Ten Thousand Maps to Bear Picture of Quintuplets

North Bay Board of Trade is issuing 10,000 maps of North Bay and district in the hopes of attracting further summer tourist trade. The maps, it is noted, will "prominently display a picture of the Dionne quintuplets." There is no doubt but that the fame of the Dionne quintuplets will attract tourists of a kind to the North Bay district, but with the five famous babies wards of the province of Ontario it seems questionable whether it is either wise or dignified to use the helpless youngsters simply as a cheap means of publicity.

To Establish Farming Empire in Alaska Now

Two Hundred Families from the Mid-West of the United States have Started Migration with a View to Establishing Themselves in North.

By JOHN D. GREENE

Central Press Canadian Writer
St. Paul, Minn., April 25.—Convinced by Uncle Sam's agents that fertile lands lie between Alaska's glaciers, 200 farming men from families from Michigan, Wisconsin and Minnesota are going up there to establish a new agricultural empire in the belt of the midnight sun. This city, built by the industry of their immigrant ancestors, will see the start of the drama-packed exodus, Friday, April 26, when 67 farmers, with their wives and children and portable household belongings, will entrain for San Francisco to board the ship which will carry them to Alaska.

The remaining 133 families will desert their drouth and erosion-impoverished grain belt lands within the fortnight and sail from Seattle May 15. Into Strange Land
This migration, in the burdens of labour and hardship it will impose on the colonists, is seen by many as the 1935 equivalent of the migration of the Pilgrim Fathers from England to Massachusetts in 1620. Yet, although none of the families selected for the trek knows anything regarding life in the great north territory from which few of them will return, all eagerly have accepted the chance it offers for an escape from poverty.

In language they understand, Don L. Irwin, director of the government agricultural experiment station at Matanuska, Alaska, has told the farmers concerning the fertility of the soil; how a glacier in some early age moved down between the Chugach and Talkeetna ranges, leaving the valley of the Matanuska coated with rich loam, 10 feet deep; how in the 120-day growing season potatoes, grain, berries and green vegetables thrive to an extent unknown in the United States.

To these inducements the government added an offer to lend each family up to \$3,000, help it build comfort-

able four and five-room log homes, and wait 30 years before settling accounts—five full years, in fact, before asking payment of the 3 per cent. interest.

Forty Acres Apiece

At Palmer, in the heart of the Matanuska valley, the government has laid out 200 lots of 40 acres each. Before soil

the first contingent of settlers arrives, these plots will be numbered and spacious tents will be erected on them.

As the colonists step from the train at Palmer they will draw numbers from a hat. As each draws a number, he and his family will be instructed how to reach the designated timber tract out of which the future livelihood of that family must be carved by axe and plow.

Four hundred men from northwest transient relief camps will be brought to Alaska with the first contingent of settlers to help clear the land. With the menfolk among the colonists these woodsmen will make the forests ring with their axe blades and operate tractor-driven plows to turn the virgin

Some of them will begin immediately to build log houses for the settlers.

October Time Limit

The houses must be built by October. So must a schoolhouse, which will also be the community's social centre in the long winter months when the sun shines only 200 minutes a day.

So must a cannery, a garage and a workshop be erected in the wilderness before October 15, when the 400 transient camp workmen will sail back to the States, leaving the colonists to face alone the hardships of their first winter under the aurora borealis.

Through the winter the colonists will be able to do little except attend their cows, one of which will be assigned to each family. In the spring, however, they will be expected to produce nearly a million dollars worth of farm products. This is important.

Large Sum for Trade

Merchants in Seward, Anchorage, Matanuska and Fairbanks annually buy a million dollars worth of food-stuffs from the United States and Canada. When the present colonization project was conceived last year, those merchants declared their readiness to purchase produce of the Matanuska valley if they could be sure of receiving enough for their retail needs.

Not to be discounted are declarations from military observers who declare that colonization will help build Alaskan defences in any invasion of U.S. from the east.

A. R. Fisher Likely to be Supervisor Boys' Sports

Kiwanis Club Committee Chooses Assistant Principal of Mattagami School. Impressive Address by Mr. Fisher on Sports for Boys. Patriotic Meeting of Club on Monday Next.

Albert R. Fisher, assistant principal of Mattagami Public School, is the man who has been chosen by the Boys' Work Committee of the Kiwanis Club to look after boys' sport in Timmins during the summer holiday. Mr. Fisher's appointment has not yet been officially announced, but at Monday's Kiwanis Club meeting it was made clear that he is the choice of the committee.

The idea behind the organization of sport during the vacation months is to keep the younger people occupied with healthful activities, where they may learn to love clean sport and to use their time to better advantage.

Mr. Fisher spoke to the Kiwanis Club at the Monday luncheon and brought out many points in favour of the club's action. In his work at the local school, he has had an opportunity to observe the effect of sport on the school lives of the children under his direction. He mentioned one case in particular of a lad who had no interest whatever in the various sports at the school. Recently he became active in one—now he is an enthusiastic young athlete, building a strong body and developing a keen sense of fair play.

Good Effect on Later Life

The effect on the after-school life of a child was stressed in the talk. A boy learns to be active, alert and to have a certain amount of confidence

in his own ability. A team of stars is good, said Mr. Fisher, but a good team without stars is better. The manner in which team work was impressed on young minds through sport has a wonderful effect on their attitude in later life, he believes. The boy who learns to work with others and to co-operate in the reaching of a definite goal has a much better chance of succeeding in the world himself and making it a better place for his fellow citizens.

The physical development itself is also an important point, the speaker told the club. Boys who are engaged in properly organized sport, supervised so that they are not under undue strain, build clean, wholesome bodies, fit for the world's work.

Will Ask Town's Aid

The Kiwanis Club will approach the town council for aid in their venture, as they feel it will be of community-wide benefit and should properly be supported at least in part by all the people of the town.

The guest of honour at next week's Kiwanis luncheon is to be Jos. A. Braddette, M.P. As the date is coincident with the King's Jubilee holiday, the occasion will be marked by a patriotic theme.

This Monday's meeting was well attended and it is expected that on May 6th every member of the club will attend who possibly can.

Mystery of Kit and Clothes near Track

Outfit Falling off Train near Iroquois Falls the Cause of Some Alarm Last Week

There was some alarm last week in the Iroquois Falls district when children found near the track of the Abitibi railway line a kit of clothing, tools, etc., along with some letters. It was feared that the owner of the equipment had fallen a victim to some accident or other evil; or that he may have fallen off the railway line and been injured or killed. Reports were more or less current as to what happened to the owner of the clothing and tools. Chief Neil Curley, of Iroquois Falls took up the matter, and very soon had the case settled. It developed that the owner of the clothing, etc., was alive and well in Cochrane, and that there was no harm done of any kind except that the man was without the clothes and tools in the kit and that trouble was soon remedied. It appears that the kit fell off the A. T. & N. Railway. The man was travelling on a logging train and the goods had in some way or another fallen or been dropped from the train while in motion.

Thanksgiving Song for King's Jubilee

Sonnet by Poet Laureate, Set to Music, to be Sung During the Silver Jubilee.

A despatch from London, England, says that John Masefield, poet laureate, has penned a sonnet, a Song of Thanksgiving for the King's Silver Jubilee, which appeared in print for the first time on Saturday.

It follows:—
"Scattered beneath the mansions of the sun
In distant continents, in every sea,
The many nations are that make us one
King, law and language, give us unity;
Our many peoples seldom speak together,
And yet, in stormy days we link and stand
In common purpose facing to the weather,
Swayed by one will and striving as one hand,
Being for freedom and for peace, our way
Is worth man's caring; we may still behold
The world's to-morrow spring from our to-day
With happier morning brighter than the old;
In hope of such a morrow's dawn we sing
God prosper, bless and save our gracious King."

His verse was put to music by Sir Walford Davies, Master of the King's Music, whose office is parallel to that of Mr. Masefield in many ways.

"I expect it will be heard in public for the first time in the Jubilee parade on May 6th at Aldershot," said Mr. Masefield. "On the same evening I shall recite the words over the wireless from London."

Britain will hear the sonnet often during the Jubilee ceremonies and it will be sung in June at the Silver Jubilee Tattoo at Aldershot, by 500 men of the First Battalion of the Welsh Guards.

Error in Report of Men's Club Meeting, Schumacher

In the report last week in The Advance in reference to the final meeting for the season of the Men's Club of Schumacher there was an unfortunate typographical error that placed the credit for a very clever reply to the toast to "The Ladies" on the wrong shoulders. The report gave "Mr. Murray Tait" as making the response. It should have been "Mrs. Murray Tait." Mrs. Tait's impromptu response to the toast was one of the most interesting and pleasing features of an evening that was most enjoyable and much appreciated throughout.

Aquatic Club Meet To-Night in Annual

New Members will be Welcomed at Organization Meeting in Doherty Roadhouse Co.'s Office.

Anyone interested in aquatic events of any kind is invited to attend a meeting of the Mattagami Aquatic and Motorboating Association being held to-night (Thursday) at eight o'clock in the office of Doherty-Roadhouse, Pine street.

Officers will be elected and it is likely that some discussion will be held as to what the activities of the club will be for the season. The club members are interested in most water events that can be held in or on the Mattagami. Frank Roscoe is the president of the club and G. Richardson is vice-president.

New members are welcomed, officials told The Advance this week.

Steady Decline in Cost of Explosives for Mining

Huge quantities of dynamite and other commercial explosives are used each year in Canada's mining country, both on old and new properties, and it is interesting to note that in the last ten years the cost of these necessities has undergone a steady downward revision.

The cost of high explosives in Canada in 1935 is less than at any time in the last 20 years, a recent survey reveals, and more than 20 per cent. lower than the price levels of 1925.

Last year the metal mine operators of Canada alone spent \$1,100,000 less on the same quantities of explosives than if they had purchased them in 1925, thus leaving this sum available for other processes of mining development.

SOCCER IN NICKEL BELT TO COMMENCE ON MAY 11TH

According to despatches from Sudbury, the opening of the 1935 season of the Sudbury and District Football Association is scheduled to take place Saturday May 11, when Froot Mines will take on the Creighton eleven and Falconbridge will face the "Dark Horse" Donovans.

The announcement that the Nickel Belt Club had thrown in their lot with the National Soccer League was confirmed and Secretary Tom Bell of the S.D.F.A. proceeded with the distribu-

tion of constitutions and playing forms of the National Loop. Affiliation with the Ontario Football Association also continues for this year and preparations were made for the entry of a local team in the Eastern Canadian semi-finals for the Canadian championship as represented in the Dominion F. A. Cup for which Froot Mine made such a brave bid last July at Toronto, losing out through injuries to Montreal Verdun who eventually captured the Dominion honours at Winnipeg.

Toronto Mail and Empire:—It is announced that 80 per cent. of Great Britain's prosperity has returned. The way things are to-day, that is battling 350 in the World's Series.

The Bicycle with the STRAIGHT LINE DRIVE

THE TWO WHEELS TRACK LIKE ONE

RUNS FASTER STEERS EASIER BALANCES PERFECTLY

ONE of the big reasons why you should choose a C.C.M. is because of its Straight Line Drive.

To produce the C.C.M. Straight Line Drive, all of the parts of the bicycle must be made with watch-like precision. Then they must be put together so accurately that, when the final "truing up" of the bicycle occurs, the front and rear wheels, and front and rear sprockets line up truly.

It is not uncommon to find ordinary bicycles with a difference of from one-half to three inches in the tracking of front and rear wheels. You can realize just how far short such bicycles fall from having a Straight Line Drive.

With a bicycle that doesn't track perfectly, that runs a little "off center",

that "creeps" slightly to left or right, undue friction is set up that is a waste of the power put into the pedalling, as well as shortening the life of the tires.

With C.C.M.'s precision-built Straight Line Drive all the pressure you put on the pedals goes to drive your bicycle straight ahead. And, besides making your C.C.M. run easier, the Straight Line Drive also makes your C.C.M. easier to steer and easier to balance.

All C.C.M. models have frames of seamless steel tubing; Endrick or enamelled steel rims; rustless steel spokes; bright parts Chromium plated over C.C.M.'s 20-year Nickel, insuring a brilliance that lasts; powerful C.C.M. Hercules coaster brake; Dunlop Fort or Dunlop Imperial Tires.

WHEN BUYING A BICYCLE BE SURE IT HAS THE C.C.M. TRADE MARK

The True Value BICYCLE
