Suggest Sabotage at the Frood Mine

Chief Coroner Thinks Fatal Mine Blast May Have Been Due to Intentionally Placed Dynamite.

Sudbury, July 21.—(Special)—Possibility that an explosion at the Frood Mine on Saturday, which killed a workman, had been caused by a load of dynamite being placed intentionally in a pipe "either for sabotage or other unknown reasons," was suggested by Chief Coroner Dr. P. E. Laflamme, in his verdict on the man's death yesterday.

The workman, Andrew Kolibab, aged 37, employed at Frood as a salvage man, was instantly killed when a terrific explosion occurred while he was cutting pipes and rails with acetylene gas. The pipes had been taken to the surface from underground.

Asks Further Probe
"It is possible the load of dynamite was put intentionally in the pipe by some unknown person, intended either for sabotage or other unknown reasons," the verdict stated. "I would ask the Police Department to continue its investigation."

All windows in the south end of the warehouse, seventy feet distant, were shattered by the explosion, witnesses said. No dynamite is used in that part of the yard, F. J. Eager, Superintendent of the mine, testified, except that which comes through on steel cars for the surface magazine. Later it is transported to the underground magazine.

Found Dynamite in Pipe

S. J. Rose, mine salvage man, who employed Kolibab, said that a year ago he had found a pipe with dynamite in it, and had been so worried that he threw the pipe down a creek. He had reported the incident, he said, to Walter Abrahamson, who now is no longer with the company.

Kolibab's body had been so badly shattered that it was partially decapitated and had multiple injuries, Dr. Alex Duncan testified. One stick of dynamite wedged in a pipe would have as much power as five or six ordinary sticks because of the concentration of power in so small a space, the mines Superintendent, said.

Joseph Timchuk, who was cutting pipes with Kolibab about 100 feet away,

said he had never seen powder or dynamite around there before.

Allan Brock, assistant to the Superintendent, said there was no doubt about it that the explosion had been caused by dynamite. He added that in 1933 the company had used a system of blasting by stuffing dynamite in pipes, but that this system was not in use now, and, as the pipes were constantly being changed, there was no possibility one of these had become mixed with the pipes being salvaged. He pointed out also that pipes used at that time were two-inch, while the pipe which had exploded was much smaller.

Dome Nets \$2,152,779 in First Six Months

Equal to 2.13 per Share Compared with \$1.95 in Same Period Last Year.

Dome Mines estimates net profit for the six months ended June 30, 1937, at \$2,152,779 before depreciation, depletion and adjustments of surplus and contingencies; reserve accounts. This is equal to \$2.15 per share on the \$1,000,000 shares issued, and compares with net estimated profit of \$1,952,468, or \$1.95 per share in the corresponding period of 1936.

Production for the period was \$3,760,285 from milling of 287,000 tons of ore, from which was produced 107,271 fine ounces of gold. Average recovery was \$13.10 per ton. In the same period last year 276,800 tons were milled, from which were produced 96,458 fine ounces of gold, valued at \$3,352,388 after mint charges of \$36,712. Average recovery was \$12.24.

Development, operating and general costs amounted to \$1,433,095, or \$4.99 per ton of ore treated, compared with \$1,220,348, or \$4.41 per ton treated last year. Reserves for municipal, Provincial, Dominion and United States income taxes amounted to \$355,608, compared with \$351,734, while outside exploration written off was only \$1,797, compared with \$11,833.

After these charges, estimated operating profit was \$1,969,784, compared with \$1,768,473. To this was added non-operating profit in the six months last year was \$183,995.

Annual Meeting July 29th of Kerr-Addison Gold Mines

Postponed annual meeting of shareholders of Kerr-Addison Gold Mines will be held in the King Edward Hotel, Toronto, on July 29, at noon. Among the most important items to come before shareholders is the anticipated announcement regarding type and size of mill to be erected on the property, Larder Lake area.

According to present indications, a mill of 1,000 tons' capacity is probable, although definite decision will not be known prior to the meeting. Results of recent diamond drilling are also expected to be announced at that time.

Satisfactory Progress at the Moneta Gold Mine

Satisfactory progress is reported being made in the campaign of underground development currently under way on four levels at Moneta Porcupine Mines with the zone indicated by diamond drilling having been encountered on all horizons. Confirmation of the results secured in drilling is being obtained in the present underground campaign, it is reported. According to northern advices, the crosscut on the bottom or 500-foot level averaged \$30 in gold per ton for the first ten feet with complete assays for the crosscut not completed as yet. The crosscut on the 3rd level is reported to have shown values of \$18 across 15 feet.

Sudbury Star:—We read in the paper about some new fish ladders that have been installed in British Columbia. Now it seems that an energetic salmon can start at the bottom rung and work himself up into the 29-cent cans.

DE VALERA OFFERS CONGRATULATIONS

After saying bon voyage to the British crew of the Empire Flying Boat Caledonia before the start of the experimental flight across the Atlantic Ocean to New York, he returned to Foynes and congratulated the American crew of the Clipper ship upon the completion of the Atlantic flight from New York to Ireland. Above, Mr. de Valera is congratulating the skipper of the American flying boat.

BOTH OF THEM

Kitchener Record: A birthday item in a Missouri paper ended happily with this sentence: "At the last table sat grandpa and the birthday cake, beautifully lit up."

LAST THING TO DO

(From C.N.P.C. Review)
Sunday School Teacher—"Dear children, tell me the last thing you must do before you go to bed."
Wise Child—"Park the door key in the mail box for grandma."

HOW MUCH

(From C.N.P.C. Review)
"What's the charge for this battery?"
"Three amperes."
"Well, how much is that in Canadian money?"

NOT AFRAID

Waterloo Chronicle:—The Scots now are publicly exhibiting the long-hidden crown of Mary, Queen of Scots. Probably they are confident, at last, that their English neighbours won't try to swipe it.

AUTOS IN CANADA

Quebec Chronicle-Telegraph:—Ours is a "travel wealthy" country, having over 1,200,000 motor vehicles—one for every nine inhabitants. These motor vehicles were mustered on the monster parade with a hundred feet of highway allowed each vehicle they would form a procession almost 23,000 miles in length, and with a little crowding, utilizing trucks and buses, the whole population might be carried. To complete the picture, there are over 400,000 miles of highways, which provide a spending place of "travel wealth" and in addition to our own heavy motor traffic, an even greater motorcade of more than 4,000,000 automobiles from other countries travelled over the Dominion's highways last year.

Sudbury Star:—"Mining Areas Are Booming," the editor of a Toronto's paper's "flying newsroom" ascertains. Seems like a lot of expense and trouble to find out this fact in evidence for many months.

Northern News:—Designers are foolish, says F. B. Todd of New York, in thinking that a man needs about 100 suits, when he only needs five. Well, many of us have a suit for every day in the week! Yes!

Globe and Mail:—Mr. Eden announces that Britain does not wish to interfere with those who dwell on the shores of the Mediterranean. In fact, he would be glad if some of them took a jump into it.

PLAYING TAG

Ottawa Journal: There are few unmixed blessings. Winnipeg raised \$4,000 by holding a tag-day, spent it on oiling the mosquito grounds. Then came heavy rains that washed the oil away but left Manitoba with improved crop prospects. Almost a question of having both mosquitoes and wheat—or having neither—or having another tag day.

LOOK UP NOT DOWN

(Waterloo Chronicle)
People spend a lot of time looking at aviators and later for them.

DE VALERA WISHES BON VOYAGE

Mr. de Valera, President of the Irish Free State, travelled to Foynes to say bon voyage to the British crew of the Empire Flying Boat which was successful in flying over the Atlantic Ocean to New York and then returning to London. Mr. de Valera is shown above with Captain Wilcockson and members of the Caledonia's crew just before the start of the flight across the Atlantic Ocean.

SEE THE NEW

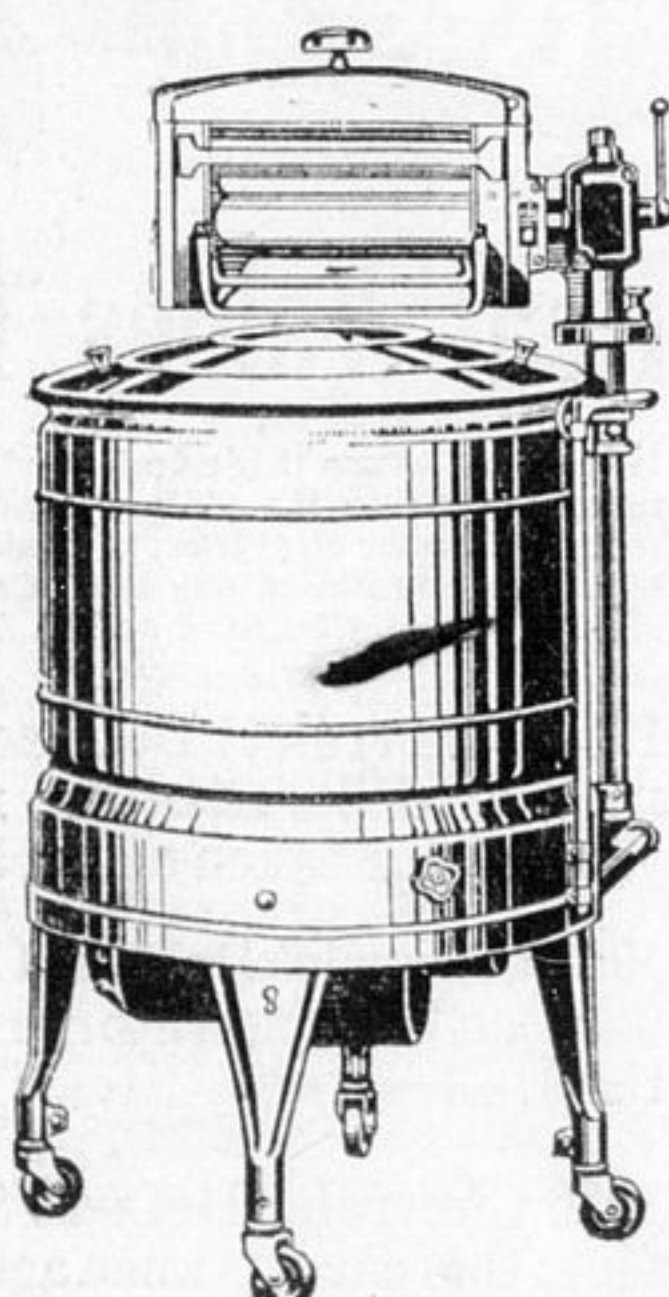

Apex Washers

At Pelletier's
This Week-End

This week we are proud to offer you the new Apex Electric Washer. Nowhere will you find a Washer that has all the smart features of the Apex at so low a price. See them and be convinced. A small down payment delivers one to your home.

Two Smart Models

\$99 and
\$109

MAKE CERTAIN THAT YOU GET ALL 3 BEFORE YOU BUY

You Want a Washer That Will Wash All Kinds of Clothes—

WASH THE SHEEREST OF SILKS AND HEAVIEST OF WOOLENS WITHOUT WEAR AND TEAR. The Apex Double Dasher washes a few dainty silks in a small amount of water or heavy woollens in a whole tubful. It washes all the clothes all the time, whether they are at the top, in the center, or at the bottom of the tub. Saves time, reduces laundry costs. An exclusive Apex feature.

You Want a Washer That Will Wring All Kinds of Clothes

WRING THEM SOFT AND FLUFFY WITHOUT HARM TO EITHER SILKS OR WOOLENS. Only Apex has the Adjustable Pressure Selector. It enables you to set wringer rolls at the proper pressure for all kinds of fabrics. The Apex patented Pressure Selector tells exactly how much pressure to use for each type of garment. Increases the life of your precious silks and woollens. Another exclusive Apex feature.

You Want a Washer of Beautiful, Modern, Durable Design

A WASHER OF RIGID CONSTRUCTION—DESIGNED AND STYLED TO LAST FOR YEARS. Beneath the beautiful lines of the Apex washer, lies rigid construction, a durable electrically welded frame, the famous sealed in oil Apex lifetime mechanism.

Now You See . . . Why You Need All Three!

All washers will wash clothes—but only Apex, with its Double Dasher, Pressure Selector and Modern Styling, gives you all three things you want and need in the washer you buy.
