AFTERNOON TEA AND SALE OF HOME BAKING, NOV. 14TH

Announcement is made of an afternoon tea and sale of home baking, to be held under the auspices of the St. Matthew's Ladies' Guild, on Wednesday afternoon, Nov. 14th, at the home of Mrs. C. E. Taylor, 57 Tamarack street.

Timmins Has Second Case of Tularemia

So Far as Known it is the Second Case Known in Canada. Infection Comes from Rabbits. First Patient Recovered.

Timmins has a second case of tularemia, likely the second case of this disease for Canada. Tularemia is a disease fairly common in the United States, Russia and Japan, but so far as known Timmins has had the only two cases ever in Canada to date. In January, 1930, Dr. Lou Hudson, of Timmins, reported the first case of tularemia ever known in Canada, his diagnosis being confirmed by the authorities. Dr. Hudson's first patient was a local man who contracted the disease while skinning rabbits. Although the disease usually proves fatal, Dr. Hudson's first patient made complete recovery.

Now, Dr. Hudson reports a second case of tularemia, the patient this time being a woman who has recently handled wild rabbits. Three days after dressing a wild rabbit she became suddenly ill with high fever, chills, muscular and joint pains, followed by a sore thumb and swollen glands. Dr. Hudson diagnosed the case as one of tularemia and samples of the blood forwarded to the public health laboratories at Toronto resulted in the diagnosis being confirmed. The case is still under treatment and investigation, and judging by the success of the doctor's treatment in the other case her chances for recovery are the best.

Tularemia, Dr. Hudson explains, exists primarily as an infectious disease of wild rodents, particularly rabbits. Among these animals it occurs as a fatal bacteremia due to bacterium tularemense. The disease affects man

secondarily as a result of direct contact with the tissues or body fluids of an infected animal, or as a result of indirect transmission from animal to man by certain ticks or flies.

Dr. Hudson adds the advice that care should be exercised in dressing wild rabbits. Rubber gloves should be worn so as not to scratch the hands. The meat should be well cooked in each case when rabbits are used for food.

Teck-Hughes Planning to Drop Two Directors

Teck-Hughes Gold Mines, Limited, will drop two directors, William W. Reilly and Conrad E. Wettlaufer, both of Buffalo, from its board if a by-law passed by the board, is confirmed at the forthcoming annual meeting of the company.

Accompanying notice of the twelfth annual meeting, shareholders are presented with proxies for a special general meeting in favour of George Miller, J. F. Lash and Dr. D. L. H. Forbes, which unless otherwise instructed, will be voted to confirm a by-law to reduce the board from nine to seven and for the election of A. W. Johnston, Dr. D. L. H. Forbes, G. C. Miller, K. P. Emmens, J. F. Lash, J. F. Thompson and H. C. McCloskey. The list does not include the names of the two members of the board who admitted under recent public examination they had disposed of a large amount of their holdings while the question of a dividend reduction was in abeyance.

The annual meeting of Teck-Hughes Gold Mines, Limited, will be held in the Ballroom of the Royal York Hotel, Toronto, at 12 o'clock noon on Tuesday, November 20th.

M. Spaine returned to Timmins last week after a visit to the South.

Notable Programme by Welsh Male Choir

Musical Treat at Oddfellows Hall on Tuesday Evening, under Auspices of Timmins I.O.O.F. Auxiliary Club.

A musical event of outstanding interest was given on Tuesday evening of this week at the Oddfellows' hall under the auspices of Timmins Lodge No. 459 Auxiliary Club when the Porcupine Welsh Male Choir presented a musical programme that delighted the music-lovers present. The Porcupine Welsh Male Choir is a well-balanced organization and under the direction of Ron Jones has achieved notable excellence. There are a number of outstanding individual voices in the choir, as was proven by the solo numbers during the evening, and the conductor, R. Jones, apparently has the gift of directing and welding the good individual voices into a choir that is very creditable.

The choir for the evening was taken by G. A. Macdonald, who had been honoured by being appointed honorary president of the Porcupine Welsh Choir. In introducing the programme the chairman made humorous reference to the outstanding characteristics of different races and peoples, classing the Welsh as a nation of singers. The programme fully justified the reference.

J. Thomas, president of the Porcupine Welsh Male Choir briefly introduced the choir and the conductor, R. Jones, and the accompanist, A. Garrowsay.

The numbers by the choir were all given very effectively and showed not only the individual talent of the members of the choir but also the success attained through their responsiveness to the work of the gifted conductor. Among the numbers given by the choir were—"In Absence"; "In the Sweet Bye and Bye"; "Men of Harlech"; "Guide Me, O, Thou Great Jehovah"; "Jolly Roger"; "Comrades in Arms"; Welsh National Anthems; National Anthem. Though the selections were varied in character, they were all given with equal effectiveness. Two of the hymns given were sung as a token of sympathy and respect for the Welsh coal miners who lost their lives in the Chelmsford mine disaster.

The individual numbers on the programme equalled the excellence of the choral selections. The pleasing tenor voice of T. Williams was heard to advantage and on each appearance he was insistently encored. His rendition of "Because" was particularly appreciated. Another member of the choir, A. Bellamy, baritone delighted all with his selections, "Play Gypsies," "Old Man River," and other numbers being favourites with the audience. The bass solos, "Asleep in the Deep," "Asleep in the Dark Blue Waves," and "Danny Boy," gave opportunity for the effective bass voice of L. Spacey, who won encore for each number given. Among the members of the choir none won greater favour than the conductor, Ron Jones, whose gifted tenor voice was a delight to the audience. His presentation of "Macushla" was especially attractive.

The Welsh Choir was equally fortunate in the talent on the programme apart from the members of the choir. Mrs. Stanlake's beautiful soprano voice won very special appreciation from the audience, her solos, "Break of Day," and "I Know a Valley," being outstanding on the programme for the evening. The violin solos by David Gordon, with H. Walters playing the piano accompaniments added further charm to the evening. The playing of these gifted young artists won very sincere and enthusiastic approval, tone, technique and interpretation being unusually good.

Before the concluding numbers by the choir, the president, J. Thomas, expressed the special appreciation felt for the artists who had assisted with the evening's programme.

The programme for the evening was divided into two parts with an intermission between. During this intermission the chairman gave a few humorous stories, while Chas. F. Lacy, Noble Grand of the Oddfellows Lodge, responded to a request for a brief address. Mr. Lacy expressed the pleasure the Oddfellows felt in having the Porcupine Welsh Male Choir for the evening and the general appreciation that was felt for the pleasing music enjoyed.

Annual Turkey Dinner at Schumacher Nov. 12th

The annual turkey dinner at Trinity United Church, Schumacher, will be on Monday, Nov. 12th, and promises to excel even the past successes in this line. In order to accommodate all there will be two dinners, one at 5 p.m. and the other at 6 p.m. The ladies at Schumacher are justly noted for the excellence of these annual turkey dinners and the good service, and all should note the date and times.

Ranges, Heaters

These Canadian all-steel built stoves are beautifully finished in cream and green enamel with nickel-plated trimmings, with and without warming ovens and reservoirs

British Airplanes and Airmen Eliminate Space

(From Mail and Empire)
The victory of the British team, Messrs Scott and Black, in the MacRobertson air race from England to Australia has a peculiar interest for Toronto. They flew a De Havilland Comet machine and this city is the home of the De Havilland Company of Canada. Contact, official organ of the Toronto Flying Club, notes that the total time from the take-off at Mildenhall to the finishing line at Melbourne was only 71 hours, while an ordinary first-class letter mail takes five weeks to make the same journey. They were actually 20 hours ahead of the second machine, so that their time was nearly

25 per cent. better than that of any other competitor. Britain leads the way in eliminating time and space. The excellence of its planes and the skill of its pilots have made this possible.

The winning machine, a De Havilland "Comet", is one of the most interesting types of aircraft in existence, and has exceeded even the expectations of the designers. As soon as the regulations for the race were issued it was realized that the insistence upon machines complying with the International Convention's take-off requirements would provide the limiting factor for range and speed. De Havilland engineers quickly concluded that a controllable pitch propeller would be essential in order to

obtain the take-off with sufficient fuel to cover the range of 2,700 miles, which was necessary to make sure of reaching all control points without an intermediate landing. Arrangements were therefore made to obtain a license for the design and manufacture within the British Empire of the Hamilton Controllable Pitch Propeller.

It has been suggested in certain quarters that the Comet is just a racing freak, and of no use for any commercial purpose. This is scarcely true, because no machine, which can fly nearly 12,000 miles over an unorganized air route with comparatively poor landing grounds, can be classed as a freak. Furthermore, the designers have had commercial possibilities in mind from the first. It appeared to them that there are countries where vast distances and comparatively small populations made the organization of a fast mail service impossible unless the machines could be operated with the utmost economy.
