCIAL ELECTIONS

It is expected the largest vote in the history of Ontario will be recorded when the province goes to the polls in June for the Legislature general election.

In the last general election there was a total vote of 1,014,311 votes. The popular vote for Conservative government candidates was 596,677 and for opposition nominees 417,634. In ridings where acclamations took place there were 101,688 on the lists.

Total names on the voters' lists were 1,804,932 so nearly 800,000 failed to exercise the franchise. All parties this year are urging that every one entitled to the franchise vote.

LATE JOHN ALLEN ACTED AS BUYING AGENT FOR MCINTYRE

The Northern Miner last week says:—"John Allen, an old time resident of the North country mining areas, passed away on Thursday, May 10th, at his home in Cobalt, in his 77th year. He is survived by his wife. Mr. Allen went to Porcupine in the early days and served as purchasing agent for the McIntyre mine, later going to the Temagami Steamboat Company and subsequently joined the staff of the Northern Ontario Light and Power Company at Cobalt and continued to serve as purchasing agent for the company from 1917 to 1932, when he retired. He was greatly interested in mining and was formerly director and secretary-treasurer of Galatea Gold Mines and a director of Smelters Gold Mines, Limited."

Kapuskasing Farm Weekly News Letter

Some Helpful Hints on "Good Draining," and Also on the "Preparation of Clay Soils."

The following is No. 24 in the series of letters sent weekly to The Advance from the Dominion Experimental Farm at Kapuskasing. These letters are proving of special interest to wide circles of readers. While The Advance has a number of settlers and farmers on its list of readers, it is a natural fact that the greater majority of this paper are townspeople in the three big centres of the Porcupine—Timmins, Schumacher and South Porcupine. It is remarkable, however, the great interest shown in these articles from the Kapuskasing Farm. One reason for this is that the weekly letters from Kapuskasing deal often with matters of special concern in regard to poultry, gardening, flowers, etc. These topics that are of special interest to many even in the larger centres. In Timmins, Schumacher, South Porcupine and the Dome, for instance, poultry fanciers are many, while lovers of flowers and gardens are very numerous. This is proven by the notable shows put on here by both the poultry and horticultural societies. Both the flower and poultry exhibits have been

admitted to be outstanding for any district and especially so for a new country.

This week the weekly letter from Kapuskasing deals with "Good Draining," and "The Preparation of Clay Soils." The letter will be found below:—

Good Draining

Lack of drainage is the dominating cause of the unsuccessful growing of most crops. However, there is scarcely a farm in Northern Ontario where satisfactory drainage cannot be made by the system of open ditches or furrows.

In all good surface drainage the following factors are essential:

1. The discharge or community ditches should be straightened and cleaned where necessary in order that the water may get away rapidly in the spring and after each rainfall.
2. The open ditches which are called to carry the water from the furrows or from the surface should be located where they will assure rapid draining of the water. These open ditches should be made with wide open tops and the material removed from the ditch levelled off to low places in the field.
3. Where the fields are more or less level, narrow lands may be made and rounded up with furrows about 36 feet apart, and the furrows should be well cleaned so the water may get away rapidly.

Properly managed clay soils are very

productive and farmers who understand their drainage requirements, who know how and when to plough and cultivate and what crops to grow, usually prefer them to lighter soils. They are liable to be slow in warming up in the spring and seeding may be delayed as their fine texture has a large-holding capacity. Therefore, everything possible must be done to secure good surface drainage. They bake easily and readily form clods, making cultivation difficult even under good methods of management. Ploughing and other tillage operations must be conducted when the soil has the proper content of moisture, that is, when it is dry enough not to puddle when worked. The liberal use of farm manure, the inclusion of legume crops in the farm rotation and, in some cases, the application of a dressing of superphosphate are practices which, if carefully followed, should maintain the fertility of this type of soil.

At the Kapuskasing Experimental Station, late summer or fall ploughing is the general practice for clay soils, which permits frost and weather to exert their beneficial influence in the breaking down of any clods which may have formed. The stiff-tooth cultivator and the disk are valuable implements to prepare deep mellow seed bed, while the drag-harrow is invaluable for making a fine seed bed.

MUTUAL LIFE OF CANADA

Reports Increased Business April Sales Higher

The number of new policies paid-for in April 1934 exceeded by 30% the number for April 1933.

Policyholders Add to Insurance

Approximately 5,000 Canadians applied for and received Mutual Life insurance policies in amounts ranging from \$500 to \$120,000 and aggregating many millions, between January 1st and April 30th, 1934.

One-half of this business was taken by present policyholders—a splendid endorsement of the results of their original policies.

Payments to Living Policyholders Three Times Greater Than Death Claims

Death Claim payments in 1934 already total **\$1,128,954**
Payments to LIVING POLICYHOLDERS in Dividends, Matured Policies, etc., in the same period amount to **\$3,745,438**

An EXAMPLE of how MUTUALITY PAYS

The following simple statement shows the result of one man's policy with The Mutual Life of Canada. (\$5,000 Endowment in 30 Years—Issued in 1904 at age 25)

THIS MAN PAID	
30 Annual Premiums of \$159.75	\$4,792.50
HE RECEIVED IN RETURN	
Face Value of Policy	\$5,000.00
Accumulated Dividends	3,223.20
Special Extra 1928 Dividend	23.00
	\$8,246.20
HE GAINED	\$3,453.70

This is a return of \$122.06 for every \$100 of premiums paid. If the assured had died at any time while the policy was in force \$5,000 plus the accumulated dividends to date of death, would have been paid to his beneficiary.

It is to YOUR advantage to insure in The Mutual Life of Canada—the only Canadian life insurance company that since its organization (1869) has operated on a mutual basis—there is no capital stock—ALL profits from all sources belong to policyholders, who own the company in its entirety.

Command the Road with the 1934

The BIG Straight Eight of the Low Price Field!

When you know the startling performance facts about the Hudson 8, you're almost sure to guess the price hundreds of dollars too high.

At this amazing price of \$1056, freight only extra, you get the Big Straight 8 that will outperform any 8 cylinder stock car, regardless of price.

Sensational performance claims are easy to make on paper. Hudson performance claims are proved—on the road! In one year Hudson-built cars won more individual official C.A.A. and A.A.A. performance records than any car in history—79 of them in all! And the new big Hudson Straight 8 will even outperform the cars that smashed all these records.

And economy? In addition to its low upkeep cost, the Hudson 8 challenges any 8 to give more power from less gas!

New features? Scores of them. From year-round ventilation to the Baggage Compartment in the rear. See them for yourself. And above all—drive for yourself—the Big Straight 8 that commands the road!

Eighteen models—116 and 123 inch wheelbases, 108 and 113 h.p. engines.

HUDSON-ESSEX OF CANADA, LIMITED
Tilbury, Ontario
Prices subject to change without notice

for the coupe—completely equipped including spare tire, all taxes paid, freight only to be added
