

SAFE

for every
Baby's Bottle!

Just any milk won't do, when the health and growth of a precious little body is concerned! It has to be PURE milk; protected and improved from the farm to sterilized bottle! Timmins Dairy quality starts right at the farm. Then it's rushed to the plant, and science adds its knowledge to nature's finest product, to make it CONSISTENTLY good! Your baby's health requires the best. You can rely on Timmins Dairy quality.

Stamp-Collecting Popular Hobby Here

Boys in Timmins Take up Collection of Stamps with Special Energy and Enterprise.

"Mister, gimme the stamp off that letter?"

Such is the request that greets many a box-holder at the Timmins post office as a stamp-collecting craze appears to have hit youthful Timmins.

The sharp eyes of the teen-age philatelists spot unusual postage stamps long before the owner of the letter has noticed. The request is usually turned down, of course. Most people want to have a look at their own letters before destroying any part of them.

But the boys continue, undaunted by refusal. They have some fine material on which to work for there is a close touch between Timmins and foreign lands. Modern stamps and plentiful though they may be, their appeal to the embryo stamp expert cannot be denied.

Damage of \$1000 by Fire at Coniaurum

Mine "Dry" Damaged and Men's Clothing Burned. Cause of Blaze Unknown.

By the time all the miners' clothes are replaced that were damaged in a fire at the Coniaurum mine dry on Sunday afternoon at about 4.30 o'clock the loss will run to about \$1,000, John Redington, mine manager, told The Advance yesterday.

Complete new mining outfits were furnished to those off shift who lost their clothes in the fire, while those working underground who had left their outfits in the dry were provided with credits to buy suits, coats, shoes, and other accessories to replace those lost.

No cause could be found for the blaze. The afternoon shift had been underground for some time and the last of the day shift men had left the property. The watchman had visited the dry just a few minutes before the sprinkler system began to operate and gave an automatic alarm.

The inside of the building itself was not greatly damaged. The Advance was told, most of the loss being caused by water. None of the men at the mine lost any time through the fire.

Maritime Quadruplets to Visit the Quintuplets

The Mahaney quadruplets—the only quadruplets in Canada—are planning to visit the world's only quintuplets—the Dionne girls—at Corbeil in the immediate future. Perhaps, it would be more accurate to say that older folks are planning the visit for the four Maritime children. The Mahaney quadruplets are Edith May, Edna Louise, Lydia Christine and John Douglas, children of Mr. and Mrs. Wm. Mahaney, of Saint John, New Brunswick. An offer is now being considered by the parents in regard to the quadruplets going on the stage. In case the offer is accepted the visit to the quintuplets would make great publicity for the quadruplets.

Kirkland Miners to Teach Mining to Australians

Danny Giannini and Bill Pekkala, young machine runners at Toburn Mines, Kirkland Lake, are leaving shortly to teach Northern Ontario mining methods in Australia.

The two machine men will go away on contract to American Smelting and Refining Company for two years, their job being to introduce development methods to the Queensland section. The property to which they will be routed when they leave San Francisco likely on April 28, will be the Mount Isa Mine in Queensland district.

The Mount Isa is a base metal property which has been in production for a great number of years but only for the last six or seven years has it been controlled by American Smelting and Refining, "A.S. & R.," which in turn controls Premier, the parent company of Toburn.

The Australian mine has never used the system of drilling and development, which has been so successful in the North Country and the mission of the two Kirkland Lake young men will be as teachers as well as workers.

The chosen pair have been in mining five years at Toburn. Pekkala comes from New Liskeard and Danny is a young "old Cobalter," both from the Tri-Town sector.

They started as machine runner and helper on the Teck township drainage tunnel last fall, a contract to Louis Giannini, Dan's father and mine captain at Toburn, and before the contract was pushed to its successful conclusion Dan was in charge of the work and Bill was running a machine of his own.

Some of the Cast in Here Comes Charlie

What is a Connipion Fit? If You Take in This Play You'll Find Out.

"Mrs. Farnham's in one of her Connipion Fits again."

This is one of the funny situations in "Here Comes Charlie," to be presented at the Goldfields theatre on Wednesday and Thursday, May 6th and 7th. The play is being given by local talent and is sponsored by the Canadian Legion, Timmins branch.

In Toronto recently the production scored a big hit and critics praised the plot very highly. They also spoke of the humorous situations.

The part of "Uncle Aleck" is being taken here by Wilson Thomson, who needs no introduction to the people of the district. It is said the author must have known Wilson Thomson would take this character some day, because he is entirely suited for the funny sayings and actions which occur.

Fred Curtis is another who has a good part, as "Tim McGill" the policeman. F. Curtis has been in many plays here and has shown marked ability as a comedian. His work in this production should please all.

Miss Peggy Shaw, takes the part of "Charlie." Her vivacity and pep only add to her charm when it comes to the final act of the play. Peggy Shaw, has been known locally as a singer of great promise. It is expected that her portrayal of "Charlie" will add additional prestige to this gifted young artist and actress.

Mrs. W. D. Forrester, Mrs. W. A. Devine, Mrs. Irving and Miss Marjory Webb complete the feminine side of the cast.

All should be sure to secure tickets early. A review of the other characters will appear in The Advance next week.

A reserve seat plan will be opened at Moisley and Ball's drug store for the early buyers of tickets. Watch for the advertisements appearing soon.

Dividend and Bonus Announced Tuesday

Interesting! Announcement at Annual Meeting of the Dome Mines This Week.

Directors of Dome Mines declared regular dividend of 50 cents per share with bonus of \$2 per share, both payable July 20 to shareholders of record June 30. Jules S. Bache, president, addressing shareholders at the annual meeting on Tuesday stated that directors continue to pay out earnings 100 per cent. to shareholders in the way of dividends, while last year \$100,000 more than was earned was distributed. He stated that ore taken from the mine has been replaced by as many tons of new ore, but with higher value. In addition the company has acquired new ground which will add years to the life of the mine.

J. H. Stovel, general manager, reviewing mine development stated that ore reserves at the first of the year were practically the same as at the close of the previous year, while at April 1, reserves had been increased by about 10,000 tons owing to extension to the Ankerite vein and another Ankerite vein 100 feet away. The No. 6 shaft, some 4,500 feet from the production shaft is being prepared and it is expected sinking operations will commence by August.

With regard to Sigma Mines, Mr. Stovel states that the property is showing up favourably with four breaks or veins being worked. The first discovery has made ore from the first to the 4th level, the second vein disclosed on the second level has been worked on the second, third and fourth, while the third vein on the second level which has a north pitch has been opened on the three lower horizons. The fourth discovery was encountered in the shaft below the fourth level and has been opened up on that horizon and the management believes that they have opened it up on the third level. The grade is not satisfactory as ore possibilities. Mr. Stovel stated, averaging five dwt per ton. It is planned to sink to 1,000 feet and partially develop four new levels before a decision is given for a mill. Proven ore tonnage amounts to 118,000 tons, with probable tonnage of 150,000 tons or a little higher.

OVERSIGHT

"How did George break his leg?"
"Well, do you see those steps over there?"
"Yes."
"Well, George didn't."—Pearsone.

Mail and Empire:—At last Italy can point with pride to a result of her civilizing mission in Ethiopia. Haile Selassie has shaved off his beard.

Their Father Died Ere Rescue Squad Reached Him

Here are the two daughters of Herman Magill, Toronto attorney, whose death occurred after a week's entombment in the Moose River mine shaft along with Dr. Robertson and Alfred Scadding. Rescuers had communicated with the trapped trio before Magill's death came. His two daughters, Joyce Arlene (LEFT) 3 years old, and Patricia, aged 9, are shown at their Toronto home, unaware that death had taken their father.

BOY SCOUTS IN TIMMINS

Sixth Timmins troop, Mattagami school, has an enrolment of 17 Scouts, it was learned at a recent meeting of the Group committee at the home of F. H. V. Ball, chairman, when Scouters and committee members were present. The average attendance has been 13. Troop and pack records were submitted and approved.

A discussion was then brought up concerning the annual summer camp and the possibility of establishing a permanent camp on the shores of Nighthawk lake. The committee were unanimous in their feeling that this would be an ideal plan.

Scoutmaster Fisher asked that he might hold a three-day camp at Hoyle during the Easter holidays. Permission was granted by the committee and arrangements left in the hands of the Scoutmaster.

At the election of officers for the committee for the ensuing year, W. O. Langdon was elected as chairman and B. Alton as secretary.

Sixth Timmins Easter Camp
Although the weather of Easter week left something wanting, the boys of the 6th Timmins troop made up by enthusiasm, in the success of the Easter camp. Several boys passed Scout tests, and all practised Scout work and what could be done of the Jamboree programme.

Let a page of the Camp Lodge book give an idea of camp life. The log was written by Scribe Herbie Langdon:

"April 13: At 9.30 this morning, Scoutmaster Fisher, Troop Leader Knell, Scribe Langdon, Patrol Leaders Daw-

NEW DISCOVERY

to many women is the fact that they can use pure soap flakes for all their washing yet save money. They use Princess Flakes to wash white goods whiter, to protect the life of dainty lingerie and sheerest stockings—to make woollens soft and fluffy—because Princess are all pure soap. They save money because Princess cost less than other pure soap flakes.

FORD V-8 Dependability

-PROVED BY THE PAST-IMPROVED FOR the Future!

THE 1936 FORD V-8 FORDOR TOURING SEDAN

WATCH THE FORDS GO BY

The Ford V-8 is car value No. 1 by a very wide margin. It is still the only car under \$2500 with a V-8 engine. Modern motoring requires at least eight cylinders and Ford gives you their smooth power and performance—with economy. More than two million motorists have proved the Ford V-8 on the road. They are satisfied that it is the most dependable Ford ever built.

The 1936 Ford V-8 is more reliable than ever. Every part and feature is built to the high standard of the V-8 engine. New refinements of steering and gear shifting make driving easier and more pleasurable. Quick-acting Super-Safety Brakes have more effective braking area per pound of car weight than any other low-priced car. Cold drawn steel wheels of unusual

strength with wide rims provide broad support for 6.00 x 16 balloon tires. Safety Glass throughout at no extra cost is an important safety feature. Miles are easier and more comfortable because of Centre-Poise Riding and extra body room. You would have to step up to a much higher price to get the unusual features that are regular equipment with the Ford V-8.

Make your own test of V-8 value and dependability in your Ford dealer's car. He invites you to drive it at your convenience. Phone him today.

TUNE IN THE FORD SUNDAY EVENING HOUR
Symphony Orchestra and celebrated guest soloists, 9 o'clock (E. S. T.). • FRED WARING AND HIS PENNSYLVANIANS, 9:30 Tuesday evening (E. S. T.). Columbia System.

FORD HAS ALL THESE QUALITY-CAR FEATURES—NO OTHER FULL-SIZED LOW-PRICED CAR HAS ANY OF THEM

1. V-type 8-cylinder engine.	5. Big Super-Safety Mechanical Brakes.
2. 90 horsepower.	6. Semi-centrifugal clutch.
3. High-compression aluminum cylinder heads (as regular equipment).	7. Full torque-tube drive, radius rods front and rear.
4. Dual down-draft carburetion.	8. Three-quarter floating rear axle.
