

April in North This Year the Coldest in Ten Years

Sunshine and Warm Weather in March Offset Here by Last Month's Weather. Ten Year Average Temperature for April is 31.5 Degrees, While April This Year Averaged 28.4.

The North has just come through the coldest April experienced in the past ten years. Supposed usually to be the month when spring begins to make an impression, the past month was a good example of how the weather averages throughout the year. Too much warm weather and sunshine in March had to be offset somehow, and April with its 140 hours of sunshine, eight inches of snow, and average temperature of 28.4 degrees was a distinct disappointment. The ten year April average is 31.25 degrees.

Probably be a few light snowflurries during May, the yearly average for snowfall has been just about reached. Persistently low night temperatures did much to bring down the average. During all but one night the thermometer sank below the freezing point. That balmy evening was the 28th, while on the 26th, the mercury went to a low of exactly 32 degrees. On the 3rd, the lowest temperature of the month was recorded—2 above zero. That day was also the coldest, with an average of 13 degrees. Only two years show an average of colder nights—1926 and 1928. This year's average or mean

minimum was 18.9 degrees while in 1928 it was 17.3 degrees and in 1926 only 15.9 degrees.

The Brighter Spots

There were some bright spots in April of course. On the 30th for instance the maximum reached 57 degrees. During the night the temperature went down to 26, giving an average for the day of 41.5 degrees. On only eight days did the thermometer fail to climb above the freezing point. The average maximum for the month of 37.9 degrees is well below the ten year average and is the lowest mean maximum since that of 1926 which was 34.5 degrees.

Rain fell on six days during the month, the heaviest fall occurring on the 29th—a quarter of an inch. The other five days had light showers or drizzles. The total rainfall was .49 inches; just about the average. Heavier rains may be expected late in May or early in June. Snowfall of eight inches was mostly in light flurries and showers scattered through 13 days. This is about normal for the month, although one period of nine days, from the 14th to 22nd, accounted for more than half

the total. The heaviest precipitation was on the 26th when two inches of snow fell.

Just One Clear Day

The dull and cloudy monotony of the month was broken on the 24th when the sky was clear from sunrise to sunset. On 13 other days clouds covered the sun for part of the time, and for the rest of the days, old Sol failed to break through for an appreciable length of time. For two weeks, from the 16th to 23rd, there were only two days on which there was any sunshine worth recording.

One fairly good display of the Aurora Borealis was observed on May 20th, and a modest Caronta of the sun on the evening of the 6th. The moon was at the new stage on April 21st and will be at the full on Wednesday of this week. At the beginning of May, sunrise was at 4:45 and sunset at 7:10. Lighting up time for vehicles is about an hour after sunset, eight o'clock or 8:15.

Goethe—With women one should never venture to joke.

Miners Who Helped in the Rescue Work Were Modest

An editorial note in The Sudbury Star on Wednesday of last week says:—"Underground miners are not wanting in what it takes to face dangers of sudden and violent death when occasion arises for them to come to the aid of other persons in peril. This fact was well demonstrated in the recent thrilling episode at the Moose River mine in Nova Scotia. But to encounter their fellow-beings and become the target of their plaudits and felicitations is another matter. When three of the Porcupine district miners returned home from the Maritimes after aiding in the rescue of Dr. Robertson and Alfred Scadding, they left the train at Schumacher, three miles from Timmings, requisitioned a taxi and were driven to their homes to escape the crowds. Such is courage and modesty."

Kitchener Record—Business is feeling better, so the experts say, so maybe it'll come around to see you some time.

Canadian Pacific

(183,161) ounces; Quebec 46,306 (45,242); British Columbia 26,003 (35,130); Manitoba and Saskatchewan 12,607 (approximately the same); Nova Scotia 751 (1077). Jewelry and scrap 2965 (2343).

During February the average price of gold on the London market in Canadian funds was \$35.18 at which price the Canadian output was worth \$9,372,786 compared with \$9,731,043 in January when the average was \$35.06.

To Start Work on Schumacher Church

Work Likely to Commence About May 20th. Tenders to be Called Here.

Construction of the new St. Alphonse Roman Catholic Church in Schumacher will begin about May 20th, P. J. O'Gorman, Sudbury architect, told The Advance this morning.

Of cement block and white crystalline stucco construction, the building is to be on the present site of the Schumacher church and is to accommodate about 350 parishioners. Rev. Father Martindale's rectory will be a ten-roomed place, of similar construction on the same property.

A sketch of the building shows it to be Romanesque in style, with rounded arched windows, pleasant gables, and a bellry that rises only slightly above the roof proper to a height of 70 feet. Provision has been made for a basement that will seat four hundred people. Proper stage facilities will be included and the roof of the hall is high enough so that badminton or other games can be played. The building's longest side, 100 feet, is toward the street. The width is 40 feet. The ceiling of the main body of the church is 30 feet in height, giving a pleasant, roomy interior. Tenders will be called for this week.

Death of William A. Wendt at Timmings at Age of 75

The death of William A. Wendt, aged 75 years, occurred on Thursday, at the home of his daughter and son-in-law, Mr. and Mrs. George Pittonet, 85 Maple street, south. The body was shipped to Ottawa on Saturday, following a brief service at Walker's funeral parlour at which Rev. Bruce Millar officiated. Mr. and Mrs. Pittonet went to Ottawa on Saturday to attend the funeral services there. Mr. Wendt had been living in Timmings for the past year.

SUDBURY WEATHER NOTE

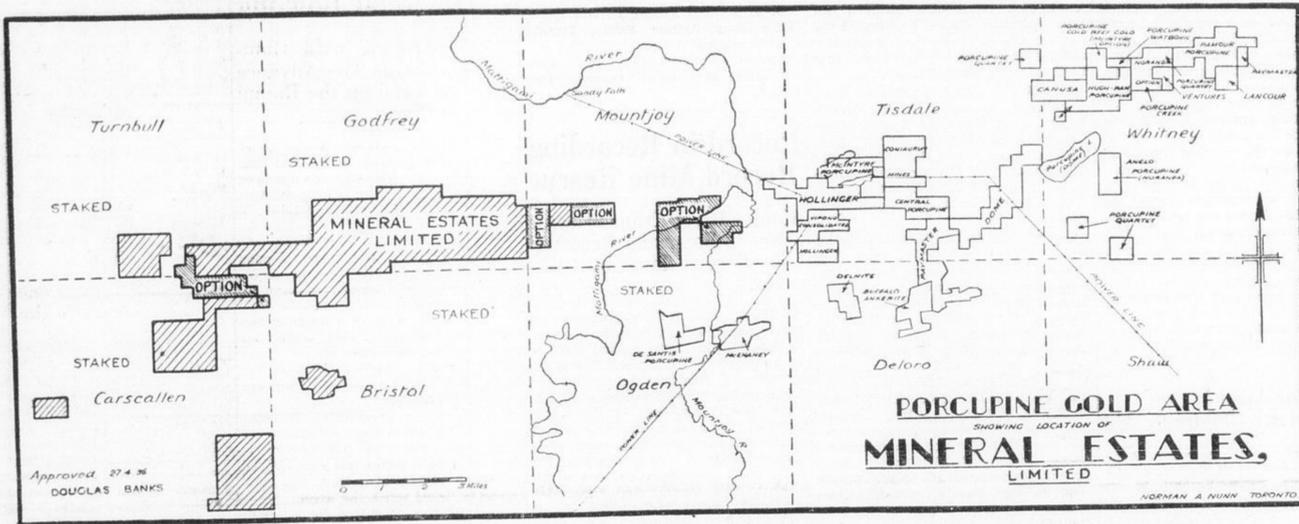

(From Sudbury Star) Art Duncan is the gent who, the other day, dealing with that popular subject—the weather—suggested: "We don't have any summer up here, just six months' bad sleighing."

AN EXCEPTIONAL MINING ENTERPRISE WITH VAST POSSIBILITIES

MINERAL ESTATES, LIMITED

Mining Claims staked and under option and optioned Mineral Rights in land comprising in all about 13,500 acres.

Located just west of the Town of Timmings and the great Porcupine Gold Camp and extending from east to west for more than 14 miles.

INDICATIONS ENCOURAGE THE BELIEF THAT THE LONG SOUGHT WESTERN EXTENSION OF THE GREAT PORCUPINE ORE ZONE HAS BEEN DISCOVERED AND EXTENDS THROUGH THE LENGTH OF THE PROPERTY

CAPITALIZATION—Authorized (par value of \$1.00 each)	300,000 shares
Issued	156,459 shares
Subscribed for but not yet issued	18,750 shares
This issue	25,000 shares
Balance in Treasury after sale of shares hereby offered	99,791 shares

THE COMPANY—Mineral Estates, Limited, was incorporated under the Ontario Companies Act to stake or otherwise acquire mining properties of promise; to explore and develop such properties to the point of establishing their mine making possibilities, and to arrange for development to bring these properties to production without delay.

PROPERTIES—Mineral Estates, Limited, has acquired 281 Unpatented Mining Claims holds options on 15 other Unpatented Mining Claims and has also Options on Mining Rights in other lands, all in the Townships of Mountjoy, Godfrey, Turnbull, Bristol and Carscadden, which altogether aggregate over 13,500 acres and extend west from a point about one mile west of the Hollinger Consolidated Gold Mines for 14 miles.

EXPLORATION—Preliminary surface work and a geophysical survey encourage the belief that the long sought Western extension of the great Porcupine Ore Zone has been discovered and extends through the length (14 miles) of the property. The property lies just west of a region long proven and richly productive.

LOCATION—The property lies just west of the Town of Timmings, Porcupine Mining Division, Northern Ontario.

POWER AND TRANSPORTATION—Power, water and timber are readily available for mining purposes, and good roads serve the property, thereby assuring excellent transportation facilities.

DEVELOPMENT—A preliminary geophysical survey of the property has been made and a wide zone has been indicated, which appears to extend over the full length of the prop-

erty. Many parallel veins are indicated, and wherever outcroppings have been examined favorable geological conditions are found to exist. An extensive campaign of diamond drilling and surface exploration is at present underway and results have been encouraging. Several veins have been uncovered on surface disclosing favourable formation with spectacular showings of free gold. An effort will be made as quickly as possible to prove the existence and extent of these veins at depth by diamond drilling.

MANAGEMENT—The management of the Company is in the hands of capable business and mining executives, who have obtained the services of a competent resident engineer and have retained Mining Research Corporation, Limited, as Consulting Engineers to advise in this exploration campaign on the property.

ENGINEERS—The Directorate of Mining Research Corporation, Limited, comprises such well known names in North American mining circles as E. E. Campbell, M.Sc., M.E., formerly Assistant General Manager of Granby Consolidated Mining and Smelting Company and General Superintendent of United Verde Extension Mining Company in Arizona; E. B. Knapp, until recently General Superintendent of Lake Shore Gold Mines; Dr. C. V. Corless, for many years General Manager for Canada of Mond Nickel Company; S. Power Warren, a metallurgist of broad international experience and until recently Professor of Metallurgy, Colorado School of Mines; and Wilbert G. McBride, Chairman, Department of Mining Engineering, McGill University.

F. L. James, B.A., Sc., is Resident Engineer in charge of operations at the property. Mr. James has an enviable record in Canadian Mining, having been associated with Hollinger Consolidated Gold Mines and later with the Granby Consolidated Mining and Smelting Company of British Columbia.

The present issue of 25,000 Treasury Shares is offered to the public at the price of \$2.50 per share, for the purpose of providing further capital to explore and develop the property and make payments under options held by the Company. The total proceeds of the issue will go directly into the treasury of the Company without deduction, no commissions being payable in respect of this issue.

All applications for shares are subject to acceptance by the Company, who reserves the right to allot a smaller number of shares than applied for.

HEAD OFFICE: 34 KING STREET, EAST, TORONTO, ONTARIO

SUMMARY OF PERTINENT INFORMATION CONTAINED IN PROSPECTUS OF MINERAL ESTATES LIMITED, FILED APRIL 28th, 1936.

Mineral Estates, Limited, was incorporated under the Ontario Companies Act on February 24th, 1936, having an authorized capital of \$300,000 divided into 300,000 shares of the par value of \$1.00 each, of which 156,459 shares have been issued. One of the Directors, R. E. Stibbard, of Timmings, conveyed to the Company nine Unpatented Mining Claims in Bristol Township and in consideration the Company allotted 103,334 shares. The Company allotted 16,666 shares for six Unpatented Mining Claims in Carscadden Township, and 2,800 Preference shares of Hocken Exploration Company, Limited, transferred to the Company by Elliott Allen, Trustee in Bankruptcy of the estate of W. V. Hocken, 330 Bay Street, Toronto, and W. V. Hocken, Timmings, Ontario. Certificates representing 115,000 of these shares are held in escrow by the Premier Trust Company, to be released on consent of the Securities Commission. An additional two hundred and sixty-six Unpatented Mining Claims in the Townships of Mountjoy, Godfrey, Turnbull, Bristol and Carscadden which were staked by certain of the Directors and others on behalf of the Company, have been transferred to the Company without profit to the transferees, and the Company has agreed to repay the sum of \$9,002.05 which was expended in staking and recording such Claims and filing Transfers. The Company has Options to purchase 15 Unpatented Mining Claims in the Townships of Carscadden and Turnbull for the sum of \$59,000 payable at various times till November 15th, 1938, and to purchase the Mineral Rights in certain lands in the Township of Mountjoy comprising approximately 1,428 acres for \$45,150, and the surface rights in lands in the same Township comprising approximately 160 acres for \$10,000, all payable at various times. The Company has paid a commission of \$7,038.50 in respect of the sale of 26,134 shares at \$1.00 each and has agreed to pay commissions at the rate of 2 1/2% in respect of the sale of 18,750 shares subscribed for at \$1.00 but not yet issued pending payment in full. The Company has not agreed to pay any other commissions. The actual net return to the Treasury on the sale of 8,305 shares has been \$8,305.00; and on the sale of 28,154 shares has been \$21,115.50. Except as hereinbefore mentioned the Directors have not been interested in the property acquired or proposed to be acquired by the Company, other than as promoters, and any property conveyed by them to the Company has been acquired for the Company and conveyed without profit. No money has been paid or is payable to any promoter for any services. There is no mortgage indebtedness and no bonds, debentures, debenture stock or other securities rank ahead of the Capital Stock. No dividends have been paid. The names of the Directors and Officers of the Company appear elsewhere in this advertisement. The Premier Trust Company, Toronto, is the Registrar and Transfer Agent of the Company.

TO MINERAL ESTATES LIMITED, HEAD OFFICE: 34 KING ST. E., TORONTO, ONT.

Gentlemen: I hereby subscribe for _____ shares of the Capital stock of MINERAL ESTATES LIMITED, at \$2.50 per share.
