Police Continue Fight Against Undesirables

Woman Committed to Jail as Vagrant. Other Woman Case Remanded. Costly Street Trouble. Other Police Court Cases.

Timmins police are continuing their battle to rid the town of undesirable women, especially those believed to be suffering from social diseases and so a special menace to the community. During the past few months the chief and his staff have prosecuted a large number of cases, some under disorderly house charges and others under this vagrancy law. The result has been a number of jail terms, thus ridding the community of numbers of these undesirable, while others have not waited for prosecution but have left town of their own accord. When it is fully realized that the police are in earnest and intend to clean the town of this class of undesirables there will be little trouble in protecting the general public in this way.

A jail sentence of not less than three months or more than two years less one day was the judgment given by Magistrate Atkinson in the case of Gladys Miller, charged with vagrancy in Tuesday's police court. The young woman had been picked up by a constable at 445 a.m. on March 9th in the laneway off Spruce street near Third avenue. She could give no satisfactory account of herself; how she earned her living; or where she lived.

After being freed on bail she was found at a Floral Park address of which the police did not speak very highly.

Two cases of vagrancy held over from last week were withdrawn as one of the men had found work and the other had disappeared.

Sophia Korhan appeared in court after delays extending over a period of several weeks. She was found guilty of having liquor not obtained on a permit and was ordered to pay a fine of \$100 and costs. Police testified that on the night of Feb. 13th they had entered her premises on Fifth avenue and had found two men in the kitchen, one of whom had before him a glass containing alcohol and water. On searching the place they found a bottle containing a small amount of clear "alky." Mrs. Korhan maintained that the alcohol was for rubbing, but had no proof of purchase from the government vendor. She did not explain for what reason the alcohol was mixed with water in a drinking glass.

Three Expensive Bottles Three bottles of beer in a paper bag being carried along the street at an early hour of the morning by Erik Elu, caused a \$25 fine for the owner. He was originally charged with having liquor in a place other than his private residence but as that offence entails a \$100 minimum fine, the charge was reduced to one having to do with beer.

The complainant, M. Zudel in a charge of reckless driving laid by him against Athanas Blanchard, was ordered by the court to pay the costs. It was shown in evidence that Zudel had considered withdrawing the charge if the damage to his car was paid. It was estimated that two dollars would have covered the repairs to the vehicle. No reckless driving was shown, as Blanchard had stopped his car before attempting to pass the other, parked on a Delora township road. Blanchard's car had slipped in the rut against Zudel's.

Had Words on the Street Two young men who had been at a dance at a Fourth avenue hall were arraigned before the magistrate charged with creating a disturbance on the public street. According to their own testimony they had bumped into one another in a "tag" dance and had gone outside to "talk it over in a gentlemanly manner." Unfortunately a crowd had followed them and were blocking the sidewalk. A police constable claimed he had seen blows struck, but both those charged maintained that no fight had occurred. They were assessed three dollars and costs, a total of \$10 each.

Two first offence drunks paid \$10 and costs each. The charge against Arthur Counsel of unlawfully obtaining one dollar by falsely pretending to have an account at a local bank, was dismissed. It had been wrongly laid, according to the magistrate, and Counsel was advised to get the debt paid before the complainant re-laid the charge.

Two Wage Disputes Heard Two wage cases were begun but neither of them were finished for lack of evidence. They will be completed next week provided no settlement is made in the meantime. In the first case a baker who had been brought up here from Toronto claimed his former employer owed him \$50. He was to have been paid \$20 a week and said that he had only been paid for six and one-half weeks. The employee stated that he had given a week's notice, but the employer denied this, as he denied that he was behind with the man's wages.

In the second case a young married man claimed his former employer owed him \$18.33. The employer in giving evidence stated that she had guaranteed his grocery bill when he first came to town and she was willing to pay him \$4.50. The young man denied that she had given any such guarantee and thought he should be paid the whole total of the money owed him. They will be given a week in which to settle before the magistrate gives his decision. R.C.M.P. officers have laid a charge

under the Excise Act against Lewis Rinquette. It is claimed by the police that he was in possession two and a half gallons of mash suitable for manufacturing spirits.

A second woman charged with vagrancy was remanded for a week. Her \$50 bail was renewed by a local taxi driver.

R. J. Thomas will face two charges in next week's police court. He is charged by Albert Desormeau of 4 Floral Park with wounding him, and by the provincial police with being in possession of offensive weapons other than firearms.

Dr. Blaylock is the third recipient of the platinum medal which was established in 1933 as part of the fiftieth anniversary celebration of the Canadian nickel industry. The medal is a 3-inch disc of pure Canadian platinum which carries an allegorical design by R. Tait McKenzie, distinguished Canadian sculptor. The first medal was struck at the Royal Canadian Mint, Ottawa, by Hon. Wesley A. Gordon, Minister of Mines. James J. Denny, mill superintendent of McIntyre Porcupine Mines, Limited, and Robert Early Phelan, general manager of Hudson Bay Mining & Smelting Company, Ltd., were the first two recipients.

Dr. Blaylock's work first received recognition in 1924 when he was awarded the McCharles Prize of the University of Toronto. Four years later he received the James Douglas Medal of the American Institute of Mining and Metallurgical Engineers. In 1929 McGill University conferred on him an honorary LL.D., and the following year the University of Alberta accorded him a similar honour.

Dr. Blaylock was selected for this honour by an awards committee composed of the past five presidents of the Institute. Born in Paspébiac, Gaspé Peninsula, P.Q., on February 18, 1879, he was educated at Bishop's College school in Lennoxville and at McGill University from which he was graduated as a Bachelor of Science in 1899.

The same year he started as junior chemist and assayer in the Canadian Smelting Works at Trail, B.C., becoming chief chemist in 1901 and metallurgist and purchasing agent in 1905. Consolidated Mining & Smelting Company of Canada, Ltd., was incorporated in 1906, and in 1907 he was appointed general superintendent of the Hall Mines smelter at Nelson, B.C. In 1908 he moved to the same position in the St. Eugene mine in Moyle, and a year later also took over the superintendency of the Sullivan mine.

In 1911 Dr. Blaylock returned to Trail as assistant manager, becoming gen-

Compare Kiwanis Work to Harnessing of River

Helpful Address Given at Timmins Kiwanis Club Luncheon on Monday. Concrete Examples Given of the Work of the Club. Next Meeting a St. Patrick's One.

Kiwanis work was compared to the harnessing of a powerful river in an address by James P. Lynch at the Monday meeting of the Timmins club. The effort of men who want to help to correct bad conditions in a community may be largely wasted without union, he claimed, and Kiwanis provides that bond through which a large number of men, each doing a little, can accomplish a multitude of good things.

A concrete example of the work of the local Kiwanis club was before the meeting and it was unanimously agreed that help would be given. Undernourishment was given as the cause of a girl's ill-health. The condition had reached such a stage that she had fainted in school not long ago. The father of the family is unable to work and the town relief funds do not provide milk for any other than the infants of those who are receiving aid. It is thought that milk will gradually bring the girl back to normal health.

It was work of this sort that Mr. Lynch stressed as being among the more important services rendered by Kiwanis clubs all over the continent. In every community there are men who want to help their town in some manner, he said, and without some organization

through which to work, little can be accomplished in an orderly fashion. To illustrate his point, Mr. Lynch told of a river in the United States that flows in many streams down from the mountains. It becomes a mighty river, but before it is able to do any good to the land, it wastes away in the sands. Through damming and careful control of the flood waters, the river is now irrigating a large area. So it is with Kiwanis the speaker explained, as carefully controlled expenditures by interested persons can accomplish great permanent good in a community.

Mr. Lynch is a past president of the Saulx Ste. Marie Kiwanis club and has been identified with the movement for many years.

The club learned with regret of the death of Mrs. Sam Bucovetsky, one of the town's earlier residents, and wife of Kiwanian S. Bucovetsky.

Kiwanian P. Moisley was welcomed back to the luncheon after a period of illness from which he has almost completely recovered.

The next meeting of the Kiwanis club will probably be in the evening and will take the form of a St. Patrick's Day celebration.

Timmins Men Bereaved By Death of Their Father

A despatch from Sturgeon Falls says that after an illness of 12 days the death occurred at the home of his son, Alphege Coupal, on Sunday, March 3, of Six Coupal. Born in St. Jacques Mineur, Que., 73 years ago, the late Mr. Coupal had resided in Sturgeon Falls 27 years and was engaged in farming up to two years ago. Since that time he had lived with his son, Alphege. His wife predeceased him 15 years ago. Surviving are four sons, Alphege, Sturgeon Falls; Paul and Gideon, Timmins; and Rock, of Kapuskasing; a brother, Joseph, of Ottawa, and four half-brothers, Louis, Emery, Alphege and Henry, of Ottawa; and two half-sisters, Mrs. Patrick, of St. Catharines, and Mrs. Kernel Vernon. The funeral was held from the Sacred Heart Church Wednesday morning, March 6th. Rev. Father Smith officiating. Pall-bearers were George Vin, Joseph Fournier, J. Clouthier, Larocque Lefeshe, Frank Bray, Alex St. Denis.

The Semi-Weekly Smile

"Johnnie," inquired his aunt, "did you enjoy the book I sent you for Christmas?"

"I don't know yet," said Johnnie; "I haven't looked at it."

"Why not?"

"Cause mother said I'd have to wash my hands first."

Important New Industry Mooted for Kapuskasing

Paper on "Mattagami River Refractory Clays" Describes to Mining Institute at Winnipeg the Work Done by the Company.

For some time past it has been known that there are extensive deposits of fire-clay and silica sand, suitable for making a wide variety of refractory products, in Northern Ontario, north of Cochrane and Kapuskasing. Wednesday it was announced to the Canadian Institute of Mining and Metallurgy at their annual convention in Winnipeg that these are to be exploited on a substantial scale. A. E. Hilder, managing director of General Refractory Products Ltd., Toronto, presented a paper entitled "Mattagami Refractory Clays," in which he described the work already done by his company on the deposits and outlined the further course of development it is proposed to pursue.

The deposits of clay and silica it is proposed to use are reached from Kapuskasing over the spur line of railway 57 miles long, that runs north to Sandy Falls on the Mattagami. On the west

bank of the river, 7 miles beyond the end of steel, drilling has disclosed in the space of six acres 325,000 tons of fire-clays, 200,000 tons of silica sand and 50,000 tons of kaolin. Plant-scale tests of these materials have demonstrated that they have an unusually fine refractory quality, and that by admixing them judiciously a wide range of refractory materials can be made.

Minerfilders Limited, of Toronto, has financed the development up to the present. Mr. Hilder, states that, the quality and amount of the raw materials having now been proved adequate, a manufacturing plant will be constructed at Kapuskasing. Refractory brick of various kinds, high-temperature cements, face-brick, building tiles, china clay and silica sand are to be produced from the plant, serving principally the growing markets in the mining districts of Northern Ontario and Quebec. It is intended also to ship fire-brick to the older industrial sections of both provinces, to compete with imported fire-brick.

Mr. Hilder states that, with the projected plant running at its full capacity of 30,000 tons a year, it will not only provide a substantial amount of local employment but will give an important revenue to the railways.

Official Dates Set for the King's Jubilee Events

Here is something worthy of consultation, especially by those who are planning a visit to the Old Country this year, and who may wish to see as much of Jubilee proceedings as they can cram into their holidays.

The official programme of the Royal Jubilee celebrations, the main events of which will cover a period extending from May 6 to July 25, has been issued. The full list of Jubilee festivities follows:

Monday, May 6—The King and Queen, with the Royal family, attend a Thanksgiving service at St. Paul's Cathedral in the morning. In the evening the King will broadcast to the Empire. Chain of bonfires throughout the country. Illuminations and floodlighting.

Wednesday, May 8—The King receives Empire delegates at St. James' Palace.

Thursday, May 9—The King and Queen drive to Westminster Hall to receive addresses from Parliament. Attend a State dinner at Buckingham Palace.

Saturday, May 11—The Prince of Wales represents the King at a ceremony at Cardiff. The Duke of York and the Duke of Gloucester at Edinburgh and Belfast.

Sunday, May 12—Thanksgiving services in churches. Tuesday, May 1—Ball at Buckingham Palace. Monday, May 20—State dinner at Buckingham Palace. Wednesday, May 22—The King and Queen at a reception and ball at Guildhall. Thursday, June 13—Ball at Buckingham Palace. Saturday, July 6—The King reviews the Royal Air Force at Mildenhall and Duxford. Saturday, July 13—The King holds a review at Aldershot. Tuesday, July 16—The King reviews the fleet at Spithead. Saturday, July 20—The King inspects the police in Hyde Park. Thursday, July 25—Garden party at Buckingham Palace.
