SMALL MAN'S BIG IDEA

Egeo. Green

(Quebec Chronicle-Telegraph)

when I came up to Cobalt I go out a man named Anson Hubert Smith,

It seems that many years ago, Smith saw the tremendous possibilities of harnessing the waters of the Colorado River. He began to agitate for it. He talked of it in season and out. He found his idea taking hold of other men's minds and at last, before he died he saw it take actual shape in the form of vast hydro-electric works.

Not a bad life's achievement for the editor of a remote, isolated and popularly unheard-of small-town paper!

Fort Erie Times-Review: A Paris newspaper surprised the world on Monday with the news that "Lawrence of Arabia" is in Africa acting as military adviser to the Emperor of Etheopia A few weeks ago Lawrence died as the result of a cycling accident in England Extraordinary, but by no means unique It is more to be marvelled at, for instance, than the two birthplaces Kentucky has marked as the birthplace General Sheridan's horse, there is evidence to show that the famous charger In view of the confusing haze which 113 on the T. & N.
