

Adjoining the Second Largest Gold Producer in Canada

POLARIS GOLD MINES (CANADA) LIMITED

(No Personal Liability)

Mr. H. McMaster, M.E., resident engineer in charge of operations at Polaris under Mining Research Corporation Limited, the managers, reports:

Locating of new Porphyry bodies on Polaris. No 2 hole encountered the porphyry at 200 feet, and was still in it last night at a depth of 548 feet. The known length is at least 800 feet, making this body of impressive proportion. We have now four known occurrences of Porphyry on the property paralleling one another at fairly regular intervals. The most westerly one is in contact with Keewatin Greenstone, the contact having a quartz filling and showing considerable action. A new vein was located Monday in the Southern portion of the property on the south half of the south half of Lot 1, Concession 3, in the Township of Mountjoy, showing up in an old pit from one to two feet wide. These discoveries will be followed up and further developed by trenching and blasting.

Present Offering 50,000 Shares at 35c per Share

Goldfields Securities, 76 1/2 Third Ave., Timmins, Ont.
I wish to subscribe for _____ shares of Polaris Gold Mines (Canada) Limited, at a maximum price of \$ _____
I am enclosing certified cheque or money order for \$ _____ to cover.
I understand the proceeds of this sale do not go into the treasury of Polaris Gold Mines (Canada) Limited, as payment of commitment for payment of this issue has been made to the company by Goldfields Securities.

Work of Humane Society Outlined to Lions Club

Timmins will have Shelter for Care of Abused Animals if Present Plans are Carried Through, M. McKillop, of the Ontario Humane Society Said. Other Notes and News of Lions Club.

Timmins will have a shelter for the care of abused animals if a branch of the Humane Society is organized here. M. McKillop told the Lions Club on Thursday night when, as organizer for the society, he addressed the club on the work of seeing that animals get better treatment at the hands of their human masters.

Educating people to care for animals is the society's greatest work, he said. The idea is not to see how many convictions can be had against those who are cruel but to show them the error of their ways and to assist in pointing out mistakes. The impression made on children of a community by the society's work changes the whole attitude of youngsters in that they become more kindly not only to their dumb companions but to the human beings with whom they mix.

Sudbury and North Bay already have branches of the Humane Society since the recent revival of the work in the North. Mr. McKillop showed the Lions pamphlets and photographs illustrating cruelty, in which animals were left to starve, were worked while sick, or were underfed.

Affiliated With Royal Society
The Royal Society for the Prevention of Cruelty to Animals with which the

Ontario society is affiliated, is the oldest of its kind, he said. In Great Britain, laws are more strict in this regard than in any other nation. More severe punishments are provided, with the result that there has been a vast improvement there in the attitude of people toward animals.

Funds are needed locally, Mr. McKillop said, and further information may be had by anyone at the society's office in the Hamilton block. A telephone has been installed there.

The Timmins club received the bronze plaque from the Lions International, District "A" for new membership during the past year, a recognition of the activity of local Lions in organizing.

Mr. Brown, of Toronto, was a guest at the meeting and pleased the Lions with a vocal solo.

At the next meeting of the club, the members of the Scottish football team, who defeated the English on Wednesday night 4-0 in the first of an annual series of international soccer matches for the Porcupine, will be presented with the medals they won. Members of the English team and those who were officials at the game will also attend the dinner.

Weather Last Month Set up Two Records

Hottest and Driest Period Ever Known in This Part of North.

July's weather set up two records in the North—it was the hottest and driest period ever known here. The intense heat wave of the eight days from the 6th to 13th, experienced here in common with the rest of the continent, shattered every record, and the average temperature for the month, 66.7 degrees, is also a new high.

July 12th, with a temperature of 103, will not be forgotten quickly. The average maximum temperature for those eight days was 96.1 degrees; average minimum, 70 degrees; making a mean of 83 degrees for the period.

Only an inch and a half of rain fell during the whole month, and that was mostly in the latter part of July. Eleven days, from the 9th to the 20th, passed without a trace of rain.

There was an exceptional amount of sunshine—11 hours a day on an average for the month. During the hot weather the sun shone brightly for 15 hours in every 24. Total sunshine for the month was 340 hours, even though smoke from bush fires did obscure the sun on some days.

Before the hot weather began, there had been some exceptionally cool weather—the 1st for instance, had a minimum temperature of 40, the 2nd 43. Toward the end of the month there was again some cool weather, the 24th and 29th showing minima of 45 degrees. Mean minimum for the month was 55.2 degrees, the highest on record. Mean maximum for the month was 78.2 degrees, also a new high.

Crops and Gardens Suffer
A great deal of damage was done to crops and gardens through the hot, dry month. A few gardens, given a great deal of attention with the hose, came through all right but the farmers who could not give this artificial rainfall suffered great losses. Then, brought on by the weather, caterpillars, cutworms and other pests began to multiply, in many cases completing the ruin begun by the sun.

Full moon was on August 2nd.

Blairmore Enterprise—We have never heard of gambling and bootleg joints are prepared to accept "Prosperity Certificates."

Sparks from Neighbouring Chimney Caused Small Fire
Fire in the roof of the house at 28 James street, caused by sparks from a neighbouring chimney, gave the firemen a run yesterday afternoon. Both box and telephone alarms were sent in. Chemical was used to put out the blaze after only ten or fifteen dollars' damage had been done.

take care of a larger crew.
Last week, Mr. Paquette, the underwriter, took a group of 21 financial men to the property where they will spend a few days. The officials of the company are satisfied that the result of this trip will greatly enhance the financial structure.

Wedding This Morning at Church of Nativity

Rhea, daughter of Mr. and Mrs. E. Savard, was married this morning at the Church of the Nativity to Leonard McNeil, son of Mr. and Mrs. Thomas McNeil. Rev. Father Larendau performed the ceremony. It was a quiet wedding, attended by just the immediate family and friends of the popular young people.

The bride wore a hand-knit white suit and carried roses and lilies-of-the-valley.

A wedding breakfast was served after the ceremony at the home of the bride's parents.

Out-of-town guests included Paul Savard and Miss B. Savard of Sudbury, and Mr. and Mrs. W. Duane.

The bride and groom left on the noon train for a honeymoon in the South. On their return they will live in Timmins.

Marriage at Cobalt of Timmins Couple

Miss Martha Andrecheck and Mr. Harold P. Cybolski Wedded on Saturday.

Cobalt, Ont., Aug. 17th, 1936. Special to The Advance.
A pretty summer wedding was solemnized in St. Patrick's Roman Catholic Church at Cobalt on Saturday morning, when Martha Andrecheck, oldest daughter of Mr. and Mrs. John Andrecheck, of Cobalt, and a graduate nurse of St. Mary's hospital at Timmins, became the bride of Mr. Harold P. Cybolski, of Timmins, and oldest son of Mr. and Mrs. Joseph Cybolski, of Barry's Bay. Rev. Mgr. Biernaski, of Barry's Bay, uncle of the bride and godfather of the groom, performed the ceremony, and Rev. Father Coulis, of Barry's Bay, and Paul Yoloski, of Round Lake, were deacon and sub-deacon at the Nuptial High Mass. Rev. Father Caulfield, parish priest at St. Patrick's, was in the sanctuary.

Given in marriage by her father, the bride wore a gown of white lace, with white picture hat trimmed with tulle, and white accessories. Her bridal bouquet was of Talisman roses, lily-of-the-valley and baby's breath.

The maid of honour, Miss Agnes Andrecheck, the bride's sister, wore a pink organdie dress, with matching picture hat and accessories, and she carried a muff of sweet peas. The bridesmaid was Miss Martha Vachon, of Kirkland Lake, who was dressed in blue organza, with matching picture hat and accessories, and she also carried a muff of sweet peas. Mr. Edward Andrecheck, of Gowganda, brother of the bride, was groomsman.

After the church ceremony, a buffet lunch was served at the home of the bride's parents on the O'Brien property, and later Mr. and Mrs. Cybolski left by motor on their wedding trip. The bride travelled in a fawn suit of sharkskin, with brown accessories. On their return, Mr. and Mrs. Cybolski will reside in Timmins.

Truck Takes Fire When Driver Replenishing Gas

In its issue last week The Halleyburian has the following reference to the story of a truck taking fire on the Ferguson highway:—
"When Peter Mark, Chinese resident of Islington, on his way to Timmins with a truck load of fruit, attempted to replenish the supply of gasoline for his engine from a tank carried on the vehicle it took fire and caused damage of around \$400 to the truck and \$150 to the fruit. He had stopped just north of New Liskeard on Sunday at 9:45 p.m. near the Demonstration Farm,

Dome Wins Right to Go on in Dickson Cup

Dome football club won the right to go on in the Dickson Cup series on Saturday night when Hollinger was defeated 2-0. The first game of the round was played at the Timmins park when the two teams were tied.

Tierney, who scored the first goal for Dome, looked like the best of the forwards while Willie White and Galbraith helped a good deal. Foster and Welsh were the choice of the backs. Jackson played hard on the Hollinger forward line and Paynter at centre half for Dome was effective.

Dome had the best of the play throughout and left no doubt in the spectators' minds of their right to continue in the quest for Porcupine district honours.

Radio Programmes in North Not Worth the License Fee

Last week's issue of The New Liskeard Speaker had the following pertinent comment on the radio question, so far as it hits the North:—
"A lot is being said in the daily papers about the proposed trans-Atlantic radio and other long distance broadcasting. The people of the North would be more interested in some kind of a programme which would give them a service which would be worthy of the license fee demanded by the Federal Government. We all looked for some service from the present Federal Government, but it just kidded ourselves. Even Mr. Joseph Bradette, M.P., has been unable to make any impression on the radio authorities, and we expected great things from Mr. Bradette's influence in this matter. Under present conditions, the Government has no right whatever to demand a license fee for service rendered the North."

Ottawa Journal—It is the people who come early to avoid the crowd that makes the crowd.

Noteworthy Results at Labine-McMahon

Encouraging Showings at Deloro Township Property, Diamond Drilling and Other Work.

Diamond drill results at the Deloro township claims of the Labine-McMahon Syndicate have been encouraging. John A. Labine, secretary-treasurer, told The Advance on Saturday. Situated almost half way between the Nabbob and Buffalo-Ankerite mines, the Labine-McMahon includes three claims on which a considerable amount of surface work has already been done.

Commercial ore has been shown by the drill cores, although assaying is not yet complete. When the drilling programme has been finished and assays made this fall, underground development will be considered. Trenching and stripping on the surface have revealed two vein systems, one in the northern part of the property and the other well within the southern boundary. The formation, strike and dip is very much similar to that at Buffalo-Ankerite, Mr. Labine says.

The syndicate also owns two claims in Tisdale township a mile north and a quarter of a mile east of the Con-

aurum. Men employed by the syndicate were taken in there last week to begin surface exploration. Some years ago free gold was found on surface in the Tisdale claims.

Financing of the syndicate, which has a capitalization of 20,000 units, has been carried on locally.

Stolen Toronto Car Located in Timmins

New Auto, Minus Four Wheels and Tires, Discovered in Bush.

Minus four wheels and tires, a new car reported stolen in Toronto on August 9th was recovered by Timmins police on Saturday. It had been abandoned by the car thieves in the bush between the cemetery and the incinerator. Mr. Snyder, of Wende avenue, noticed the car there and reported it to the police.

The car might easily have travelled around Timmins for some time without attracting more than passing attention, since it bore a "Y" license plate, issued in Toronto. The "Y"s have been used here too to fill the demand after the regular plates had all been issued.

The black sedan is being held here for the Toronto police force, who sent out a descriptive circular about it.

Good Values on the Porcupine Quartet

Property in Denton and Carscallen Assays High. Crew of Miners on Claims.

Head office of Porcupine Quartet Gold Syndicate received a wire this morning from Geo. A. MacMillan, general manager, reporting on the assay results obtained on the Syndicate's No. 5 property comprising 11 claims located in Denton and Carscallen townships. It is expected that diamond drilling will be carried out on this property in the very near future.

The chip sample was taken by A. M. Stuart and ran \$31.50 across 3 feet. Further development work is proceeding with a crew of men now on the property.

The Syndicate also owns 67,500 shares of Hallnor Mines Limited as well as controlling three other properties in the heart of the Porcupine camp.

Mr. L. B. Wright has been engaged by the board of managers to make a survey of all the four properties of the Syndicate and future work will be guided by the recommendations that Mr. Wright makes.

Good Results from Drilling at Polaris

Complete Geological Survey Now in Progress at the Polaris.

Diamond drilling at Polaris Gold Mines continues to give satisfactory results. H. McMaster, mining engineer in charge of the work reported to-day. Cutting through the porphyry mass encountered a week or so ago has gone on into a finely mineralized ore containing 40 per cent. quartz, he said.

A complete geological survey is now in progress and so far has indicated the Polaris is due to become one of the Porcupine's producers within a comparatively short time. Other producing mines in the district have found good results in the direction of Polaris it is reported.

Extended Program at Gale Gold Mines

Official Information Indicates Increased Power and Larger Staff to be Used.

Official information from the Gale Gold Mines, Ltd., head office at Windsor, Ont., shows the latest developments at the property.

On the first level, the drift on No. 1 vein advanced from 248 feet to 265 feet. Numerous coarse free gold showings have been uncovered, at the time of writing. Work done only on west face to date. Drift on No. 3 vein has advanced from 76 to 190 feet, assays running up to \$30.10 per ton. 114 feet of work done on the west face.

On the second level, the cross-cut has advanced from 207 to 265 feet. Total footage advance, 189 feet. Negotiations are under way for an increase of power to meet increasing needs of the work at the property. Provisions are also being made to
