Railway Enquiry is Brought to an End

Officials Disagree on Tie Grading at T. & N. O. Enquiry, Commissioner to Prepare Report.

Armand Racine of Windsor Tuesday ended his probe of the affairs and conduct of the Temiskaming & Northern Ontario Railway after a brief session in which he heard evidence regarding purchase and grading of ties.

Mr. Racine, Commissioner appointed by the Ontario Government to conduct the probe left Wednesday for Toronto, and will spend some time preparing a report which he expects to hand to Premier Mitchell F. Hepburn within a fortnight.

Purchase of Ties
The Commissioner on Tuesday examined G. B. Alford, purchasing agent for the railway, and asked him questions regarding purchases of ties over the last ten years.

Alford said practically 60 per cent of the ties were bought from settlers, and that each bona fide settler was allowed to supply 300 ties. He said no tenders were called on ties bought from lumber companies and that the price was set by the Railway Commission.

He said he had not personally inspected ties bought for the road, but had depended on reports submitted by inspectors.

He said ties were bought in various grades, in about these proportions: No. 1 grade, 45 per cent; No. 2 grade, 45 per cent.; No. 3 grade or "culs" 10 per cent.

Mr. Racine showed the purchasing agent several tie butts and asked him to grade them. His gradings did not agree with those of Frank McBurney North Bay lumberman, who was called in as an expert witness.

Assistant Promoted

Alford said during construction of the northern extension of the railway three tie inspectors were employed, but that as the work was cleaned up the inspection was delegated to one man with a part-time assistant. Later the assistant tie inspector had been made a full-time inspector although his experience was limited to his period as assistant, Alford testified.

He said the man D. A. Wauchope, brother-in-law of Chairman George W. Lee of the railway, had been appointed on Mr. Lee's "intimation."

Wauchope was called as a witness and asked to grade tie butts. His gradings were higher than those of the expert witness, McBurney.

DIONNES IN QUEBEC HAVE ANOTHER SET QUINPLETS

Another set of Dionne Quintuplets have come to light at St. Agathe des Monts, Que.

But this time they are only quintuplet carrots and not girls, as in Cornelt, Ontario.

Mrs. G. Dionne, of Lantier, near St. Agathe des Monts, has raised them. The five tubers have the one carrot top and are joined together at the large end.

Mrs. Dionne, of Lantier, is not related to the Corbell Dionne family.

Medico: "But, my dear man, I've been performing operations for the past ten years and I've never had a complaint. Doesn't that prove anything?"

Patient: "Yes—dead men tell no tales."
—Exchange.

Wedding on Sept. 8th at South Porcupine

South Porcupine A.Y.P.A. Enjoy Social Event. Presentation at Porquus Junction to Mrs. Woodall.
Other South End News.

South Porcupine, Ont., Sept. 12th, 1934. Special to The Advance.

A very quiet wedding took place in the vestry of the R. C. Church here on Saturday, September 8th, when Rita Hortie, of Golden City, was married to Moody Goldwin Miller, second son of Mr. and Mrs. Henry Miller, of Bruce avenue. Mr. Hortie gave away his daughter, who was attired in a blue crepe suit, and carried a bouquet of lilies-of-the-valley. She was attended as bridesmaid by Miss Muriel Miller, sister of the bridegroom; she wore a simple red outfit and carried an old-fashioned nosegay of roses. A reception was held afterwards at the home of the bride's parents in Porcupine. The young couple will reside on Golden avenue, South Porcupine. We extend our best wishes for their future happiness.

Mr. Mike Cybulski, owner of the South End Garage, is digging out the foundation for a cement basement in front of his new cement car storage on Bruce avenue. We understand it will be in keeping with the rest of his fine building, and will certainly add its quota to an improved South Porcupine. The new building will be comprised of offices and apartments above. The new Klinga townsite is adding houses to its extension of Rea avenue at a rapid rate. Two new ones came into existence last week. A new rock road has been commenced into the new district from Main street.

Mr. and Mrs. Alec Bailey, of Hastings, with their sons, Mr. Paul Bailey and Mr. Gerard Bailey, and Miss Vera Lege, of Montreal, are visiting the former's daughter, Mrs. Allan Pearce of Connaught Hill this week. This is their first visit so far north, and they report having enjoyed the trip by motor immensely.

Mr. Bob Gallagher has returned from his vacation in the South. Miss Mary Gallagher is not returning north from her motor tour of the New England States, but will enter St. Joseph's College, Toronto, to attend university this year.

Mrs. Fred Ahr, who has been visiting Mrs. Ed Ahr for some weeks, left this week for her home in Buffalo.

Mrs. Ellis Wright entertained at tea on Thursday in honour of Mrs. H. M. Martin, who is leaving shortly for an extended visit to England.

Mr. Biton, of Toronto, is up in town this week completing negotiations concerning the Bay Lake Mines in Shaw township.

Mr. Kenneth Hamilton, of Quyon, Quebec, is visiting his aunt, Mrs. J. Ostrom.

Miss Rose Gibson and Miss Norma MacPhail are leaving on Thursday to enter Normal School in Toronto.

Mrs. Norman Rule has returned from visiting her husband, who is the Sanitarium at Gravenhurst. We are glad to report him as progressing toward recovery.

A fire alarm was turned in at 11:30 p.m. on Sunday from Golden avenue. A car which has been parked for some time in between two houses, caught fire, and on account of the danger to the houses it was considered necessary to get out the brigade. Removal of the

front seat which was blazing, removed the menace and no further damage was done. A lighted cigarette butt, dropped from an upper window into the car is supposed to have caused the blaze.

Congratulations this week to the Rev. L. and Mrs. Hussey, formerly of South Porcupine, now of Kincardine, on the birth of a small daughter in the Mountain-side hospital at Hamilton on September 4th. We are glad to report that Mrs. Hussey is now progressing nicely, although at first her condition was considered very grave. Latest reports concerning both mother and child are more encouraging.

A special meeting of the United Church Guild was held at the home of Mrs. Burton at the Dome on Tuesday. A tea and sale of home-baking is being arranged for Sept. 26th in the United Church.

The young people of the A.Y.P.A. met at the home of Mrs. Maxwell-Smith on Tuesday evening. A very nice time was enjoyed by all. Games, dancing, etc., were indulged in and a nice lunch served. It was intended as a surprise party for Miss Betty Martin, who is a member of the organization, and is leaving with her mother shortly to visit her relatives in England. The A. Y. P. A. presented her with a lovely initiated travelling case as a parting gift. This was given with a neat speech by the president, Mr. Victor Thomas.

At the local police court on Tuesday morning five drunks were charged. Four paid the usual fine, and one is to come up for judgment next week. A case of theft against a lady was dismissed. A woman's case was dismissed. A case of assault was withdrawn and costs paid. One case of reckless driving was dismissed, while another was adjourned until Sept. 7th. In a case of assault the assailant was ordered to pay costs and sentence was suspended. For selling liquor one man paid \$100.00 fine and costs, while another case was adjourned.

Mr. and Mrs. Fred Mason, who have been on two weeks' holiday in Burk's Falls and Toronto are home again.

Mrs. Stanlake has returned from a vacation in Toronto.

Mrs. Kilborne and children left on Sunday for a few days' visit in Sudbury before joining Mr. Kilborne in Kirkland Lake.

Dr. Somerville and family, who have been on an extended motor trip have arrived back in town.

Mr. and Mrs. Yeomans, of the Dome, are vacationing in Temagami.

Mr. and Mrs. Moyle have returned from a visit to Toronto.

Mr. and Mrs. Tate are on vacation in Acton.

Mrs. G. McDonald, senior, of Dome Extension, left last week to return to her home in Scotland.

A very pleasant surprise party was held on Thursday evening, Sept. 8th at St. Stephen's Rectory, Porquus Junction, by the members of the Women's Institute, in honour of Mrs. J. E. Woodall. During the evening Mrs. Woodall was presented with a silver flower-bowl centre-piece. The presentation was made by Mrs. F. C. Richardson, who, on behalf of the Women's Institute expressed their appreciation to Mrs. Woodall for the faithful work and kind service which she has rendered during the past 20 years. Archdeacon and Mrs. Woodall will be leaving the Junction shortly to reside in South Porcupine.

Miss Verne Smythe, of the staff of the Presbyterian hospital, is leaving this week-end to attend the wedding of her brother, Elwyn, in Toronto.

Merger of Properties in Shiningtree District

A merger of West Shining Tree properties was consummated last week at a special meeting of the shareholders of the White Rock Gold Mining Company Limited, held in Sudbury, the proposal having been unanimously adopted. By virtue of a resolution passed, the White Rock mine will be amalgamated with the Atlas and the Harvey Kirkland Mines holdings, and a new company will be formed to commence active development of the properties. It is understood an engineer is going into the field next week to make preliminary arrangements for the beginning of operations. The area involved is about 240 acres.

The property of the White Rock Mines is located about five miles east of Shining Tree and 25 miles east of Westree station. It adjoins the old Champion Reef mine. Some years ago the holdings were actively developed. A 170-foot shaft was sunk, and approximately 1,000 feet of lateral work performed on two levels. About a year ago some further development was undertaken by the late Wm. McVittie.

There is a mining plant on the ground, together with boiler house, blacksmith shop and camp buildings. The Atlas also was under development in the early days of the district. The property was later taken over by the A. J. Young interests and has been inactive for some time.

White Rock Mining Company Limited was organized in 1919, and the present officers are C. W. Jessop, president; Dr. W. C. Morrison, vice-president; G. E. McVittie, secretary-treasurer. These three, with W. Law and W. Webster, comprise the board of directors.

When the new company is organized as a result of the merger of the three properties, it is understood White Rock Mining Company will be wound up, and the stock interest in the new concern will be transferred to its shareholders individually.

They are using real rifles and bayonets, and making themselves familiar with machine-guns

Re-Elect Directors of Paymaster Mines

Annual Meeting of Paymaster Mines Held at the Mine Property in Deloro on Monday of This Week.

The annual meeting of the shareholders of the Paymaster Consolidated Mines, Limited, was held at the mine on Monday of this week, Sept. 10th. The board of directors for the past year were re-elected for the ensuing year.

The annual report for the year was read by A. S. Fuller, president of the company. A summary of the report by the president is given as follows:—

"About one year has passed since the company was in possession of sufficient capital to commence operations. The sampling at the Dome Lake, or main shaft, has indicated 10,000 tons of \$9.00 ore, while at the 'Heine' shaft, 35,000 tons of \$11.00 ore is shown. Within the past months the ore dump at the Dome Lake shaft has been sampled, indicating 6,000 tons of \$6.00 grade ore. This ore will be used for initial milling purposes. Milling operations will begin some time during the month of September. About 100 tons will be milled daily. Mill tonnage will gradually be stepped up."

The officers and directors of the Paymaster are:—A. S. Fuller, president; E. H. Walker, vice-president; C. E. Cook, treasurer; E. L. O'Reilly, assistant treasurer; R. K. Grant, H. D. Rothwell, directors.

Beverage Rooms are Not Proving Very Satisfactory

On several recent occasions The Advance has noted that the beverage rooms are not proving very satisfactory. There seems to be no doubt but that the drunks in charge of cars also seem to be more plentiful. Cases are constantly being reported of men spending too much in the beverage rooms and neglecting their families as a consequence. Business men also have to wait for payments on account. Whether the fault lies with the law and regulations, the enforcement of the beverage room plan itself may be a matter for argument. There does not seem to be any question, however, as to the general effect being unsatisfactory. The experience in Timmins seems to be duplicated to more or less extent in the South. In an editorial item referring to the question last week The Simcoe Reformer says:—

"Resentment continues to grow among the people of Ontario over effects of the new beverage rooms. Even to hotelkeepers they are proving a not unmixed blessing. Many hotel proprietors are finding it necessary, particularly on Saturday nights, to close their beverage parlors long before midnight. Otherwise they could not hold in check the rowdy element that is making a disgrace of the new legislation. One hotelkeeper in a northern town is considering the surrender of his license rather than have his hotel turned into a rough-house resort. Last Wednesday there were fourteen charges of intoxication on the magistrate's docket in Simcoe police court. Soon the streets will not be safe for women and children after dark. We wonder what Mr. Hepburn and the Globe are going to do about it. They disagree about a plebiscite, but possibly they might concur in a proposal to close the beverage rooms at 9 or 10 o'clock in the evening, which should be done 'pronto.'"

Derive Drug from Quinine to Put Curb on Pneumonia

A new drug made from quinine which promises a new treatment for pneumonia was described to the American Chemical Society at Cleveland, Ohio, this week by scientists of the Mellon Institute of Pittsburgh.

This quinine derivative has been used on animals with remarkable results, and tried also on human beings with effects announced to-day as "very encouraging."

To get their new preparation, the institute chemists began with optochin, a drug known to physicians for many years. This old drug was highly toxic to pneumonia germs, but of little use because it also caused blindness.

The new drug causes no blindness. It is more deadly to the germs than the old one.

Actually not only one, but several of these modified quinine drugs have been made, each one increasingly effective against pneumonia.

The report was made by C. L. Butler, Alice G. Renfrew and Leonard H. Cretcher before the division of medicinal chemistry. They stressed a warning that physicians should not try ordinary chemical means of producing the new drug, because the slightest impurity would have poisonous effects.

The first change made in the old drug optochin was to substitute for some of the hydrogen it contained an alcoholic chemical technically called alcoholic hydroxyl. This resulted in a drug called betahydroxythbrocupreine.

From there they went to another substance now called ethyl-apoquinine. This is the one tried on human beings. But first it was given to mice. It saved the lives of 29 out of 30 mice who had received massive doses of pneumonia germs 1,000 times stronger than the amount required to cause death.

From the medical standpoint an important feature is that the new drug can be given by mouth in the form of tablets. Once it is safely standardized it can be used without elaborate or expensive technique.

It is fatal to all four known types of pneumonia bacteria. To date it has been tried only on human beings whose physicians had given up hope. No details were revealed except that the results had been "very encouraging."

Compiling New Directory for Timmins and Vicinity

Mr. Gamble, of the Might Directories Co. Toronto, is in town this week in connection with the work of compiling and publishing a new directory for Timmins, Schumacher and South Porcupine. It is two years ago that the last directory for this camp was published, and though the directory was a very good one, and the Might directories usually are, there are many changes in a couple of years and a new directory now is needed.

Mr. Gamble has already engaged a number of enumerators for the work of gathering the necessary data and statistics for the new directory.

The Might directories give an alphabetical list of names of the people of the community, a list of names arranged by streets, etc., a classified business directory, a list of all fraternal, social and other societies and associations, town officials and other valuable information regarding the town and its people.

Mr. and Mrs. O. W. Rusk were guests last week of friends at North Bay on their way to Chate Bay to visit relatives and friends.

Another Representative of Agriculture Needed Here

Commenting on a recent article in The Advance, The Cochrane Northland Post says:—"As we have remarked on former occasions, we do not always see eye to eye with our Timmins contemporary, the Porcupine Advance, but there are a few matters on which we can readily agree. In one particular at least we are in entire agreement, and that is the need for an additional Agricultural Representative to assist Mr. Pomerleau in his all-important work."

The Northland Post then reproduces the editorial from The Advance in regard to the need and the desirability for a second representative of agriculture for the immense territory left to Mr. Pomerleau. To this The Northland Post adds the following paragraph:—"To the Advance's observations we can append a hearty, hear, hear! Our present Agricultural Representative is a hardworking, capable man. But he is only one man, and can only be in one place at a time, so that his labours are tremendously handicapped by the fact that he is unable to adequately cover the territory that he is responsible for."
