THIS BOY SEEMS TO HAVE TIMELY FORM OF FORTUNE
(By Jack O'Toole)

"Boy's Mother Stricken With Paralysis in Arm While Soaking Him," reads a recent news despatch. It will be interesting to note the life of that lad as he matures. He will no doubt win a first prize in an Irish Sweepstakes some day—always be able to get a seat on a street car—meet and marry an heiress with a yacht in every port and never meet an insurance salesman.

In skin tonics as in everything else nothing succeeds like the best

Elizabeth Arden

● The best skin tonic is the mildest! Strong astringents, you know, dry the skin and cause wrinkles. That is why Ardena Skin Tonic is made of such fine ingredients so carefully aged and blended. Ardena Skin Tonic and Ardena Cleansing Cream work together to cleanse and tone in a thorough yet gentle manner which promises and preserves that delicate texture known the world over as the "Elizabeth Arden look."

Ardena Velva Cream . . \$1.10 to \$6
Or, for dry skins, Orange Skin Cream \$1.10 to \$8

MOISLEY & BALL
Prescription Druggists

brief descriptions of some of them:
Burr mills have two specially cut circular stone discs, face to face, one fixed and the other rotating against it. The well-broken drug for whole, if a small seed) is fed through a hole in the centre and ground between the stones as it passes outwards toward the circumference where it is discharged.
Chasers (no connection with a party) have two wide stone or iron wheels connected by a horizontal axle which is rotated by a vertical shaft attached to its centre, thus causing the wheels to slowly chase each other around and around on a flat pan. The material is gradually reduced to powder under the wheels.
Ball mills, much similar in design to those used in ore milling processes, are sometimes lined with porcelain to avoid contamination from metal.
Rollers are used for grinding many of the more or less oily seeds and nuts.
Disintegrators are used for coarse and medium grinding. They have arms or hammers which rotate at high speeds, up to 3,000 or 4,000 revolutions per minute. Screens separate the material for size.
Pulverizers are of various types and are capable of producing fine powders of 80 to 300 mesh.

School Friends in Business Together

(Continued From Page One)
was opened in September of 1922 and Mr. Todd chose Mr. Moisley as manager of the new store and put him in charge of all the arrangements. He's been there ever since.

A Barrie Boy
The younger partner is a Barrie boy, was born there on January 8th, 1902, went to public school in the Simcoe county town, and attended the Barrie Collegiate Institute in search of more knowledge. Robertson's drug store in the same town was the scene of his first acquaintance with mortar, pestle and graduate. In 1921 he went off to Toronto to the Ontario College of Pharmacy where he met his partner of later years.

When he was a fully fledged druggist, he took a job with George Gerrie, who ran a drug store near the city hall in Hamilton. There he was in the prescription department and had his first responsible experience at deciphering those peculiar marks doctors write on little pieces of paper. He met his partner-to-be in Toronto in the fall of '22 and started to work in the Timmins store of the Todd chain late in October of that year. In January of 1923 he was sent out to manage the South Porcupine store and remained there until September of 1924, when he was brought in to the Schumacher head office to manage things from that end. In February of 1925 he joined the staff of the Timmins store and was there when it became Moisley and Ball on March 16th of the following year.

Both Service Club Members
Both partners have done their share in the building up of Timmins from another angle. Mr. Moisley has been a member of the Kiwanis Club since 1931 and is at present president of the club. In the sphere of boys' work he is prominent. In addition to being district vice-president of Ontario Boys' Work Board, supervising Trail Ranger and Tuxis work in a wide area in the North, he has given freely of his time to aid the Kiwanis boys' programmes. The Trail Rangers and Tuxis camp at Nighthawk lake has been the goal of one scheme he has seen through to a successful conclusion.

Mr. Ball was a member of the Kiwanis Club from 1924 to 1930 when the growing business forced him to give up his membership. Last year, however, he returned to service club work when it was suggested that a Lions Club be formed here. He was one of the prime movers in the pre-organization days of the club and was selected as its first president, a position he still holds. As chairman of the group committee of the Mattagami Scouts, he has returned to an old love for work among boys, for years ago in Barrie, he was Scoutmaster of "Frank Smith's Own Scouts," a group that received wide recognition and once took second prize in a Scout rally at the Canadian National Exhibition in Toronto.

Sudbury Star:—Poor Kate Smith was all in after climbing 20 odd flights of stairs to the radio studio the other day. When the Mountin' Overcomes Kate Smith, so to speak.

Modern Drug Store Carries "Vitamins"

Diseases of Older Days Avoided by the Use of Remedies and Preventives.

Remember in the history books how Cartier's men were killed off with scurvy? How many of the sailors of olden times died of diseases for which the medical science of that day could find no cure? Those things don't happen to-day, even in the North where there is likely to be a lack of certain things that go toward keeping people of European descent healthy.

Science has isolated things called "vitamins" and little known though their chemical composition may be, the effects of lack of certain vitamins appear to be sure enough.

The modern drug store is actually a storehouse of vitamins. Canadian, British and American firms have specialized particularly in producing compounds containing health-giving vitamins for protection against many diseases that once took large toll on this continent. Cod liver oil, and haliver oil are just two of the better known products of the day. There are more complex things like capsules containing high concentrations of vitamins A, B and D for one condition, Irradol A for another. Doctors prescribe them, but it's up to drug stores of the Moisley and Ball type to keep them fresh and ready for instant dispensing.

Below You will Find a Regular Bag of Bones

(Northwestern Drug News)
The bones of the body are two hundred or more, but for sorting out people we need only four:

I. Wishbones
They hope for, they long for, they wish for and sigh. They want things to come but aren't willing to try.

II. Fannybones
They laugh, grin and giggle, and twinkle the eye; If work is a joke, sure they'll give it a try.

III. Jawbones
They scold, jaw and splutter, they froth, rave and cry; They're endless on talk, but they're short on the try.

IV. Backbone
They strike from the shoulder, they never say die; They're winners in life for they know how to try.

KLEEREX
HEALS SKIN AILMENTS
including Eczema and Psoriasis which disappear with proper treatment of KLEEREX. "The Wonder Healing Salve." (Medium and strong). 50¢, \$1.00, \$2.00 sizes.

Rare Serums and Drugs Carried Here

(Continued from Page One)
Chemical appear on the drugs used. They have the depot for Northern Ontario for the Winthrop chemical and are local depot for British Drug Houses, Burroughs Wellcome and Oppenheimers.

50,000 New Prescriptions
Fifty thousand new prescriptions in ten years is the record they have marked up. That does not include a single repeat, but that means an average, increasing yearly, of 5,000. The old pill box has given way to a modernly designed box with a hinged lid. The label now goes inside where there is no danger of it coming off or fading so badly that it can't be read. Liquids go into specially designed bottles with a bakelite screw cap. Glandular products go into little screw cap phials to be sure they will keep well. Eye and nose drops, sometimes badly affected by light, go into amber bottles, each provided with an individual dropper and a case to exclude light entirely.

The dispensary is still the most important part of Moisley and Ball's.

Other Departments
It is the only drug store in the North completely departmentalized.

The tobacco and news stand end of it is a growing business too. The stock of tobaccos is fresh; an extraordinarily large number of periodicals makes it possible to satisfy almost every taste.

Stationery is another department of the business. Fine writing papers from Canadian firms; greeting cards for the various seasons; and all the things that go with school days and correspondence are in a third department.

In toiletries, Moisley and Ball carry a large stock and are able through exclusive agencies and others, to satisfy the demands of men and women for not only the latest creations but high quality products. In the deBarry and Balance lines they are exclusive Timmins dealers; they also have large stocks of Elizabeth Arden, Princess Pat, Martha Washington, Woodbury's and Yardley powders, perfumes, rouges, facial creams, bath salts, lipsticks, soaps, shaving accessories, and all the other things that go toward the beautification of modern woman and the appearance of modern man.

Candy, popular anywhere, but more than usually so in Timmins, is a big item in the drug store of to-day. Freshness in candy is important. So is quality in the materials used. Moisley and Ball's lines are famous all over Canada—Neilson's, Smiles 'n' Chuckles, and Moir's.

Kodaks make another complete department of the store and in this regard it has been kept strictly up to date. The newest cameras for taking snap shots are available; so is the "magazine" Cine-Kodak, the wonderful little movie camera that makes the taking of movies easier than snap shots.

Projectors and all accessories are also stocked in the store.

Another department is the fountain—the first full-fledged drug store soda fountain in Timmins. Although installed only last year, its popularity is increasing every week.

The sale of Victor radios has been a highly successful business for the firm, particularly since last fall. They have continued their activities to the one line, believing it to be the most generally satisfactory.

In connection with the store there is also a hairdressing parlour, under the direction of Miss Myrtle Anderson. Separated from the main part of the establishment, the beauty parlour has done well and continues to be a popular place with Timmins ladies.

Looking back ten years to the day when the partners took over the store, they pictured it as a more or less ordinary sort of place even for the Timmins of those days. Constant improvements during the years culminated in 1934 with the complete renovation of the interior, installation of modern show windows brilliantly lighted, modern lighting effects for the main part of the store, new merchandising aids, and a host of other improvements.

They had the first big neon sign in Timmins installed in 1931 when the idea was just beginning to reach the North.

THIS WOMAN THEN DIDN'T HAVE TO TAKE HER MEDICINE

(Wampole's Helps)
A woman shoplifter was discharged in court because she was under doctor's orders for nervous trouble. Apparently he had told her she must take something for it.
