Secret of "World's Largest Liner" Made Public at Last

Its construction guarded with the greatest secrecy over a period of two years, the giant flying clipper No. 5 said to be the world's largest air liner, has at last been shown. It was revealed for the first time to a small group of aviation executives and experts at Baltimore, Md. No. 5 was built for trans-Pacific use by the Pan-American Airways. It is a gleaming giant of chrome metal, measuring 90 feet in length, and 24 feet high, and it has a wing span of 130 feet. It weighs 23,100 pounds, empty. It will take the air with its full crew, 50 passengers, and capacity load of freight, weighing 51,000 pounds.

Air View of Centre of European War of Diplomacy

Despite the quietness of the European scene for a few days (that is comparatively) the Saar Valley still remains as the crucial centre of European diplomacy. With the plebiscite approaching (January 13) both Nazis and France are making efforts to assure that the vote will swing to their country, although observers concede the rich district to Germany if the vote is held. Pictured above is the residential district of Saarbrücken, largest and most important town in the valley. The Saar is noted for its coal and iron deposits.
