

# Appetizing Lunches on the Motor Trip Prized

### Wayside Eating Places with the Most Attractive Exterior, However Do not Always Serve the Best Meals. Some More Recipes.

(By Edith M. Barber)

What a pleasant surprise it is to find a well served, appetizing meal when you stop for lunch in the country! When it comes near to meal time you cast searching glances on both sides of the road, hoping that you will find an attractive place. Of course, long experience has taught you that looks are not everything and that sometimes you will find better food at the plainest place than at Ye Olde Colonial Tea Shoppe.

I had the pleasant experience, however, of finding two eating places that combined attractive and interesting surroundings with good food. We lunched on the terrace out-of-doors beside a tiny garden with a little pool and enjoyed the black bean soup (it was a cold day), the well-broiled chops and nicely cooked vegetables and ended the meal with as good a shortcake as I have ever had.

At another charming place we dined well with the smothered chicken, vegetables and salad. The unusual point was that they were cooked well and the rhubarb pie was something to dream about. On Thursday nights a hunt supper, with cold turkey and ham, baked beans or macaroni and cheese, salad and home-made desserts are featured.

After a day like this in the country I felt quite encouraged about the chances of improvement there are in American eating places.

#### Smothered Chicken

- 1 four-pound chicken
- 1/2 cup butter
- 1 tablespoon chopped onion
- 1 tablespoon chopped carrot
- 1 tablespoon chopped turnip
- 1/2 cup flour
- 2 1/2 cups boiling water
- 1 teaspoon salt
- Black pepper
- Cayenne
- 8 mushrooms
- 1/2 cup cream

Dress, clean and cut up a chicken. Dredge with salt, pepper and flour, and fry in salt pork or bacon-fat. Arrange in a casserole and cover with a sauce made from the other ingredients in the following way:

Cook the chopped vegetables in the butter about five minutes. Add the flour and seasoning and cook until well browned. Add the water, cook until smooth, and pour over the chicken. Bake in a moderate oven until the chicken is tender, add the mushrooms which have been sliced and fried in a little butter, and the cream. Heat and serve in the casserole.

#### Baked Beans

- 1 quart small soup beans
  - 3/4 pound salt pork
  - Boiling water
  - 1 1/2 teaspoons salt
  - 1 teaspoon mustard
  - 1/2 cup molasses
- Soak the beans in cold water overnight. Drain, cover with fresh water, and simmer until soft. Drain and place in an earthen beanpot. Bury the meat in the beans. Mix salt, mustard and molasses and add one-fourth cupful of boiling water. Pour over the beans and add enough boiling water to cover. Cover and bake in a slow oven (250 degrees F.) eight hours.

### Bad Roads to Blame for Many Motor Accidents

The following is an editorial from The Northern News, of Kirkland Lake, last week:

"There are more accidents on the Ferguson Highway than ever before, and you don't have to blame the motorists."

Such was the comment this week of an observer who is in official and personal position to know whereof he speaks.

He elaborated his expression of opinion by saying that owing to the heavy and bumpy condition of the road, motorists had often to travel faster than was safe to keep out of second gear.

That does not, of course, offer an alibi for reckless drivers, but it does stress the oft-repeated assertion that the road is not safe for a large volume of traffic, particularly near Kirkland Lake.

Incidentally, the mentor aforesaid mentioned that he has often travelled on highways around here at reasonable speed to be hit on the back of his neck by rocks flying through the open windows of his car. You have only to check up on cracked windshields to corroborate this idea of a road as an automatic bombing machine.

Canada Lumberman:—An honest man is one who pays, if it takes a lifetime. The other kind takes a lifetime anyway.

### Jas. Robbins Family North in the Arctic

#### Looking After Gold Claims in Alaska Area. Young Wife and Two Children in Party.

Friends of the family in Timmins and district will be specially interested in the following article, which also has an interest of its own. James Robbins is a son of P. A. Robbins, for several years general manager of the Hollinger Mines. The article is from a Chicago newspaper dated July 20th and reads as follows:

#### May Not Yet Have House, But at Least They Are Cool

(By Penelope)

Young Mr. and Mrs. James Robbins, whose address ranges all over the country, are in as cool a spot as anyone could wish at this moment. Mr. Robbins' parents, Mr. and Mrs. Percy Robbins of Highland Park, wish they knew more about their house. They know its location—ten miles south of the Arctic circle, somewhere near a little government station called Candie, in Alaska.

Any further information they have to get by guessing. Last year Mr. Robbins and his young brother, Peter Robbins, spent three months up there getting a gold mine opened on one of the family claims. This year they returned to supervise its working.

With them went pretty Mrs. James Robbins and her two children, one of whom is 3 years old and one who will be 2 in August. Additional luggage, shipped on ahead, included two prefabricated houses, which the two engineers intended to get set up and ready for occupancy by the time the remainder of the colony arrived.

Since there is no transportation except by sled or plane, and no communication save by word of mouth or cable, the senior Robbins has no idea whether the houses are up or whether there are still only tents. Mr. Robbins intends to go up and see for himself next month, but in the meantime they can only wait at home in the midst of electric fans and iced lemonade and wonder.

#### First Boat Gets Through

The first boat got through to the nearest harbor a few weeks ago, bearing supplies. The ice is practically gone now and the snow and blizzards have turned to slush and rain.

There are no trees and no vegetation at that particular spot except tundra moss, which spreads in lush blankets over the gravelly wastes. There is daylight practically all the time, with mist and clouds the only interruption to the sun's penetrating rays.

Great activity surrounds the mines, which are being operated by the use of dredges, assembled there with considerable difficulty. The two brothers, who have prospected there before, are sure of the presence of gold. All they have to do is get it.

#### No Stranger to Adventure

Mrs. Robbins, like the others of the family, is no stranger to adventure. She and her husband spent the first year of their marriage in a camp in Northern Canada. Then they trekked from place to place on his mining explorations, spending some time later with their two babies in Grass Valley, Cal. She and the children will stay with her husband until September, when the whole crew beats a hasty retreat home, just ahead of the mountainous snows that engulf the place eight or nine months of the year.

#### Foretells Blistering Hot Weather in August

The direct rays of the sun are gradually moving southward in their focus, and will soon affect this region, which will result in hot weather during August. This was the explanation given by Rev. A. J. Bruce, Copper Cliff, for his recent prediction of a blistering hot month.

In the orbit in which it travels, the sun, this year, is bringing its rays to bear more directly on this part of the hemisphere than in the past 33 years. Hot dry days and cold nights will be the weather bill of fare for August, Rev. Mr. Bruce says.

He attributed the large number of icebergs this season to the fact that earlier in the year the direct rays of the sun were focused on the Arctic regions. Now they are swinging south.

#### "HUNGER MARCHER" STEPS FROM ONE TERM TO ANOTHER ONE

A former Sudbury taxi driver last week completed a term in the Don jail for illegal activities in connection with the so-called "hunger march" recently starting from Toronto. Sudbury authorities had been searching for this fellow for some time. They may have expected to find him among the "hunger marchers" because he was the sort that would join that kind of movement. At Sudbury he pleaded guilty to charges of forgery and also of non-support of his family. He was sentenced to six monthseterminate and twelve months indeterminate.

Northern News, Kirkland Lake:—"Mosquitoes invaded the office for a while last night, drifting up from the lagoon north and west. That must be quite a breeding place for the little pests."

### Cent-A-Mile

#### COACH EXCURSION FROM T. & N. O. and N. C. R. Stations TO

#### PEMBROKE OTTAWA RENFREW MONTREAL ARNPRIOR QUEBEC

Via North Bay and Canadian Pacific

### Thursday, August 15

Coach excursion tickets will be honored on trains 2 or 46. Passengers who use train 46 will arrange their own transfer from North Bay C.N. to North Bay C.P. Depot and take C.P. train 8 leaving North Bay 12.15 a.m.—Friday, August 16th.

Tickets Good in Coaches Only No Baggage Checked

Tickets valid to return leaving destination point up to and including Sunday, August 18th, so as to reach North Bay in time to connect with Train 1 leaving North Bay C.P. Depot 10.15 a.m. on Monday, August 19th

Children 5 years of age and under 12 when accompanied by guardian—Half Fare.

#### TEMISKAMING AND NORTHERN ONTARIO RAILWAY THE NISSIPING CENTRAL RAILWAY COMPANY

### Newly Married Couple to Reside at Smooth Rock Falls

A despatch yesterday from Toronto has the following particulars about a recent wedding held in the city. The despatch says:—

"The marriage took place Sunday morning in the rectory chapel of St. Peter's Roman Catholic Church, of Laura Katharine, daughter of Mr. and Mrs. B. Harrison, and Mr. Kenneth Lawrence Gauthier, son of Mr. James Gauthier and the late Mrs. Gauthier. Rev. John Overend officiated.

"The bride was given in marriage by her father and wore a gown of white organdy with white mohair hat, white lace mittens and carried deep red roses and lily-of-the-valley. Her bridesmaid, Miss Josephine Harrison, was in pale pink organdy with white hat and carried a colonial nosegay. Mr. James Gauthier was the groomsmen. Mrs. Harrison was gowned in blue and white.

"Following a quiet reception at the home of Mr. and Mrs. W. J. Baxter, the couple left for a trip through the Thusand Islands, the bride going away in a two-toned light blue crepe frock, and white and blue accessories. On their return Mr. and Mrs. Gauthier will live at Smooth Rock Falls, Ontario."

### Naybob Starts Deep Drilling Campaign

#### Preliminary Work Being Done Preparatory to Plans for Increased Tonnage at Naybob.

In an official statement the Naybob Gold Mines, Limited, says:

"Before deciding definitely on plans for increased tonnage, we are today starting a diamond drill campaign on our large ore body near the present shaft. This body is over 100 feet wide on the 700 level, and if the values improve between the 700 and 1200 levels in the same proportion as from the 400 to 700 levels, our present plans would be entirely inadequate.

"During the drilling, it will be necessary to decrease our present underground work by one drill so that the diamond drilling can be speeded up.

"This work on our large ore body will enable us to make our plans now, to cover the handling of the ore from both the north and south vein systems and to give us additional information for sinking."

### Section 98 of Criminal Code Should be Enforced

In an editorial article on Wednesday of last week The Toronto Mail and Empire says:—

"Nothing has been more obvious in connection with relief camp treks and hunger marches in this country than the fact that these and other disorderly outbreaks have been fomented and led by members of Communist organizations. Confirmation of this statement is at hand in reports of the Third Internationale meeting held at Moscow this week. The Canadian delegate to the conference has made a statement that the Communist party has doubled its strength in Canada during the last year or two and that 90 per cent. of the strikes in this Dominion have been led by Bolshevik agitators. In this country as in the United States agents of the Third Internationale are working under instructions to corrupt the regular labour unions, and to take advantage of the discontent of both industrial workers and farmers in order to create a united proletarian front. These agents are urged to preach the gospel of force everywhere, undermine existing governments and employ every resource at their command for revolutionary and subversive purposes. Fortunately in this country Section 98 of the Criminal Code provides a means of holding these gentlemen in check so far as Canada is concerned. It remains with the authorities to continue to use this instrument in defence of the state and of human life and property."

### Garden Contest of Horticultural Society

#### Twenty-one Prizes Offered for Annual Competition for Lawns and Gardens in Town.

Experts in the matter say that never before in the history of Timmins has there been so many fine gardens as this year, so the annual garden competition under the auspices of the Timmins Horticultural Society should have special interest this year. The prize lists recently issued by the Horticultural Society give full details in regard to the garden competition. A summary of the references to the garden competition may well be repeated herewith:—

#### Garden Competition

All entries for the garden competition must be in on or before Saturday, Aug. 24th, 1935. These may be left with the president, Geo. Curless, 32 Mes-sines avenue, or with the secretary, Geo. Hogg, Box 2694, or Riverview hotel. Gardens will be judged Aug. 31st.

#### Note re Gardens

Owing to larger membership and to encourage new members the Hollinger townsite has been placed under separate heading. This eliminates the possibility of two prizes being awarded to one garden, and so extends the prize list, but it does not alter the possibility of a townsite garden being the best garden of its size in town.

#### Hollinger Townsite Gardens Only

First prize, second and third, donated by the Hollinger Mine; fourth, by Canadian Industries, Limited; fifth, by Bertrand Bros.; sixth, by A. G. Luxton.

#### Gardens, 30 Feet and Under

First prize, R. Simpson Co.; second prize, by C. F. Huckerby; third, Canadian Industries, Ltd.; fourth, Swift Canadian; fifth, Goldfields Drug Co.

#### Over Thirty to Sixty Feet

Hollinger townsite excluded. First prize, by T. Eaton Co.; second, by Canadian Industries, Ltd.; third, by Canada Packers; fourth, Northern Ontario Power Co.

#### Gardens Over Sixty Feet

First, Marshall-Ecclestone; second, Canadian Industries, Ltd.; third, Beauty Bros.

#### Best and Neatest Front Lawn

First prize donated by A. & P. Tea Co.; second prize, \$2.00; third prize, \$1.00.

### Dreaded Mosquito's Bite is Complicated

#### Friend Buzzer Uses a Very Complete Tool Kit in the Operation of Blood Transfusion.

(By Dr. Geo. A. Skinner)

Probably, if you ever wondered just how mosquitoes bite, you thought they bit by prodding you with a single awl. As a matter of fact, they do not bite at all. Instead, they saw a hole through your skin, then insert a perfect hypodermic needle and proceed to fill up on good red blood.

If that were all they did it would not be so bad—though bad enough to cause much irritation of the skin and occasionally some cussing when the bite is in a tender place. And the mosquito has a way of picking out the tender spots, for she feels around and finds one to her liking before starting her carpentry work. It is only the female that bites, for the gentleman mosquito does not live on such coarse food as blood.

After the lady mosquito has saved a hole through your skin she injects through a tube some of her own saliva, so that your blood will not clot. Incidentally this is what causes the itching. But in doing this she is likely to inject things that are unfriendly to the human being, such as malarial parasites, tiny worms, called filaria, and the like. We do not have much of this in the North, and most of the mosquitoes north of Missouri are comparatively harmless.

Suppose we look at the tools that Mrs. Mosquito carries. When we first look, even with a magnifying glass, all that we see is a pair of short, feathery projections and a tiny tube, like the trunk of a very tiny elephant. This is a complete tool kit. Suppose we examine it further.

There are two feathery "feelers" which contain her ears and seem to play an important part in connection with her too efficient sense of direction. Then there are what appear to be eight little hairlike projections which must be "teased" out of their sheath. These look harmless enough, but let's take a stronger glass so that we may be able to see them more clearly.

Now the tools begin to be apparent. First, we see two rather tubelike hairy projections that are jointed. Next there is a beautifully sharpened, long hypodermic needle. Then two little saws on long handles. Next, another hypodermic needle that looks like a sword blade. Then two more saw blades. Then, below them, what is really the case for the tool kit. This sheath, or scabbard, which is the lower lip, has two little hinged ends, which are delicate feelers, by means of which the mosquito is able to locate a nice soft place to start operations.

We will assume that this mosquito has now alighted on your skin and has prospected around and found a satisfactory place to collect a meal. How does she get it? First, she moves away the two tubes. Then she starts the two pairs of saws and soon she has made a fair-sized opening.

If you watch her you will see that she waves her head and shoulders, as does any husky carpenter when sawing. Now she commences to work the

### The Household by Lydia Le Baron Walker

#### NOVELTY HANDKERCHIEFS WITH WOOL EMBROIDERY AND HOW TO MAKE THEM

Two fascinating patterns for wool embroidery on handkerchiefs

Handkerchiefs embroidered in fine wool are novelties for sport costumes. There is time to make these fascinating accessories to doll up your sport clothes which will be given a new lease of life by such an addition. You can put the embroidery on handkerchiefs you buy, or you can make the handkerchiefs, whichever you choose. It takes but a short length of handkerchief linen to cut into three or more handkerchief squares, according to the width of the linen. The hems can be rolled and whipped with a strand of one of the colours of the embroidery wools, or two contrasting strands can be used, one for whipping in one direction, and the contrasting one for whipping in the opposite direction over the first, thus forming cross-stitches.

Embroidery Wools The wool is fine—almost as fine as wool darning strands. There are many kinds from which to make a selection. Some are soft and fuzzy, others are tight-twisted, while still others have fibres of silk twisted with those of wool in the medium, fine though it is. It should be remembered that fine wool strands are much coarser than fine cotton, linen, or silk threads. For this reason the embroidery works up much faster in the wool.

Designs and Colours The design occupies one corner of a handkerchief. It is generally developed in several colours of wool. These may be arbitrary, but if the sport costume is of colour, not white material, there should be emphasis put on the colour of the suit, so that it is immediately apparent that the work was done as an accessory of that particular costume. The handkerchief can be so worked that the colours in different costumes are cleverly combined, thus making the handkerchief appear to have been made expressly for which-ever costume it is worn with. The handkerchiefs are part of the decoration of a costume and for this reason are so positioned in a pocket that its full attractiveness of the design in its artistic colourings is in full view.

How to Get Patterns The motifs shown on the handkerchiefs pictured are charming. They can be obtained by sending a dime and a three-cent stamped and self-addressed envelope with a request directed to Lydia Le Baron Walker care of this paper. Directions for using the designs for various purposes accompany the pictorial pattern. The work can be developed in applique, or embroidery in various stitches, all or which are told about on the pattern sheet. However, for the use on handkerchiefs in the special novelty decoration, wool is the correct embroidery medium.

Other hydermic syringe, which is used only to take in food, and the blood is drawn into the stomach by a suction action imparted by the little muscles around the head.

When she has all the food that she can carry she packs up the tool kit and flies away to rest and enjoy the meal. And you have a mosquito bite.

runner, who is in jail pending a court appearance. Albert Pegram and possibly one other are sought to entirely solve a crime which was indicative of a bold attempt by gangsters to spread their nefarious activities to this country.

"This first big venture, however, proved disastrous to the perpetrators, and will serve as a notice to others of that ilk that Ontario will not tolerate infractions of laws intended to safeguard life and property.

### Canadian Law Deals with Alleged Kidnapping Gang

An editorial in The North Bay Nugget this week says:—

"In their work of cornering those implicated in the kidnaping of John S. Labatt, wealthy London brewer, the Ontario Provincial Police have demonstrated that Ontario is an undesirable locality for the arch-criminal.

"With two convicted, two awaiting trial and the arrest of a fifth imminent, these law enforcers have discharged their duty in a commendable manner. Their work was in no way spectacular. In fact, newspapers were more or less in the dark until actual arrests had been made.

"First David Misner was apprehended, convicted, and quickly despatched to a prison cell for a long term. Next came the arrest of "Piccolo Pete" Murray in Lexington and his removal to London for trial. Another swoop brought in Michael McCardell, who readily admitted guilt, and Jack Bannon, a former Windsor district rum-
