TORONTO WOMAN HAS HER TWENTY-SECOND CHILD

Not to be outdone by Mrs. Matthew Kenny, who on Wednesday gave birth to her 11th child since 1926 in the Millar will \$500,000 maternity sweepstakes, Mrs. Grace Bagnato, Toronto, court interpreter, Saturday was presented by the stork with her ninth, a baby boy. Reports from the hospital are that both mother and child are doing well. This is Mrs. Bagnato's 22nd child,

although only nine are eligible for the prize, which goes to the Toronto mother who gives birth to the most children in the 10 years following Charles V. Millar's death. The millionaire lawyer-sportsman died in October, 1926.

Blairmore Enterprise:—"I strongly object," says a noted woman at Ottawa, "to that ugly word 'spinster.'" Just to oblige her, in future we shall say 'lady-in-waiting.'

Hon. P. Heenan Says Will Start Roadway

Irrespective of Ottawa the Trans-Canada Highway to go on at Once, Says Hon. Peter Heenan.

In an interview at Toronto this week Hon. Peter Heenan, Minister of Lands and Forests and Northern Development, made it plain that the Ontario Government intends to proceed at once with the construction of the Trans-Canada highway. Unless the Dominion Government ceases to "quibble" over construction of the Schreiber-White River section of the highway, according to Hon. Mr. Heenan's interview, he will recommend to the Ontario Government that it proceed with the project, pending that Ottawa will square accounts later, "in a way that two governments should work together," as he is quoted as phrasing it.

Hon. Mr. Heenan in the interview said that a letter had been sent to Hon. Mr. Gordon giving all the data that he could ask for in regard to the White River-Schreiber route and other questions. Hon. Mr. Heenan seemed to suggest that there had been enough discussion of the question in public between the two governments and that which was needed now was action.

A request from the Dominion Government that they be represented at the opening of tenders for the stretch in question was branded by Acting Premier H. C. Nixon as "most insulting and offensive." He declared, how-

Could Science Stop War by "Striking"?

(BY "SHAKES")

These days we hear much about impending war in half a dozen parts of the world. We have been warned that a new war on anything like the scale of the last one would mean almost complete annihilation of the race. Scientists, by accident, sometimes not, have "improved" the methods by which warfare could be made infinitely more ghastly affair than the Great War.

Indeed, according to chemists, electrical engineers, physicists and others, the business of war could not go on if the scientific talent of the world went on strike. This has led to a most interesting discussion recently in some of the major scientific journals. It goes something like this:—

The scientific world is perhaps more international than any other. They think alike and in many cases help one another out in many ways. (An excellent example of this was given by Dr. Speakman in his address here when he told of the help Germany had given the Ontario Research Foundation in their attempts to process Northern Ontario's lignite coal.) They work for the good of humanity and in general receive very little pay for it. We have come to depend on them to a greater extent than any one class of men have been relied upon in ages past. Even our wars could not go on without them. Why not a scientists' strike in the event of a war being declared? They claim that 100,000 of them, banded together, could prevent the slaughter of one nation by another by simply refusing to act.

The recent wars of the world—in the Chaco and in Manchuria—have not been such terrible things as they might quite easily be if all the means of killing now developed were used by the combatants, though in both those parts of the world, the loss of life has been tremendous.

There are new gases, one of which was found quite by accident in the United States, is said to possess a much nastier disposition than any used in the Great War. Colourless, it cannot be detected until a breath is taken and after that, even if pure air is taken the effects remain and the coughing becomes worse. One of its worst (or best from the standpoint of the attacker) actions is that it explodes violently when heated. Thus if the gas were laid down on a still day, by bomb, for instance, and then a shell dropped into the midst, it would do away with practically every living thing in the area.

Discovery of the latest "horror" came while the properties of one of the halogen elements, fluorine, were being investigated. Fluorine is a colourless gas itself, much like chlorine, and belonging to the same family of elements as chlorine, iodine and bromine, all of which have been very useful to mankind. When the new gas was discovered it came as a combination of cold nitric acid and fluorine gas, making another gas which on analysis, seems to be a sort of nitrate of fluorine.

The discoverer of the gas, Dr. George H. Cady hopes to put it to some better use than that of destruction and is at present investigating its possibilities in industry.

All Financial Advt's. Must Be Fyled Now

Brokers and Security Issuers Warned that This Does Not Mean Any O.K. by the Government.

A despatch from Toronto on Tuesday had the following:— All financial advertising and literature in Ontario must be submitted to the Securities Commission it was ordered Tuesday by J. M. Godfrey, K.C., the commissioner.

In instructions to that effect sent to all brokers and security issuers, Mr. Godfrey pointed out that registration of the advertising in the commission in no way implies that the commission has approved of it, nor will the commission censor the advertising in advance of publication.

Mr. Godfrey ordered that "immediately on publication of mailing of financial advertising or literature, whenever such advertising has for its object the sale of securities or the procuring of names of prospective clients, a copy must be forwarded to the commission."

"No intimation shall be given in such advertising that it has been sent to the commission. Notice is hereby given that brokers and security commissioners will be held strictly accountable, as in the past, for all statements contained in advertising material and receipt of advertising by the assistant registrar of the commission in no way implies that this commission has approved of it."

Financial advertising or literature is to include all circulars, bulletins, circular letters, circular telegrams, pamphlets, prospectuses, progress reports, newspapers published by or on behalf of brokers, house organs, or any other literature offering to the public investment advice, Mr. Godfrey stated. The commissioner emphasized that "the commission will not censor or in any way approve such advertising matter in advance of publication."

WHAT THE DOCTOR SAID WHEN HE WATCHED SALLY RAN

An editorial note in The Sudbury Star last week says:—Dr. Dafoe, who exclaimed "Gosh!" when the fifth Dionne quintuplet was born, again exclaimed "Gosh!" in New York the other night when he saw Sally Rand do her bubble dance. Those who have never witnessed a quintuple birth will entirely agree with him in the case of the gal Sal.

Your Grey Hair

can be restored to its NATURAL COLOUR without the use of a dye or tint

ANGELIQUE GREY HAIR RESTORER is made from roots and barks and restores the ORIGINAL COLOUR in the NATURAL WAY, at the same time giving the hair its natural, healthy lustre. Price \$1.00 per Bottle

SOLD UNDER A MONEY BACK GUARANTEE

To keep the hair and scalp clean, use ANGELIQUE SPECIAL SHAMPOO—Price 25c per bottle

Christmas Events to be Held at South Porcupine

Also Events at the Dome for Christmas, and at Golden City. Other News of South Porcupine and the District

South Porcupine, Ont., Dec. 16th, 1934. Special to The Advance. Christmas is the "Festival of the Child," and a good many pleasing events are to entertain us this next week, which will be given by and for children. We have received dainty invitations for a school "Broadcast" for Thursday afternoon at the public school, another for the public school children's concert in the high school at the same time; the United Church Sunday School Christmas tree in the evening of the same day, and the Dome Children's Christmas tree on Friday. It shall all be faithfully recorded, although just at present we don't quite know how it's to be done.

And in addition Golden City is going to have its usual Children's Christmas concert on Thursday evening!

The Dome community is busy working in the interests of Christmas and doing special things to make a brighter time for its less favoured citizens. A round and square old-time dance—"a carny dance"—is to be held on Saturday in the new hall, and we understand instead of the usual entrance fee, a large hamper at the door will take contributions from everybody for Christmas hampers. We hear of house parties given specially for providing Christmas gifts for poor families whose parents are none too well off, or who are sick; Scout and Guide Christmas parcels; one small girls' club which has completely dressed a doll for somebody else who wouldn't otherwise have one; the efforts of some citizens to gather together goodies and groceries to leave on Christmas Eve at the doors of needy neighbours. All of which is not unique to our town. It is being done everywhere. Christmas is coming, and the Spirit of Christmas is already here.

We are indeed sorry to hear that Mr. and Mrs. Martin Knutson have moved from the Buffalo-Ankerite Mine to Timmings. They will be much missed. Mr. H. Herschman, formerly of the McIntyre has taken over Mr. Knutson's position at the mine.

The firemen are preparing for the New Year's dance. Fuller details later, but if you are thinking of going anywhere else, just cancel the idea, and stay here to have one big family party with the firemen and their friends at the High School hall.

Mr. and Mrs. Lawrence Elliott left last week to take up residence in the States. Miss Bernice MacDonald is back to spend Christmas with her parents. Mrs. Woon entertained a skating party at her home at the Belvedere Apartments on Saturday.

Messrs W. H. Johns, Wm. Wattam, and J. Bell are leaving on Friday to spend the Christmas season in Montreal and incidentally to take in the hockey match between the Rangers and Maroons.

The South Porcupine Fire Dept. are preparing to round out their year's work with the annual New Year's Eve dance and it seems they have another duty to fulfil before the season is over! The old-timers of the community are asking the boys if they are going to give another old-timers' party. Well, the fire chief tells us they are considering the idea, and have also heard that the ladies of the early days of the camp think they should be considered too!

The fire department wishes us to thank the townspeople for their co-operation and practical assistance in fire prevention. So far a successful year is reported with but one fire running into heavy loss.

We reported a week or so ago a little symphony orchestra under the direction of Mr. Lindewall as doing excellent work here. This orchestra is composed of young people, and on Sunday night they were invited to play in Timmings at the Polish hall. We understand that they got a great reception and were recalled time and again to repeat selections. Those who were present were greatly surprised at the real quality of the youngsters' performance. Mr. Lindewall would like the public to hear the orchestra, and will gladly let them perform for any charitable purpose if requested. His only stipulation is that heated conveyances be sent for out of town affairs for the children. On looking over the programme presented in Timmings we are surprised at the real quality of the pieces attempted:—"The Wizard"—"Santa Lucia"—"Neapolitan Boat Song"—"Festival Overture"—"The Maypole Waltz"—and a march "Fall in Line," all fairly difficult music.

Born—in the South Porcupine hospital on Dec. 12th, 1934, to Mr. and Mrs. George Firie, a son.

Born—To Mr. and Mrs. G. Zardo on Dec. 5th, at South Porcupine—a daughter.

Born—To Mr. and Mrs. Gregor Johannes in the Presbyterian hospital—a son—on Dec. 12th, 1934.

Former J.P. in Toronto Has to Advertise the Ex.

The several Justices of the Peace in Timmings and district who have been dismissed by the Heppburn government in the political re-adjustment carried on in most departments have been troubled considerably in the last week by affidavits taken, or other similar work. The Timmings men feel the annoyance all the more because of the fact that they did the work before when they held the office of J.P. It is a fact that most of the Timmings J.P.'s never charged for any of their services and affidavits, etc., were signed free by the scores each year.

But probably they are not as badly off as Henry Massie, of Toronto. He was for years a Justice of the Peace in the Danforth district where he carried on business and witnessed signatures, swore out affidavits, and did other numerous duties for which he would take no remuneration. However, he was once president of Ward One Conservative Association, and so, despite any generosity he might have shown or help he may have been, he could scarcely hope to escape the Heppburn axe. After he had his J.P. commission taken away from him, the people still flocked to his office to secure his help as in the past. They simply can not or will not believe that he is no longer a J.P. The situation became so much of a trouble to him that Mr. Massie has placed a sign on his office door:—"Ex.-J.P."

COURT HELPS SANTA CLAUS FOR HAMILTON YOUNGSTERS

Adjournment of a case to Dec. 21 so that the complainant, George Rayner, could fulfil his promise to impersonate Santa Claus in schools on Monday was Magistrate McKay's contribution to the happiness of Hamilton children.

Mr. Rayner's auto was ditched by a hit-and-run driver on Clappison Hill Monday night. Provincial Traffic Officer Bond located an auto driven by William Gavin, Freelon, who was charged with reckless driving and failing to remain at the scene of an accident. Gavin's front left tire was cut to the casing and the left front hub-cap and left front fender were damaged.

Toronto Star:—It is an amazing thing that sometimes a motor car can be squeezed between two street cars and wrecked completely and the driver can emerge apparently with nothing wrong with him except a dinge in his hat.

Mr. Massie is a brother of J. K. Massie, of town, and has visited here on more than one occasion, making friends by his genial disposition.
