The Advance is now settled in its fine new quarters, and ready to carry on the issuing of the paper semi-weekly (every Monday and Thursday) instead of weekly as before.

The new premises on the old site are up-to-date and commodious. The front is of Rugged brick (Maple bark finish), one of the most attractive fronts in town. The balance of the new building is of cement block construction with steel girding. The building is two-storied with office suites upstairs. New and extended business and news

and editorial offices are at the front of the ground floor, with the best in both natural and artificial lighting. The building is fully equipped with a hot water heating system, with an Iron Fireman and other perfected equipment. The natural wood finish with oak trimmings makes a pleasing appearance, while high ceilings and other features add to the advantages.

On this page will be found congratulations and good wishes from some of those who helped to erect the new building.

The new building was erected over and around the old one, business being carried on as usual in the process, and the old structure being torn out as the new was completed. With new premises and enlarged equipment The Advance is better able than ever to serve the business men and the public of Timmins and the North.

A general invitation is extended to the public to visit the new premises of The Advance.

The Advance continues to advance with Timmins and the North.
