## The Canadian Legion in the Porcupine

By One Interested in their Welfare

### The Convention is Off

Since last Thursday events have moved rapidly in Legion circles. The agitation coming from Sudbury for a provincial convention has been called off, but not before Dr. Downe, president of the Sudbury branch, got an earful and also an eye-ful. It appears that he received a letter from Capt. Jules Ferry (and hence the earful) and this contained an invitation to visit the "Dis-missals Committee" in their stronghold at the Parliament Buildings, Toronto, (this being the eye-ful). What he witnessed evidently has given him a change of heart. In an article of some length in The Sudbury Star, Dr. Downe, raps all and sundry. In one paragraph he says: "Efforts of the Sudbury branch to secure a provincial convention of the Legion to discuss the matter, did not meet with the favour of other branches only a few expressing support of the motion." Later those not expressing support get their knuckles slapped by the statement:—"But in the meantime we must adopt the 'wait and see' attitude of the majority of the branches of our so-called fighting men's organization and trust that everything will be all right eventually." He gives Premier Hepburn some hard hits and Jules Ferry gets the final knockout by the statement:—"It is regrettable that so many branches are not conversant with the true facts, that the Provincial Command is allowing the Legion to become a political football." Having got all this off his chest, the despatch says:—"Acting on this invitation of Captain J. J. Ferry, I met the Dismissals Committee in Toronto and was thoroughly informed of their work and probable results from same. My impression of the committee was that they are conscientious and sincere in their efforts. They will review the history of each dismissed man and reasons for dismissal and will present the data obtained to the government with their recommendations." Then he becomes hoarse under the col-

lar and is quoted as saying:—"Some reinstatements will not be recommended. Others will be reinstated if the government chooses to accede to the requests of the Dismissals Committee. In all probability there will be as many reinstatements as the government thinks will keep the returned men quiet."

He does not deal in detail with the work on hand. There is no mention made that for nearly 3 weeks these men, of the Dismissals Committee have been working as long as 8 to 10 hours a day. That each case is being reviewed individually and recommendations made. No one can accuse the Provincial president of being slack in the matter. He alone, where others failed, got the investigation under way. It was Jules Ferry who put the returned soldiers case before Hepburn. After this he named his committee and some results have been announced. No fair-thinking Legionnaire will expect to see all these men back in their old jobs. All will wish that it could be so. They will realize that a new broom has to remove some of the cobwebs and soft political jobs, even if same were secured because of fighting ability, et al. One has only to study Canadian history 1918-1934 and check over the list and see what job your colonel or major received. The list does not feature many of the ordinary rank and file. At present the Timmins branch is featuring a checker tournament. It is interesting to watch the lone challenger. He takes note of every move of his opponent and then does a quick dart, places his man and on to the next one. This agitation can be classed as being strikingly similar. Our Sudbury friend says the "Dismissals Committee is a clever move." The answer or checkmate to this is:—"If we find we have been cornered and do not receive just treatment for those slated to be re-instated, then will come the call to arms, and the 'so-called fighting men's organization,' out to ask that justice be given."

### More About Medical Treatment

The following was inserted with every pension cheque received here this week. The notice clears up quite a few points regarding who is able to take advantage of Free Medical Treatment. It says:—"Pensioners are entitled to such free treatment as the Medical Officers considered necessary to help the disabilities which have been found to be related to military service. The department does not make decision as to service-relationship, that is to say, as to who is a pensioner—The Canadian Pension Commission decides that point and all inquiries on entitlement to pension or on amounts of pension received, or on any other pension matter, must be made direct to the District Pension Medical Examiner, who address for this district is given as "D" District, Christie Street Hospital, Ex-soldiers who are not pensioners are not entitled to medical treatment. Application for Treatment should invariably be made to the Chief Medical Officer at the nearest District Office who will give the pensioner advice about local arrangements. Pensioners should not move out of their home district or travel abroad without first communicating with their District Chief Medical Officer and before receiving adequate information and advice—otherwise conditions dangerous to the pensioner may arise which could not be covered by Departmental arrangements.

### Things Missing and Other Questions

1. A sketch party—"Oh, where, oh where did that car go?" Ask Louie he might be able to solve the puzzle.
  2. Has anyone seen the dominoes? They were supposed to be on hand, they were, but one set only, and even that had one missing. Ask Fred.
  3. Where are the bridge players? No comments on this one, but ask Bill.
  4. Who took the manuscript from our scenarios bag, while on a trip to Toronto recently? Has Martha got it or will it be produced near Kirkland Lake? Page the steward for this one.
  5. Who will win the big fight? Dingie says he's raring to go. Parsons says he's open to act as a second for anyone; Austin has not signified his intention of acting as referee. Again will Louie put up the other \$90?
  6. Will a sick comrade ever forget the bottle of Sisto tonic? and again will he ever get that money? Ask Harry.
- These and several others are well worth trying to answer, but if in doubt, see, yours truly.

### Confederation Life to Have Four Conventions in 1936

In celebration of the 65th year of its establishment, in 1871, the Confederation Life Association, head office, Toronto, one of Canada's oldest and largest life insurance companies with branch offices in many other countries, announces four field staff conventions in 1936—one for Eastern Canada, one for Western Canada, one for Great Britain, and one for Cuba, Mexico, Central America and the West Indies. The Eastern Canada convention will be held at St. Andrews-by-the-Sea, New Brunswick, and the Western Canada convention at Jasper Park Lodge, Alberta. The period of production qualification is the 1935 agency business year, and representatives may bring their views to conventions by doubling, this year, the minimum production required.

## Nature Builds Your Body— but you supply the materials.

Health suffers if you run short of iron.

Your food and drink are the only materials Nature gets to maintain bodily strength and well-being. But the tragedy of modern foods is their shortage of iron. Sooner or later this has an effect upon the health. It causes, at first, a run-down condition and simple anaemia; then develops into serious ailments, if not checked.

This was shown to be true in a group of forty-five people whose blood was examined by a competent authority. In forty cases the blood was thinner and paler than it should have been, due to the shortage of iron. The authority who conducted the tests recorded the exact amount of the shortage for each person, then put every one of them on a 30-day treatment. The preparation he gave them was Dr. Williams' Pink Pills (called pink because they have a pink sugar coating). In one month he examined their blood again and found that the red corpuscles and the iron had definitely increased in every case.

This test is a demonstration of what this fine old remedy can do for you, if . . . as is likely . . . you need iron.

Wouldn't you like to feel really strong and vigorous again? Wouldn't you like to eat well, sleep soundly, take a keen interest in life around you . . . ? Then put yourself on a 30-day treatment with Dr. Williams' Pink Pills. Directly you begin taking this reliable old preparation, the reconstructive process will start. The blood will grow richer . . . will carry more vitality . . . and your own feelings will react pleasantly. Old aches and pains will give way to new vigor and brighter outlook on life. You will know once again the joy of possessing that priceless treasure . . . health! Full size box 50c. 37H

### Wider Nationalization of Radio in the Dominion

In Monday's issue of The Advance a despatch from Ottawa was quoted in reference to the present proposal to spend a million dollars for radio, to improve the general service to the people of Canada. The despatch suggested that the government plans further nationalization of radio, rather than allowing it to fall into the hands of private monopoly. Some days ago The Toronto Star carried a despatch from Ottawa that emphasized certain features of the attitude of the Radio Commission and the government. For the interest of readers of The Advance this despatch is given herewith in full. The despatch in The Star says:—"Further implementation of the Aird committee's proposals for full nationalization of radio broadcasting in Canada has been recommended to the government by the Canadian Radio Commission. The Aird report has been implemented in-so-far as national control is concerned and to some extent operation of radio stations on a public ownership basis.

"The major feature of the report was recommendation of a chain of high-powered, commission-owned stations across Canada, at an initial cost of \$5,000,000, spread over five years. The commission now recommends that as conditions do not warrant the \$5,000,000 expenditure, a start be made by the establishment of new stations to complete the ration-wide covering, the estimate being \$1,000,000.

"This programme would mean new equipment and increased power for the commission's existing stations, and the erection of new stations at strategic points now insufficiently covered. In the maritimes, in some sections of Quebec, many sections of Ontario, large areas in Saskatchewan and some parts of Alberta and British Columbia, the commission's programmes cannot be brought into local sets.

### Plan Diamond Drill Work at the Arcadia

Report by Colin Thistlethwaite on Property Formerly Known as the Triplex Mine.

A diamond drilling programme for Arcadia Gold Mines, owning 17 claims in Shaw, Langmuir and Carman townships near Timmins, is recommended by Colin Thistlethwaite, consulting engineer, according to recent reports. It is recommended that three holes be drilled on the "Tommy Burns" vein and seven in a body of sulphide that is supposed to lie about 200 feet below the surface. One deep hole is also recommended. Mr. Thistlethwaite's report also states that a small pilot mill, capable of expansion, should be installed, although there is said to be a small mill at the property now. He gives it as his opinion that the sulphide body is the one that should be worked and not the small high-grade veins on which large amounts of money have been spent in the past.

The mine office is at South Porcupine and the executive office in Toronto. Until this time it has been financed chiefly from the United States, there being only one Canadian on the 1934 board of directors. Two shafts, one 60 feet and the other 100 feet in depth, have been sunk and some diamond drilling done last October. The property was formerly known as Triplex Gold Mines.

### PREMIER ANNOUNCES THAT DIONNES ARE CONTENTED

A full accord between Mr. and Mrs. Oliva Dionne, their attorney and the Ontario Government, with respect to the problem of the Dionne quintuplets was reached over the week-end, according to Premier Mitchell F. Hepburn, all parties now being satisfied.  
No details of the agreement were given by Premier Hepburn, but it is understood a bill will be framed for presentation to the Legislature which will implement the agreement. "Even the babies themselves are going to sign it," the premier said smilingly.
