 President—Ross L. McDonald, Kapuskasing.
 Vice-President—Miss M. Gauthier, Smooth Rock Falls.
 Secretary—Miss J. A. Markell, Timmins.
 Treasurer—Mr. W. R. McVittie, Cochrane.
 Librarian—Miss M. Tackaberry, Timmins.

Executive Committee—Miss L. Shaw, Timmins; Miss C. Dupont, Kapuskasing; Miss E. McGuire, Kapuskasing; Mr. E. S. Fell, Smooth Rock Falls.

Auditors—Mr. J. E. Morton, Cochrane and Mr. J. A. Bush, Cochrane.

Quintuplets on the Fifth Month of Life

Dr. Dafeo Says the Five Babies are Making Excellent Progress. Plans Now to Prevent "Spoiling" Them.

Four months old last Friday, the famous Dionne quintuplets are becoming spoiled, and Dr. A. R. Dafeo says the petting of the amazing little sisters must stop. At the same time he declared all are immeasurably better fortified in the race for life than they were even one month ago. This is given in a despatch from Callander last week. Since their birth, last May 28, in the little farm house near Callander, the infants thrilled the world as they continued to live and gain strength under the tireless supervision of the north country practitioner. There have been setbacks and times of worry—ad there may be more to come—but the energetic middle-aged physician was proud last week as he looked back over the successful struggle of four months. "Their worst time," he said as he prepared to leave for the new little hospital where the babies were moved two weeks ago, "was the period immediately after their birth. Their lack of vitality and the poor surroundings, with few, if any, conveniences to meet the emergency, gave little hope all would survive. It was remarkable the way they got along."

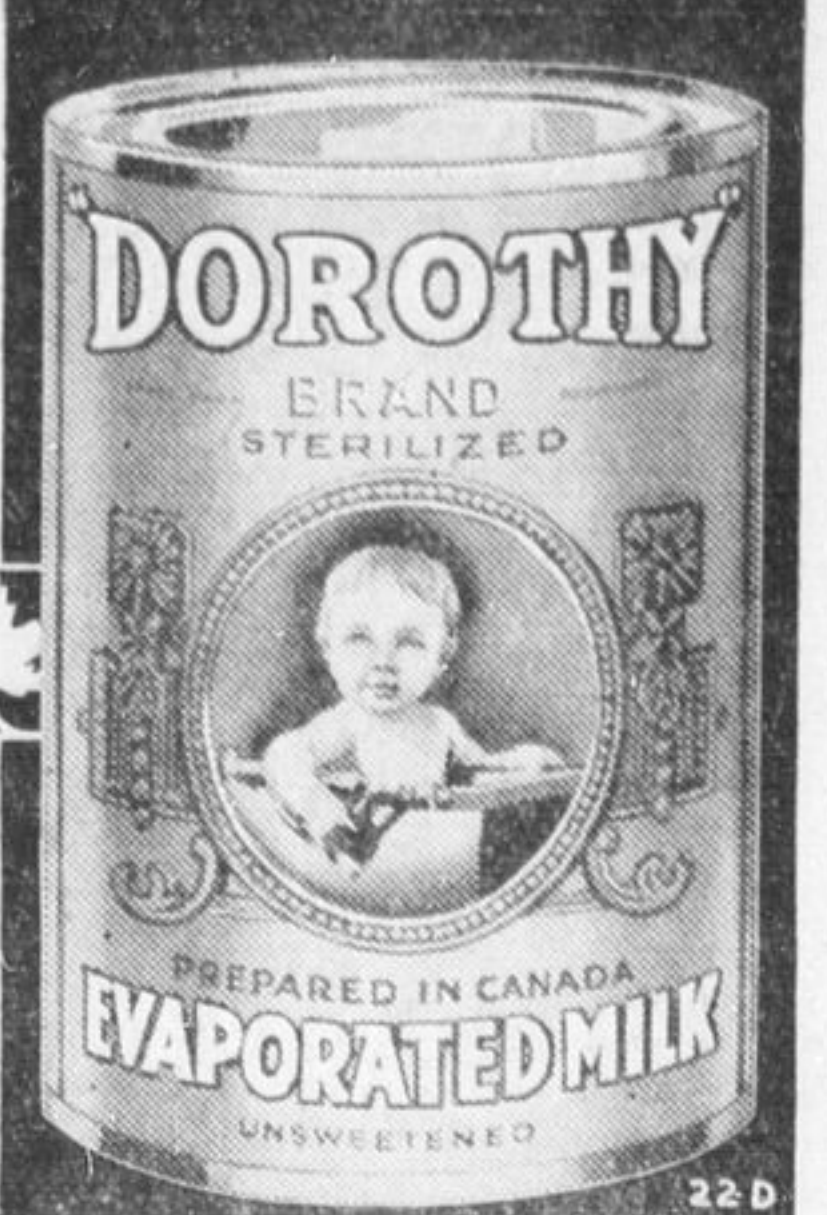

Through Trying Times
 Constant care and attention had its early effect. Under a capable nursing staff, with the addition of more and more comforts and necessities, the babies began to thrive. Then came days when one or the other was not well. Little Marie, the smallest, suffered most of the five from jaundice. Later a tiny growth on her thigh was definitely diagnosed as a naevus tumor and radium treatment was applied by world-renowned specialists. Dr. Dafeo said the tumor now appears "dead."
 Then came a trying experience as one after the other of the little sisters suffered from intestinal toxæmia. Today they are safely through this trying time, said Dr. Dafeo.

When whooping cough made its appearance in the district, the physician hurried his charges to the newly completed hospital across the road from the farm home. They have shown no signs yet of developing the disease, although the period of incubation, should they have contracted whooping cough, is not past. Dr. Dafeo wants another week to pass before he is relieved of this anxiety.

Are Getting Spoiled
 "They have had so much attention through-out, their skin the little scamps are getting spoiled," said the physician today. "We went to them when they cried and we petted and fussed over them. Now that they are better they have learned what their crying trick does."
 "Often little Marie, and sometimes Yvonne, leads the yelling and then all

join in and whoop things up in great style. Then they stop and listen for footsteps. If they hear none the chorus starts again.

"We have got to do something about it. We are going to be stern again, and the petting must stop."

Only Emilie now seems not quite up to par, the physician said. She has no temperature and is not ill, but in appearance is not quite so "peppy" as the others. Dr. Dafeo thought she would be as well as the others.
 For a while each day the babies are put in a large basket in the hospital window so they can get the benefits of the sun. If the sun is bright they are kept there only four or five minutes. If the weather is dull they stay there half an hour, kicking, stretching and rolling.

President of Hollinger Contradicts Big Story

The following paragraphs are given in a despatch from Toronto last week and appearing in most of the daily papers:—

President Noah A. Timmins, of Hollinger Consolidated Gold Mines Limited, has taken the pains to contradict reports which have been published in a Toronto newspaper to the effect that some \$55,000,000 in ore was in sight on the Premier property in Hislop township, now under exploration by Hollinger. Mr. Timmins says:

"This statement is manifestly an error as sufficient work has not been done to justify any estimate of ore in sight. It is true that diamond drilling results were favourable, but it will take several months' development work before it would be fair to make any statement about the property."

In other words, Hollinger's president draws attention to the obvious fact that millions in ore cannot be proved by a few diamond drill holes. Drilling is a good test of values and is useful in securing valuable information as to

lengths and widths of mineralized zones and the possibility of those zones making pay ore. But it requires shafts, drifts and crosscuts and intensive development on many levels underground before the existence of \$55,000,000 worth of ore can be definitely proven.

Huntsville Forester:—The political axe should be reserved for those who jeopardized their claims for consideration by political activities, which are rightly banned in the civil service. To remove a faithful servant, whether he be a highway superintendent or a departmental clerk, simply because some party friend of the government claims the job through political services, is too dangerous a policy to defend and to inimical to public interest to require comment.

Goodyear Sales Showed Increase During Year

Volume of sales and profits of the Goodyear Tire & Rubber Co. of Canada, Limited for the past nine months have materially exceeded those of the same period a year ago, and the company has earned more than sufficient in this period to cover dividend requirements for the current year at rates heretofore paid, states C. H. Carlisle, president, in a letter to shareholders accompanying dividend cheques for the third quarter of 1934. The company has not only maintained but improved its position in the industry.

Stressing the value to the company of the human factor, Mr. Carlisle says: "As shareholders, we are prone to value the worth of a company by its financial position and its earning capacity, but there is another factor, that is its personnel. You have a very efficient and progressive organization, the men in your factories are high-grade, efficient, co-operative—72 per cent. of all factory employees have had more than five years' continuous service. Of these, 258 have had ten years' service or more, 166 fifteen years' or more, 42 twenty years' and over and two about twenty-five years' service or for the entire time since the formation of your company."

Referring with regret to the recent death of C. B. McNaught, vice-president of the company, Mr. Carlisle says: "He joined your board in 1921, was a man of sound judgment, a thinker, a hard worker and never too busy to give his best to your company. He always

had a smile and a kind word for others. Mr. McNaught was a factor in Canadian business, serving as director or in management of many of the largest industries and financial institutions of Canada. He gave liberally of his time and efforts to his government at the time of the war and afterwards, serving as a member of the War Trade Board and also as a member of the Canadian Trade Commission."

New Liskeard Speaker Moved to New Quarters

The New Liskeard Speaker appeared last week looking bigger and better than ever after a couple of abbreviated issues necessary through the disorganization consequent on moving to new quarters. The Speaker is now fully established and settled in its new building in the Evans block, Whitewood avenue, New Liskeard. The Speaker has not only acquired enlarged and improved premises but it has also added to its plant and equipment. There are few towns the size of New Liskeard where the newspaper has as complete and up-to-date a plant and equipment as possessed by The Speaker and there certainly are no other towns where the newspaper is more able and more loyal in advancing the true interests of the community. The people of New Liskeard evidently appreciate their fortune in having a newspaper and job printing plant like that of The Speaker and increased service to the community seems to be followed in New Liskeard by increased support and appreciation.

New Loan Will Help Business Recovery

Statement of Prime Minister R. B. Bennett Receives the Approval of the People of Canada. Further Step to Recovery.

The frank, concise statement of the Prime Minister of Canada, Hon. R. Bennett, regarding the 1934 Refunding Loan has met with warm and encouraging response from bankers, insurance and trust company executives, business men, professional men, agriculturists and labour leaders throughout the country. The concrete evidence of business recovery from the low point of last year which Mr. Bennett stressed in his opening announcement such as a 56 p.c. increase in industrial production, 17 p.c. increase in employment, 43 p.c. increase in farm products prices, as well as a substantial improvement in carloadings, electric power production and wholesale prices, emphasizes the strengthening of the national credit, the progress in achievement of national economy and the steady general upturn in business.

Completion of this year's refunding programme will bring the total war loan refinancing (inaugurated in 1931) to over \$1,000,000,000.

\$9,000,000 per annum has already been saved in interest charges and when this year's operations are concluded, the annual saving in interest will be about \$14,000,000. This saving more than offsets interest charges on debt incurred to meet the extraordinary burdens incident to unemployment relief; and eventually should enable the government to reduce taxes.

The tenor of the comments from bankers, insurance and trust company executives, industrialists, agriculturists, and labour leaders is ably summed up by the unanimity of their opinions, which are that Canada has emerged from the depression with probably less strain than that experienced in many other countries; and that, while our progress is gradual, it is well founded. There have been no disturbing recessions consequent upon too rapid a rise.

The consensus of opinion is that by reason of the favourable basis of conversion and the attractive yield offered (particularly in the long term bonds) the majority of 1919 Victory Bond holders will convert, and new investors hasten to secure an allotment of the new bonds.

Do You Hold Victory Bonds Maturing November 1st, 1934?

The new 1934 Dominion of Canada Refunding Loan offers an excellent opportunity for the investment of funds. It also provides holders of Victory Bonds due November 1st, 1934 with an opportunity to continue their investment in the strongest security in Canada.

Denominations: \$100, \$500 and \$1,000.
