Leo Bandiero Brings Athletic Honour Here

Leo Bandiero, 13-year-old Timmins High and Vocational School athlete brought honour to his home town on Saturday when he won second place in the Ontario schoolboy championship meet at Toronto, in which the best boy athletes of the province took part.

In addition to a medal, Leo gets something well worth while—a three-week training at the Lake Couchiching camp near Orillia over which Jimmy Wilson of Montreal will reside. All expenses are to be paid by the Ontario Athletic Commission for those winning first and second places in the Toronto events. Wilson is one of Canada's best coaches and will give the boys under his charge expert instruction under ideal conditions.

A short time ago Leo won the Northern Ontario junior championship at the New Liskeard track and field meet and since he made the Athletic Commission "standard" had his expenses paid to the Toronto meet. He was the only Timmins boy to make the trip.

Has Good Academic Record
He has another year in Ontario schoolboy junior competition and may be expected to do a great deal next season. His abilities are not confined to athletics, for he stood eighth in first form work at the local school, out of a class of 165.

John Grabo, physical training instructor at the high and vocational school, accompanied Leo to Toronto and wired the news of his victory on Saturday to W. W. Tanner, principal of the school.

Most of the New Canadians came from Central Europe in the days when Canada's immigration gates were wide open. All have been residents of this country for more than five years.

This year it is a little more difficult to get naturalization papers than it has been previously. A statement must be submitted by at least two British subjects stating that they have known the applicant for at least five years and have known him as a resident of His Majesty's Dominion.

Communists Banned
Those who are connected in any way with the Communist movement or who are known to have Communist tendencies will find it difficult to become citizens of Canada. On the part of the authorities at Ottawa have been becoming more and more strict.

Costly Frost Here Friday

Much Damage is Done to Vegetables in Gardens in Timmins Area.

Cucumbers were in bloom and beans were to have been ready for sale locally within the next three or four weeks. For some gardeners the loss of the less hardy plants means virtually the loss of an entire year's work. It is too late now to plant again.

Potatoes, radishes and other vegetables are reported to be unharmed by the cold weather. Local radishes appeared in Timmins stores last week and are of high quality.

Official thermometers did not record any temperatures below the freezing point but the weatherman said this morning that the ground temperatures were usually a few degrees lower than those registered by the protected instruments. Low-lying farms are reported to have suffered more severely than those on the hills.

With proper by-laws finally passed by the council, the decision as to whether or not Timmins will have new sewers, sidewalks, and paved streets is entirely up to the Ontario Municipal board. After months of consideration, the council last week gave their official approval to these public works: sewers, \$6,885; sidewalks, \$12,454.50 and paving \$50,430.

Although the work should have been started by now in order to take advantage of the best construction weather, if the Municipal Board gives its approval within the next week or so, the town will be able to go ahead this year. If approval is not received early next month, the greater part of the works programme will be left until next year.

This year's public works proposals have been hanging fire now since the beginning of the year and although the Municipal Board paid of visit to Timmins a couple of months ago, the council at that time had no figure or proposal to offer the members. Since that time the questions have been slated for discussion many times. Legal advice was obtained in the end, by-laws prepared and approved. Once the by-laws are in the hands of the Municipal Board, the town can do no more than wait for the board's decision.
