**Names Wanted of the Royal Montreal Regt**

**Committee Anxious to Locate Ex-Members of Regt. Memorial Planned.**

Last week the help of The Advance was solicited by the committee of past commanding officers and others connected with the Royal Montreal Regt. in their efforts to locate as many as possible of the former members of the regiment. It will be an odd thing if there are not some members of the regiment in Timmins or district. There are few regiments that have no representation in this part of the North. In addition to wishing to know the location of all former members of the Royal Montreal Regt., as a matter of sentiment and for old times' sake, there is also a plan under way to erect a memorial tablet to the officers and men of the regiment who gave their lives in its service during the war. It is felt that all former members of the regiment will wish to take part in this.

As noted in The Advance on Monday the tablet is to be erected in the regiment's armoury, which was also erected and dedicated as a memorial to those who made the supreme sacrifice. The tablet is to be unveiled Nov. 8th. The tablet will be of bronze and will have a receptacle in its base for a book of memory in which will be inscribed on parchment the names of all those to whom the tablet is dedicated. Any in Timmins or district who wish to contribute to the memorial fund should send their contributions to the honorary treasurer, Capt. W. A. Fowler, P.O. Box 352, Station B, Montreal, Que.

**Man Dies from Injuries When Motor Truck Upsets**

While riding on the running board of a truck at the Beattie mine on Sunday afternoon Boris Naidoff, 35, Yugoslav, was severely injured when caught between the steps of the mine office building and the truck when it overturned and died four hours later at the Youville hospital, Noranda.

James Lewis, driver of the truck said at the inquest, held by Coroner Dr. Bouille in Rouyn on Monday evening, that Naidoff mounted the running board without his knowledge and that he did not know he was there until he saw him lying beside the overturned truck, which was owned by a contractor named Williams. Naidoff, who was employed at the mine and was working with a gang unloading freight cars, was at one time working at the Noranda mine. He has a wife in Jugoslavia. According to the testimony of Dr. Hoare death resulted from shock and hemorrhage with a fractured pelvis. The jury returned a verdict of accidental death.

**Man Badly Burned in July at Dufault Recovering**

Emile Auger, who for weeks hovered between life and death as a result of painful and serious burns sustained at a fire that destroyed his home at Dufault, near Noranda, in July of this year, is now making remarkable progress to recovery and it is expected that he will be able to leave the hospital in a few days. At the time of the fire at his home he was severely burned and has been in the Youville hospital ever since. Auger was assistant at the C.N.R. station at Dufault. The house in which he lived was completely destroyed by a midnight fire. His wife and three children and also a maid in the house all lost their lives as a result of the fire.

**Business Men Throughout Canada Have Stood Test**

(Edmonton Journal) The difficulties that business men have faced during the past few years are inadequately recognized by their fellow-citizens. So is the fact that fair dealing has characterized their operations in the great majority of cases. The way they have met the test of these trying times should result in their being accorded a large additional measure of public confidence which will stand them in good stead in the better days that now lie ahead.

**KIRKLAND LAKE OFFICER ABLE TO BE BACK ON DUTY**

Many friends in Timmins will be pleased to know that Constable Allan Morrison, of Kirkland Lake, who injured some weeks ago when his motorcycle "bucked" on him, is now able to be back on duty again. He is riding the iron horse that threw him and hurt him before. He had his left arm and his right foot injured in the "spill." The arm is all O.K. again and the foot only a little stiff.

**Kapuskasung Young Man Presented with Medal**

Walter Sparling, 19-year-old youth, has been awarded a bronze medal by the Royal Canadian Humane Society for his rescue last July 16 of two small girls and a woman, from drowning in Kapuskasing bay.

The medal and a certificate were received during the week by the Kapuskasing Boy Scout committee, which was instrumental in having the Humane Association recognize the rescues. Presentation of the awards will be made by Mayor Noble in the town hall, Monday evening, October 23, in conjunction with a Thanksgiving day free show the Boy Scouts are putting on.

Walter dived into the waters of the bay and brought to safety Elizabeth McIntyre, Helen Forbes and Mrs. Edmunds who had waded beyond their depths.

**Cobalt Youth Thought he Had Killed his Father**

"Telephone the police; I've killed my father!" This was the startling announcement said to have been made by a young man named Simon who lives at Cobalt when he entered a taxi office at Cobalt the other evening or early morning. The police were duly summoned, but the youth was wrong in thinking he had killed his father. It is true that he hit his father over the head with a hammer, and the father was knocked unconscious. It takes more than that to kill some men and as a matter of fact Simon, Sr., is reported as not even suffering from concussion. Provincial officers were on the job promptly and made an investigation of the matter. They found the father just recovering from the blow on the head.

The blow on the head was a severe one, the head of the hammer being a heavy one. But that won't stop some of these gentlemen. The story behind the use of the hammer is alleged to have followed an attack made on the boy's mother by the father. The boy undertook to hammer it into the father's head that he could not attack the mother in safety if his son were around. The father was "laid cold" for a time, and stayed so long that way that the boy thought he was dead. When the police arrived on the scene the father was very much alive. However, the young man was placed under arrest and will appear before the magistrate likely this week.

**MATHESON MAN SERIOUSLY INJURED WHEN HORSES BOLT**

Word from Matheson is to the effect that Alfred Pusey, farmer of the district, is in the hospital there in serious condition. Last Friday the team of horses he was driving became frightened and bolted. He was thrown from the vehicle but was dragged a considerable distance by the horses. He was hurried to the hospital but was found to be in rather serious condition from the injuries received.

**DECLARES BEHRING SEA MAPS ARE ALL OBSOLETE**

A despatch from Seattle, Wash., says that United States Coastguard Commander L. V. Kjelhorn returned from a charting survey of the far north Monday to declare all "Behring Sea maps obsolete." He said the survey had proved there is no "gateway" south of the Behring Sea to the North Pacific. Last summer he discovered an immense undersea mountain range in the Behring Sea.

**Alberta Premier Now Not So Strong, Against Press**

Premier William Aberhart indicated at Edmonton this week that he would await expressions of opinions from his Social Credit followers in Alberta, before taking action on his threat to license the press.

Addressing the Edmonton Prophetic Bible Conference, the premier denied he had any idea of curtailing the freedom and liberty of the press, but desired only "the press should be required to print the truth, the whole truth and nothing but the truth."

Fair and open criticism of his policies was not objectionable, Mr. Aberhart said. "The press should be allowed to express its opinions openly, but surely no one would confuse that and claim the right of printing that which has no essence of truth from top to bottom and give it as news and still maintain such publication is in accordance with recognized principles of freedom of the press."

The premier said he had received resolutions from Social Credit groups in Northern Alberta favouring press licenses and would be glad to hear other expressions of opinion "before further action is taken by us."

The premier left for Calgary before starting on a two weeks' speaking tour through southern Alberta.

**United States View of Alberta's Debt Default**

(From The New York Times)

In view of the record of Canadian Provincial Governments in maintaining full service on their internal as well as external debt, considerable interest was manifested in financial circles here in the report published yesterday by a committee for holders of bonds of Alberta, headed by J. M. Macdonell of Toronto. The committee reported, after a survey of several weeks, that the Provincial Government was not justified in its programme to reduce interest charges on its debt by 50 per cent., and, in a statement made to the government, contended that the province was economically and fiscally solvent and could pay all its interest obligations in full.

The study was precipitated by the government's order in May last, authorizing the Provincial Treasurer to offer as of June 1 to holders of the Provincial direct and guaranteed bonds and to holders of Treasury bills and savings certificates one-half the interest payable on those obligations, provided that the rate offered did not fall below 2 per cent. annually. With respect to the 4 per cent. Treasury bills held by the Dominion of Canada, payment was made in full of the interest due in June, and the Dominion voluntarily reduced the rate to Alberta and other Provinces from 4 to 3 per cent., effective on July 1.

Full Payments to Ottawa While the original order contemplated a reduction of 50 per cent. in interest payments to the Dominion from June 1, this reduction was never made effective in relation to the Dominion Government, the report stated.

Total interest-bearing debt of the Province on March 31, was \$170,526,948, with annual interest requirements of \$8,125,860, and an average rate of 4.7 per cent. according to the committee's survey. The direct debt consists of \$128,140,260 of debentures, average interest on which is 4.9 per cent., and Treasury bills of \$25,758,750, with an average interest rate of 4 per cent.

Of the total debt, \$39,949,501 is payable in Canada alone, either to the Dominion Government or to the public; and \$105,027,696 is payable in London, Canada or the United States. Of the latter figure, \$4,000,000 is payable in London and Canada; \$19,915,000 in the United States, London and Canada; \$65,843,500 in Canada and the United States, and \$15,268,996 in London only.

The committee's report, prepared by Courtland Elliott and J. A. Walker as special investigators, who several years ago made a similar survey of conditions in Saskatchewan, produced statistics to show that the income of the people of Alberta in 1934 was about \$90,000,000 above living costs, an improvement of more than 2½ times from the excess of 1930. While the committee concluded that Alberta had ample funds to meet governmental costs without repudiation, it nevertheless recommended the temporary suspension of sinking fund payments to ease the burden of servicing the public debt.

Balanced Budget Seen Possible It is declared that Alberta's budget can be balanced, on the basis of the Elliott-Walker survey, without new taxation or a radical reduction in customary expenditures.

**Conservative Party Policy for the North**

(Continued From Page One)

G. Howard Ferguson, Hon. Geo. S. Henry, Hon. Earl Rowe, A. F. Kenning, and Gordon Gauthier, President—Dr. J. F. McClinton, Timmins.

Vice-presidents—F. C. Evans, South Porcupine; F. K. Ebbitt, Iroquois Falls; Al Hornick, Kirkland Lake; R. S. Potter, Matheson; F. Tremblay, Ramore; and A. C. White, Hoyle. Secretary-treasurer—J. T. Jackson, Timmins.

A. V. Waters, K.C., of Cochrane, former member for the riding before it was split, made a brief address before Mr. Gordon spoke.

Stirring Address by Hon. W. A. Gordon

The former minister of the Bennett government covered many topics of interest to the North, more particularly of gold mining and the pulpwood industry.

Up until a short time ago, the North always had an official in Toronto who would at least come up to see how things were going. He would meet plenty of criticism but at least some assistance would be given; something would be done about the troubles. This finally resulted in the establishing of a definite highway from North Bay to Timmins and Cochrane to replace the pioneering trails. "The roads are no longer supposed to be trails but highways serving known resources. There is no longer any need for sporadic road building. We must outline at least a 10-year programme to properly and permanently improve roads to serve established industry and to assist the location of settlers. We know what we have and we know what we need," he said.

Hon. Mr. Rowe has Definite Plan Mr. Gordon prophesied that Mr. Rowe will outline a very definite plan when he is up here next month. A businesslike method of developing the country will be emphasized. The former government had set aside first five million dollars, then ten million dollars a year for Northern Ontario. "Mr. Hepburn came up here on a hurried trip. He did not come out in the open and take his medicine," said Mr. Gordon.

Wealth Goes South As for the North being the "sink-hole" for Southern Ontario's money, Mr. Gordon reminded those at the meeting that the North is an extraordinary wealthy place — everyone admits that. But there are few wealthy men here. Where has the wealth gone? he asked. The answer was "to the south."

Mr. Gordon questioned the wisdom of the government's new pulpwood policy under which several townships near Port Arthur have been thrown open for bidding. No restrictions as to where the pulp is to be processed have been made and a quarter of a million dollars is being spent on opening waterways that lead from those townships close to the United States.

U.S. Forced Paper Prices Down American newspapers took advantage of the European supply of newsprint to force down the price of this continent.

**Mr. Gordon said, Canadian industry has suffered and the pulp mills have lost money through the activities of the combine. Now they have found the European supply unreliable and are turning back to Canada. Under the former government's policy, pulp had to be processed in Ontario—the "embargo" being effective. "Remember that the getting of the pulp itself is the smallest factor as far as wages in the processing of pulp and delivery to the consumer is concerned," Mr. Gordon said. "The government should now consider allowing established newsprint industry to operate at a profit and force the United States combine to pay for some of the lean years."**

There is no more pitiful sight than a limit stripped of pulp, he said, and although this is very necessary within reason, it is a direct encroachment into natural resources, which cannot and will not be replaced within our lives.

**Poor Economy**

The fires of Cochrane, Timmins, Halleybury and Matheson are nothing compared with destruction of wealth in Ontario this summer, Mr. Gordon said. The two or three hundred thousand dollars saved by the Liberal government in cutting down forest rangers' staff and equipment would not pay the interest for an hour on the value of the resources destroyed during the past summer, he said.

Mr. Gordon told the story of tariffs, referred to the fine example set by the British Empire as a group of nations that are co-operating for general economic benefit.

We in Canada have no idea of what the government of a dictatorship would be like, he said. The nearest approach the nation has is in the Ontario government right now, he claimed.

Hon. Earl Rowe to Visit Here J. T. Jackson, secretary of the association, is to get in touch with Mr. Rowe immediately to find out what his itinerary will be for his coming visit.

**Spruce Falls Co. Expect to Employ Large Number**

Some 1,400 men will be employed by the Spruce Falls Power and Paper Company at the peak of their winter logging operations, company officials said this week. Last year the maximum number of men employed was only 500.

At the present time the company has between 800 and 900 men employed in 10 camps. It is estimated that the number of cords of pulpwood which will be cut this winter will approximately double that of last year.

The main logging camps will be located this winter along the company's private railway line extending to Smoky Falls, 40 miles north of here and along the Kapuskasing river watershed. Last year the company cut 75,000 cords of pulpwood from its own limits and purchased an additional 75,000 cords from settlers in the district.

**COMMUNISM DEFINED**

Somebody is always asking What exactly is communism? The other day in a discussion on this subject a friend of mine very aptly summed it up in five words: "I'll divide what you earn." —ROBERT M. FERNS, New York.

**AVIATOR CRASHES IN THE ATLANTIC**

Kurt Bjorkvall, noted Stockholm commercial pilot, tried to fly the Atlantic this week from New York to Stockholm. He left Tuesday, crashed into the ocean on Wednesday and was picked up by a passing trawler. Baroness Eva von Blower-Eisenstein shows here is wearing shorts, introducing a new fashion for women fliers. She is an expert pilot and mother of a six-year-old boy, and was expected to leave with Bjorkvall on the flight.
