Satisfactory Report by the Buffalo-Ankerite

Annual Report Just Issued. Gross Profits for the Year Given at \$238,450.31. To Move Head Office to Property. Other Items of Interest.

The annual report of the Buffalo-Ankerite Gold Mines Limited, has just been sent out to shareholders. Accompanying the report is a notice of the annual meeting to be held in Buffalo, N.Y., on Feb. 21st.

The annual report covers the period ending Dec. 31st, 1934. It deals with the financial affairs of the company as well as the progress at the mine.

The earnings of the mine, gold bullion recovery, including premium, are given as \$707,118.72. Against this are costs of production, mining, milling, power, supervision, insurance, taxes, etc., etc., \$468,668.41.

The Earned Surplus Statement as at Dec. 31st, 1934, is as follows:— Balance at credit, Dec. 31st, 1934 \$89,727.97; add balance transferred from profit and loss statement before depreciation and development write-off, \$225,009.69; making a total of \$314,737.66.

Less development written off, \$65,641.35; depreciation, \$46,987.73; dividends paid, \$89,371.77; provision for income tax and contingencies, \$9,507.32; total, \$211,508.17.

Balance as per balance sheet, \$103,229.49. The second annual report for the year 1934 notes that during November, 1934, the company employed the services of Charles L. Hershman as consulting engineer and after the completion of his report retained him as mine manager, Martin Kuntson leaving the company's employ.

The actual average tonnage treated during the year per day was 345.6, the report says, and the tons treated per 24 hours running time were 363.8. The daily average during the year 1933 was 321 tons, the average daily during the month of November was 401 tons.

The report by Edward G. Kinkel, managing director, continues as follows:—"During the year 1934, Revere P. Kinkel acted as assistant to the managing director and was recently appointed assistant treasurer of the company. Mr. R. P. Kinkel spends practically his entire time at the property.

"In December, 1934, over \$2,000.00 in precipitates were stolen from the mill, which theft was covered by insurance and which loss has been paid.

"The winze was placed in operation in the early part of 1934 from the 600-foot level to the 1000-foot level but considerable difficulty has been encountered with unusual pressure of soft rock on the winze frame from the 875-foot level to the 1000-foot level and the management intends to abandon this part of the winze as a safety element. However, cross-cutting and drifting has already taken place on the 1000-foot level, enabling the company to utilize this level at a later date.

"A substantial body of ore encountered in the No. 7 vein, north area of the property, made it advisable to construct a haulage drift directly from this ore body to the vicinity of the winze station and two Mancha locomotives and additional two-ton mining cars were purchased and are now in operation. Although the ore in this area has not been definitely proven one mine manager has estimated that there is possible and probable ore from the surface to the 800-foot level in the No. 7 zone amounting to 369,000 tons with an assay value of \$8.80, giving a total value of \$3,247,200.00, valued at \$20.67 per ounce.

"Because of the difficulty encountered in the sinking of the winze and the opening up of the ore bodies in the north zone of the property no further effort was made during the year 1934 to sink the main shaft as the management desires a further study of the vein system before proceeding.

"The management has decided to defer a part of its development costs to the year 1935 as it is anticipated that the recoveries will materially increase during the year 1935, the recoveries during the month of December, 1934, having been the largest for any month during the year.

"The plant and equipment are in excellent condition as considerable money was expended for this purpose during the year.

"This company during the year 1934 sold 25,637 shares of its unissued stock at an average of \$2.66 per share and 1,200 shares were issued for services. Your company also holds a first mortgage of \$25,000 on all the assets of the Marbuan Gold Mines, Ltd., an adjoining mine with a complete 150-ton mill and auxiliary buildings, on which mortgage 7 per cent. interest is paid. There is also an open account with the Marbuan Gold Mines, Ltd., on which this company receives 6 per cent. interest. The mine manager and his staff are employed by both companies, thereby reducing the costs to each company, and much material is purchased jointly, further reducing costs to the individual companies.

Semi-Weekly Review of News in General

Items of Interest from Far and Near. Special Notes on Happenings of the Day

Howard Burbridge and Albert Prince were sentenced to seven years each in the penitentiary upon conviction of hijacking a motor truck loaded with cigarettes last October near Napanee and taking the crew of three to a cottage near Fergus where they were held. Payment of "sweatshop" wage scales and employment of child labor are to become criminal offences carrying heavy penalties, if Parliament adopts the recommendations of the Royal Commission on Price Spreads and Mass Buying.

The second session of Nova Scotia's 17th legislature since confederation will be opened on Tuesday, March 5th, Premier Angus L. Macdonald announced on Tuesday evening following a cabinet meeting.

Despatches from New Bedford, Mass., say that hope had all but vanished Tuesday night for three Cape Verde packets which cleared last November for a group of islands off the African coast and have since remained unreported. All are well overdue. Their fate is linked with that of 60 men, women and children who made up the crews and passenger lists of the three ancient schooners.

The trial of Harold W. Vermilyea, charged at Belleville, Ont., with the murder of his mother Mrs. Aurelia last October, started this week. Mr. Justice Nicol Jeffrey is the presiding judge. It is said that insanity may be brought forward as a defence in the case.

According to a despatch from Leicester, England, a new and powerful ray machine which is reported to kill "painlessly" at a distance of a few hundred yards has been built by R. C. Chadfield, inventor and lecturer at the art and technical college. Eventually the machine may also be used for the determination of the sex of an unborn child.

From St. Clairsville, Ohio, comes the story that a baffling disease partially diagnosed as "creeping paralysis" contributed to the death of John Dietrich, 15, the third and last son of Mr. and Mrs. George Dietrich to be claimed by

the malady influenza, aggravated by the disease which twisted his body grotesquely, caused his death five days after his brother, Glenn, 16, died of the paralysis.

Norman Rogers, one of the professors at Queen's University, Kingston, has been chosen by the Liberals of Kingston and Portsmouth as their candidate for the next Federal election.

A majority refunding operation for the present year which will involve approximately one-fourth of the railway debt of the Dominion is heralded in a Government motion placed on the House of Commons order paper to-day by Hon. Dr. R. J. Manion, minister of railways. The intention of the Government's part which the resolution reveals is to secure for that portion of the national railway debt which is due advantage of the current low rates of money as compared with that which ruled at the time at which these securities were issued.

Holland may be asked to be included in the European aerial defence league as the alternative against becoming another Belgium or being a no-man's-land under fighting aeroplanes in the next war, it was learned to-day.

J. R. Sproat Takes Over Temagami Navigation Co.

The Navigation Company established on Lake Temagami by Captain Fred Marsh, of Midland, and the late Oederic R. Perron, of Mattawa, and known as the Perron and Marsh Navigation Company, has been sold to J. R. Sproat of Temagami, who has been manager for the company in the past few years. It will be known under the new ownership as the Temagami Boat Company Limited.

NORTH SHORES MINES AIM AT GREATER EFFICIENCY

A. W. Jeckell has gone in to the North Shores Gold Mines property with a commission to reorganize the operation with a view to greater efficiency, according to a report from Schreiber.

Mr. Jeckell has had experience with Hollinger and Wright-Hargreaves, and has lately been associated with the T. H. Rea interests. The 75-ton mill is said to be operating at part capacity. The company is working narrow high-grade shoots on the adit plan.

Ask Local Committee Compensation Cases

(Continued from Page One)

department when they left the house so that the service was frozen, but it had been turned off immediately notification was given.

S. Tarabass requested that the snow plough open four miles of road south of Timmins and charge the work to him. It is not likely that this will be done.

In order to get a property out of the hands of a partnership, the present tenant of a house asked that the town allow him to remain in the house and do some renovating until the property was entered in a tax sale when he intended to buy it in. He is at present registered as part owner of the place.

"We should receive taxes if the property is there," said the mayor. The question will be talked over at a private meeting.

A letter from the Canadian Legion indicated that Conklin's Shows have been invited to come to Timmins under the auspices of the Legion in June. Mr. Bartleman asked that the town's decision be left over until the next meeting in order to meet Mr. Neame and request that gambling at the show be reduced or cut out entirely. There were a number of complaints received last year.

A strong letter was received from a number of taxi stand owners in the town requesting that the council refuse Brunette's Taxi the privilege of buying a taxi stand on Spruce street near the station. The council seemed willing to agree with this but Mr. Bartleman asked that it be held over.

A petition was received from the Finnish hall asking that wood be supplied for heating the hall, where single unemployed are allowed to sleep. It was claimed that expenses had been increased and that unless the town helped out they might have to refuse

men the privilege of sleeping there. The mayor felt that they should be helped since they were doing a good service to the community. The town has aided during the past two or three years.

P. J. Gibbons wrote applying for the privilege to sell soft drinks and ice cream at the tourist camp. The council referred it to the board of works.

Ask Money for Delegates

A letter signed by the Ukrainian Temple and the Finnish Association asked that the council provide funds to send two delegates to the gathering of unemployed at Ottawa on Feb. 18th when a "free unemployment insurance bill" will be presented to Prime Minister R. B. Bennett for consideration. In lieu of this they asked that the council allow them to collect money for the purpose by a tag day. Council refused both requests.

A speaker to the covering letter accused the relief officials of "discrimination" in the handing out of meal tickets to the single unemployed. Mayor Richardson assured the delegation that any real resident of the town would be looked after in the usual manner.

Suggests Compensation Committee

The question of establishing a committee to advise the Workmen's Compensation Board in Toronto of local cases was brought forward by Councilors Bartleman and Chateaufort, and was considered a most important one. The proposed committee would have representatives of employers, employees and municipal officers and would get detailed information on doubtful cases in connection with injured workmen or those dying from industrial diseases. Council was unanimous in the desire that it be established and letters will be written to government officials asking that it be done.

The police "black maria" will be laid up until the purchase of a new one is authorized at some future date. The upkeep is becoming too heavy, it was stated.

The price of \$11.50 a ton on a carload of western coal was accepted. This is

the third carload the town has used this winter.

It was decided to hold a closed meeting of the council at 7:30 Monday night. Neither the public nor the press will be admitted, as usual, despite the objection of Mr. Bartleman.

School Children Need Clothing

Some children in Timmins are being kept from school because they have insufficient clothing, according to A. G. Carson, superintendent of the Children's Aid Society. Some have so little clothing that they arrive at school with frozen hands or feet in cold weather. He stated that the society had done about all it could in the way of filling this need but that the supply of second hand clothing here is almost exhausted and they could not buy new clothing for all needy cases. Mayor in touch with Mr. Dunn about cases he considered to be in dire need of clothing.

The report of the Children's Aid Society was received by the council and the Mayor who had attended the annual meeting, stated that it was a very fair report and that the society was in much better condition financially than it had been for some time, following an appeal for funds last fall.

Clean Up Minor Details

Among minor details decided was that insurance be placed on the temporary police car pending delivery of the new one; the petition of owners on Elm street north for sewers was left to the board of works; town by-laws will be consulted to see if Wilson avenue is a through street in response to a demand from a citizen that the stop signs on streets crossing Wilson be observed; a few small rebates were allowed; and a number of relief complaints heard.

A single man, recently ill and still suffering from what is supposed to be a stomach tumor, may become a charge on the town. He had no other home than Timmins, though he has been away from here for some time, having been in Montreal for a year. Rouyn for some months at a later date, and just a month or so ago sentenced to a jail term here for selling liquor.

MAYOR JAS. SIMPSON TO VISIT NORTH BAY SATURDAY

Mayor Jas. Simpson of Toronto is to visit North Bay on Saturday and will speak at the Trinity Church Men's Club dinner on Saturday evening. He will also be given a civic luncheon by Mayor Bullbrook and the members of the North Bay council at noon. He will be given opportunity to enjoy a game of curling if he wishes. He will return to Toronto after the dinner Saturday evening.

"Diamond drilling has commenced on the property of Woman River Gold Mines, Limited, in Matachewan, according to the secretary, C. E. Bond.

It is the intention of the company to carry out a large programme consisting chiefly of short holes to test the numerous veins uncovered on surface and from which encouraging values were secured. The first hole, which is spotted to cut the free gold vein at a depth of about 50 feet, is expected to be completed this week.

WHY MOTOR LICENSES WERE PRESSED FOR COLLECTION

A despatch from Toronto says that Premier Heppburn on Monday revealed why the Department of Highways insisted that all motor car licenses be purchased by the end of January. There were two obligations to be met by the government Feb. 1, one a \$5,000,000 issue in treasury bills and the other a \$5,000,000 debenture issue.

The Department of Highways handed over to the treasury during January \$3,541,000 and since then the total was augmented by \$400,000. That was why he insisted markers be purchased by the end of the month, he added.

DIAMOND DRILLING STARTS AT THE WOMAN RIVER MINE

Diamond drilling has commenced on the property of Woman River Gold Mines, Limited, in Matachewan, according to the secretary, C. E. Bond. It is the intention of the company to carry out a large programme consisting chiefly of short holes to test the numerous veins uncovered on surface and from which encouraging values were secured. The first hole, which is spotted to cut the free gold vein at a depth of about 50 feet, is expected to be completed this week.

There was a Clock Without Face or Hands....

in a shop window. It appeared to be running, so the merchant was asked why he kept it there.

"It keeps perfect time," he replied.

"But how can you tell the time without hands or face?"

"I figured that out by the position of the wheels and springs," said the merchant.

"But other people can not figure out the time from such a clock!"

"If they take the time and trouble they can," was the response.

Of course, the people did not figure it out, but depended on other clocks that told them the time conveniently.

There was a merchant who did not believe in advertising.

"People can see my stocks and values, if they just take the time and trouble to visit my store," he said.

But, of course, people do not bother that way. Why should they waste time studying "wheels and springs" when they can conveniently select their needs from the announcements in The Advance, and save money, time and trouble.
