### Motor Accidents for June Show Increase

Despite Safety Campaigns, and Appeals for Careful Driving, the Number of Accidents Shows Increase.

Motor vehicle accidents reported during June totalled 944 as compared with 896 for the same month of 1935—a percentage advance of 5.4. The number of persons injured (892) in these accidents was 7.7 per cent. above last year's total, although the number of deaths (32) and the amount of property damage (\$92,887) decreased by 25.6 per cent. and 16.3 per cent. respectively.

during the six months showed a decrease in the number of fatal accidents and fatal injuries, but an increase in all accidents, number of non-fatal injuries and damage to vehicles and other property.

There were 4,380 accidents reported during this period, resulting in 172 deaths, injury to 3,284 persons and a property damage loss amounting to \$436,363.

Accidents increased in number by 7.3 per cent. from the corresponding total of last year. Total injured and amount of property damage advanced by 5.4 per cent. and 7.8 per cent. respectively. Despite these increases however, fatal accidents (153) were 13.1 per cent. less in number than during the six months of last year, and the number of persons fatally injured (172) was 14.4 per cent. below the corresponding total for 1935. The number of

vehicles registered at the end of June (576,619) was 5.2 per cent. above the total for the 1935 period; and gasoline consumption increased 20.8 per cent.

As compared with the increase of 7.3 per cent. in the number of accidents reported, accidents during daylight (which made up 59.5 per cent. of the total) advanced by 7.1 per cent., while night mishaps showed a percentage gain of 7.4. Total accidents during daylight decreased by 9.5 per cent., and night accidents were 9.9 per cent. less than last year.

The collision with railroad train type of accident showed the greatest rate of increase. There were 60 such accidents during the first half of 1936 as compared with 47 for last year—representing an increase of 27.7 per cent. There were 1,474 collisions with pedestrian accidents reported—11.3 per cent. more than during the same period of 1935.

Evidence of the increased seriousness of accidents which may be expected with higher prevailing speeds, is given by the fact that fatal accidents, involving collisions between motor vehicles, increased by 28.6 per cent. in the face of as general decrease in fatal accident amounting to 13.1 per cent.

### Weather to be Cool for Next Day or Two

Weatherman Not Promising Nice Weather for Immediate Future.

The temperature took a rather severe tumble this week-end and is likely to remain low for the next couple of days at least, the weatherman said this

morning. "Changeable, unsettled, and cool" was the best he could dig out of the readings to-day.

Nearly an inch of rain has fallen during the past week, a large amount for any time of the year. The weekend's sharp showers brought half an inch alone.

Temperatures have been: Thursday max. 73, min. 45; Friday max. 63, min. 51; Saturday max. 61, min. 50; Sunday max. 64, min. 48; last night's minimum 42; eight o'clock this morning 42.

Huntingdon Gleason—For the best solution of the traffic problem, some policeman in the British Empire is to receive the King's Gold Medal and \$150. Every police officer has been invited by the British Home Office to compete. He must submit his ideas by November 1 and express them in 11,000 words or less.

### Progress of Mining Vital to Recovery

(Continued from Page One) ada that money be appropriated to make a geological survey. A succession of brilliant men have carried on the work. Not until 1907 was a mines' branch established at Ottawa. Still later the mineral wealth began to be realized in a dim fashion. To-day it staggers the imagination, yet the end is not in sight. Gold and base metal production will this year approximate \$222,000,000. "That is new wealth added to the Dominion."

**Desperate Condition in West**  
Mr. Crerar had just returned from a visit to the drought-stricken areas of the West. "It has left people in a very desperate condition indeed," he said. "I could not help contrasting their situation with that of your thriving city. I see on every hand evidences of prosperity."

The mining industry as a whole had lost a great man in the death of Noah A. Timmins, said Mr. Crerar, in paying brief but sincere tribute to the founder of Timmins and the Hollinger. Not only had the great mine here owed its progress to Mr. Timmins but the activities of the company in developing other areas, such as Noranda, have been of great value to Canada. Hollinger alone has produced \$225,000,000 in gold and the Porcupine \$400,000,000. Number 10,000 brick is to be poured at Hollinger within a few weeks. There are many districts in Canada that would be delighted beyond measure if they had a half or a quarter of the local \$10,000 daily payroll.

Canada to-day carries a heavy load, Mr. Crerar pointed out. Before the country engaged in the last war, the federal debt was \$336,000,000. At the finish it was two millions of dollars. The interest charges rose from 12 millions to 125 millions. Care of disabled veterans and the wives and families of those who were killed or disabled takes another 55 million a year.

**Other Reasons for Load of Debt.**  
The second reason for the great expense that must be borne by any Canadian government he gave as the optimistic spirit of development that swept Canada in the last century and in the early part of the present one. "We spread out over the whole thing quickly, built many railways and created a railway problem for ourselves." In providing the amenities of civilization over such a large extent of land, a tremendous burden of debt was placed on the nation.

The depression, which came partly as a result of the war has been the third great cause of mounting debt. Markets for agricultural products, lumber and fish were reduced drastically. Federal, provincial and municipal relief has already taken half a billion dollars and the end is not yet in sight.

Stabilization of taxes for mining, the guarantee by the federal government that new mines will not be taxed for the first three years of operation, the making of a complete geological survey and air mapping of the country, the spreading of mining knowledge, the building of roads into new mining areas—all these will lead to a faster development of mining, Mr. Crerar said, that may well lead Canada out of the depression.

**Plea for Democracy**  
Europe is dominated by fear, warring factions and different political philosophies. Liberty and freedom have disappeared, he said, touching briefly on Canada's position in the world. "It should be a lesson to us. Democracy with all its failings and weaknesses is still the best form of government the human race has evolved. Neither a dictatorship of the right or left can take its place. In the face of suspicion and fear in Europe and of reactionary influences across the Pacific it is necessary here to cherish the ideal of liberty, to nurture it and to bring it to full fruition." He closed his address with two pleas, one to every citizen to do his part in taking a healthy interest in the affairs of the nation. The other was: "Let us pull together to make Canada the country it should be." He could understand the sour outlook of the people of the West who have lost their homes in the North, where prosperous times still are, there should be no internal strife at all but rather a progressive spirit that makes for greater unity.

**Mayor Welcomed Guest**  
Mayor J. P. Bartlemar, welcomed Mr. Crerar to Timmins and invited him to return for the celebration of the town's 25th anniversary next July. He told briefly of the quick growth of the town and extended to the minister the appreciation of the people for the efforts of the government in increasing the life of the mines and so the life of the community.

R. E. Dye, superintendent at the Dome, introduced Mr. Crerar to the hundred Porcupine district men who were there. He said that the mines wanted no special consideration but merely a chance to help Canada out of the depression by employing more men with every passing year.

**Day's Work with Every Ton**  
R. J. Ennis, manager of the McIntyre, extended the thanks of the board of trade to Mr. Crerar. "Taxes on every ton of ore amounted to \$1.10, he said, or 28 per cent. of the profit. He realized, he said, that the government had to have money and that they had been getting it where they could. Farmers and manufacturers were having a tough time of it, so it had fallen to the lot of the mines to pay heavily. A mine has one crop, he pointed out, not a yearly crop like a farm, but a crop that lasted for generations. Destruction of a part of that crop through taxes, making it unprofitable to mine low grade ore, means fewer days work in the life of the mine. Every ton of ore mined means a day's work for a man, half of that day directly through the mines, and the other half through dividends and in other ways. The Porcupine mills 10,000 tons of ore every day. The government had helped to lighten the life of the mines by removing the 10 per cent. bullion tax, he said, but that with every reduction of

### Loyola College

MONTREAL  
Conducted by the Jesuit Fathers

In addition to subjects of B.A. Course, offers Pre-Medical, Pre-Law, Pre-Science Courses, with exemptions and saving of one or two years at the Universities.

### Loyola High School

A Classical School of Recognized Standing.

### Dome and South End Hold Pleasing Picnic

Enjoyable Event by Sunday Schools on Wednesday of Last Week

South Porcupine, Ont., Aug. 31, 1936. Special to The Advance.

The Dome and South Porcupine Sunday Schools of the United Church held their annual picnic at the Pump House on Wednesday afternoon. The children were taken out to the Pump House by buses which called at the Dome. Each child brought a basket lunch and in addition there was a booth provided by the Sunday school with ice-cream, candy, etc. The weather was perfect and the afternoon was devoted to field sports.

#### Winners of Sport Events

Ladies' running race—1st, Mrs. Rayner, coffee.

Men's flat race—Mr. Langley.

### Death at Beamsville of Mrs. Christie's Mother

South Porcupine, Ont., Aug. 29th, 1936. Special to The Advance.

The sincere sympathy of all will go out to the near relatives in the death of Mrs. E. Isabelle Kew, at Beamsville, Ont., on Tuesday, Aug. 25th, death coming as the result of a stroke. On learning of her mother's serious illness, Mrs. E. Isabelle Kew, at Beamsville, her brother Michael, of the Dome, left for Beamsville, and was able to be at the bedside of their mother before she passed away.

taxes, so many more men could be employed. Mr. Ennis spoke highly of Dr. Camsell, saying that "Canada is indeed fortunate in having a deputy minister of mines who has such a full understanding of the industry."

#### President Presents Pictures

W. O. Langdon, president of the board of trade, who presided at the meeting, presented to Mr. Crerar on behalf of the board two water colour sketches of the Hollinger and the McIntyre, painted by Graham H. Norwell, Ottawa artist. The minister in receiving them said that any time anyone from Timmins came to his office in Ottawa, he would see those pictures on the walls.

George Hale, tenor, sang two selections during the banquet, "You'll Remember Vienna" and "Mary O'Neill." Both were enthusiastically received by the audience. Orchestra music by a trio, Edward Nathanson, violinist, Eddie Deke, clarinet, and Herman Walters, pianist.

Seated at the head table were: Hon. T. A. Crerar, W. O. Langdon, Mayor J. P. Bartlemar, R. J. Ennis, Dr. Camsell, R. E. Dye, Dayton Ostrosser, R. P. Kinkeel, John Knox and Mr. Carnegie.

Joseph A. Bradette, M.P. for Cochrane was unable to attend the banquet since he was out of town. Mr. Langdon had extended invitations to him and to John Rowlandson, member of the legislature. Mr. Rowlandson could not be reached until Saturday.

Sudbury Star.—In any event, the reporters know that Lindbergh still has a heart, albeit a mechanical one.
