**New Race Added to
Long Branch Races**

Purse of \$5,000 for New Feature at Seven-Day Running Race Meeting.

A new race of \$5000 added value to be

decided at the Long Branch seven-day running race meeting that commences Wednesday, June 9th, at the Toronto suburban mile track was announced Tuesday by the Orpen-Hare confederacy. The affair is to be an annual fixture with the probability of its value increasing every year should conditions and the response of the horsemen and public warrant. The race will be decided on the Saturday of the meeting in this instance, June 12th.

Closely patterned after the King's Plate, inasmuch as conditions call for three-year-olds and upward which were eligible to the Woodbine fixture of 1937, the new race will be a handicap event for which a name has not yet been chosen, and will be enlarged next year to include Canadian-bred, not only Ontario-breds as in the case with the Plate. Other restrictions will also be removed such as horses of three-year-olds and over not being eligible if they have won a race other than the Plate, nor will it matter if they have left the Province for a certain period or have been out of Canada. These changes will be made next year, as the time was too short between now and the running to hope to get any entries from anywhere but Ontario.

Like the plate, the new race will be at one mile and a furlong, but the nomination fee will be but \$5 and starting fee \$25, as compared respectively with the \$10 and \$50 for the Guinness. In addition the breeder of the winner of this most attractive race, which next year will be a truly national event, is to receive \$300 and the trainer \$100. With the starting and nomination fees.

St. Mary's Journal-Argus:—Sandy's landlady was never very lavish with her helpings at meals, but one day his portion was so small that the Scot looked up: "Haven't you made a mistake?" he asked. "No," she said, "what's wrong?" "Only that my name's Sandy, not Gandhi!"

Picturesque Burman Troops in London

The Indian and Burma Coronation contingents which traveled to London for the great celebrations are camped under canvas at Hampton court. Our photograph shows a Burman officer being shaved by an orderly.

town is being placed on the local Rexall drug store. It is understood that several others will be installed shortly on other large buildings including the Lake Shore hotel.

Mr. McIntyre, the district sanitary inspector, is in town making a house-to-house inspection of wells and sanitary arrangements. He is being assisted by Constable L. Treganza, who as a member of the O.P.P., is deputy health inspector under the act.

Arrangements are under way for the incorporation of the township. At present health and sanitation is being handled by provincial officers.

The Proprietary Mines, power, division, is installing all new power equipment to serve the town. The new poles with modern type wiring and brackets give the town an up-to-date appearance.

The Imperial Bank of Canada is making preparations for the building of an up-to-date block on Godfrey street. The bank is at the present time conducting business in a rented building on Government road.

The new hotel on Government road is rapidly being completed and the Lake Shore hotel will soon have all alterations made. All the engineering in connection with the Lake Shore hotel is under the personal supervision of J. C. Milling, C.E., of Kirkland Lake. The new addition to the Lake Shore hotel will be modern in every sense, bedrooms with bath attached, running hot and cold water.

The highway condition is certainly improving, and this highway between Larder and Kirkland is one of the busiest stretches in the province. An effort is being made locally to have the placing of calcium chloride or some other anti-dust substance on the highway.

With the coming of spring, lot sales have greatly increased. Many of the larger north country houses are preparing to establish branches in this "up and coming" community. Day by day better results are being obtained from the mines. Diamond drilling is bringing more satisfactory assays. It is reported that Omega will be increasing its tonnage some time this summer. Martin Bird continues to obtain excellent results from its underground workings. Several deals involving big money are reported to be under way in Hearst, Fernland and Sheldon Larder are well backed.

Globe and Mail:—A Pennsylvania town official has discovered an ancient civic ordinance approved in 1802 forbidding smoking after sunset. So that more than a century ago elected persons also were trying to take the joy out of life.

**New Phone Central
at Larder Lake Soon**

Boatmen Busy with Freight on the Lake at Larder.

Larder Lake, May 25th, 1937.—The Northern Telephone Company expects to have its new local exchange completed this month. The old exchange is located near the station with communication being sent over T. & N. O. lines. When the new exchange is completed, a direct line will be used from Kirkland Lake which is under construction at the present time. The new line is located along the Kirkland-Rouyn highway.

Boatmen in town are all busy carrying freight to the various properties operating close to the lake. Many first-class boats have arrived in town and this summer will bring good transportation facilities for anyone requiring them.

The first Neon sign to arrive in this

the purse will be considerably over \$5000 of which the second horse will receive \$800, the third \$500 and there will be a prize of \$300 to fourth horse.

Another feature that should appeal to the more modest stables is that while owners or trainers may nominate one or more horses only one owned by the same interest will be allowed to start. Entries will close Friday, June 4th, with weights published before 10:00 a.m. Monday, June 7th. Winners after publication of weights will be penalized four pounds. Acceptances are to be named through the entry box the day before the race at the usual time of closing.

The valuable handicap will be raced as the sixth event of the Saturday sport and all or nearly all the horses that raced in the King's Plate last Saturday, in addition to a number of other eligibles expected to be entered. The backwardness in training of many that were intended for the Plate but weren't ready will not interfere with their starting in the Long Branch fixture.

In every respect the new race has unusual appeal. There will no longer be the complaint that the horses weren't given enough time in which to prepare, and next year it will be possible for entrants to engage in other races in addition to the Plate. Also it will give owners throughout Canada a chance to strive for a rich prize.

The announcement of this new and rich stake is expected to be followed by other important news having to do with improvement of racing and racing conditions generally at the Long Branch plant. Realizing that racing is definitely on the comeback trail, the Orpen-Hare interests intend to make the forthcoming Long Branch meeting one of the most attractive in years. Decision to stage this new race is but the first move in this direction.

Brampton Conservator:—The taxation of billboards is now being considered by some Ontario municipalities. Why not? Very little escapes these days.

BE BEAUTIFUL
By ELSIE PIERCE
FAMOUS BEAUTY EXPERT

A weekly camomile shampoo followed by a lemon juice rinse serves to keep MADELEINE CARROLL'S blonde hair golden

Madeleine Carroll Thinks "Every Woman Can Be Attractive"

Madeleine Carroll passes on "this inspirational message to you." She thinks every woman can be attractive, which is much more important than merely being beautiful. Remember this: that it is what people who know you see "behind that face of yours" that makes you attractive to them. Don't try to be someone else. Be yourself. And make yourself just about as nice a person as you know how. You know as well as I do that early nights, plenty of fresh air, eight hours of sleep a night, not too much to eat or drink, a sane diet and keeping your face well cleansed does all you need to do to keep your face lovely.

Well, it seems to me that Miss Carroll has covered the ground pretty thoroughly. She feels that one should get as much fresh air as possible. That washes the lungs, whips up the circulation, promotes health generally. And keeping the skin fresh and clean is, without doubt, the first big step toward complexion beauty. She cleanses her skin three times a day with cream followed by astringent.

She goes on to say that "No beauty treatment will keep your eyes bright and shining. You've got to keep what's behind those eyes bright, and the rest will follow. She emphasizes right thinking.

Charming Others: Her theory of "people who know you see behind that face of yours," is not wrong by any means. When you are nice and kind and charitable, your thoughts make you charming to others. So often people who know a person who on first glance might appear plain, think that person beautiful because of the nice things that person does, the way he or she walks, talks, charms others.

Miss Carroll feels that late nights, parties, lack of fresh air and overwork are the chief purveyors of lines and wrinkles. Moderation in all these things will definitely prevent them.

Miss Carroll's life has not been the smooth, easy, "success over night" story. She has known disappointment and discouragement, privation and hunger. But, evidently "being as nice as possible" has always been part of her credo and when finally she soared to stardom she was doubtless all the lovelier for the hardening experience she had had. Natural gold hair, blue eyes and a fair complexion, five feet four inches of grace, she recommends dancing to keep one fit and slender. As for her diet, "I just don't eat potatoes or bread, and that's about all the dieting I do"—Miss Carroll says.

**Another Warning Against
Fooling with Explosive Caps**

(From Northern News)
In the very same week that Canadian Industries sent out a message of warning to newspapers throughout the country, three Monteith boys were injured through the discovery of blasting caps and their use in play.

The incident, fortunately not involving any deaths, is not only a warning to children, but to those who use the caps in blasting and leave them lying around.

This would be easy to do, particularly in the operation of sinking pits and making trenches on a new prospect, where the caps might lie for some time to be discovered by a youngster on a hike or fishing trip.

Quite a few of us are not familiar with the appearance of these dangerous little objects.

For their benefit, and to emphasize the warning, we quote from the circular sent out by C. P. C. Downman, an old associate, and publicity director for Canadian Industries:

"These small aluminum or copper cylinders, bright and shiny, filled with a powerful explosive, are about one-quarter of an inch in diameter, from one to two inches long, and resemble an elongated 22-calibre cartridge, except that some have wires attached to them.

"One cap can tear a hole through a plate of steel one-sixteenth of an inch thick. A few together can burst their way through a two-inch plank of oak.
"If tossed into a fire, a cap instantly becomes like shrapnel, whose flying fragments are blinding bits for the eyes of all nearby. If lightly pounded with a hammer or even pried and picked at, they are likely to explode. Then loss of sight or limb, if not of life, is inevitable."

IMPORTANT

**Temiskaming and Northern Ontario Railway
The Nipissing Central Railway Company**

The T. & N. O. Railway is operating a fast over-night freight service to all its important centres, providing for following morning deliveries. Also, in addition, day local passenger and express service. Over-night fast passenger trains are operated between Toronto, North Bay, and T. & N. O. destinations, known as "The Northland," carrying modern air-conditioned equipment.

To maintain this excellent service we must have your patronage. Therefore, decide now to travel and ship by Rail.
