horizon. No. 212 raise is up over 40 ft. and considerable visible gold is reported.

The company has reported to the Toronto Stock Exchange the sale of 10,000 shares of stock at \$2 per share net to the treasury. An option has also been given on the remaining 240,000 shares in the treasury at \$2 per share till October 12th, 1937. A previous option on 50,000 shares at \$1.75 per share has been absorbed in the new financing deal.

Preston is fast approaching the mill stage and the above financing if carried to completion would adequately look after the installation of a large initial mill. Last week The Northern Miner outlined that ore implications suggested a 500-ton mill to start, although official word was not attached to the story.

### July Good Month at the Young-Davidson

Matachewan Property Shows Increased Production and Profits.

Young-Davidson Mines, subsidiary of Hollinger, during the month of July milled 27,285 tons of ore and recovered 2,757.18 ounces gold having a value of \$96,779, it is officially reported. Total operating expenses in the month amounted to \$58,509, leaving profit of \$38,270, a new high record. Output in the preceding month totalled \$89,147 from 26,704 tons of ore treated, while operating expenses were \$60,277, leaving profit of \$28,870.

During July the mill handled an average of 910 tons per day, with average recovery, based on \$35 gold, amounting to \$3.53 per ton.

In the first seven months of the current year, the company recovered 17,829.34 ounces gold valued at \$626,381 from the milling of 193,697 tons of ore. Operating expenses in the seven-month period totalled \$430,367, leaving profit of \$196,014. An average of 918 tons daily were handled during the seven months with average grade of \$3.25 per ton.

Comparative monthly figures follow:

Month	Tons Milled	Bullion Produced
January	28,616	\$84,220
February	25,553	78,525
March	28,645	86,170
April	27,691	92,309
May	29,203	99,231
June	26,704	89,147
July	27,285	96,779
Totals	193,697	\$626,381

### FAST MOVERS

Louisville Times:—A naturalist says ants move faster in summer than in winter. Naturally—they don't have to hurry to picnics in the winter.

### Hollick-Kenyon in Search for Russians

Noted Airman in Charge of Northern Flights Joins in Search for Lost Aviators

Word from Toronto yesterday was to the effect that Herbert Hollick-Kenyon, well-known Canadian aviator, who has been frequently in Timmins recently, since the Northern Flights Limited started their daily air service between Timmins, Kirkland Lake and other Northern towns; and Toronto and Montreal, left on Tuesday to join Sir Hubert Wilkins, famed Arctic explorer, in an extensive aerial search of the top of the world for the lost Russian fliers. Mr. Hollick-Kenyon is also noted for his air work in the far North. The intention of the two famous aviators mentioned was to take off yesterday from New York in a flying boat to be ready for them through arrangements made by the Russian Embassy at Washington. They would pass over Northern Ontario yesterday if the plans were carried through as expected. It was thought that their first stop would be at Sioux Lookout, although Flight Pilot Hollick-Kenyon believed that they might go as far as Gods Lake on the first hop. It is expected that the

airship will arrive at Aklavik to-day to begin their search for the lost aviators. It is doubtful if two more experienced or able men for the work could be secured than Sir Hubert Wilkins and Hollick-Kenyon. They are not only skilled aviators with wide experience but they have the actual knowledge of the Arctic and Arctic conditions that makes their services doubly valuable. If the Russian aviators are still alive, there are no others as likely to locate them as this pair of aces.

Hollick-Kenyon is one of the directors of the Skyline Express and is famed for his exploits with Lincoln Ellsworth on the Antarctic expedition in 1934. He is also a director of the Northern Flights Limited, the latter company giving daily air service between Timmins, Kirkland Lake, Rouyn and other Northern towns and Toronto, Montreal and other points in the South.

### PEPPED UP FOR DANCE

For "pepping" himself up, it cost Charles Mercier \$20 and costs in a recent Cochrane police court. He was charged with consuming liquor in a public place. He had taken a bottle of liquor to a dance and in the court room told the magistrate he had taken it there to "give him pep".

### Weeklies Convene in Historic Halifax

Newspapermen of Dominion Held Annual Meeting in Nova Scotia Capital.

Some two hundred or more newspapermen from all over the Dominion—publishers, editors, managers and others—gathered last week at Halifax, Nova Scotia, for the annual convention of the Canadian Weekly Newspaper Association, which includes the semi-weeklies as well as the weekly papers. A more delightful place for a convention could not be selected than Halifax with its beauty and historic grace while the hospitality extended to the visitors added to the pleasure of the occasion. One of the features of the occasion was the complimentary luncheon tendered by The Halifax Herald and The Halifax Mail to the delegates, the event being held at the Lord Nelson hotel on August 13th. For the event The Halifax Herald and The Halifax Mail issued unique souvenir menu cards, with an illustration on the cover suggesting that weekly and daily newspapers were doing their part in the progress and development of Canada.

Another feature that impressed delegates from distant points was the beautifully illustrated literature in regard to Halifax and Nova Scotia—"The Land of Evangeline"—available to visitors. Booklets descriptive of Nova Scotia issued by the Dominion Atlantic Railway were particularly attractive and informative. A souvenir song sheet printed by the Granby Leader-Mail, of Granby, Quebec, was another feature worthy of note.

The Halifax Herald and the Halifax Mail paid special attention to the convention of the newspapermen, giving extended reports of the proceedings and showing the visitors many courtesies. On the opening day of the convention The Herald and The Mail each published four-column half-tone cuts of the directors of the C.W.N.A., there being twenty in the group, including L. J. Bennett, Carman, Man., president for 1937; Geo. W. James, Bowmanville, the new president; Adam L. Sellar, Huntingdon, Que.; Lorne Eddy, St. Mary's, Ont.; Geo. Lake, Timmins, Ont. The Halifax Mail and The Halifax Herald also had editorials welcoming the visitors and extolling the influence and the talent of the weekly and semi-weekly newspapers.

The number of outstanding addresses heard during the convention was noteworthy. Here are some of them:

Address by President L. J. Bennett, of Carman, Man.

"A Reader's Digest of Weeklies," by Mrs. Jessie Allen Brown, Halifax.

"Seeing Ourselves as Others See Us," by S. J. Dorman, secretary, Saskatchewan division.

"The Country Newspaper and the Chain Stores," by J. George Johnston.

Addresses by John H. Casey, professor of journalism at Oklahoma University.

"Pictures for the Weekly Newspapers," by Frank Manton, Toronto.

"What Does the Advertising Dollar Buy?" by Miss F. E. Clowworthy.

"Cost Trends and How They Affect Weekly Newspapers," by John Aikins, Oakville.

"The Journey of the Printing Press Across Canada," by L. B. Duff.

"The Co-operative Movement," by Professor Malcolm McLellan, professor of education at St. Francis Xavier University.

On the Thursday afternoon the delegates and their ladies were the guests of the city of Halifax on a motor tour via the Dartmouth Lakes to "Green Acres." A welcoming lunch was given at "Green Acres" by the Barber-Ellis Company. Mayor Mitchell, of Halifax, addressed the luncheon party.

On Thursday evening the newspapermen were the guests of the Government of Nova Scotia at a complimentary dinner at which Premier Angus L. Macdonald gave the welcoming address. This was followed by an address by Prof. Casey of Oklahoma University. These addresses were broadcast over a national network.

Rev. A. Stanley Walker, professor of history at King's College, was the guest speaker at the luncheon on Friday by The Halifax Herald and The Halifax Mail. E. E. Kelley, editor-in-chief of The Halifax Herald and The Halifax Mail, presided at this luncheon. Those at the head table included Chief Justice Sir Joseph Chanoim, Mayor Walter Mitchell, and George Matthew Adams, the noted columnist.

Other entertainments for the delegates included a two-hour boat trip as guests of the Halifax Harbor Commission, and a dance as guests of the C.N.R. management of the Nova Scotia Hotel.

The awarding of prizes and awards took place at the annual dinner of the C.W.N.A. The Wolfville Acadian won the gold wrist watch given by Printer and Publisher for the best front page. The Drumheller Mail was second. The

W. E. Mason trophy for best papers with more than 2000 circulation was won by The Barrie Examiner. The Simcoe Recorder was second. The Charlies Clark Cup for papers between 1000 and 2000 circulation was won by The Cranbrook Courier. The Huntsville Forester was second.

The retiring president, L. J. Bennett, was presented with a tray of Sheffield plate as a mark of appreciation for his services.

George W. James of the Bowmanville Statesman, was elected President of the association, as the three-day convention, termed the most successful in the history of the group, closed.

Frank J. Burns, of the Kentville, N.S., Advertiser, and H. T. Halliwell of the Coleman, Alta., Journal, were named First and Second Vice-Presidents, with C. V. Charters of the Brampton, Ont., Conservator elected Managing Director and Secretary.

Directors chosen were: R. J. McDougall, Pentticon, B.C., Herald; P. T. Galbraith, Red Deer, Alta., Advocate; W. T. Mohrpy, Viscount, Sask., Sun; John Marsh, Amherstburg, Ont., Echo; T. A. Love, Grand Forks, B.C., Gazette; S. J. Doran, Alameda, Sask., Dispatch; S. N. Wynn, Yorkton, Sask., Enterprise; W. A. Bourns, Hartney, Man., Star; A. B. Dunlop, Neepawa, Man., Press; T. P. Lancaster, Havelock, Ont., Standard; George Lake, Timmins, Ont., Advance; G. A. Dills, Acton, Ont., Free Press; R. S. Giles, Lachute, Que., Watchman; Walter Legge, Granby, Que., Leader-Mail; C. J. Allbon, Springhill, N.S., Record; Charles R. Allen, Hartland, N.B., Observer; A. L. Barrett, Curling, Nfld., Star.

### Open Air Barbecue at the Buffalo-Ankerite Mine

Members of the Timmins Kiwanis Club and their ladies are invited again this year by Mr. and Mrs. Phil Kinkel to enjoy the hospitality of the Buffalo-Ankerite on Monday afternoon and evening, Aug. 25th. The event will take the place of the regular Kiwanis luncheon and it will also be a Kiwanis Ladies' Night. Vice-President Kinkel has told the Kiwanis that they may come out as early as they desired in the afternoon and remain on the same plan. Another piece of advice is to take along your swimming suit as the bathing is excellent. The event on Monday afternoon and evening is to take the form of an open air barbecue supper. All are assured of a happy time. Supper will be served at 6.30 p.m. Eastern Standard time.

### Preston East Dome Now Financing for Big Mill

(From Northern Miner)

Another flat drift hole through the north indicated lense on the 200-ft. level at Preston East Dome returned \$4.24 across 31.5 feet of core. This is in hole No. U-9 located about 100 ft. north of No. 212 crosscut.

To the ore widths indicated in the flat drift holes must be added up to 14 ft. of width exposed in the north drift and the diamond drill stations, explains D. G. H. Wright, consultant. The north lense is indicated in three other flat drift holes and on No. 212 crosscut. Hole No. U-8, 120 ft. north of No. 212 crosscut, returned \$5.43 across 24.5 ft. of core. No. 212 crosscut returned \$8 across 50 ft. in sampling both walls. Hole No. U-7, south of the crosscut, gave \$4.72 across 52 ft. and hole No. U-6 further south returned 20 ft. of good grade.

Drifting has started on the 300-ft. level where three muck samples reported to represent 15 ft. of advance in the main shaft crosscut returned good grade. First drift returns showed high grade ore, states Mr. Wright. The shaft crosscut on the 300 level, known as No. 301, has been turned north into a drift and latest returns indicate that the footwall ore zone is being entered. The footwall ore zone on the 200-ft. level returned a big width of good grade ore in the shaft crosscut. The footwall ore here will be explored with flat drift holes in a similar manner to the 200-ft. level.

High grade is also reported from first drifting of No. 207 heading south of the shaft crosscut on the 200-ft. level. The crosscut showed some high grade in a wide section of low average grade representing the hangingwall zone at that

# EXPLOSIVES

### FROM THE MARITIMES through to the YUKON

52 survey and exploratory parties placed in the field by the Mines and Geology Branch Department of Mines and Resources.

This summer about 300 men are working in every mineral province in the Dominion, the Yukon and the Northwest Territories to record new mining data. Out of fifty-two parties, forty-one are engaged in geological investigations and eleven in topographical mapping.

#### BRITISH COLUMBIA

Attention is given to the mapping and exploration of little known areas in the central portions of the province. Detailed examinations in several of the producing camps. And the surveying and mapping of areas in other sections of the province where prospecting has been active.

#### ALBERTA

The mapping of oil and gas structures in the foothills, and in a large area in the extreme southeastern section of the province is holding the attention this year.

#### SASKATCHEWAN

A total area of approximately 29,900 square miles of Pre-Cambrian formations in the northern half of the province is being given attention.

#### MANITOBA

The geology of two areas will be mapped, one lying south of Red Deer Lake, and the other north of Oxford and Kneeholes. And detailed examination of the Central Manitoba field is being continued.

#### ONTARIO

Geological mapping and investigations in the Quebec-igneous area, 70 miles west of Port Arthur; in the southwestern peninsula of the province; in the Toronto-Hamilton area; in the Madoc-Marmora area; and in a portion of the province east of Ottawa. Also includes a topographical project in northwestern Ontario.

#### QUEBEC

Approximately some 4,000 square miles of territory is being covered in the field operations this year. Attention is chiefly centred to the mineral areas north of the Transcontinental Railway. Geological investigations are being carried out in the Clering and Bouquet-Joanpe areas, south of the Railway.

#### MARTIME PROVINCES

Comprising the geological examination of two areas in New Brunswick; a special study of the Sydney coal-fields; and an examination of the principal mining properties in Nova Scotia.

#### YUKON

Geological investigations in the Klondike area are being continued. This area is the chief source of Canada's placer gold output. Topographical mapping of the Mayo area, 130 miles east of Dawson is also being carried on.

#### NORTHWEST TERRITORIES

As important gold discoveries have been made in the Yellowknife River area, and a large area immediately to the east, geological investigations and mappings are being carried on in these sections.

There is a type of C.I.L. Explosive to meet every mining need. Our Technical Department is ready to assist on any problem relating to blasting operations.
