Some Settlers Live on Bread and Lard

So Says Rev. J. C. Cochrane in Refering to Plight of New Settlers in North, Another Proof of Need of Land Bonus.

In an interview at Toronto this week Rev. J. C. Cochrane, superintendent of Northern missions of the United Church, is quoted as referring to families of settlers in the North as existing for weeks on a diet composed almost entirely of bread and lard. These families are settlers who went to Northern Ontario under the relief settlement plan of the Dominion Government as put into effect by the late Henry Government. The conditions of poverty of these settlers is described by Rev. Mr. Cochrane as being appalling Rev. Mr. Cochrane says that the condition of the tettlers and their families is made much worse by the feeling of uncertainty they have. They do not know what the Ontario Government intends to do to help them now, if anything.

"The \$600 which they were given when the plan was put into effect has, in many cases, been used up," he said, "they are trying to live on \$10 a month and when even that ceases it fosters a spirit of resentment that is growing steadily. They have no assurance from the government that anything more is going to be done for them and apparently work has come to a standstill." Last winter Rev. Mr. Cochrane made

a survey of all the new settlements in the North, and in general found the outlook hopeful. He made a number of recommendations which were gladly accepted by the Henry Government Since the change of government, however, the settlers, who were at first very hopeful, believing the storic's heard during the election campaign as to improvement in treatment accorded them, have become greatly depressed because of the uncertainty that has grown up. They are not sure whether they will have to return to their former homes in the South or not. The attitude of the Henry Government before its defeat was that it would be good policy to do practically anything to keep the new settlers going. Most of them had been taken from relief in the South and so even if it cost something to keep them going on the new farms that was no more costly and much more desirable than direct relief in the South. Unfortunately, this attitude had not been so apparent at first or the whole plan might have proved more successful At that, it must be admitted that guite a measure of success was achieved Rev. Mr. Cochrane in his survey last winter said that the plan was working fairly well. The disorganization and the uncertainty following announcements by the present Government as plan has undoubtedly added to the discouragement of the new settlers. been that no more groups of settlers men employment. Now it looks as if

Rev. Mr. Cochrane is not giving any sensational or alarmist picture and he time now will be able to sing again: knows what he is talking about. There "Happy days are here again." should be immediate attention given the matter by the Government. Any help, however, will only be temporary. It seems more and more apparent that the only real permanent aid to settlement must come from some form of bonus for land-clearing. This would Hollinger Hislop Company's Contract mean helping those who are helping themselves and showing probability of 'making a go of it." The land bonus has worked well in Quebec. The Henry Government promised to inaugurate this land bonus but they waited too noted that the Hydro Electric Comlong before doing so, the recent election mission had negotiated a contract for topping any plans along this line.

LLEGED RED AGITATOR TARRED AND FEATHERED

A group of farmers at Vegreville, Alperta, their patience apparently exnausted in the matter, caught George Palmer, who was for a time engaged in newspaper work in Moscow, Russia, but who recently has been agitating farmers in Alberta to strike against the grain elevators there, according to reports. commission. Men Who Took Bridge Away in Liskeard District

Two Haileybury residents were given until Saturday of last week to arrange to replace a bridge over Mill Creek, near Lake Temiskaming which they have been charged with taking. As originally laid, the information charged them with theft of the bridge, valued at \$500, but they were allowed to plead guilty to the lesser charge of removing timbers. The hearing was adjourned for a week to allow them to arrange for replacement of the bridge.

The two men, Robert Palmer and Lloyd Watson, denied having taken the timbers, although an estimate made by Provincial Constable R. O. Stromberg states that Watson had about fifteen cords and Palmer had about sixteen cords of wood.

The story alleged that the timbers had been skidded down a sharp slope to the edge of the lake, boomed to the the brickyard bay, and then hauled to the shore again. Another man, Joseph Young, allegedly agsisted in the work, and got \$5 from Palmer and understood the balance was to come from Watson, although Palmer swore Watson was only to loan him the money for this purpose. Watson's story was that he had agreed to help Palmer haul the wood on a load-for-load basis, but he admitted that he had asked no questions, and knew the timber came from the old highway bridge.

Again at Capacity at Iroquois Falls Mill

Seventh Machine Went into Operation at Abitibi Mill, Iroquois Falls, on Tuesday This Week. To Return to 8-hour day.

This week there is good news from Re-instatement of Some Iroquois Falls. For the first time since September, 1931, the Abitibi Power & Paper Co. at the Falls expects to have seven machines running for some time and, perhaps, permanently. past three years the paper mill at the Falls has been under curtailed producoperation has varied from time to time, but never has there been the full of the \$5 fee. quota of machines running

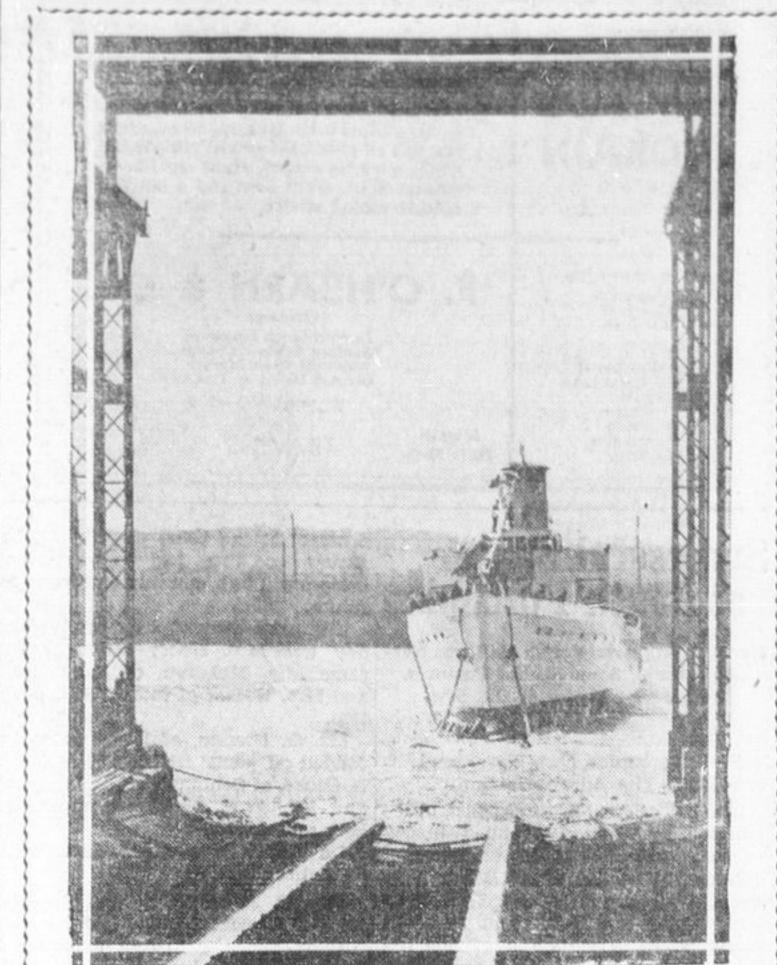

on Saturday the sixth machine went year-old New Toronto baseball pitcher, into operation and then again on Tues- and Archie Briden, 37, South Porcuday of this week another machine-the pine, who formerly played in the Namore or less permanent.
