### Chapleau Woman Faces Murder Charge

Husband Also Under Arrest on Complicity Charge.

Thursday evening Willie Saylor, 28-year-old Chapleau Indian, died from gunshot wounds in the head and body, and Friday morning his sister-in-law, Mrs. Henry Saylor, was arrested by provincial police on a charge of murder, while her husband was also taken in charge for complicity. The story, as gathered from the various accounts current, says that Willie Saylor, while intoxicated, went to his brother's cabin on the Indian reserve at Chapleau about 6.30 p.m. Thursday. The brother, was away and Mrs. Saylor refused to allow Willie to enter. He apparently started to batter down the door and then Mrs. Saylor is alleged to have shot him. When the police found the dead man on Friday after the crime was reported, he was hanging from the doorway, having apparently forced his head, one arm and one leg through the flimsy door. The bullets used were said to be dum-dum bullets and death from one of the shots in the head would be instantaneous it is thought. After the alleged shooting Mrs. Saylor went to the home of a neighbour where she stayed until her husband came along. She said nothing to the neighbours in regard to the tragedy but told her husband as soon as he arrived at the neighbour's place. The news of the tragedy, held back for some time apparently, spread quickly through Chapleau when once the story was told. The news reached the ears of the chief of police at Chapleau and the scene being out of his territory he promptly notified the provincial police. The arrests soon followed. The couple were lodged in Sudbury Jail to await preliminary trial. It is hoped to have the preliminary trials over in time for the regular trials to take place at the March 1st assizes at Sudbury. Mr. and Mrs. Saylor are said to be very popular and respected at Chapleau. Counsel has not yet been secured for their defence. It is said that Willie Saylor in his attempts to enter the house threw an axe through the window before he started breaking in the door. The axe hit Mrs. Saylor on the leg, tearing a four-inch gash in the leg. Mrs. Saylor escaped from the cabin by way of the window after the shooting. Word from Sudbury says that Henry Saylor was taken into custody partly because he wished to accompany his wife and also because of some alleged outspoken comments he made commending the reported action of his wife in the shooting.

North Bay Nugget:—Fireflies and butterflies are sufficient to cause a "spring" scare, but along come school kiddies to thumb marbles. Isn't the appearance of the marble a sure indication of a change in seasons?

### Plan for Conserving of the Wild Life of Canada

(From Globe and Mail)  
As with her forest wealth, Canada has paid little attention to conservation of the wild life that has its home in these forests. Reforestation and forest protection now form one of the country's most pressing problems, the subject of intensive and increasing study. But the wild life continues to disappear; cottontails to retreat before the advance of civilization and its accompanying industries, and no one appears to care greatly. And as wild life decreases its hunters increase in number. An example of this may be found in Northern Ontario, where, inevitably, mining activity is invading the natural sanctuaries of forest animals and birds, and, in and out of season, the hunter is ubiquitous.

The effects are becoming evident in many ways. As Mr. Joseph W. G. Clark, in a letter appearing on this page on Jan. 29, points out, 31 per cent. of Canada's fur crop of last year was harvested on farms in settled sections of the country—fur farms as they are known. From the point of view of the fur industry this may be all right; in fact it is the only alternative to reliance on trapping over country in which the fur-bearers are becoming scarcer and more remote. But, as Mr. Clark says, what about this country's \$300,000,000 annual tourist trade? A large percentage of these tourists come here to hunt and fish. They come under the impression that the forests are full of wild things and the waters full of fish; and they are disappointed. Much can be done—and is being done—toward replenishing the supply of fish; but with forest wild life it is different. Animals and birds must be left undisturbed if they are to propagate their kind. So that the way to preserve the wild life of Canadian forests is to leave it alone for a few seasons; at least give it adequate protection against the harrying hunters. There will be loud protest over such a plan—which also would have its effects on the tourist business; but what other method is there of protecting the wild things of the forest?

Of course, the sportsman's paradise of earlier days never can be restored, but something can be done toward conserving what remains of it. Mr. Clark mentions the Wild Life Institute of the United States, which is tackling in an earnest way the problem of checking the threatened disappearance of wild animals and birds. Enthusiasts even are planning the purchase in Canada of a million acres as a breeding ground for wild ducks; which gives point to Mr. Clark's question: "Are there in Canada enough business men of vision to associate themselves in a Canadian wild life institute for the purpose of rescuing what others have placed in final jeopardy?"

### Sudbury Police Commission May Enquire re Beer Party

Sudbury city council this week asked the police commission of that city to enquire into charges that the International Nickel Company held a "beer party" for its employees and urged them to attend and disrupt a meeting of an alleged labour organization in that city last Sunday. The charges would strike many as being startling were it not for the fact that they are preferred by a paid organizer giving the name of Anderson but whose voice over the radio is not in keeping with his name. The organizer also wanted investigation into another charge that he made, namely, that the Sudbury police were lax in not preventing disturbances at his meetings.

### Epidemic of Influenza Said to be of Mild Type

Although influenza is more prevalent this winter in Canada than usual, it is of a mild type, and there has been no increase in mortality over previous years. Dr. R. E. Wodehouse, Deputy Minister of Pensions and National Health, at Ottawa, stated this week. The disease has been more in the nature of head and chest colds, he said, than true influenza, and is quite different from the type of infection that occurred in the winter of 1918.

The numbers of cases reached a maximum the past week. Reports were received by the department from all Provinces, but exact figures were not available for Quebec.

"The Maritime Provinces report very few cases, and the mortality in those Provinces is negligible," the Deputy Minister declared. "For example, in Prince Edward Island only one case was reported during the last week of the month and no deaths. For the same period only 64 cases and one death were reported in New Brunswick, and only 10 cases and no deaths in Nova Scotia.

"In the Province of Quebec there have been many cases of cold of a gripe-like character during the winter months, and the mortality has been very slight. In Ontario, 586 cases and 10 deaths were recorded. In the Western Provinces of Manitoba, Saskatchewan and Alberta, the number of cases was few and only one death occurred in each Province. There has been no indication of an outbreak in British Columbia."

### Some More Recipes for Butter Cakes and Cookies

In giving further recipes for butter cakes and cookies, the Milk Utilization Service, Dairy Branch, Dominion Department of Agriculture, draws attention to the fact that butter is very easily and quickly creamed if left in room temperature for a short time before being used.

**Butter Cake**  
1/2 cup butter  
1/2 cup fine granulated sugar  
2 eggs  
1 teaspoon flavouring  
1/2 teaspoon salt  
2 1/2 teaspoons baking powder  
1 1/2 cups flour  
1/2 cup milk  
Cream butter. Add sugar gradually and cream together. Add well beaten eggs and flavouring. Beat well. Add alternately the milk and dry ingredients, adding baking powder with last amount of flour. Bake in a buttered loaf pan in moderate oven (350 degrees F.) for 45 minutes, or in layer cake pans at 375 degrees F. for 30 minutes.

**Butter Icing**  
4 tablespoons butter  
1 1/2 cups icing sugar  
Milk, cream or fruit juice  
Flavouring.  
Cream butter. Add sugar gradually. Beat well. Add liquid, drop by drop, until of desired consistency.

**Oatmeal Cookies**  
1 cup butter  
1 1/2 cups brown sugar  
1 egg  
1 1/4 cups fine rolled oats  
1 1/2 cups flour  
1/2 teaspoon soda  
1 teaspoon baking powder.  
Pinch of salt  
1 cup cocoanut.  
Cream butter. Add sugar and cream well together. Add well beaten egg, then dry ingredients and cocoanut. Drop by spoonfuls on buttered baking sheet and bake in moderate oven (375 degrees F.) about 8 to 10 minutes.

### Sleigh Sedans With Wood For Fuel in Chelmsford

When the city dweller goes out in his sedan he figures on getting 23 miles to the gallon of gas, but when Adrien Joliat, of Boninville, goes out in his sleigh he expects to get 23 miles to the handful of wood.

Mr. Joliat is just one of the many users of sleigh-sedans, sometimes called settlers' sleighs, in Chelmsford district. These sleighs, most of them of home manufacture, are the settler's answer to cold weather and bad roads. They are comfortably equipped inside depending on the ingenuity of the builder and most of them are heated by a small wood stove placed behind what would ordinarily be the backboard.

Constructed on sleigh frames, the bodies are built out of canvas, wood or galvanized iron. The size depends upon the demands to be made upon them and they vary from two-passenger coupe size to the 12-passenger type used by Oscar Mainville, of Balfour township, to bring his family and neighbours into Chelmsford to attend church and do their shopping.

### \$117,327 Spent on Rouyn to Senneterre Line in 1936

A progress return on the construction of the Canadian National Railway branch line from Senneterre to Rouyn in Quebec, tabled in the House of Commons Tuesday, revealed \$117,327 was spent on the line last year. Expenditure for 1937 was estimated at \$3,750,000.

Tenders for clearing, grading, culverts, trestles and substructures of bridges along the 99 miles the branch line will extend, has been awarded to Fred Mannix. He started work on Nov. 9 last and by Dec. 31 had completed approximately 53 miles of clearing, some of the culvert work and had made a start on the rock work.

The total cost of the branch line has been estimated at \$5,940,000, or \$60,000 a mile.

### Interesting Questions When Shoemen Gather

Protection against false advertising, elimination of fake bankrupt sales, and the possibility of sales tax reduction are a few of the vital business questions that will be discussed at the National Shoe Retailers' Association annual convention in the Royal York Hotel, Toronto, on February 15 and 16, according to an announcement made at Toronto this week by Geo. S. Hougham, Secretary of the Association.

"If the modern retailer wants to keep pace with modern business trends," said Mr. Hougham, "he must be ever alert to the trends of present-day legislation. He must either be prepared to regulate himself or the government will do it for him. Legislative bodies all over the world are on the doorstep of business demanding 'good housekeeping' and retailers must clean house or submit to government action."

This phase of modern retailing will be dealt with at the convention in a thorough discussion of current trends in business legislation.

For the first time in Canada, a university has co-operated with a retail merchants' association in making an economic survey of trade conditions. The Department of Business Administration, University of Western Ontario, at London, has been co-operating with the National Shoe Retailers' Association on a survey of Ontario retail shoe stores. This work has been conducted by Allan Ross, under the direction of Prof. P. H. Hensel, head of the department. The findings of the survey will be presented by these experts at the forthcoming convention

### Prisons Proper Places for Carrying Out Executions

(From Ottawa Journal)  
While Parliament is giving some study to the manner of imposing the death penalty in this country—a subject upon which there is much division of opinion in the House and out of it—there is a change waiting to be made on which no division at all appears to exist.

Death sentences should be carried out in the federal penitentiaries, not in the county jails. This is a reform in the system which could be made simply, and which would relieve local jails of a painful responsibility they are not well adapted to carry.

A murderer duly sentenced to death should be taken at once to the Dominion penitentiary in the region of the

### EVERY WOMAN FACES THIS QUESTION

How do I look to other people? So many women risk their beauty by neglect of constipation. It often causes loss of pep, sallow skins, all eyes, poor complexions. Yet common constipation can be added so easily. Just eat two tablets of Kellogg's ALL-BRAN with milk or fruits every day, three times daily in severe cases. This delicious ready-to-eat cereal supplies the "bulk" needed to exercise the system—and vitamin B to help tone up the intestinal tract.

Within the body, ALL-BRAN absorbs more than twice its weight in water, gently sponging out the intestines. It never causes the artificial action of pills and drugs, that often prove ineffective. Kellogg's ALL-BRAN, you see, is a food—not a medicine. It relieves common constipation the way Nature intended—so its results are safe. Buy it at your grocer's. Made and guaranteed by Kellogg in London.

trial court, where permanent facilities could be maintained for imposing capital punishment. Such a step would not interfere in the least with the legal processes of appeal and review, but publicity for the murderer would end at the penitentiary gates.

We have not read or heard any serious objection to such a change in policy in this respect, and the Minister of Justice would have strong support from the public if he were to take steps to end the present custom.
